P 85-1421	d,d,d'd'-tetramethyl-, dihexyl ester	50 FR 38197 (38198) (9-20-85)	Dec. 4, 1985.
P 85-1422	Generic name: Aliphatic polyester reacted with diisocyanate and diol acid, amine salt	50 FR 38197 (38198) (9-20-85)	Do.
P 85-1423	Generic name: Aliphatic polyester reacted with aromatic diisocyanate and iol acid, amine salt	50 FR 38197 (38198) (9-20-85)	Do.
P 85-1424	Generic name: Copolymer of methacrylic acid ester and substituted methacrylic acid derivatives	50 FR 38197 (38198) (9-20-85)	Dec. 7, 1985.
P 85-1425	Generic name: Unsaturated acid and heterocyclic modified epoxy resin	50 FR 38197 (38198) (9-20-85)	Do.
P 85-1426	Generic name: Mixture of aliphatic alcohols	50 FR 38197 (38198) (9-20-85)	Do.
P 85-1427	Generic name: Substituted naphthalene	50 FR 38197 (38198) (9-20-85)	Dec. 8, 1985.
P 85-1428	Generic name: Oxime capped polyurethane	50 FR 38197 (38198) (9-20-85)	Do.
P 85-1429	Polymer of soya fatty acid, pentaerythritol, benzoic acid, isophthalic acid, styrene, and methyl methacrylate	50 FR 38197 (38198) (9-20-85)	Do.
P 86-1430	Generic name: Isocyanate-terminated polyester polyurethane	50 FR 38197 (38198) (9-20-85)	Do.
P 85-1431	Generic name: Isocyanate-terminated polyurethane	50 FR 38197 (38198) (9-20-85)	Do.
P 85-1432	Generic name: Substituted N,N-diethyl-m-anisidine	50 FR 38197 (38199) (9-20-85)	Do.
P 85-1433	Generic name: Alkoxylated coconut glyceride	50 FR 38197 (38199) (9-20-85)	Do.
P 85-1434	Generic name: Halogenated peroxide	50 FR 38197 (38199) (9-20-85)	Dec. 10, 1985.
P 85-1435	Generic name: Polyester diol	50 FR 38197 (38199) (9-20-85)	Do.
P 85-1436	Generic name: Amine-boronhalide complex	50 FR 38197 (38199) (9-20-85)	Do.
P 85-1437	Generic name: Ethylene-vinyl fatty ester copolymer	50 FR 38197 (38199) (9-20-85)	Do.
P 85-1438	Generic name: Modified acrylate terpolymer	50 FR 39167 (39168) (9-27-85)	Dec. 11, 1985.
P 85-1439	Generic name: Reaction product of a substituted nitrile with a halogenated unsaturated compound	50 FR 39167 (39168) (9-27-85)	Do.
P 85-1440	Generic name: Polymer of benzene dicarboxylic acid, alkane diols, and alkane carboxylic acid	50 FR 39167 (39168) (9-27-85)	Do.
P 85-1441	Pyridinium,1,1'-[sulfonylbis[3,1-phenyleneamino[6-[[3-[[3-carboxy-4,5-dihydro-5-oxo-1-(4-sulfophenyl)-1H-pyrazol-4-yl]azo]-4-sulfophenyl]amino]1,3,5-triazine-4,2-diyl]]]bis [3-carboxy-, dihydroxide, tetrasodium salt.	50 FR 39167 (39168) (9-27-85)	Do.
P 85-1442	Benzoic acid, 2,5-bis[[4-[[4-[[4,8-disulfo-2-naphthalenyl] azo-3-methylphenyl] amino-6-(4-morpholinyl)-1,3,5-triazin 2-yl]amino]-, pentasodium salt.	50 FR 39167 (39168) (9-27-85)	Do.
P 85-1443	Chromate (7-), bis[1-[4-[[3-(acetylamino)-4-[(4,8-disulfo-2-naphthalenyl)azo] phenyl]amino]-6-[[6-[(2-carboxyphenyl)azo]-5-hydroxy-7-sulfo-3-naphthalenyl]amino]-1,3,5-triazin-2-yl]-3-carboxypyridinumato(6-)]-, heptasodium, dihydrate.		

VOL 51 ISS 78 AP 23 1986 UMI

PMN No.	Identity/generic name	FR citation	Expiration date
P 85-1444	2,7-Naphalenedisulfonic acid, 5-[[4-chloro-6-[(2-sulfoethyl)amino]-1,3,5-triazin-2-yl]amino]-4-hydroxy-3-[(2-sulfophenyl)azo]-, tetrasodium salt.	50 FR 39167 (39168) (9-27-85)	Do.
P 85-1445	Generic name: Urethane-modified polyester-acrylic copolymer	50 FR 39167 (39168) (9-27-85)	Do.
P 85-1446	Generic name: Potassium salt of an alkoxylated fatty amine acid	50 FR 39167 (39168) (9-27-85)	Do.
P 85-1447	Polymer of methyl methacrylate, ethyl acrylate and 2-hydroxy ethyl acrylate	50 FR 39167 (39168) (9-27-85)	Do.
P 85-1448	Generic name: Amido amine	50 FR 39167 (39168) (9-27-85)	Dec. 14, 1985.
P 85-1449	Generic name: Polymer of bisanhydride of Bisphenol-A, aliphatic diamine and an aromatic diamine	50 FR 39167 (39169) (9-27-85)	Do.
P 85-1450	Ethylene glycol benzoate triethylacetate with carbon numbers C_{10}-C_{12}	50 FR 39167 (39169) (9-27-85)	Do.
P 85-1451	2,2',4-tris-(2-chlorophenyl)-5-(3,4-dimethoxyphenyl)-4',5'-diphenyl-1,1'bi-1H-imidazole	50 FR 39167 (39169) (9-27-85)	Do.
P 85-1452	Generic name: Blocked substituted-urea polyurethane	50 FR 39167 (39169) (9-27-85)	Do.
P 85-1453	Generic name: Blocked amino-epoxy resin	50 FR 39167 (39169) (9-27-85)	Do.
P 85-1454	Generic name: Polyurea polyurethane polymer	50 FR 39167 (39169) (9-27-85)	Do.
P 85-1455	Generic name: Fatty polyol	50 FR 39167 (39169) (9-27-85)	Do.
P 85-1456	Generic name: Substituted heterocyclic substituted triazinyl ester substituted arylidene-dione	50 FR 39167 (39169) (9-27-85)	Do.
P 85-1457	Generic name: Aliphatic ammonium salt of substituted aromatic acid	50 FR 39167 (39169) (9-27-85)	Do.
P 85-1458	Generic name: Acrylic polymer containing aromatic carboxyesters	50 FR 39167 (39169) (9-27-85)	Do.
P 85-1459	Generic name: Acrylic polymer containing aromatic carboxyesters	50 FR 39167 (39169) (9-27-85)	Do.
P 85-1460	Polymer of bis-(4-phenoxyphenyl) methanone and 1,4-benzenedicarbonyl dichloride	50 FR 39167 (39169) (9-27-85)	Dec. 15, 1985.
P 85-1461	Bis(4-phenoxyphenyl) methanone	50 FR 39167 (39169) (9-27-85)	Do.
P 85-1462	Generic name: Polyurethane elastomer	50 FR 39167 (39170) (9-27-85)	Do.
P 85-1463	Generic name: Polyurethane elastomer	50 FR 39167 (39170) (9-27-85)	Do.
P 85-1464	Generic name: Substituted pyrazol azo benzene sulfonic acid	50 FR 39167 (39170) (9-27-85)	Do.
P 85-1465	Generic name: (Dialkylamino, alkylaryl and N-(alkysulfonyl amino and halophenyl substituted oxopentanamide	50 FR 39167 (39170) (9-27-85)	Do.
P 85-1466	Generic name: (Dialkylphenoxy, (N-dialkylamino and alkylaryl and (cyanophenylureido) aryl substituted hexanamide	50 FR 39167 (39170) (9-27-85)	Do.
P 85-1467	Polymer of Spentol P48-A6-80 and diethyl toluene diamine	50 FR 39167 (39170) (9-27-85)	Dec. 16, 1985.
P 85-1468	Generic name: Modified alkanolamine, salt with organic acid	50 FR 39167 (39170) (9-27-85)	Do.
P 85-1469	Generic name: Modified alkanolamine, salt with inorganic acid	50 FR 39167 (39170) (9-27-85)	Do.
P 85-1470	Generic name: Methylene diphenylene diisocyanate polyol prepolymer	50 FR 39167 (39170) (9-27-85)	Do.
P 85-1471	Generic name: Methylene diphenylene diisocyanate polyol prepolymer	50 FR 39167 (39170) (9-27-85)	Do.
P 85-1472	Generic name: Methylene diphenylene diisocyanate polyol prepolymer	50 FR 39167 (39170) (9-27-85)	Do.
P 85-1473	Generic name: Methylene diphenylene diisocyanate polyol prepolymer	50 FR 39167 (39170) (9-27-85)	Do.
P 85-1474	Generic name: Polymeric diisocyanate polyol prepolymer	50 FR 39167 (39171) (9-27-85)	Do.
P 85-1475	Generic name: Methylene diphenylene diisocyanate polyol prepolymer	50 FR 39167 (39171) (9-27-85)	Do.
P 85-1476	Generic name: Methylene diphenylene diisocyanate polyol prepolymer	50 FR 39167 (39171) (9-27-85)	Do.
P 85-1477	Generic name: Methylene diphenylene diisocyanate polyol prepolymer	50 FR 39167 (39171) (9-27-85)	Do.
P 85-1478	Generic name: Acrylic polyamine	50 FR 39167 (39171) (9-27-85)	Do.
P 85-1479	Generic name: Mixed alkyl phosphate ester	50 FR 39167 (39171) (9-27-85)	Do.
P 85-1480	Generic name: Substituted bis(phenyl)-isobenzofuranone	50 FR 39167 (39171) (9-27-85)	Do.
P 85-1481	Generic name: Polyether triol	50 FR 39167 (39171) (9-27-85)	Dec. 17, 1985.
P 85-1482	Propylene glycol and propylene oxide	50 FR 39167 (39171) (9-27-85)	Do.
P 85-1483	Propylene glycol and propylene oxide	50 FR 39167 (39171) (9-27-85)	Do.
P 85-1484	Generic name: Amine terminated polyether polyol	50 FR 39167 (39171) (9-27-85)	Do.
P 85-1485	Generic name: Phosphorated polyether polyol	50 FR 39167 (39171) (9-27-85)	Do.
P 85-1486	Generic name: Phosphorated polyether polyol	50 FR 39167 (39171) (9-27-85)	Do.
P 85-1487	Generic name: Polypropylene glycol ether with sugar	50 FR 39167 (39171) (9-27-85)	Do.
P 85-1488	Generic name: Polypropylene glycol ether with sugar	50 FR 39167 (39171) (9-27-85)	Do.
P 85-1489	Generic name: Polyether triol	50 FR 39167 (39172) (9-27-85)	Do.
P 85-1490	Polymer of 2,2-dimethyl 1,3-propanediol, 2-butenedioic acid and dimethyl terephthalate	50 FR 40584 (40595) (10-4-85)	Dec. 18, 1985.
P 85-1491	Polymer of 1,2-ethanediol, 1,2-propanediol, 1,4-benzenedicarboxylic acid and 2,5-furandione	50 FR 40584 (40595) (10-4-85)	Do.
P 85-1492	Acetate capped alkyl ester grafted alkoxylated polyol	50 FR 40585 (40595) (10-4-85)	Do.
P 85-1493	Generic name: Hydrophobic cationic acrylic terpolymer	50 FR 40585 (40595) (10-4-85)	Do.
P 85-1494	Generic name: Hydrophobic cationic acrylic terpolymer	50 FR 40585 (40595) (10-4-85)	Do.
P 85-1495	Generic name: Hydrophobic cationic acrylic terpolymer	50 FR 40585 (40595) (10-4-85)	Do.
P 85-1496	Generic name: Hydrophobic cationic acrylic terpolymer	50 FR 40585 (40595) (10-4-85)	Do.
P 85-1497	Generic name: Hydrophobic cationic acrylic terpolymer	50 FR 40585 (40595) (10-4-85)	Do.
P 85-1498	Generic name: Hydrophobic cationic acrylic terpolymer	50 FR 40585 (40595) (10-4-85)	Do.
P 85-1499	Generic name: Hydrophobic cationic acrylic terpolymer	50 FR 40584 (40595) (10-4-85)	Do.
P 85-1500	Generic name: Hydrophobic cationic acrylic terpolymer	50 FR 40584 (40595) (10-4-85)	Do.
P 85-1501	Generic name: Hydrophobic cationic acrylic terpolymer	50 FR 40584 (40595) (10-4-85)	Do.
P 85-1502	Generic name: Silyl substituted amino carboxylate-potassium salt	50 FR 40584 (40595) (10-4-85)	Do.
P 85-1503	Generic name: Silyl substituted amino carboxylate-sodium salt	50 FR 40584 (40595) (10-4-85)	Do.
P 85-1504	Amine, hydrogenated tallow amine, reaction product with toluene diisocyanate and para-toluidine	50 FR 40584 (40595) (10-4-85)	Dec. 21, 1985.
P 85-1505	Generic name: Alumina organometallic compound	50 FR 40584 (40596) (10-4-85)	Dec. 22, 1985.
P 85-1506	Generic name: Water-based polyurethane elastomer	50 FR 40584 (40595) (10-4-85)	Do.
P 85-1507	(4-Sulfomanido-benzene-ethyl sulfanyl sulfuric ester-sodium salt) 1,4-(sulfonic acid sodium salt) 2,6 of nickel-phthalocyanine.	50 FR 40584 (40596) (10-4-85)	Do.
P 85-1508	Generic name: Polymeric diphenylmethane diisocyanate prepolymer	50 FR 40584 (40596) (10-4-85)	Do.
P 85-1509	Mixed C_6 and C_8 methyl ethers	50 FR 40584 (40596) (10-4-86)	Dec. 23, 1985.
P 85-1510	Generic name: Ethylene, vinyl acetate, methacrylic acid, hydroxy substituted hydrocarbon copolymer	50 FR 40584 (40596) (10-4-85)	Do.
P 85-1511	Generic name: Polyester resin of an aryl dicarboxylic acid plus an alkane diol	50 FR 40584 (40596) (10-4-86)	Do.
P 85-1512	Reaction product of tallow amine with bisphenol-A diglycidyl ether, ethoxylated	50 FR 40584 (40596) (10-4-85)	Do.
P 85-1513	Generic name: Toluene diisocyanate and mixed alkane diols	50 FR 40584 (40596) (10-4-85)	Dec. 24, 1985.
P 85-1514	Generic name: Phenolic polyester	50 FR 40584 (40596) (10-4-85)	Do.
P 85-1515	Generic name: Phenolic polyester resin	50 FR 40584 (40596) (10-4-85)	Do.
P 85-1516	Generic name: Polyester containing amide groups	50 FR 41580 (10-11-85)	Dec. 25, 1985.
P 85-1517	Generic name: Bis(substituted arylazo substituted sulfo aryl) transition metal complex	50 FR 41580 (10-11-85)	Do.
P 85-1518	Generic name: Isocyanate terminated polyester urethane	50 FR 41580 (10-11-85)	Do.
P 85-1519	Generic name: TDI-polyol prepolymer	50 FR 41580 (41581) (10-11-85)	Do.
P 85-1520	Generic name: Isocyanate terminated prepolymer	50 FR 41580 (41581) (10-11-85)	Do.
P 85-1521	Generic name: Polyester of adipic acid, isophthalic acid with alkyl diols	50 FR 41580 (41581) (10-11-85)	Do.
P 85-1522	Generic name: Modified polymer of rosin and polyol	50 FR 41580 (41581) (10-11-85)	Do.
P 85-1523	Generic name: Acrylate modified polyester of a carbomonocyclic acid, tall oil fatty acids and diols	50 FR 41580 (41581) (10-11-85)	Do.
P 85-1524	Generic name: Alpha-substituted-3-phenoxybenzyl alcohol	50 FR 41580 (41581) (10-11-85)	Do.
Y 85-147	Generic name: Saturated polyester resin from dibasic acids and diols	50 FR 38194 (9-20-85)	Sept. 24, 1985.
Y 85-148	Generic name: Aromatic-aliphatic ketone/formaldehyde resin modified with a cyclo-aliphatic diisocyanate	50 FR 38194 (9-20-85)	Do.
Y 85-149	Generic name: Styrenated vegetable oil	50 FR 38194 (9-20-85)	Sept. 25, 1985.
Y 85-150	Generic name: Styrene malemide	50 FR 38197 (9-20-85)	Sept. 30, 1985.
Y 85-151	Generic name: Sulfonated polystyrene imide	50 FR 38197 (9-20-85)	Oct. 1, 1985.
Y 85-152	Generic name: Oil free alkyd resin	50 FR 38197 (9-20-85)	Oct. 2, 1985.
Y 85-153	Generic name: Oil free alkyd resin	50 FR 38197 (9-20-85)	Do.
Y 85-154	Generic name: N-PMI styrenic terpolymer	50 FR 38197 (9-20-85)	Do.
Y 85-155	Generic name: Mixed alkyl phosphate ester	50 FR 38197 (9-20-85)	Do.

—Continued

PMN No.	Identity/generic name	FR citation	Expiration date
Y 85-156	Generic name: Polyurethane dispersion	50 FR 38197 (9-20-85)	Do.
Y 85-157	Generic name: Polyester of carbomonocyclic acid and alkylene glycols	50 FR 39166 (9-27-85)	Oct. 3, 1985.
Y 85-158	Generic name: Polyester of carbomonocyclic ester and alkylene glycols	50 FR 39166 (39167) (9-27-85)	Do.
Y 85-159	Generic name: Dimer acids, dicarboxylic acid, ethylenediamine, diamine polyamide resin	50 FR 39166 (39167) (9-27-85)	Oct. 7, 1985.
Y 85-160	Generic name: An ammonia/water soluble random copolymer of butyl acrylate and acrylic acid	50 FR 39166 (39167) (9-27-85)	Oct. 8, 1985.
Y 85-161	Generic name: Styrene-acrylate random emulsion copolymer	50 FR 39166 (39167) (9-27-85)	Do.
Y 85-162	Generic name: Ammonium salt solution of a terpolymer of styrene, alpha methyl styrene and acrylic acid	50 FR 39166 (39167) (9-27-85)	Do.
Y 85-163	Generic name: A terpolymer of 2-ethylhexyl acrylate, butyl acrylate, and hydroxyethyl methacrylate	50 FR 39166 (39167) (9-27-85)	Do.
Y 85-164	Polymer of propylene glycol and propylene oxide	50 FR 39166 (39167) (9-27-85)	Oct. 9, 1985.
Y 85-165	Polymer of propylene glycol and propylene oxide	50 FR 39166 (39167) (9-27-85)	Do.
Y 85-166	Generic name: Ethylene oxide-propylene oxide copolymer triol ether	50 FR 39166 (39167) (9-27-85)	Do.
Y 85-167	Generic name: Alkyd resin	50 FR 40586 (40597) (10-4-85)	Oct. 10, 1985.
Y 85-168	Generic name: Polyester of carbomonocyclic acid, alkylene glycol and alkanedioate	50 FR 40586 (40597) (10-4-85)	Oct. 15, 1985.
Y 85-169	Generic name: Polyester of carbomonocyclic acid, alkylene glycol and alkanedioate	50 FR 40586 (40597) (10-4-85)	Oct. 15, 1985.
Y 85-170	Generic name: Ethylene oxide-propylene oxide copolymer triol ether	50 FR 41583 (41584) (10-11-85)	Oct. 20, 1985.
Y 85-171	Generic name: Polypropylene oxide triol ether	50 FR 41583 (41584) (10-11-85)	Do.
Y 85-172	Generic name: Ethylene glycol-propylene oxide polymer	50 FR 41583 (41584) (10-11-85)	Do.

IV. 75 Chemical Substances for Which EPA Has Received Notices of Commencement to Manufacture

PMN No.	Identity/generic name	Date of commencement
P 83-655	Generic name: Naphthalenesulfonic acid, derivative, ester hydroxybenzophenone	Sept. 27, 1984.
P 83-1007	7-[(6-[(4-[(3,6-disulfo-8-hydroxynaphthalene-1-yl)-azo]-2-methoxy-5-methylphenyl)amino-4-[(2-hydroxyethyl)amino)-1,3,5-triazin-2-yl)amino)-4-hydroxy-3-[(2-methoxy-5-sulfophenyl)azo]-2-naphthalene-sulfonic acid, tetrasodium salt.	Aug. 26, 1985.
P 83-1321	Generic name: Imide-amide polymer	Oct. 1, 1985.
P 83-1324	Generic name: Polyesteramide	Aug. 12, 1985.

VOL 51 ISS 78 AP 23 1986 UMI

IV. 75 Chemical Substances for Which EPA Has Received Notices of Commencement to Manufacture—Continued

PMN No.	Identity/generic name	Date of commencement
P 84-61	Generic name: Copolyester polymer	June 22, 1986.
P 84-291	Generic name: Reaction product of alkenylsuccinic anhydride and substituted alcohol	Aug. 28, 1985.
P 84-555	Ethyltriphenylphosphonium chloride	Sept. 23, 1985.
P 84-596	2,7-Naphthalenedisulfonic acid, 4-amino-5-hydroxy-6-(2-hydroxy-5-sulfophenyl)azo, potassium salt	Aug. 28, 1985.
P 84-656	Generic name: Silicified lacocyanide	Sept. 6, 1985.
P 84-661	2((2-hydroxy-1,1-bis(hydroxymethyl)ethyl)-amino]-ethanesulfonic acid, sodium salt (3:1)	Jan. 22, 1985.
P 84-662	4-(2-hydroxyethyl)piperazine-1-ethanesulfonic acid, sodium salt (1:1)	Nov. 6, 1984.
P 84-812	Benzoxazolium, 5-chloro-2-[2-[[5-chloro-3-[4-sulfobutyl]-2 (3H)-benzoxazolylidene]methyl]-1-butenyl]-3-(4-sulfobutyl)-inethyl ammonium salt	Mar. 25, 1986.
P 84-913	Generic name: N,N'-bis[2-[2-(3-alkylthiazoline)vinyl]-1,4-phenylene diamine double salt	Aug. 16, 1985.
P 84-963	8-Nitro-2(3H)-benzoxazolone	Aug. 16, 1985.
P 84-1007	Generic name: 3-alkyl-2-[2-sulfo]vinyl thiazolinium salt	July 1, 1985.
P 84-1126	Generic name: Methanone, alkyl-substituted phenyl	Aug. 28, 1985.
P 84-1163	Generic name: Perfluoroalkyl substituted polyurethane	Aug. 28, 1985.
P 84-1171	Generic name: Perfluoroalkyl substituted polyurethane	Aug. 30, 1985.
P 84-1185	Generic name: Alkali metal salt of an unsaturated carbonylic acid	Sept. 9, 1985.
P 84-1198	Generic name: Polyester urethane polymer	Apr. 4, 1985.
P 85-195	Polymer of dehydrated castor oil fatty acids, pentaerythritol, isophthalic acid, linseed oil, dehydrated castor oil, dimethylethanolamine, isononanoic acid, maleic anhydride	Sept. 11, 1985.
P 85-312	Generic name: Complex polyether-esters	Aug. 30, 1985.
P 85-332	Generic name: Acrylic copolymer	July 3, 1985.
P 85-400	N-(3-ethyl-9H-carbazol-3-(E1)-9-octadecenamide	Aug. 14, 1985.
P 85-403	Generic name: Mixed amine/alkane polycarboxylate	Do.
P 85-404	Generic name: Mixed amine/alkane polycarboxylate	Aug. 19, 1985.
P 85-472	1,3,5-triisopropyl-phenylene-2,4-diisocyanate	Aug. 20, 1985.
P 85-473	Generic name: Alkylaluminum chloride	Sept. 9, 1985.
P 85-493	Ethanone, 1-(3-fluoro-phenyl)-	Aug. 20, 1985.
P 85-527	Generic name: Vinyl-epoxy ester	Aug. 16, 1985.
P 85-596	Generic name: Dinsubstitutedheteromonocyclic(carbomonocyclicsubstituted)heteropolycycle	Aug. 11, 1985.
P 85-603	Generic name: (3-alkylheteromonocyclic-4-hydroxyphenyl-substituted)-3'-substituted-4'-hydroxyphenylsubstituted)alkyl	Aug. 14, 1985.
P 85-604	Generic name: Di(trisubstitutedheteromonocyclic(carbomono-cyclicsubstituted))-heteropolycycle	Aug. 7, 1985.
P 85-605	Generic name: Trisubstituted phenol	Sept. 1, 1985.
P 85-624	Generic name: Amino-hydroxy-naphthalene disulfonic acid, [[(dichloro-triazinyl)amino]substituted phenyl azo]-[[substituted phenyl]azo]-alkali metal salt	Aug. 14, 1985.
P 85-650	Generic name: Mixed amine-alkane epihopolycarboxylate octaesters	Do.
P 85-651	Generic name: Mixed amine/alkane epihopolycarboxylate octaesters	July 30, 1985.
P 85-694	Generic name: 2-propenoic acid copolymer	Sept. 10, 1985.
P 85-715	Polyethylene-butyl acrylate-maleic anhydride	Aug. 12, 1985.
P 85-803	Generic name: 4,4' phenylmethane diisocyanate adduct of polyether polyol	Aug. 28, 1985.
P 85-806	Generic name: Polyester resin	Sept. 9, 1985.
P 85-816	Generic name: Benzenesulfonic acid, 4-[[4-substituted(-3-methyl-5-oxo-2-pyrazolin-1-yl)-, salt	Sept. 10, 1985.
P 85-863	Polymer of ethylene, ethylene acrylate and maleic anhydride	Sept. 3, 1985.
P 85-866	Generic name: Substituted acetonamide	Aug. 28, 1985.
P 85-871	Generic name: Hydroxyl-terminated polyurethane	Sept. 12, 1985.
P 85-885	Generic name: Unsaturated polyester resin	Do.
P 85-886	Generic name: Brominated unsaturated polyester resin	Aug. 29, 1985.
P 85-903	N,N,N-trimethyl-N-2-hydroxypropylammoniumhydroxide	Sept. 26, 1985.
P 85-917	Generic name: Copolyesters	Aug. 30, 1985.
P 85-928	Polymer of pentaerythritol, phthalic anhydride, benzoic acid, styrene, tall oil fatty acid, acrylic acid, neopentyl glycol, isophthalic acid	Sept. 6, 1985.
P 85-936	Benzenamide, N,N'-(14-chloro-5,6,7,12,13,17,22,23,25,26,-decahydro-5,7,12,17,22,25,26-heptaoxa-naphtho[2,3-C]benaphth[2',3',6,7]indolo[3,2-a;3',2',-i]acridino-1,18-diyl).	Aug. 28, 1985.
P 85-944	Generic name: Phenol formaldehyde resoles	Oct. 1, 1985.
P 85-954	Generic name: Polydimethylsiloxy, methyl ethane siloxane copolymer	Aug. 13, 1985.
P 85-971	Generic name: Tetrafunctional mercapto-ester reaction product with propylene dicarboxylic acid	Do.
P 85-972	Generic name: Hydroxy-terminated polyether diol reaction product with Benzophenone tetracarboxylic dianhydride and hydroxy ethyl methacrylate	Aug. 23, 1985.
P 85-975	Generic name: Substituted alkenol	Aug. 26, 1985.
P 85-987	Generic name: Substituted sultoaryl aryldioxazine	Sept. 10, 1985.
P 85-998	Generic name: Mixed esters of butene polyols	Aug. 21, 1985.
P 85-999	Generic name: Polyfunctional methacrylate of polyisocyanate adduct of alkoxylated polyol	Aug. 30, 1985.
P 85-1009	Generic name: Polyhydroxy ether diisocyanate acrylate polymer	Aug. 28, 1985.
P 85-1015	Vinyl chloride interpolymer containing hydroxyl and carboxyl groups	Sept. 15, 1985.
P 85-1026	Generic name: Mercaptoalkylsiloxane	Oct. 1, 1985.
P 85-1027	Generic name: Polydimethylsiloxy, methyl-mercaptoalkyl siloxane copolymer	Sept. 2, 1985.
P 85-1029	Generic name: Polymer of alkane polyols, aromatic carboxylic acid, benzene dicarboxylic acids, polyamide resin, vegetable oil, and vegetable oil acids	Sept. 6, 1985.
P 85-1032	Generic name: Epoxy modified polyol	Do.
P 85-1033	Generic name: Epoxy modified polyol	Oct. 9, 1985.
P 85-1057	Generic name: Alkathene	Sept. 11, 1985.
P 85-1072	Tetra isobutyl titanate	Aug. 7, 1985.
Y 85-55	Generic name: Polyoxyalkylene silsesquioxane	Aug. 27, 1985.
Y 85-100	Generic name: Polymer of an aromatic diisocyanate, alkane polyols, alkanolamine, alkanedioic acid, alkane alcohol	July 24, 1986.
Y 85-102	Ethylene-propylene-styrene copolymer	Aug. 29, 1985.
Y 85-114	Polymer of acrylamide-methylpropane sulfonic acid and acrylic acid sodium salt copolymer	Sept. 9, 1985.
Y 85-134	Generic name: Water soluble acrylate random copolymer	Do.
Y 85-135	Generic name: Water soluble acrylate random copolymer	Do.
Y 85-136	Generic name: Water soluble acrylate random copolymer

BILLING CODE 6561-50-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Information Collection Submitted to OMB for Review

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of Information Collection submitted to OMB for review and approval under the Paperwork Reduction Act of 1980.

Title of information collection: Application for a Bank to (1) Establish a Branch, (2) Move its Main Office or Branch, and (3) Establish a Remote Service Facility (OMB No. 3064-0070).

Background: In accordance with requirements of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the FDIC hereby gives notice that it has submitted to the Office of Management and Budget form SF-83, "Request for OMB Review," for the information collection system identified above.

ADDRESS: Written comments regarding the submission should be addressed to Robert Neal, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, D.C. 20503 and to John Keiper, Assistant Executive Secretary (Administration), Federal Deposit Insurance Corporation, Washington, D.C. 20429.

Comments: Comments on this collection of information should be submitted on or before May 8, 1986.

FOR FURTHER INFORMATION CONTACT: Requests for a copy of the submission should be sent to John Keiper, Assistant Executive Secretary (Administration), Federal Deposit Insurance Corporation, Washington, D.C. 20429, telephone (202) 898-3810.

SUMMARY: The FDIC is requesting OMB approval for extending the expiration date of the procedure followed by insured State nonmember banks in making application for the consent of the FDIC to establish and operate a new branch or move a main office or a branch from one location to another. (A remote service facility is considered to be a type of branch.) The procedure requires the applicant bank to submit a letter application to the FDIC containing information needed for evaluating certain factors as required by section 18(d)(1) of the Federal Deposit Insurance Act (12 U.S.C. 1828(d)(1)) before giving consent. The application procedure is contained in FDIC regulation 12 CFR 303.2. It is estimated that it takes the average applicant seven hours to prepare the letter application.

Dated: April 15, 1986.

Federal Deposit Insurance Corporation.

Hoyle L. Robinson,

Executive Secretary.

BILLING CODE 6714-01-M

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 1100 L Street NW., Room 10325. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the Federal Register in which this notice appears. The requirements for comments are found in § 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 202-010636-013.

Title: U.S. Atlantic-North Europe Conference (ANEC).

Parties:
Atlantic Container Line (G.I.E.)
Dart-ML Limited
Hapag-Lloyd AG
Intercontinental Transport (ICT)
Sea-Land Service, Inc.
Trans Freight Lines
United States Lines, Inc.
Compagnie Generale Maritime (CGM)

Synopsis: The proposed amendment would specify that when a party to the agreement is also a member of the Gulf-European Freight Association (GEFA) and routes a through shipment of cargo overland from a U.S. interior/coastal point via U.S. Gulf port area to a U.S. South Atlantic port for oncarriage by sea, the tariffs and service contracts of GEFA and not those of ANEC will apply. The parties have requested a shortened review period.

Agreement No: 202-010637-011.

Title: North Europe-U.S. Atlantic Conference.

Parties:
Atlantic Container Line (G.I.E.)
Dart-ML Limited
Hapag-Lloyd AG
Intercontinental Transport (ICT)
Sea-Land Service, Inc.
Trans Freight Lines
United States Lines, Inc.
Compagnie Generale Maritime (CGM)

Synopsis: The proposed amendment would modify the scope of the agreement to specify that any party who may also be a party of the North Europe-U.S. Gulf Freight Association. FMC Agreement No. 202-010650, and routes a through shipment of cargo overland from U.S. Atlantic ports south of Cape Hatteras to U.S. interior/coastal points via U.S. Gulf port areas following pre-carriage by sea, shall be subject to the tariffs and service contracts of that association and not those of this conference. The parties have requested a shortened review period.

By Order of the Federal Maritime Commission.

Dated: April 18, 1986.

Tony P. Kominoth,

Assistant Secretary.

[FR Doc. 86-9042 Filed 4-22-86; 8:45 am]

BILLING CODE 6730-01-M

[Docket No. 86-14]

Union Carbide Corp. v. Waterman Steamship Corp.; Filing of Complaint and Assignment

Notice is given that a complaint filed by Union Carbide Corporation, Battery

VOL 51 ISS 78 APR 23 1986 UMI

Division against the Waterman Steamship Corporation was served April 16, 1986. Complainant alleges that respondent has violated section 18(b) of the Shipping Act, 1916 and section 10(b) of the Shipping Act of 1984 by misapplying rates on various shipments of dry cell battery parts originating at U.S. Atlantic coast ports and destined for Port Sudan, Sudan.

This proceeding has been assigned to Administrative Law Judge Charles E. Morgan. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61. The hearing shall include oral testimony and cross examination in the direction of the presiding officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions or other documents, or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the presiding officer in this proceeding shall be issued by April 16, 1987, and the final decision of the Commission shall be issued by August 17, 1987.

Tony P. Kominoth,

Assistant Secretary.

BILLING CODE 6730-01-M

FEDERAL RESERVE SYSTEM

Formations of; Acquisitions by; and Mergers of Bank Holding Companies; First West Virginia Bancorp, Inc. et al.

The companies listed in this notice have applied for the Board's approval under section 3 of the Bank Holding Company Act (12 U.S.C. 1842) and § 225.14 of the Board's Regulation Y (12 CFR 225.14) to become a bank holding company or to acquire a bank or bank holding company. The factors that are considered in acting on the applications are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Each application is available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank or to the offices of the Board of Governors. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Unless otherwise noted, comments regarding each of these applications must be received not later than May 16, 1986.

A. **Federal Reserve Bank of Cleveland** (Lee S. Adams, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101:

1. *First West Virginia Bancorp, Inc.*, Wheeling, West Virginia; to acquire 100 percent of the voting shares of First West Virginia Bank, National Association—Buckhannon, Buckhannon, West Virginia.

B. **Federal Reserve Bank of Richmond** (Lloyd W. Bostian, Jr., Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. *Bank of Virginia Company*, Richmond, Virginia; to acquire 100 percent of the voting shares of Security National Corporation, Washington, DC, thereby indirectly acquiring Security National Bank, Washington, DC.

C. **Federal Reserve Bank of Atlanta** (Robert E. Heck, Vice President) 104 Marietta Street NW., Atlanta, Georgia 30303:

1. *Bank Corporation of Georgia*, Fort Valley, Georgia; to acquire 100 percent of the voting shares of The Citizens Bank of Ashburn, Ashburn, Georgia.

D. **Federal Reserve Bank of Chicago** (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. *Spring Valley Bancorp, Inc.*, Spring Valley, Illinois; to acquire 100 percent of the voting shares of Spring Valley City Bank, Spring Valley, Illinois.

Board of Governors of the Federal Reserve System, April 18, 1986.

William W. Wiles,

Secretary of the Board.

BILLING CODE 6210-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control

Cooperative Agreements for Behavioral Risk Factor Surveillance Systems; Availability of Funds for Fiscal Year 1986

Introduction

The Centers for Disease Control (CDC) announces the availability of funds for Fiscal Year 1986, for cooperative agreements for State Behavioral Risk Factor Surveillance Systems (BRFSS).

Authority

These cooperative agreements are authorized by Section 301(a) of the Public Health Service Act (42 U.S.C. 241(a)), as amended. The Catalog of Federal Domestic Assistance Number is 13.283.

Program Objective/Purpose

The purpose of this cooperative agreement program is to assist States in monitoring the prevalence of major behavioral risks associated with the 10 leading causes of premature death in the United States, and through this monitoring process, assist in the development of programs designed to reduce major behavioral risks in the population and determine progress toward achieving prevention goals.

Cooperative Activities

A. Recipient Activities

1. Formulate a plan for the development, implementation, and conduct of the behavioral risk factor surveillance mechanisms. The plan should provide:

a. A timetable for the development and implementation of the surveillance system.

b. Identification and selection of appropriate staff for the surveillance program and provision of adequate supervisory personnel who will be responsible for the timeliness and quality control of data collection. In addition, supervisors will train new subordinate staff and edit completed questionnaires.

c. For acquisition of behavioral risk factor information.

2. Establish and maintain the behavioral risk factor surveillance system.

3. Develop a plan for using available risk factor prevalence information and other morbidity and mortality data for improving and refining State program priorities and goals and assessing their attainment.

B. Centers for Disease Control Activities

1. Collaborate in assessing State geographic, demographic, and economic characteristics and developing an overall surveillance strategy.

2. Collaborate with each State on the compilation of specified information in a periodic, standardized, and uniform manner on risk factors relating to leading causes of morbidity and mortality.

3. Collaborate in the training and development of staff to implement and conduct the program activities described herein.

4. Provide necessary statistical and epidemiological assistance for the compilation of risk factor prevalence information.

5. Provide technical assistance throughout the program implementation phase with special reference to development of quality control mechanisms appropriate to a State-level surveillance system.

6. Provide training for State personnel in data analysis and interpretation and develop State capacity for enhancing intervention strategy design and measuring program impact on the basis of statistically valid morbidity data.

7. Coordinate with other Federal agencies and organizations in both the public and private sector to ensure a coordinated, cooperative program for helping assess the attainment of the 1990 Objectives for the Nation.

8. Coordinate and facilitate the interchange of technical information with recipients.

Eligible Applicants

The official health agencies of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, Trust Territories of the Pacific Islands, the Commonwealth of the Northern Mariana Islands, and American Samoa are eligible to apply for a cooperative agreement.

Availability of Funds

Approximately $450,000 will be available in Fiscal Year 1986 for the support of about 26 BRFSS cooperative agreements. The average award of the cooperative agreements is expected to be $17,000, with individual awards ranging from $15,000 to $20,000.

Behavioral risk factor cooperative agreements will be funded for a 12-month budget period and a 5-year project period. The funding estimates described above are subject to change.

Review and Evaluation Criteria

During Fiscal Year 1986, the funding criteria for competing continuations and new behavioral risk factor cooperative agreement applications will be based upon the applicant's experience and/or ability to provide evidence of resources available to design, implement, and manage the timely collection and analysis of behavioral risk factor information and the applicant's commitment to continue the surveillance system in future years with State resources contributed to the system. Specific review of new and continuation behavioral risk factor applications will be based on the following criteria:

A. Experience

1. Successful implementation of a BRFSS as evidenced by the:

a. Timely and periodic collection of data.

b. Designation of interviewing and supervisory staff or designation of a competent contractor for interviewing services.

c. Use of a standard questionnaire.

d. Completion of appropriate data processing activities including keypunching and error corrections.

e. Adherence to a statistically correct sampling plan.

f. Adherence to appropriate quality control procedures including survey administration, rules of replacement, refusal conversion, and monitoring or verification of interviews.

g. Demonstrated ability to reduce errors.

2. Extent of other experience with timely collection and analysis of behavioral risk factor prevalence information.

3. Other evidence of the capability of the applicant to perform the tasks required for a BRFSS.

B. Workplan and Personnel

1. Relevance of the proposal to the scope and objectives provided in this request for applications.

2. Soundness in describing how the BRFSS will be designed, implemented, and managed as evidenced by the:

a. Description of lead persons/departments.

b. Definition of action steps, time frames, and persons responsible for completion.

c. Inclusion of appropriate quality control measures.

d. Description of specific, measurable objectives such that progress can be evaluated based on the completion of the stated processes.

e. Assurance that interviewing will not be interrupted for any given month.

f. Processing of interviews in a timely fashion.

g. Provision of a sound sampling plan.

h. Clear delineation of CDC versus State responsibilities.

i. Clear description of the programmatic uses of the data.

C. Budget

1. Appropriateness of requested budget relative to the work proposed.

Applications

A. Copies—Place of Submission

There will be one annual review cycle for new and continuation applications.

The original and two copies of the application must be submitted on or before June 20, 1986 to:

Grants Management Officer, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control, Room 321, 255 E. Paces Ferry Road, N.E., Atlanta, Georgia 30305.

B. Deadlines

Applications shall be considered as meeting the deadline if they are either:

1. Received on or before the deadline date, or

2. Sent on or before the deadline date and received in time for submission to the independent review group. (Applicants should request a legibly dated U.S. Postal Service postmark or obtain a legibly dated receipt from a commercial carrier or U.S. Postal Service. Private metered postmarks will not be acceptable as proof of timely mailing.)

Applications which do not meet the criteria in either paragraph B.1. or B.2. immediately above are considered late applications and will not be considered for review or funding.

C. Reviews

Applications are not subject to review as governed by Executive Order 12372; however, they are subject to review as governed by Regulations (42 CFR Parts 122 and 123) implementing the National Health Planning and Resource Development Act of 1974.

Information

Information on application procedures, copies of application forms, and other material may be obtained from Luther DeWeese, Grants Management Specialist, at the above address (404) 262-6575. Technical assistance for preparation of an application may be obtained from Gary C. Hogelin, Chief, Field Services Branch, Division of Nutrition, Center for Health Promotion and Education, Centers for Disease Control, 1600 Clifton Road, N.E., Atlanta, Georgia 30333. The telephone number is (404) 329-3075, or FTS 236-3075.

Dated: April 17, 1986.

William E. Muldoon,

Director, Office of Program Support, Centers for Disease Control.

BILLING CODE 4160-18-M

VOL 51 ISS 78 APR 23 1986 UMI

Food and Drug Administration

[Docket No. 86E-0114]

Determination of Regulatory Review Period for Purposes of Patent Extension; Betagan

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (DFA) has determined the regulatory review period for Betagan and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims that human drug product.

ADDRESS: Written comments and petitions should be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Philip L. Chao, Office of Health Affairs (HFY-20), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1382.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) generally provides that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under that act, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continue until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA recently approved for marketing the human drug product Betagan, a solution of levobunolol hydrochloride, which is indicated for use in lowering intraocular pressure and may be use in patients with chronic open-angle glaucoma or ocular hypertension. Subsequent to this approval, the Patent and Trademark Office received a patent term restoration application for Betagan from Allergan Pharmaceuticals, Inc., and requested FDA's assistance in determining the patent's eligibility for patent term restoration. FDA, in a letter dated March 21, 1986, advised the Patent and Trademark Office that the human drug product had undergone a regulatory review period and that its active ingredient, levobunolol hydrochloride, represented the first permitted commercial marketing or use of that active ingredient. Shortly thereafter, the Patent and Trademark Office requested that FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for Betagan is 1,870 days. Of this time, 1,169 days occurred during the testing phase of the regulatory review period, while 701 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act became effective:* November 7, 1980. The applicant claims that the notice of claimed investigational exemption (IND) was submitted on October 3, 1980. However, FDA did not receive the IND application until October 8, 1980. Therefore, under 21 CFR 312.1, the IND became effective on November 7, 1980.

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the Federal Food, Drug, and Cosmetic Act:* January 19, 1984. The applicant claims that the new drug application for the drug (NDA 19-219) was initially submitted on January 17, 1984, but FDA did not receive the application until January 19, 1984.

3. *The date the application was approved:* December 19, 1985. FDA has verified that NDA 19-219 was approved on December 19, 1985.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 730 days of patent extension.

Anyone with knowledge that any of the dates are published is incorrect may, on or before June 23, 1986, submit to the Dockets Management Branch (address above) written comments and ask for redetermination. Furthermore, any interested person may petition FDA, on or before October 20, 1986, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, Part 1, 98th Cong., 2d Sess., pp. 41-42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 15, 1986.

Stuart L. Nightingale,

Associate Commissioner for Health Affairs.

BILLING CODE 4160-01-M

Health Resources and Services Administration

Advisory Committee; Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following National Advisory body scheduled to meet during the month of May 1986:

Name: National Advisory Council On Nurse Training.

Date and Time: May 12-14, 1986, 10:30 a.m.

Place: Conference Room M, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Open on May 12, 10:30 a.m.—12:30 p.m.

Closed for remainder of meeting.

Purpose: The Council advises the Secretary and Administrator, Health Resources and Services Administration, concerning general regulations and policy matters arising in the administration of Title XXVII, National Health Service Corps, Health Professions Education, Nurse Training Omnibus Budget Reconciliation Act of 1981 (Pub. L. 97-35). The Council also performs final review of grant applications for Federal assistance, and makes recommendations to the Administrator, HRSA.

Agenda: Agenda items for the open portion of the meeting will cover announcements; consideration of minutes of the previous meeting; reports by the Director, Bureau of Health Professions, the Financial Management Officer, BHPr., the Director, Division of Nursing, and staff reports. The meeting will be closed to the public on May 12, at 12:30 p.m. for the remainder of the meeting for the review of grant applications for advanced nurse training grants, nurse practitoner grants, special project grants, national research service awards, and research project grants. The closing is in accordance with the provision set forth in section 552b(c)(6), Title 5, U.S. Code and the Determination by the Administrator, Health Resources and Services Administration, pursuant to section 10(d) of Pub. L. 92-463.

Anyone wishing to obtain a roster of members, minutes of meeting, or other relevant information should write to or contact Dr. Mary S. Hill, Bureau of Health Professions, Health Resources and Services Administration, Room 5C-04, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-6193.

Agenda items are subject to change as priorities dictate.

Dated: April 17, 1986.

Jackie E. Baum,

Advisory Committee Management Officer, HRSA.

BILLING CODE 4160-15-M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Statue of Liberty-Ellis Island Centennial Commission; Renewal

This notice is published in accordance with section 9(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix). Following consultation with the General Services Administration, notice is hereby given that the Secretary of the Interior is renewing the Statue of Liberty-Ellis Island Centennial Commission. The purpose of the Commission shall be to serve as the primary citizen advisory body to the Secretary and the National Park Service on all matters pertaining to the preservation of Ellis Island and the Statue of Liberty, as well as the centennial celebrations of each. It is anticipated that the Commission will advise the Secretary, without limitation, on the means and schedules of preservation, the projected uses of the facilities, the needs and uses of donated funds, property and services, the programs and activities associated with centennial celebrations and the ongoing programs and activities associated with both the Statue of Liberty and Ellis Island.

Further information regarding the committee may be obtained from the Deputy Under Secretary, Statue of Liberty-Ellis Island Commission, Department of the Interior, 18th & C Sts., NW., Room 6124, Washington, D.C. 20240.

The certificate of renewal is published below.

Certification

I hereby certify that the renewal of the Statue of Liberty-Ellis Island Centennial Commission is in the public interest in connection with the performance of duties imposed on the Department of the Interior by 16 U.S.C. 1a-2(c) and 16 U.S.C. 431.

Dated: April 17, 1986.

Donald Paul Hodel,

Secretary of the Interior.

BILLING CODE 4310-70-M

Bureau of Land Management

[OR 39468]

Realty Action; Exchange of Public Lands in Curry County, OR

SUMMARY: The following described public domain land located in Curry County, Oregon, has been examined and through the development of land use planning decisions based on public input and resource considerations, regulations, and Bureau policies, it has been determined that this public land is suitable for disposal by exchange under the authority of sections 205 and 206 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1716):

Willamette Meridian, Oregon

SW¼NW¼ section 35, T. 39S., R. 14 W., containing 40 acres.

All minerals in these public lands will be included in the exchange. The patent, when issued, will be subject to a reservation of right-of-way thereon for ditches and canals constructed by the authority of the United States under the Act of August 30, 1890 (43 U.S.C. 945).

The exchange proponent, Mr. Charles Toth, will receive title to the federal land noted above which will serve to block up his private ownership.

In exchange for this land the United States will acquire private lands of equal value, listed below, which will enhance its' management program by providing legal, public access to the New River, Area of Critical Environmental Concern (A.C.E.C.) and also serve to consolidate its land ownership pattern. The value of the lands to be exchanged are approximately equal and acreage will be adjusted or money will be used to equalize the values upon completion of the final appraisal of the lands.

The lands to be acquired, in priority order, are as follows:

Willamette Meridian, Oregon

T. 30S., R. 15 W., Portions of Lots 3 and 4 Sec. 2, containing 14.2 acres.

T. 40 S., R. 13 W., Lot 10 Sec. 9, containing 40.75 acres.

These 2 parcels are presently under third party ownership. Once the appraisals are finalized the exchange

VOL 51 ISS 78 AP 23 1986 UMI

proponent will acquire all or a portion of these lands to trade to the United States to consummate the exchange.

This exchange is consistent with the management objectives of the Coos Bay Management Framework Plan, the Management Plan for New River A.C.E.C., local government zoning plans and Oregon's Coastal Zone Management Program. The public interest will be well served by making this exchange.

The publication of this notice in the **Federal Register** segregates the public lands described herein from all other forms of appropriation and entry under the public laws, including the mining laws, for a period of two years from the date of publication. The exchange is expected to be completed before the end of that period.

ADDRESSES: Detailed information concerning the exchange, including the environmental analysis, is available for review at the Bureau of Land Management's Coos Bay District Office, 333 South 4th Street, Coos Bay, OR 97420.

DATE: For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the Coos Bay District Manager at the above address (Reference exchange number OR 39468). Objections will be reviewed by the Oregon State Director of the Bureau of Land Management who may sustain, vacate or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: Thom Green or Bob Bierer, Coos Bay District Office, at (503) 269–5880.

Dated: April 15, 1986.

Robert T. Dale,

District Manager.

[FR Doc. 86–9061 Filed 4–22–86; 8:45 am]

BILLING CODE 4310-33-M

Colorado; Realty Action

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, Serial No. C–40267, Determination of land suitable for exchange under the authority of Sections 205, 206, 302(b), and 310 of the Federal Land Policy and Management Act of 1976 (43 U.S.C. 1715, 1716, 1732, and 1740).

SUMMARY: Approximately 549 acres of public land under the jurisdiction of the Bureau of Land Management have been determined suitable for exchange. The determination of suitability has been made in response to a Bureau-benefiting exchange proposal developed cooperatively between the Bureau and Double J Land and Cattle Company. In the proposal, Double J Land and Cattle Company have offered to exchange approximately 556 acres of private land. The exchange proposal has been made to facilitate the consolidation of land holdings, provide access to approximately 12,000 acres of unaccessible public land, and resolve unauthorized occupancy and enclosure of public lands. The consolidation would increase managerial efficiency and provide public access to natural resources on public land being managed by the Bureau.

The values of the land to be exchanged have been determined to be approximately equal. Upon completion of the final appraisal of the lands, the acreages will be adjusted or money will be used to equalize the exchange values.

Selected Public Land

Description of Land To Be Considered For Exchange in Garfield County, Colorado:

West Rifle Creek Area

Sixth Principal Meridian, Colorado

T. 4 S., R. 93 W.,
Sec. 16, NE¼NW¼;
Sec. 20, W½SE¼NW¼.

Description of Land To Be Considered For Exchange in Eagle County, Colorado:

Castle Peak Area

Sixth Principal Meridian, Colorado

T. 2 S., R. 84 W.,
Sec. 20, lots 1–3, E½NE¼, E½NW¼NE¼, SW¼NE¼, SE¼NW¼, E½SW¼NW¼;
Sec. 21, lot 2, SW¼NW¼, W½NW¼N W¼;
Sec. 28, lot 1 and 2.
Total selected: 549.24 acres.

Offered Private Land

Description of Land To Be Considered For Exchange in Eagle County, Colorado:

Sixth Principal Meridian, Colorado

T. 2 S., R. 84 W.,
Sec. 23, S½S½;
Sec. 25, lots 1 and 2, N½NW¼, SW¼NW¼, N½SW¼;
Sec. 26, N½NE¼, NW¼NW¼.
Total offered: 555.96 acres.

Terms and Conditions: The following reservations for existing uses and users would be made in a patent issued for public land.

1. The reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

2. The reservation to the United States of all mineral deposits in the land.

3. The reservation of Oil and Gas leases C–36936, C–36937, C–42897, C–18334.

4. The reservation of Power Transmission Line Right-of-Way C–16807.

5. The reservation of Telephone and Telegraph Right-of-Way C–30975, C–27649.

6. The reservation for access on Eagle County Road 41 and Garfield County Road 252.

7. The reservation for use of existing roads north of Alkali Creek, C–43071. The publication of this notice in the **Federal Register** will segregate the public lands described above to the extent that they will not be subject to appropriation under the public land laws, including the mining laws. As provided by the regulations of 43 CFR 2201.1(b), any subsequently tendered application, allowance of which is discretionary, shall not be considered as filed and shall be returned to the applicant.

FURTHER INFORMATION AND PUBLIC COMMENT: Additional information concerning this exchange, including the planning documents and environmental assessment, is available for review in the Glenwood Springs Resource Area Office at 50629 Highway 6 and 24, Glenwood Springs, Colorado.

For a period of 45 days from the date of this notice, interested parties may submit comments to the District Manager, Grand Junction District Office, Bureau of Land Management, 764 Horizon Drive, Grand Junction, Colorado 81506. Objections will be reviewed by the State Director who may sustain, vacate, or modify this action. In the absence of any objections, this Notice of Realty Action will become the final determination of the Department of the Interior.

Dated: April 10, 1986.

Dick Freel,

District Manager, Grand Junction District.

BILLING CODE 4310-84-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–225]

Certain Multi-Level Touch Control Lighting Switches; Commission Decision Not To Review Initial Determination Terminating Respondent on The Basis of a Settlement Agreement

AGENCY: U.S. International Trade Commission.

ACTION: Nonreview of an initial determination (ID) terminating a respondent on the basis of a settlement agreement.

SUMMARY: The U.S. International Trade Commission has determined not to review an ID terminating respondent Trivar, Inc. (Trivar), in the above-captioned investigation. On March 5, 1986, complainant Southwest Laboratories, Inc., and respondent Trivar filed a joint motion (Motion No. 225–36) for reconsideration of Order No. 17 which denied their earlier joint motion (Motion No. 225–20) to terminate Trivar as a respondent in the investigation on the basis of a settlement agreement. The presiding administrative law judge (ALJ) denied the joint motion for reconsideration during the March 3, 1986, prehearing conference. On March 17, 1986, the ALJ sua sponte issued an ID (Order No. 29) reversing Order No. 17 and granting Motion No. 225–20 terminating Trivar as a respondent. No petitions for review were received, nor were any comments received from other Government agencies or the public.

FOR FURTHER INFORMATION CONTACT: John Kingery, Esq., Office of the General Counsel, U.S. International Trade Commission, telephone 202–523–1638.

SUPPLEMENTARY INFORMATION: This action is taken under the authority of section 337 of the Tariff Act of 1930 (19 U.S.C 1337) and Commission rule § 210.53 (19 CFR 210.53)

Copies of the nonconfidential version of the ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–523–0161.

Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

By order of the Commission.

Issued: April 17, 1986.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 731–TA–286 (Final)]

Import Investigation; Anhydrous Sodium Metasilicate From the United Kingdom

AGENCY: United States International Trade Commission.

ACTION: Revised schedule for the subject investigation.

EFFECTIVE DATE: March 31, 1986.

FOR FURTHER INFORMATION CONTACT: Robert Carpenter (202–523–0399), Office of Investigations, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436. Hearing-impaired individuals may obtain information on this matter by contacting the Commission's TDD terminal on 202–724–0002.

SUPPLEMENTARY INFORMATION: On March 3, 1986, the Commission instituted the subject investigation and established a schedule for its conduct (51 FR 9535). Subsequently, the Department of Commerce extended the date for its final determination in the investigation from May 10, 1986 to July 9, 1986 (51 FR 10897, March 31, 1986). The Commission, therefore, is revising its schedule in the investigation to conform with Commerce's new schedule.

The Commission's new schedule for the investigation is as follows: requests to appear at the hearing must be filed with the Secretary to the Commission not later than June 23, 1986; the prehearing conference will be held in room 117 of the U.S. International Trade Commission Building on June 26, 1986; the public version of the prehearing staff report will be placed on the public record on June 20, 1986; the deadline for filing prehearing briefs is July 3, 1986; the hearing will be held in room 331 of the U.S. International Trade Commission Building on July 10, 1986; and the deadline for filing all other written submissions, including posthearing briefs, is July 17, 1986.

For further information concerning this investigation see the Commission's notice of investigation cited above and the Commission's rules of practice and procedure, Part 207, Subparts A and C (19 CFR Part 207), and Part 201, Subparts A through E (19 CFR Part 201).

Authority: This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to § 207.20 of the Commission's rules (19 CFR 207.20).

By order of the Commission.

Issued: April 15, 1986.

BILLING CODE 7020-02-M

[Investigation No. 337–TA–229]

Receipt of Initial Determination Terminating Respondent on the Basis of Consent Order Agreement

In the matter of certain jewelry and parts thereof.

AGENCY: U.S. International Trade Commission.

ACTION: Notice is hereby given that the Commission has received an initial determination from the presiding officer in the above-captioned investigation terminating the following respondent on the basis of a consent order agreement: Blair, Ltd. (Blair).

SUPPLEMENTARY INFORMATION: This investigation is being conducted pursuant to section 337 of the Tariff Act of 1930 (19 U.S.C. 1337). Under the Commission's rules, the presiding officer's initial determination will become the determination of the Commission thirty (30) days after the date of its service upon the parties, unless the Commission orders review of the initial determination. The initial determination in this matter was served upon the parties on April 14, 1986.

Copies of the initial determination, the consent order agreement, and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–523–0161. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

Written comments: Interested persons may file written comments with the Commission concerning termination of the aforementioned respondent. The original and 14 copies of all such comments must be filed with the Secretary to the Commission, 701 E Street NW., Washington, DC 20436, no later than 10 days after publication of this notice in the **Federal Register**. Any person desiring to submit a document (or portion thereof) to the Commission in confidence must request confidential

VOL 51 ISS 78 AP 23 1986 UMI

treatment. Such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why confidential treatment should be granted. The Commission will either accept the submission in confidence or return it.

FOR FURTHER INFORMATION CONTACT: Ruby J. Dionne, Office of the Secretary, U.S. International Trade Commission, telephone 202–523–0176.

By order of the Commission.

Issued: April 14, 1986.

BILLING CODE 7020–02–M

[Docket No. 332–226]

Monthly Reports on the Status of the Steel Industry; Import Investigation

AGENCY: United States International Trade Commission.

ACTION: Institution of an investigation.

EFFECTIVE DATE: April 9, 1986.

FOR FURTHER INFORMATION CONTACT: Ms. Nita Kavalauskas (202–523–5413), Minerals and Metals Division, U.S. International Trade Commission, Washington, DC 20436.

Background and scope of investigation: The Commission instituted investigation No. 332–226, following receipt on March 14, 1986, of a letter from the Chairman, Subcommittee on Trade, Committee on Ways and Means, U.S. House of Representatives, requesting that the Commission conduct an investigation under section 332(b) of the Tariff Act of 1930 (19 U.S.C. 1332(b)) to provide monthly monitoring reports on the status of the U.S. steel industry through September 30, 1989. This coincides with the scheduled expiration of the President's program of voluntary restraint arrangements (VRA's).

The report will provide historic and current year-to-date data for the industry as a whole on item such as production, employment, shipments, trade, and financial performance.

With respect to trade, information on imports of major carbon and specialty steel products (such as plates and sheets and strip) will be provided on a country-by-country or regional basis for each of the countries or regions subject to VRA's, and for other major suppliers. The data will show how imports of semifinished steel and other steel products relate to overall VRA limits.

In addition, information on market penetration in major products will be provided, as will information which will track imports into five major U.S. customs regions. Finally, the report will provide data on the unit values of imported steel.

Hearing-impaired individuals are advised that information on this matter can be obtained by contacting our TDD terminal on (202) 724–0002.

By order of the Commission.

Issued: April 14, 1986.

BILLING CODE 7020–02–M

[Investigation No. 337–TA–234]

Certain Upper Body Protector Apparatus for Use in Motorsports; Commission Determination Not To Review Initial Determination Joining Respondents

AGENCY: U.S. International Trade Commission.

ACTION: Nonreview of an initial determination (ID) joining two respondents to the investigation.

SUMMARY: Notice is hereby given that the Commission has determined not to review the presiding administrative law judge's (ALJ) ID to join One Up, S.r.l. and Jim O'Neal Distributing, Inc. as repsondents in the above-captioned investigation.

FOR FURTHER INFORMATION CONTACT: Paul R. Bardos, Esq., Office of the General Counsel, U.S. International Trade Commission, 701 E Street, NW., Washington, DC 20436, telephone 202–523–0375.

SUPPLEMENTARY INFORMATION: On February 21, 1986, complainants J.T. Racing, Inc. and John R. Gregory moved to amend the complaint and notice of investigation (Motion No. 234–3) to add two new respondents to the investigation: (1) One Up, S.r.l., of Italy, and (2) Jim O'Neal Distributing Inc., of California. The ALJ issued an ID granting the motion on February 18, 1986. No petition for review of the ID nor comments from other government agencies have been received.

Copies of the ALJ's ID and all other nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW, Washington, DC 20436, telephone 202–523–0161.

Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202–724–0002.

By order of the Commission.

Issued: April 17, 1986.

[Investigation No. 337–TA–83]

Import Investigation of Certain Window Shades; Issuance of Advisory Opinion

AGENCY: U.S. International Trade Commission.

ACTION: Issuance of advisory opinion.

SUMMARY: The Commission has issued an advisory opinion in which it finds that certain window shades sought to be imported by McCrory Corp. are not covered by the exclusion order issued by the Commission at the conclusion of the above-captioned investigation.

FOR FURTHER INFORMATION CONTACT: Jack Simmons, Esq., Office of the General Counsel, telephone 202–523–0493. Hearing impaired individuals may obtain information on this matter by contacting the Commission's TDD terminal at 202–724–0002.

SUPPLEMENTARY INFORMATION: At the conclusion of the above-captioned investigation, the Commission issued an order excluding from entry into the United States window shades or components thereof that infringe claims 1, 2, 7, 8, or 9 or U.S. Letters Patent 4,008,770 for the remaining term of the patent. By letter dated July 29, 1985, McCrory Corp. informed the Commission that the U.S. Customs Service had refused entry of certain window shades under the authority of the exclusion order and requested that the Commission advise Customs that the window shades are not encompassed by the exclusion order. The Commission instituted an advisory opinion proceeding to determine whether the window shades which McCrory seeks to import are subject to the exclusion order. The Commission has now determined that they are not.

Copies of the advisory opinion and all other non-confidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436, telephone 202–523–0161.

By order of the Commission.

Issued: April 11, 1986.

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Council on the Arts; Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the National Council on the Arts will be held on May 2–3, 1986 from 9:00 a.m. to 5:30 p.m. and on May 4, 1986 from 9:00 a.m. to 1:00 p.m. in Room M–09 of the Nancy Hanks Center, 1100 Pennsylvania Avenue, NW, Washington, DC 20506.

A portion of this meeting will be open to the public on Friday, May 2, 1986 from 9:00 a.m. to 5:30 p.m. and Saturday, May 3, 1986 from 9:00 a.m. to 12:30 p.m. The topics for discussion will include Program Review and Guidelines for State Programs, Arts In Education, Folk Arts, Literature, Dance, and Music; plus future options for the Advancement Program, and the future of Challenge/Long Term Enhancement.

The remaining sessions on Saturday, May 3 from 2:30 p.m. to 5:30 p.m. and on Sunday, May 4 from 9:00 a.m. to 1:00 p.m. are for the purpose of Council review, discussion, evaluation and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants, and for discussion and development of confidential budgetary projections and related plans to be submitted to the Office of Management and Budget and the Congress. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and 9(B) of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, DC 20506, or call (202) 682–5433.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 7537–01–M

NUCLEAR REGULATORY COMMISSION

Bi-Weekly Notice; Applications and Amendments To Operating Licenses Involving No Significant Hazards Considerations

I. Background

Pursuant to Public Law (Pub. L.) 97–415, the Nuclear Regulatory Commission (the Commission) is publishing this regular bi-weekly notice. Pub. L. 97–415 revised section 189 of the Atomic Energy Act of 1954, as amended (the Act), to require the Commission to publish notice of any amendments issued, or proposed to be issued, under a new provision of section 189 of the Act. This provision grants the Commission the authority to issue and make immediately effective any amendment to an operating license upon a determination by the Commission that such amendment involves no significant hazards consideration, notwithstanding the pendency before the Commission of a request for a hearing from any person.

This bi-weekly notice includes all amendments issued, or proposed to be issued, since the date of publication of the last bi-weekly notice which was published on April 9, 1986 (51 FR 12222), through April 14, 1986.

NOTICE OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The Commission has made a proposed determination that the following amendment requests involve no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The basis for this proposed determination for each amendment request is shown below.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination. The Commission will not normally make a final determination unless it receives a request for a hearing.

Comments should be addressed to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

By May 23, 1986, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Requests for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with

BEST COPY AVAILABLE

VOL 51 ISS 78 AP 23 1986 UMI

reasonable specificity. Contentions shall be limited to matters within the scope of the amendment under consideration. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will service to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received before action is taken. Should the Commission take this action, it will publish a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch, or may be delivered to the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, by the above date. Where petitions are filed during the last ten (10) days of the notice period, it is requested that the petitioner promptly so inform the Commission by a toll-free telephone call to Western Union at (800) 325–6000 (in Missouri (800) 342–6700). The Western Union operator should be given Datagram Identification Number 3737 and the following message addressed to *(Branch Chief)*: petitioner's name and telephone number; date petition was mailed; plant name; and publication date and page number of this **Federal Register** notice. A copy of the petition should also be sent to the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, DC 20555, and to the attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board, that the petition and/or request should be granted based upon a balancing of factors specified in 10 CFR 2.714(a)(1)(i)–(v) and 2.714(d).

For further details with respect to this action, see the application for amendment which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document room for the particular facility involved.

Alabama Power Company, Docket Nos. 50–348 and 50–364, Joseph M. Farley Nuclear Plant, Unit Nos. 1 and 2, Houston County, Alabama

Date of amendments request: December 9, 1985, supplemented February 18, 1986.

Description of amendments request: The licensee proposes administrative changes to Technical Specifications (TS). These changes involve sixteen areas of the specifications described generally in the following groupings:

(1) Fire detection instruments of Table 3.3–12 contain smoke and heat detectors. TS 4.3.3.9.1 would be clarified by an administrative change to allow aerosol or heat, as appropriate, for testing. The numbers of detectors and room identification would also be corrected. New detectors would be added as an enhancement to the TS.

(2) TS 4.5.3.2 would be changed editorially to require the vertification of position of a breaker or disconnect device that is required to be locked open. Separate disconnect devices were added per NUREG–0737 for use in an emergency. Therefore, the change adds an administrative option and is considered as an editorial change.

(3) Editorial corrections would be made in surveillance (TS 4.7.7.b and 4.7.7.e.4) to reflect that heaters are only in the pressurization system of the control room ventilation system and are not also in the recirculation system.

(4) TS 4.7.11.1.3(c)(1) would be editorially corrected to delete "cell plates" from the 18-month visual inspection the 24-volt battery bank of the fire pump diesel. Plates are inside the battery and cannot be visually observed without destroying the integrity of the battery.

(5) TS Table 3.7–5 would be administratively corrected to add newly installed fire sprinkler systems in the Service Water Intake Structure.

(6) TS 4.7.11.3.2(b)(2) and 4.7.11.3.3(b)(2) would be clarified editorially to delete reference to nozzles for the "puff tests" during flow tests of high pressure CO_2 systems. The test will still be performed, and the administrative change would clarify how the surveillances are done to eliminate misinterpretations. Thus, a personnel hazard or an increase in the likelihood of plant transient would be reduced.

(7) TS Table 3.7–6 would be administratively corrected for room numbers and locations for fire hose stations and to reflect a newly installed hose storage locker inside containment.

(8) TS Table 3.7–7 would be editorially corrected to reverse hydrant numbers for the east and west Service Water intake structures in order to correct an existing error.

(9) TS 4.8.3.1. 3/4.8.3 and Table 3.8–1 (Unit 2 only) would be changed to eliminate periodic TS requirements for fuse testing. The NRC staff has indicated that surveillance testing of fuses is not meaningful and that additional handling of fuses during surveillance testing may compromise fuse integrity. Also, the change would renumber sections and delete the tabular listing of overcurrent protection devices. Thus, the Table 3.8–1 listing of overcurrent protection devices would be maintained by the licensee and controlled in accordance with 10 CFR 50.59 in a similar manner and consistent with NRC staff actions taken for Generic Letter 84–13 for the snubber listing.

(10 TS 3.9.14 Action 1 would be corrected administratively to show the correct valve size of the semi-purge isolation valves as 8 inches to agree with the existing plant design.

(11) TS Tables 4.11–1 and 4.11–2 for Radioactive Liquid and Gaseous Waste Sampling and associated table notations would be clarified. For Table 4.11–1 Notation b., and for Table 4.11–2 Notation i., a sentence is added to require reporting of deviations from

composite sampling requirements per TS 6.9.1.8. For Table 4.11–2 Item D "(I–131, Others)" is deleted to make the type of analysis consistent with Notation g.

(12) TS Figures 5.1–3 and 5.1–4 would be corrected editorially to reflect the Training/EOF Center as being complete. Previously figures reflected the Center as an incomplete information center.

(13) TS 6.9.1.10 would be corrected to show the Director, Office of Management and Program Analysis, as the proper NRC official to receive monthly operating reports.

(14) TS 6.10.2.i would be corrected as an editorial clarification to reflect retention of safety related quality assurance records to be maintained by the licensee for the life of the license.

Basis for proposed no significant hazards consideration determination: By letter dated February 18, 1986, the licensee supplemented the December 9, 1985, application for Technical Specification changes. By Attachment 1 of the February 18, 1986 letter, the licensee provided a detailed 10 CFR 50.92 significant hazards evaluation (thirty-three pages in length). The analyses utilized the three factor test for each of the sixteen proposed Technical Specification changes to determine that each change meets the standards of 10 CFR 50.92(c) and does not involve a significant hazards consideration.

We have reviewed the licensee's analyses and agree that the proposed changes would not increase the probability or consequences of an accident previously evaluated, would not create the possibility of a new or different kind of accident from any accident previously evaluated, or would not involve a reduction in a margin of safety.

Additionally, the Commission has provided examples likely to be found to involve no significant hazards considerations. The example which most likely fits the proposed changes is "(i) A purely administrative change to technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature." Therefore, on the basis of our review of the licensee's 10 CFR 50.92 analyses and on the additional Commission guidance of example "(i)" cited above, or proposed determination is that the changes do not involve a significant hazards consideration.

Local Public Document Room location: George S. Houston Memorial Library, 212 W. Burdeshaw Street, Dothan, Alabama 36303.

Attorney for licensee: Ernest L. Blake, Jr., Esquire, 1800 M Street, NW., Washington, DC 20036.

NRC Project Director: Lester S. Rubenstein.

Arkansas Power & Light Company, Docket No. 50–368, Arkansas Nuclear One, Unit 2 Pope County, Arkansas

Date of Amendment Request: March 14, 1986.

Description of Amendment Request: The proposed amendment would delete license condition 2.C.(7) of Facility Operating License No. NPF–6 relating to the U.S./International Atomic Energy Agency (IAEA) Safeguards program. Under this program, the ANO–2 facility was subject to AEA inspections of nuclear material accounting and nuclear material control. The proposed amendment would not alter in any way the safeguards provisions required by NRC regulations.

The termination provisions of license condition 2.C.(7) provides that the IAEA program be terminated as of the date of such notice from the NRC. That notice was provided to the licensee in a letter dated January 21, 1986 and accordingly the IAEA inspection program was terminated at that time.

The proposed amendment would delete this license condition since it is no longer in effect.

Basis for Proposed No Significant Hazards Consideration Determination: The Commission has provided guidance concerning the application of the no significant hazards consideration standards by providing certain examples (48 FR 14670). One of the examples of actions not likely to involve significant hazards consideration relates to a purely administrative change.

As explained above, the amendment will delete a license condition which is no longer in effect. Therefore, the proposed action is purely administrative in nature, and similar to the example cited.

Therefore, since the application for amendment involves a proposed change that is similar to an example of actions that are considered not likely to involve significant hazards considerations, the Commission has made a proposed determination that the application for amendment involves no significant hazards considerations.

Local Public Document Room Location: Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801.

Attorney for Licensee: Nicholas S. Reynolds, Esq., Bishop, Liberman, Cook, Purcell and Reynolds, 1200 Seventeenth Street, NW., Washington, DC 20036.

NRC Project Director: George W. Knighton.

Boston Edison Company, Docket No. 50–293, Pilgrim Nuclear Power Station, Plymouth, Massachusetts

Date of amendment request: February 28, 1986.

Description of amendment request: The proposed amendment would delete Technical Specification Section 6.15 which imposes an implementation date of June 30, 1982, for final qualification of all safety-related electrical equipment. That date and the need for this technical specification were rendered obsolete by Rule 10 CFR 50.49 which established March 31, 1985 as the qualification deadline, with extensions allowable to a date no later than November 30, 1985 under certain circumstances.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning application of the standards for determining whether license amendments involve significant hazards considerations by providing certain examples (48 FR 14870). One example of an amendment considered not likely to involve significant hazards considerations is "(i) a purely administrative change to technical specifications: for examaple, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature." Since the proposed change involves only the removal of an obsolete requirement, the staff considers it to be similar to example (i). On that basis the staff has made an initial determination that the proposed amendment does not involve significant hazards considerations.

Local Public Document Room location: Plymouth Public Library, 11 North Street, Plymouth, Massachusetts 02360.

Attorney for licensee: W. S. Stowe, Esq., Boston Edison Company, 800 Boylston Street, 36th Floor, Boston, Massachusetts 02199.

NRC Project Director: John A. Zwolinski.

Boston Edison Company, Docket No. 50–293, Pilgrim Nuclear Power Station, Plymouth, Massachusetts

Date of amendment request: February 28, 1986.

Description of amendment request: The proposed amendment would change the date for expiration of the Pilgrim Unit 1 Operating License, DPR–35, from August 26, 2008 to June 8, 2012. This change would add the plant construction time of 3 years 9½ months to the currently licensed term and, thus, extend the operating period to 40 years.

VOL 51 ISS 78 AP 23 1986 UMI

Basis for proposed no significant hazards consideration determination: The licensee has evaluated the potential impacts associated with the proposed license extension and has performed an analysis, using the standards in 10 CFR 50.92, concerning the issue of no significant hazards consideration. The results of that analysis show that the reactor vessel is the only non-replaceable plant component which could limit the plant operating life because of its irreplaceable nature. The reactor vessel was designed using parameters listed in Combustion Engineering Report No. CENC 1139 of March 9, 1971, and included neutron fluences as the basis for a 40-year operating life. These design parameters are considered conservative by present standards. Additonal studies, described in Southwest Research Institute Report SWRI 02-5951 of July 1981 and in General Electric Report NDE 277-1285 of November 27, 1985, have also indicated that expected cumulative neutron fluences will not be a limiting consideration of vessel life. As a result, jusitification for adding the construction duration to the present expiration period now exists, assuming the design criteria are not exceeded during the 40-year operating life.

Aging analysis has been performed for safety-related electrical equipment in accordance with 10 CFR 50.49, "Environmental Qualification of Electrical Equipment Important to Safety for Nuclear Power Plants." Qualified lifetimes have been identified for this equipment as part of this analysis. These lifetimes will be incorporated into the Pilgrim Station maintenance and replacement procedures to ensure that all safety-related equipment remains qualified for the life of the plant regardless of the overall age of the plant.

The original design criteria for Pilgrim Station included many conservative, operating life-limiting assumptions. These resulted in analyses that supported a 40-year operating life at an 80% capacity factor. Since the cumulative capacity factor from plant inception is less than 60%, it is not likely to exceed 80% in the future and the conservative operating criteria will not be comprised.

Upon considering the above the information, the licensee concluded that the requested extension of the operating license would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated because the plant was originally designed for a full 40 years; (2) create the possibility of a new or different kind of accident from any accident previously evaluated because original design features were incorporated which maximize the inspectability of structures, systems and equipment; or (3) involve any reduction in the margin of safety because safety margins were considered and incorporated into the original 40-year design.

The staff has reviewed the licensee's analysis and agrees with the conclusions. Therefore, the staff has made an initial determination that the proposed amendment involves no significant hazards considerations.

Local Public Document Room location: Plymouth Public Library, 11 North Street, Plymouth, Massachusetts 02360.

Attorney for licensee: W.S. Stowe, Esq., Boston Edison Company, 800 Boylston Street, 36th Floor, Boston, Massachusetts 02199.

NRC Project Director: John A. Zwolinski.

Commonwealth Edison Company, Docket No. STN 50-454 Byron Station, Unit 1 Ogle County, Illinois

Date of application for amendment: March 18, 1986.

Description of amendment request: The amendment would revise Technical Specification Table 3.3-7 by changing the full scale range of the triaxial acceleration sensors which are part of the seismic monitoring instrumentation. This change has been requested because the instrumentation has been alarming although there is no other indication of a seismic event. This problem occurs because the alarm setpoint (0.02 g) is only 1% of the full scale range (2.0 g) of the sensors. The proposed amendment will reduce the full scale range of the sensors while maintaining the same alarm setpoint; thus, a larger signal will be required to actuate the alarm.

Basis for Proposed No Significant Hazards Consideration Determination: Based on the three criteria in 10 CFR 50.92 for defining a significant hazards consideration, operation of Byron Station, Unit 1 in accordance with the proposed amendment will not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or

(3) Involve a significant reduction in a margin of safety.

The proposed amendment revises the measurement range of instruments used to measure the acceleration of a seismic event. These instruments do not perform any protective function. With respect to the first criterion the probability of accidents previously evaluated is not affected by a change to the measurement range of these monitoring instruments. Since these instruments do not perform any protective function, the consequences of accidents previously evaluated remains the same.

The sole purpose of these instruments is to perform a monitoring function. Therefore, a revision to the range of these instruments will not create the possibly of a new or different kind of accident; thus, the second criterion is satisfied.

With respect to the third criteria, there is no margin of safety associated with these seismic monitoring instruments.

Therefore, the staff proposes to determine that the amendment does not involve a significant hazards consideration.

Local Public Document Room location: Rockford Public Library, 215 N. Wyman Street, Rockford, Illinois 61103.

Attorney for licensee: Michael Miller, Isham, Lincoln and Beal, One First National Plaza, 42nd Floor, Chicago, Illinois 60603.

NRC Project Director: Vincent S. Noonan.

Commonwealth Edison Company, Docket Nos. 50-237/249, Dresden Nuclear Power Station, Unit Nos. 2 and 3, Grundy County, Illinois

Date of amendment request: October 29, 1985.

Description of amendment request: The proposed amendments would (1) implement the coolant leak detection requirements of Generic Letter 84-11, Attachment 1, Section B for Dresden Unit 2 as requested by the staff, (2) revise the time-period requirement for conducting the in-service inspection (ISI) program to reflect the second 10-year ISI period for Dresden Units 2 and 3 and (3) correct typographical errors in the technical specifications for Dresden Unit 2.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c).

The licensee has presented a determination of no significant hazards consideration as follows:

The proposed amendments do not involve a significant increase in the probability or consequences of an accident previously evaluated because the changes reflect either a more restrictive limit on increases in coolant leakage and a more stringent plant shutdown requirement (Item 1) or administrative changes (Items 2 and 3). The proposed changes do not impact the current operation of plant equipment important to safety nor do they allow [for] any new equipment or new modes of operation.

The proposed amendments do not create the possibility of a new or different kind of accident from any accident previously evaluated because the changes are largely administrative and deal with monitoring requirements, action levels and surveillances. No new or different modes of operation or changes to plant equipment are allowed by the changes.

The proposed amendments do not involve a significant reduction in a margin of safety because the Item (1) change involves a more restrictive limit on coolant leakage increases, requires plant shutdown if this limit is exceeded regardless of the source of leakage and establishes reasonable equipment operability requirements consistent with previous NRC guidance. Items 2 and 3 reflect administrative changes which have no functional impact on operation of the plant and, therefore, no impact on the margin of safety.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Based on this review, the staff has made a proposed determination that the requested amendments involve no significant hazards consideration.

Local Public Document Room location: Morris Public Library, 604 Liberty Street, Morris, Illinois 60451.

Attorney for licensee: Mr. Michael I. Miller; Isham, Lincoln and Beale, Three First National Plaza, Suite 5200, Chicago, Illinois 60602.

NRC Project Director: John A. Zwolinski.

Commonwealth Edison Company, Docket No. 50-249, Dresden Nuclear Power Station, Unit No. 3, Grundy County, Illinois

Date of amendment request: March 31, 1986.

Description of amendment request: The proposed amendment would revise the high-flow isolation setpoint for the Dresden Unit 3 Isolation Condenser (ISCO) Return Line and clarify the bases for operation of the flow monitoring devices.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c).

The licensee has presented a determination of no significant hazards consideration as follows:

The proposed amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated because the trip level setting change is due to the installation of the new annubar on the ISCO return line, and corresponds to the design trip flow rate of 2508 GPM. This trip flow rate is General Electric's original design of 300 percent of normal flow (836 GPM) which causes the system to automatically isolate from the reactor due to a condensate return line break. The setpoint change is therefore merely a number change due to the nature of the new instrument and provides for the same mode of operation for which the system was designed. The LCO Bases is being rewritten for clarity reasons only and does not functionally impact the system's operation or isolation.

The proposed amendment does not create the possibility of a new or different kind of accident from any accident previously evaluated because the original isolation function of the ISCO system is maintained, and the change is necessary only to accommodate the new instrument. The ISCO system will still automatically isolate as designed due to high flow of 2508 GPM in either direction on the condensate return line. This change does not affect the actual trip flow rate and therefore does not functionally impact the isolation mode of the system.

The proposed amendment does not involve a significant reduction in the margin of safety because the change does not affect the design flow rate at which the system will isolate. In the event of a condensate return line break the ISCO system will isolate at 14.8" H_2O differential which corresponds to the design flow of 2508 GPM (300 percent of normal flow, 836 GPM). This isolation will prevent uncovering the core and exceeding site limits, thus maintaining the margin of safety.

The staff has reviewed the technical analysis presented in the licensee's submittal and the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Based on this review, the staff has made a proposed determination that the requested amendment involves no significant hazards considerations.

Local Public Document Room location: Morris Public Library, 604 Liberty Street, Morris, Illinois 60450.

Attorney for licensee: Mr. Michael I. Miller; Isham, Lincoln and Beale, Three First National Plaza, Suite 5200, Chicago, Illinois 60602.

NRC Project Director: John A. Zwolinski.

Commonwealth Edison Company, Docket Nos. 50-254 and 50-265, Quad Cities Nuclear Power Station, Units 1 and 2, Rock Island County, Illinois

Date of amendment request: September 26, 1984.

Description of amendment request: The amendments would add limiting conditions for operation and surveillance requirements to the Technical Specifications (TS) for certain plant modifications required by NUREG-0737 TMI Action Plan Items that are covered by Generic Letter 83-36. The licensee has proposed TS for (1) Post Accident Sampling (II.B.3), (2) Sampling and Analysis of Plant Effluents (II.F.1.2), (3) Containment High-Range Radiation Monitor (II.F.1.3), (4) Containment Pressure Monitor (II.F.1.4), (5) Containment Water Level Monitor (II.F.1.5), and (6) Containment Hydrogen Monitor (II.F.1.6). Of the other items covered by GL 83-36, Item II.B.1 on Reactor Coolant System venting does not apply to a boiling water reactor not having an isolation condenser such as the Quad Cities units; Item II.F.1.1 on Noble Gas Effluent Monitors has already been reviewed under the 10 CFR Part 50 Appendix I review of radiological effluent technical specifications; and Item III.D.3.4 on Control Room Habitability has been reviewed in a separate review. These three items of GL 83-36 are therefore not included in this notice.

Basis for proposed no significant hazards consideration determination: Generic Letter 83-36 (issued November 1, 1983) requested all boiling water reactor licensees to review their TS to determine if they are consistent with the guidance provided with the generic letter. For items where licensees identified deviations or the absence of a specification, they were requested to submit an application for a license amendment. In response to this request, Commonwealth Edison, the licensee, determined that there were not adequate provisions in the Quad Cities Units 1 and 2 TS to address the TMI items identified above. Therefore, the proposed amendment request was submitted.

The Commission has provided guidance concerning the application of the standards for determining whether a no significant hazards consideration exists by providing examples (April 6, 1983, 48 FR 14870). One of the examples (ii) of an action not likely to involve a significant hazards consideration is a change that constitutes an additional limitation, restriction, or control not presently included in the TS; for example, a more stringent surveillance requirement. As discussed in the licensee's submittal of the proposed amendments, the changes proposed for each of the TMI items would provide additional limiting conditions for operation and surveillance requirements not currently in the TS to assure the proper use of post-TMI modifications. Therefore, since all the proposed changes fall with the Commission guidance, the staff proposes to determine that the requested action would involve a no significant hazards consideration determination.

VOL 51 ISS 78 AP 23 1986 UMI

Local Public Document Room location: Moline Public Library, 504–17th Street, Moline, Illinois 61265.

Attorney for licensee: Mr. Michael I. Miller; Isham, Lincoln, & Beale, Three First National Plaza, Suite 5200, Chicago, Illinois 60602.

NRC Project Director: John A. Zwolinski.

Consolidated Edison Company of New York, Docket No. 50–247, Indian Point Nuclear Generating Unit No. 2, Westchester County, New York

Date of amendment request: August 29, 1983.

Description of amendment request: The proposed amendment would revise the Technical Specifications to provide relief from reactor coolant pump casing surface and visual examinations and updates the technical justification for deferring volumetric examinations of the pump casing welds.

Basis for proposed no significant hazards consideration determination: The Commission has provided criteria for determining whether a proposed amendment involves no significant hazards considerations in 10 CFR 50.92 (48 FR 14871). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident previously evaluated; or (3) involve a significant reduction in margin of safety.

The proposed revisions of the Technical Specifications will not involve a significant increase in the probability or consequences of an accident previously evaluated because Consolidated Edison will perform alternate inspections consisting of visual inspection of the pumps during inspection of system leakage and hydrostatic test per IWA 5000 and IWB 5000, plus a surface examination of the exterior portion of the welds on one pump during each inspection interval per IWA 2222 of ASME Section XI. These alternate examinations will substitute for the requirement for volumetric examination of the casing welds and visual examination of the casing interior as well as the requirement to visually and liquid penetrant examine the internal surface of one pump casing weld. These alternate examinations should provide reasonable assurance of component integrity.

The proposed revisions to the Technical Specifications will not create the possibility of a new or different kind of accident previously evaluated because the revision involves no changes to plant hardware or operating procedures. In addition and as discussed above, the alternative examination to be performed by the licensee will provide adequate assurance of component integrity.

The proposed revisions to the Technical Specifications will not involve a significant reduction in margin of safety because the licensee will perform adequate alternative testing.

Therefore, based on the above, the staff proposes to determine that the application does not involve a significant hazards consideration.

Local Public Document Room location: White Plains Public Library, 100 Martine Avenue, White Plains, New York, 10610.

Attorney for licensee: Brent L. Brandenburg, Esq., 4 Irving Place, New York, New York 10003.

NRC Project Director: Steven A. Varga.

Florida Power and Light Company, Docket No. 50–335, St. Lucie Plant, Unit No. 1, St. Lucie County, Florida

Date of amendment request: April 2, 1986.

Description of amendment request: The amendment would change the Linear Heat Generation Rate Limiting Condition for Operation Technical Specification Figure 3.2–1 to permit an increase in the allowable linear heat generation rate at core heights above 0.6, specifically, increasing to 14.0 kw/ft from 13.4 kt/ft at a relative core height of 0.81 and increasing to 10.81 kw/ft from 10.07 kw/ft at the top of the core. In addition, Technical Specification Figure 3.2–2 would be expanded to reflect the increase of the linear heat generation rate.

Basis for no significant hazards consideration determination: The Commission has made a proposed determination that the request for amendment involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92 this means that operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. The licensee provided a discussion of these standards as follows:

Standard (1): involve a significant increase in the probability or consequences of an accident previously evaluated.

St. Lucie 1 will be operated in the same manner as before and no change in plant design or configuration has occurred. Therefore, there is no increase in the probability of accidents previously evaluated. The large break Loss of Coolant Accident is the only accident that is affected by this increase in allowable Linear Heat Generation Rate and its reanalysis shows that the consequences of the accident are bounded by the acceptance criteria of 10 CFR 50.46. Therefore, there is no increase in the consequences of the accident.

Standard (2): create the possibility of a new or different kind of accident from any accident previously evaluated.

Since the proposed amendment will not affect the design, configuration or method of operation of the plant in any manner, it will not create the possibility of a new or different kind of accident.

Standard (3): involve a significant reduction in a margin of safety.

The Acceptance Criteria for emergency core cooling systems for light water nuclear power reactors are specified by 10 CFR 50.46. The safety analysis, accompanying the application, performed with accepted models and methods, shows that the input changes that result from this amendment provide results within the Acceptance Criteria of 10 CFR 50.46. Therefore, there is no reduction in safety margin.

The staff has conducted a preliminary review of the licensee's discussion of the standards and agrees that, since no change to the plant design, configuration or mode of operation will result from this change to Tables 3.2–1 and 3.2–2, there is no increase in the probability of accidents previously evaluated nor does it create the possibility of a new or different kind of accident previously evaluated. The staff also agrees that the large break Loss of Coolant Accident (LOCA) is the only accident that is affected by this increase in the allowable Linear Heat Generation Rate. The staff, as a result of its preliminary assessment, agrees that in using accepted models and methods in the reanalysis of the large break LOCA there is no increase in the consequences of this accident and the results are within the Acceptance Criteria of 10 CFR 50.46 and will not results in a reduction in a safety margin.

Based on the above discussion, the staff concludes that the proposed change to the Technical Specifications meets the criteria of 10 CFR 50.92 and, therefore, proposes to determine that the changes would involve no significant hazards consideration.

Local Public Document Room location: Indian River Junior College Library, 3209 Virginia Avenue, Ft. Pierce, Florida.

Attorney for licensee: Harold F. Reis, Esquire, Newman and Holzinger, 1615 L Street, NW., Washington, DC 20036.

NRC Project Director: Ashok C. Thadani.

Georgia Power Company, Oglethorpe Power Corporation, Municipal; Electric Authority of Georgia, City of Dalton, Georgia, Docket Nos. 50–321 and 50–366 Edwin I. Hatch Nuclear Plant, Unit Nos. 1 and 2, Appling County, Georgia

Date of amendment request: February 28, 1986.

Description of amendment request: These amendments would change the expiration date for the Unit 1 Operation License, DPR 57, from September 30, 2009 to August 6, 2014 and change the expiration date for the Unit 2 Operating License, NPF–5, from December 27, 2012 to June 13, 2018.

Basis for proposed no significant hazards consideration determination: The currently licensed term for Hatch Units 1 and 2 is 40 years commencing with issuance of the construction permit. Accounting for the time that was required for plant construction, this represents an effective operating license term of about 35 years for Unit 1 and about 34 years for Unit 2. The licensee's application requests a 40-year operating license term for Hatch Units 1 and 2.

The licensee request for extension of the operating licenses is based primarily on the fact that a 40-year service life was considered during the design and construction of the plant. Although this does not mean that some components will not wear out during the plant lifetime, design features were incorporated which maximize the inspectability of structures, systems and equipment. Surveillance and maintenance practices which are implemented in accordance with the ASME code and the facility Technical Specifications provide assurance that any unexpected degradation in plant equipment will be identified and corrected.

The design of the reactor vessel and its internals considered the effects of 40 years of operation at full power with a plant capacity factor of 80% (32 effective full power years). Analyses have demonstrated that expected cumulative neutron fluences will not be a limiting consideration. In addition to these calculation, surveillance capsules placed inside the reactor vessel provide a means of monitoring the cumulative effects of power operation.

Aging analyses have been performed for all safety-related electrical equipment in accordance with 10 CFR 50.49, "Environmental qualification of electrical equipment important to safety for nuclear plants," identifying qualified lifetimes for this equipment. These lifetimes will be incorporated into plant equipment maintenance and replacement practices to ensure that all safety-related electrical equipment remains qualified and available to perform its safety function regardless of the overall age of the plant. Based upon the above, it is concluded that extension of the operating licenses for Hatch Units 1 and 2 to allow a 40-year service life is consistent with the safety analysis in that all issues associated with planting aging have already addresses. Since the proposed amendment involves no changes in the Technical Specifications of safety analyses, we conclude that the proposed amendment would not: (i) Involve any significant increase in the probability or consequences of an accident previously evaluated; or (ii) create the possibility of a new or different kind of accident from any accident previously evaluated; or (iii) involve any reduction in the margin of safety.

Based upon the above the Commission proposes to determine that the proposed amendments, which provide for a 40-year operating life for Hatch Units and 1 and 2, involves no significant hazards consideration.

NRC Project Director: Daniel Muller.

GPU Nuclear Corporation, Docket No. 50–219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of amendment request: September 19, 1985.

Description of amendment request: Requests approval of an amendment to the license which would revise the requirement in Confirmatory Order dated March 14, 1983, to install interlocks on the recirculation pump loops at Oyster Creek to prevent isolating four recirculation loops. The licensee has proposed to install an alarm to indicate that a fourth recirculation loop has been isolated instead of its original design of electrical interlocks to prevent isolation of more than three recirculation loops. This revision does not change the schedule to implement the modification to the recirculation loops and the alarm must be installed, the procedures written to use the alarm and the operators trained before the resort from the Cycle 11 Refueling (Cycle 11R) outage which is scheduled for October 1986.

Basis for proposed no significant hazards consideration determination: By Confirmatory Order dated March 14, 1983, the licensee is required to implement NUREG–0737, TMI Action Plan, Item II.K.3.19 before the restart from the Cycle 11R outage. The licensee has requested a scope change for Recirculation Loop Interlock.

The staff's position on TMI Action Item II.K.3.19 in NUREG–0737 was that interlocks should be installed on nonjet pump plants (other than Humboldt Bay) to assure that at least two recirculation loops are open for recirculation flow for modes other than cold shutdown. This was to assure that the level measurements in the downcomer region are representative of the level in the core region. Isolation of all five recirculation loops results in inadequate communication of coolant between the downcomer and core regions in the reactor vessel.

The licensee presented that the Recirculation Loop Interlock requirement resulted from the evaluation of feedwater transients and small break loss of coolant accidents in General Electric boiling water reactors presented in NUREG–0626, "Generic Evaluation of Feedwater Transients and Small Break LOCA in GE-Design Operating Plants." For nonjet pump plants like Oyster Creek, isolation of all its five recirculation loops results in inadequate communication of coolant between the downcomer and core regions in the reactor vessel. Interlocks were recommended to assure that at least two recirculation loops are open for recirculation flow for modes other than cold shutdown so that level measurements in the downcomer region are representative of the level in the core region.

The licensee presented that the interlock, as originally proposed, consisted of an electrical interlock which would prevent closure of valves to isolate no more than three out of five recirculation loops. The modification also included an alarm to warn the operator that the interlock has been activated and a bypass switch and circuit to allow isolation of loops when conditions permit.

During the review of the interlock design, the licensee determined that by simplifying the modification to an alarm

VOL 51 ISS 78 AP 23 1986 UMI

only the interlock functional requirements could be adequately met. The licensee stated the alarm provides positive active indication to the operator that a fourth loop has been isolated. Since isolation of a fourth loop does not cause any short-term problems with core inventory, the operator has adequate time to recognize and correct the problem indicated by the alarm, therefore, a preventive electrical interlock is not necessary.

The licensee presented that the reduced scope modification has the advantage (1) of not requiring an additional control switch for electrical interlock bypass and additional indications on the control board of a bypass condition, (2) of greatly reducing the complexity of the valve control circuitry thereby minimizing the effect on circuit reliability and (3) of simplifying training requirements and procedural changes for operators.

The licensee presented that the NRC staff evaluation, presented in NUREG–0626, did not take into consideration a fuel zone level monitoring system for Oyster Creek vintage plants. During the 1979–80 Cycle 9 refueling outage wide range fuel zone level indication and recorder were installed. With recirculation pumps tripped this instrumentation provides the reactor operator with level indication in the core region. Also, the lo-lo-lo water level trip for automatic depressurization system initiation, concurrent with drywell pressure, is sensed within the core region.

Oyster Creek Technical Specifications (TS) require that at least two recirculation loop suction valves and their associated discharge valves be in the full open position during all modes of operation except when the reactor head is off and the reactor is flooded to a level above the main steam nozzles. This requirement is addressed in plant operating procedures and licensed operator training.

The licensee also presented that the Human Factors review of this modification determined that the functional requirements of preventing core region isolation from the downcomer can be met by the reduced scope modification which adds alarm capabilities and that the electrical interlock provides additional complexity not justified by the benefit gained. The licensee stated that the reduced scope modification would be installed during the upcoming Cycle 11 Refueling outage in accordance with the NRC Confirmatory Order dated March 14, 1983.

The alarm would alert the operator that the Safety Limit has been exceeded and that procedures have been violated. In addition, an alarm reflash capability has been incorporated into the annunciator design to indicate closure of the isolation valves for the fifth recirculation loop.

In the control room, there is the following indication of the status of the recirculation pump loops to the operators: (1) Recirculation inlet/outlet valve indication being opened or closed, (2) flow indicating ammeter for each pump, (3) frequency meter for each motor generator set for each pump and (4) a tag on the board above the valve position indicators that states that the operators must have at least two recirculation loops open.

The alarm-only modification would provide an active warning of a potentially unsafe condition, thus preventing accidental isolation of the recirculation loops. Even with the addition of an electrical interlock, operators would still have the ability to isolate more than three of five recirculation loops. This could be done using the interlock bypass feature. The bypass would be necessary to allow isolation of more than three loops when conditions permit. With the alarm-only modifications, an operator would have to disregard his training, violate procedures and ignore the posted warning, and be unaware of the significance of the control switch covers in order to exceed the Safety Limit.

Therefore, based on the above, operation of Oyster Creek with this TSCR:

(1) *Does not involve a significant increase in the probability or consequences of a previously evaluated accident because:* The alarm-only modification meets the functional requirements of providing an active warning of the isolation of four recirculation loops. One open recirculation loop is sufficient to assure adequate communication between the core and downcomer regions. The TS requirements for having at least two recirculation loops open and the alarm and operator training should suffice to maintain one loop open. The operator has adequate time to recognize and correct the problem indicated by the alarm that fewer than two loops are open.

(2) *Does not create the possibility of a new or different kind of accident from any accident previously analyzed because:* The alarm-only modification meets the functional requirements of providing an active warning of the isolation of four recirculation loops. One open recirculation loop is sufficient to assure adequate communication between the core and downcomer regions. The operator has adequate time to recognize and correct the problem indicated by the alarm that fewer than two loops are open.

(3) *Does not involve a significant reduction in a margin of safety because:* The alarm-only modification meets the functional requirements of providing an active warning of the isolation of four recirculation loops. One open recirculation loop is sufficient to assure adequate communication between the core and downcomer regions.

Therefore, because the licensee's request meets the above three criteria in 10 CFR 50.92(c), the staff proposes to determine that the licensee's proposed change does not involve a significant hazards consideration.

Local Public Document Room location: Ocean County Library, 101 Washington Street, Toms River, New Jersey 08753.

NRC Project Director: John A. Zwolinski.

GPU Nuclear Corporation, Docket No. 50–219, Oyster Creek Nuclear Generating Station, Ocean County, New Jersey

Date of amendment request: March 11, 1986 (TSCR 145).

Description of amendment request: Request approval of a change to the Appendix A Technical Specifications (TS) pertaining to the operability of the Rod Worth Minimizer (RWM) during reactor startup. The licensee is proposing to add a note to TS 3.2.B.2.b in Section 3.2, Reactivity Control, of the TS. The note states that during Cycle 11 only, unlimited reactor startups are permitted without the RWM. The Control Pattern Templates (CRPT) must be used during Cycle 11 when the RWM is bypassed or inoperable until 50% control rod density (black and white pattern) is achieved or 10% power is reached whichever occurs first. All other provisions of TS 3.2.B.2.b would remain in effect.

The existing TS 3.2.B.2.b without the note states that should the RWM be inoperable before a startup is commenced or before the first 12 rods are withdrawn, one startup during each calendar year may be performed without the RWM provided that the second licensed operator verifies that the licensed operator at the reactor console is following the rod program and provided that a reactor engineer from the Core Engineering Group also

verifies that the rod program is being followed.

This proposed change to TS 3.2.B.2.b would require the use of a CRPT during control rod withdrawal with the reactor below 10% rated power and control rod insertion densities greater than 50% in a checkerboard withdrawal pattern when the RWM is inoperable. This is in addition to the current TS requirement for a second licensed operator and a core engineer to be present to verify that the operator at the reactor control console is following the rod program. In addition, this proposed change would alter the operability requirements for the RWM by eliminating the restriction of allowing only one reactor startup during each calendar year without the RWM. This proposed change would allow unlimited reactor startups without the RWM in Cycle 11 only.

Cycle 11 will run from the restart of the Cycle 11 Refueling (Cycle 11R) outage to the shutdown for the Cycle 12R outage. This Cycle 11 is expected to run from October 1986 to Summer of 1988.

Basis for proposed no significant hazards consideration determination: The licensee has proposed Technical Specification Change Request (TSCR) No. 145 to add a note to TS 3.2.B.2.b to allow an unlimited number of reactor startups without the RWM in Cycle 11. This would change the restriction in the TS from one startup during each calendar year to an unlimited number in Cycle 11 from Fall 1986 to Summer 1988. The plant should without operational problems run during Cycle 11 with only one startup, the startup from the Cycle 11R outage.

The RWM is discussed in Section 7.7.1.3 of the Oyster Creek Updated Final Safety Analysis Report. The RWM continuously monitors control rod positions, compares the operator selected rod movements and positions against a predetermined rod pattern, and prevents rod movements that are not in accordance with this pattern. The RWM consists of the following components: Digital Computer, Input/Output Control, Input Buffer, Output Buffer, Display and Control Panel, Teletypewriter, and Keylock Switch.

The desired control rod movements are stored in the computer memory together with the actual rod positions. The pre-established control rod pattern is entered into the computer by means of a punched tape; the actual rod-position data is received from the control rod position indicating system. Rod selection and rod drive motion are evaluated by the computer with reference to permissible and existing control rod patterns. If rod operation is in accordance with the selected withdrawal sequence, the RWM output is permissive. If the operator attempts a rod selection or movement that deviates significantly from the selected program, the RWM either alarms or blocks such action.

The present RWM hardware at Oyster Creek is original plant equipment. The licensee stated that, during the past several years, it has been increasingly difficult to maintain the RWM in an operable condition. This is due to the age of the equipment and lack of spare parts. In order to improve the reliability and availability of this system, a new RWM has been scheduled for installation during the upcoming Cycle 11R refueling outage. However, due to a delay in the projected delivery date for the new hardware, installation and startup testing will not be completed prior to the current plant restart date in October of 1986 from the Cycle 11R outage.

In anticipation of future problems with the old RWM during operating Cycle 11 and the possibility of an unplanned shutdown and subsequent restart during operating Cycle 11 while the changeover to the new RWM is in progress with neither the old or new RWM operable, the licensee is proposing a temporary change to the TS for Cycle 11 only, which will allow unlimited startups with an inoperable RWM. The licensee has stated that every effort will be made to maintain the old RWM in an operable status.

The design basis of the RWM is that it should serve as a backup for procedural control in limiting control rod worths so that, in the event of a control rod drop from the reactor core at a more rapid rate than can be achieved by the use of the control rod drive mechanism, the reactivity addition rate would not lead to damage of the Reactor Coolant System nor to significant fuel damage. The RWM is not intended by the licensee to replace operator selection of control patterns, but is intended simply to monitor and reinforce good procedures.

TS 3.2.B.2 addresses the RWM operability requirements during reactor startups. The basis in the TS addresses this as follows:

> The Rod Worth Minimizer provides automatic supervision of conformance to the specified control rod patterns. It serves as a back-up to procedural control of control rod worth. In the event that the RWM is out of service when required, a licensed operator can manually fulfill the control rod pattern conformance functions of the RWM in which case the normal procedural controls are backed up by independent procedural controls to assure conformance during control rod withdrawal.

The licensee started that the first barrier or line of defense in preventing the establishing of high worth control rods is the reactor operator and the control rod withdrawal sequence. By procedures, the reactor operator follows the rod-by-rod withdrawal sequence provided by the core engineer. This sequence, in addition to providing for an efficient startup, minimizes the reactivity worth of the control rods to be withdrawn. The RWM has been designed as a backup to the operator so that if procedures are violated, the RWM will block rod motion.

Given, however, that the RWM is out of service during operation at less than approximately 10% power, less favorable control rod patterns which contain high worth rods in the withdrawal sequence could be set up, but only if the reactor operator violates an operating procedure. If the reactor operator within the bounds established by procedures, whether the RWM is operational or not, the maximum control rod worths of in-sequence control rods are the same. There is nothing inherent in the RWM which, because it is operational, gives lower rod worths than when the operator is running the plant by the same rules without it.

If the RMW is out of service, normal startup procedure would still be followed but would not be automatically monitored. Additional personnel monitoring would be used instead, as discussed in paragraph 3.2.B.2.b of the TS. If no operational errors were committed, rod worths and accident potential would be exactly the same as if the RWM were in operation. Rod grouping in startup sequences utilized in the RWM are exactly those that are the basis for the detailed sequence employed in a normal startup whether monitored by the RWM or not. The question then becomes one of evaluation of the probability of significant operational errors occurring in a startup unmonitored by the RWM.

The mere existence in the core of a high worth rod presents no immediate safetly problem. If is required that a drive-to-blade coupling failure and drive withdrawal occur before an excursion potential exists.

The RWM ensures operator compliance with a predetermined rod withdrawal sequence. However, the functional intent of the RWM can be fulfilled using other methods. The method the licensee proposes in the requirement that the CRPT be employed with a second licensed operator and core engineer being present to verify

VOL 51 ISS 78 AP 23 1986 UMI

that the operator at the reactor control console is following the rod program. The CRPT are fabricated from plastic sheets. A set of CRPT is comprised of four sheets which stack together atop the control rod selection switches. The topmost sheet contains cutouts which permit selection only of the group 1 control rods; the second sheet enables the selection of group 1 and 2 rods, etc., until the bottom sheet which enables the selection of any rod in the checkerboard or black-white pattern. Since the order of withdrawal of control rods within a group is unimportant, the CRPT performs one of the RWM functions by allowing withdrawal of only those rods which are members of the group being withdrawn.

Visual and mechanical features assure the proper stacking order of the various CRPT and correct orientation over the rod selection swithes. First, each panel is clearly and conspicuously marked by group number order. In addition, adjacent sheets are keyed by uniquely positioned cutouts and raised areas, which by matching together, ensure the correct stacking order. Finally, the proper orientation over the rod selection panel is guaranteed by asymmetrical pegs on the console over which the CRPT fit.

There are two basic withdrawal sequences (A and B) which lead to a 50% control rod density or checkboard pattern. Consequently, there is a set of CRPT for Sequence A and another set for Sequence B. Although there are several variations in the basic A and B sequences used to shape the core power distribution, these sequences remain the same in their approach to the 50% rod density. Thus, by the use of the CRPT, the probability of achieving a maximum out-of-sequence rod withdrawal error is effectively reduced to zero. This is because the maximum out-of-sequence control rod worth for a given withdrawal sequence (A or B) is always obtained by inadvertently withdrawing a control rod which is a member of the alternate sequence (B or A, respectively). For this reason only the proper set of templates is provided to the control room; the alternate set is stored in an area not readily accessible to the control room operators.

During those startups where 50% rod density is reached prior to 10% power, rod movement after 50% rod density must proceed without protection from the CRPT. However, the additional operator and core engineer who are verifying that the reactor operator is following the rod program is protection against withdrawal of an out-of sequence rod and in conjunction with relatively low rod worths after 50% rod density and the increase in required rod worths needed to exceed the 280 calories/gram design limit for the rod drop accident compensates for rod withdrawal in this region without the CRPT. Analysis shows that at a reactor power level as low as 2% with a single worst operator withdrawal error, the local energy deposition in the fuel is less than the 280 cal/gram design limit.

This TSCR is being made to allow for more than one reactor startup during each calendar year in Cycle 11 when the RWM is inoperable. This proposed change is an extension of an already existing TS provision. The function of the RWM is manually fulfilled with the addition of a second licensed operator, core engineer and the use of CRPT to ensure conformance to the control rod pattern sequence.

Therefore, based upon the above, operation of Oyster Creek in accordance with the proposed amendment will not:

1. *Involve a significant increase in the probability or consequences of an accident previously evaluated* because the TS allow for restart of the plant without the RWM and the licensee has proposed in its TSCR to follow the requirements in the TS with the additional restriction of using CRPT during startups. The number of restarts without the RWM may significantly increase from one in a calendar year to more than one, but the CRPT provides additional protection to prevent the operators from deviating from the proper withdrawal sequence and the TSCR would apply only for Cycle 11.

2. *Create the possibility of a new or different kind of accident from any accident previously evaluated* because the TS allow for restart of the plant without the RWM.

3. *Involve a significant reduction in a margin of safety* because the design basis of the RWM is to be a backup for the procedural control in limiting control rod worths in control rod withdrawals, the RWM is only required during reactor startup until reactor power reaches 10% of rated power and the licensee has proposed the additional restriction of CRPT to prevent the operators from deviating from the proper withdrawal sequence.

NRC Project Director: John A. Zwolinski.

Indiana and Michigan Electric Company, Docket Nos. 50-315 and 50-316, Donald C. Cook Nuclear Plant, Unit Nos. 1 and 2, Berrien County, Michigan

Date of amendment request: February 28, 1986.

Description of amendment request: The proposed amandment would revise the Technical Specifications by removing the requirements for the sodium hydroxide as an additive to the spray system for inside containment.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards for making a no significant hazards consideration determination by providing certain examples (48 FR 14870). One of the examples (vi) is a change which either may result in some increase to the probability or consequences of a previously analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan. The proposed amendment is directly related to the example.

The sodium hydroxide in the containment sprays provides the required ph levels in the containment sump following an accident in order to control iodine levels inside containment. The caustic sump water also serves to minimize chloride-induced stress corrosion cracking of austennitic stainless steel components and to minimize the hydrogen produced by the corrosion of galvanized surfaces and zinc-based paints. At the D.C. Cook Nuclear Plant, the function of the sodium hydroxide in the sprays to control ph will be replaced by sodium tetreborate now in the containment ice for post-accident boration control. Although the removal of the sodium hydroxide can reduce the margin of safety now provided by both the sodium hydroxide and the sodium tetreborate, the required ph levels are maintained and the calculational methodologies have been previously found acceptable and the applicants calculated doses do not exceed those previously calculated for this facility. Therefore, the Commission proposes to find that the changes do not involve a significant hazards consideration.

NRC Project Director: B.J. Youngblood.

Kansas Gas and Electric Company, Kansas City Power and Light Company, Kansas Electric Power Cooperative, Inc., Docket No. 50-482, Wolf Creek Generating Station, Coffey County, Kansas

Date of application for amendment: March 27, 1986.

Brief description of amendment: This amendment request asks that the inservice visual inspection requirement for 130 out of 1210 snubbers (shock suppressors) be extended for 4 months until the beginning of the first refueling outrage in October 1986. Under the existing requirement these snubbers are scheduled to be inspected by July 1986. These snubbers are located in areas that are inaccessible during reactor operation. No reactor shutdown is scheduled prior to the refueling outage, therefore compliance with this surveillance would require a plant shutdown solely for the purpose of completing this surveillance.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing examples of amendments that are not likely to involve significant hazards considerations (48 FR 14870). Among these examples is, "A change which either may result in some increase to the probability or consequences of a previously analyzed accident or may reduce in some way a safety margin, but where the results of the change are clearly within all acceptable criteria with respect to the system or component specified in the Standard Review Plan:" the licensee has concluded and the NRC staff agrees that the proposed license amendment fits this example in that it reflects a four month extension of a visual surveillance requirement used to gather and establish baseline information on snubber assembly performance.

Wolf Creek Generating Station utilizes only mechanical snubbers with the exception of 16 large bore hydraulic snubbers used in conjunction with its four steam generators. Mechanical snubbers at Wolf Creek Generating Station were manufactured by Pacific Scientific and the hydraulic snubbers were manufactured by Paul Munroe.

Prior to initial installation in the power block, each snubber was visually inspected and mechanically tested to ensure their operability prior to installation. The mechanical portion of this test consisted in part of an acceleration test and a drag force test. Snubber assemblies were not actually installed in the power block until approximately one year prior to Hot Functional Testing. This served to preclude unnecessary exposure of the snubber assemblies to the construction environment present prior to this time. During installation, snubber assemblies were verified to have the correct pin-to-pin dimensions and appropriate swing clearance. A manual stroke test was also performed and verified.

Subsequent to installation, system walkdowns were performed by the constructor, KG&E and the Architect/Engineer to verify correct installation and appropriate configuration. Additionally, approximately 40 percent of the snubber assemblies were inspected to fulfill preservice inspection program requirements. Inspections were also performed during Hot Functional Testing and unit startup to assure snubber operability was not adversely affected by normal thermal expansion. The aforementioned comprehensive preservice testing and inspection program ensure that the snubber assemblies at Wolf Creek Generating Station were fully operational prior to the beginning of Commercial Operation.

In early September 1985, approximately three months after initial Power Operation at Wolf creek Generating Station, 238 snubbers were inspected by KG&E personnel to determine if any snubber assemblies were damaged during construction or unit startup. Although one anubber was found to be improperly oriented, no other anomalies were identified. The anomalous snubber was reoriented and all 238 snubber assemblies were determined to be fully operable.

Since initially entering Mode 3 (HOT STANDBY) on april 26, 1985, the Unit has not reentered Mode 4 (HOT SHUTDOWN). Wolf Creek Generating Station commenced POWER OPERATION on June 6, 1985. Although Wolf Creek Generating Station has experienced four inadvertent safety injections since initially loading fuel, its overall operating history has been exemplary for a first cycle unit, including a continuous run of 134 days. The good performance of the unit has served to minimize the number of cyclical loadings experienced by the snubber assemblies.

After a Unit trip on February 22, 1986, approximately 320 snubber assemblies inside containment were inspected. The majority of these had been categorized as inaccessible during POWER OPERATION. All inspected snubber assemblies were determined to be operable. One of the steam generator hydraulic snubbers was observed to be leaking some fluid, however, this did not impair its operability. The fluid reservoir level of this snubber is being monitored to assure it continued operability.

Since inspections of 64 percent of all safety related and special scope snubber assemblies and 70 percent of all inaccessible snubber assemblies confirmed that all inspected snubbers were visually acceptable and considered operable, it is probable that no inoperable snubbers will be identified during inspections of the remaining inaccesible snubbers. In addition, a period of continuous POWER OPERATION, is unlikely to have any effect on snubber assembly operability.

Technical Specifications require a visual inspection of all snubbers between four and ten months after initial POWER OPERATION. This requirement ensures that installed snubbers remain undamaged and in the appropriate configuration after plant thermal cycles, normally present during the early phase of Cycle 1 operation, have occurred. It further serves to provide baseline information upon which future visual snubbers assembly testing intervals can be established as provided in Technical Specifications. Since 70 percent of all inaccessible snubber assemblies have successfully passed an initial visual inspection, it is expected that any inaccessible snubber assemblies not yet inspected are fully capable of performing their design function as assumed in the FSAR accident analyses. Therefore, the proposed amendment does not involve a significant increase in the probability or consequences of an accident over previous evaluations.

The proposed amendment does not involve hardware modifications, introduces no new systems, modes of operation, failure modes or other plant perturbations. During the current snubber inspections 780 of the 1210 installed snubbers have been visually inspected and found to be acceptable. An additional 300 accessible snubbers will be inspected before the required 10 month surveillance interval expires. Therefore, since only 130 snubbers will remain to be inspected, there is a high level of assurance of snubber operability during the requested 4 month extension.

Therefore, the proposed amendment does not create a possibility of a new or different kind of accident over previous evaluations.

The requested amendment merely extends an existing surveillance interval to allow continued POWER OPERATION until Refuel 1. During

VOL 51 ISS 78 AP 23 1986 UMI

periods of continuous operation at power, minimal cyclical wear of snubber assemblies occurs. The inspections performed to date indicate that the installed snubber assemblies have performed in a wholly satisfactory manner and can be expected to maintain that level of performance. Thus the proposed amendment does not involve a significant reduction in a margin of safety.

Based on the above analysis and the guidance provided by the Commission, it has been determined that the requested Technical Specification revision does not involve a significant increase in the probability of consequences of an accident or other adverse condition over previous evaluations; or create the possibility of a new or different kind of accident or condition over previous evaluations; or involve a significant reduction in a margin of safety. Therefore the requested license amendment does not present a significant hazard.

Accordingly the Commission proposes to determine that these changes do not involve a significant hazards consideration.

Local Public Document Room location: William Allen White Library, Emporia State University, Emporia, Kansas, and Washburn University School of Law, Topeka, Kansas.

Attorney for licensee: Jay Silberg, Esquire, Shaw, Pittman, Potts, and Trowbridge 1800 M Street, NW., Washington, DC 20036.

NRC Project Director: B.J. Youngblood.

Mississippi Power & Light Company, Middle South Energy, Inc., South Mississippi Electric Power Association, Docket No. 50-416, Grand Gulf Nuclear Station, Unit 1, Claiborne County, Mississippi

Date of amendment request: March 21, 1986.

Description of amendment request: The amendment would make two changes in the Technical Specifications: (1) Add a strong motion accelerometer for reactor piping supports in Table 3.3.7.2-1, "Seismic Monitoring Instrumentation" and in Table 4.3.7.2-1, "Seismic Monitoring Instrumentation Surveillance Requirements;" and (2) add automatic depressurization system (ADS) actuation instrumentation, instrumentation set points and surveillance requirements in Tables 3.3.3-1, 3.3.3-2, and 4.3.3.1-1, respectively.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in a margin of safety.

The licensee has provided an analysis of significant hazards considerations in its March 21, 1986, request for a license amendment. The licensee has concluded with appropriate bases, that the proposed amendment satisfies the three standards in 10 CFR 50.92 and, therefore, involves no significant hazards considerations. The NRC staff has made a preliminary review of the licensee's submittal. A summary of staff's review follows.

Change (1), the addition of a strong motion accelerometer for reactor piping supports, resulted from a design change required by License Condition 2.C.(7). The accelerometers will be installed on a piping support for the high pressure core spray system. It will be used, together with five other strong motion accelerometers already installed in the plant, to record data on the seismic response of major structures and systems. The data will be used to confirm that assumptions and methods used in seismic analyses are adequate and that allowable stresses for earthquake loadings are not exceeded so that reactor operation can continue. The instruments are not used for accident mitigation. Change (1) does not involve a significant increase in the probability or consequences of an accident previously evaluated nor does it create the possibility of a new or different kind of accident from any accident previously evaluated because the instrumentation is not a part of plant control instruments nor engineered safety feature actuation circuits but is used solely for monitoring purposes. Change (1) does not involve a significant reduction in a margin of safety because the addition of a sixth accelerometer improves the capability for accurately assessing stresses that occur in structures and piping systems during an earthquake.

Change (2), the addition of automatic depressurization system (ADS) actuation instrumentation, setpoints and surveillance requirements, results from a design change required by License Condition 2.C.(33)(f). A bypass timer will be added to bypass the high drywell pressure permissive if reactor water level remains low for a specified time and a manual inhibit switch will be added to allow the operator to more easily close the ADS valves, when required by the emergency operating procedures. This addition to the ADS logic is designed to satisfy the criteria of NUREG-0737, TMI Action Item II.K.3.18, and will function as a backup for operator action if ADS is required and the drywell high pressure signal is not present. In this case, ADS would be initiated on a low reactor water level signal alone. The accident affected by this change is a main steam line break outside of containment assuming a failure of the high pressure core spray system. For a time delay of 10 minutes, the fuel element peak cladding temperature is calculated to be 1862° F for this accident. The acceptance criterion of 10 CFR 50.46 is that the calculated peak cladding temperature shall not exceed 2200° F. Change (2) does not involve a significant increase in the probability or consequences of an accident previously evaluated nor does it create the possibility of a new or different kind of accident from any accident previously evaluated because the addition of the ADS bypass timer makes accident mitigation more reliable by adding backup automatic ADS actuation for accidents which are presently mitigated by manual ADS actuation alone and because the ADS manual inhibit switch makes operator action required by the emergency operating procedures more reliable. Change (2) does not involve a significant reduction in a margin of safety because the procedures for mitigating the affected accident by manual ADS actuation are not changed and the backup automatic actuation results in a calculated peak cladding temperature for the affected accident that meets the acceptance criterion in 10 CFR 50.46.

Accordingly, the Commission proposes to determine that these changes do not involve a significant hazards consideration.

Local Public Document Room location: Hinds Junior College, McLendon Library, Raymond, Mississippi 39154.

Project Director: Walter R. Butler.

Niagara Mohawk Power Corporation, Docket No. 50-220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of amendment request: December 31, 1985.

Description of amendment request: The proposed amendment would modify Technical Specification Section 3.1.1(f), by eliminating the reference to Section 6.9.2 reportability requirement pertaining to reactivity anomalies. Currently, if the difference between an observed and predicted control rod inventory exceeds the equivalent of one percent in reactivity, the "AEC" must be notified within 24 hours in accordance with Specification 6.9.2 Reference to Section 6.9.2 is an inappropriate requirement and unnecessary due to the AEC's reorganization, the reportability requirements of Sections 50.72 and 50.73 to 10 CFR Part 50 and the intent of Section 6.9.2 being for fire protection related matters only.

Sections 50.72 and 50.73 to 10 CFR Part 50 require that the licensee shall notify the NRC as soon as practical and in all cases within 1 hour if a Technical Specification required plant shutdown occurs. This reportability requirement is also located in Section 6.6.1 of the Technical Specifications. Therefore, if a plant shutdown were to occur due to the conditions stated above, it would be a plant shutdown required by Technical Specifications and thereby reportable in accordance with Section 6.6.1. The current Technical Specifications list two reportability requirements. Therefore, in order to clarify the existing Technical Specifications, an amendment to Section 3.1.1(f) of the Technical Specification has been proposed. Additionally, the referenced Section 6.9.2 outlines actions that must be taken with respect to Fire Protection Program Reports. The referenced section is therefore inapplicable to Section 3.1.1(f) Reactivity Anomalies.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c).

The licensee has presented its determination of no significant hazards consideration as follows:

10 CFR 50.91 requires that at the time a licensee requests an amendment, it must provide the Commission its analysis, using the standards in Section 50.92 about the issue of no significant hazards consideration. Therefore, in accordance with 10 CFR 50.91 and 10 CFR 50.92, the following analysis has been performed:

The proposed amendment in accordance with the operation of Nine Mile Point Unit 1 will not involve a significant increase in the probability or consequences of an accident previously evaluated.

The proposed amendment will clarify the reportability event actions that should be taken if Section 3.1.1(f) becomes effective. Thus the overall performance of Nine Mile Point Unit 1 will be improved.

The proposed amendment in accordance with the operation of Nine Mile Point Unit 1 will not create the probability of a new or different kind of accident from any accident previously evaluated.

The proposed change is not a new procedure. It will eliminate a reportability event action that is obsolete and has since been replaced.

The proposed amendment in accordance with the operation of Nine Mile Point Unit 1 will not involve a significant reduction in a margin of safety.

The proposed amendment will not change the current requirements of our Technical Specifications. Currently, there exists two reportability event actions for the same occurrence. This amendment would eliminate the requirement that is inappropriate and ensure that the correct reportability requirements of 10 CFR 50.72 and 73 are followed.

As determined by the analysis above, this proposed amendment involves no significant hazards considerations.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Therefore, the staff proposes to determine that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: State University College at Oswego, Penfield Library—Documents, Oswego, New York 13126.

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner and Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue, NW., Washington, DC 20006.

NRC Project Director: John A Zwolinski.

Niagara Mohawk Power Corporation, Docket No. 50-220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of amendment request: January 23, 1986.

Description of amendment request: The proposed amendment to the Nine Mile Point Unit 1 Technical Specifications (TS) requests two principal changes. The first change would modify Section 4.2.6.a.2 to list systems containing nonconforming components, as defined in NUREG 0313 Rev. 1, covered under the augmented inservice inspection programs.

The second change would revise the bases to TS Sections 3.2.6 and 4.2.6 referencing the Inservice Inspection and Testing Programs which will be effective following the 1986 outage. In accordance with 10 CFR 50.55a, the inspection interval for both programs will last for 120 months.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c).

Niagara Mohawk Power Corporation (NMPC) has determined that the requested amendment does not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated. The proposed TS amendment reflects changes to the Inservice Inspection and Inservice Testing Programs. These programs have been revised in accordance with 10 CFR 50.55a for the next 120-month interval beginning after the 1986 refuel and maintenance outage. The reference programs have been updated to a newer version of the ASME Section XI Codes, 1983 Edition through Summer 1983 Addendum. This latest code has been reviewed by the Nuclear Regulatory Commission, as indicated in 10 CFR 50.55a. Incorporation of this code into the Inservice Inspection and Inservice Testing Programs will help to assure proper inspection and testing of Nine Mile Point Unit 1.

2. Create the possibility of a new or different kind of accident from any accident previously evaluated for the same reasons as stated in item 1.

3. Involve a significant reduction in the margin of safety because the Inservice Inspection and Inservice Testing Programs have been revised in accordance with 10 CFR 50.55a and are subject to staff review and approval. In addition, Section 4.2.6.a.2 adds more more conservatism by referencing systems which contain nonconforming components, as defined in NUREG 0313, Rev. 1, instead of only service sensitive components. As a result, the reactor cleanup system is now referenced.

Based on the above, NMPC has determined that the proposed amendment involves no significant hazards consideration.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Therefore, the staff proposes to determine that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: State University College at Oswego, Penfield Library—Documents, Oswego, New York 13126.

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner & Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue, NW., Washington, DC 20006.

NRC Project Director: John A. Zwolinski.

VOL 51 ISS 78 AP 23 1986 UMI

Niagara Mohawk Power Corporation, Docket No. 50-220, Nine Mile Point Nuclear Station, Unit No. 1, Oswego County, New York

Date of amendment request: March 4, 1986.

Description of amendment request: The proposed amendment would modify the bases to Technical Specification (TS) Sections 3.1.8 and 4.1.8 and the notes for Tables 3.6.2k and 4.6.2k regarding high pressure coolent injection.

During the 1984 refueling and maintenance outage, Niagara Mohawk modified the high pressure coolant injection/feedwater system instrumentation and control equipment to provide a high reactor coolant trip of the motor-driven feedwater pumps. This modification reduces the probability of a reactor overfill event, and fulfills a prior commitment to the Nuclear Regulatory Commission in a letter dated April 1, 1982 in response to NUREG-0737, Action Item II.D.1.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards determination exists as stated in 10 CFR 50.92(c).

The licensee has presented its determination of no significant hazards considerations as follows:

As required by 10 CFR 50.91, a licensee must provide to the Commission an analysis using the standards in 10 CFR 50.92 about the issue of no significant hazards consideration. Therefore, in accordance with 10 CFR 50.91 and 10 CFR 50.92, the following analysis has been performed.

1. *The proposed amendment in accordance with the operation of Nine Mile Point Unit 1 will not involve significant increase in the probability or consequences of an accident previously evaluated.*

The proposed change incorporates additional requirements on the limiting conditions of operation and surveillance requirements for the high pressure coolant injection system. These specifications place more stringent requirements assuring the proper operation of the high pressure coolant injection system (that is, protection against a reactor overfill event). Therefore, the proposed amendment will not result in a significant increase in the probability or consequences of a accident previously evaluated.

2. *The proposed amendment in accordance with the operation of Nine Mile Point Unit 1 will not create the possibility of a new or different kind of accident from any accident previously evaluated.*

As stated above, this technical specification amendment imposes more stringent limiting conditions and surveillance requirements. Therefore, the proposed amendment will not create the possibility of a new or different kind of accident from any previously evaluated.

3. *The proposed amendment in accordance with the operation of Nine Mile Point Unit 1 will not involve a significant reduction in the margin of safety.*

The increased requirements within Tables 3.6.2k and 4.6.2k will provide more stringent requirements on the high pressure coolant injection system. As a result, the margin of safety will not be reduced.

As determined by the analysis above, this proposed amendment has no significant hazards considerations.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Therefore, the staff proposes to determine that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: State University College at Oswego, Penfield Library—Documents, Oswego, New York 13126.

Attorney for licensee: Troy B. Conner, Jr., Esquire, Conner & Wetterhahn, Suite 1050, 1747 Pennsylvania Avenue, N.W., Washington, D.C. 20006.

NRC Project Director: John A. Zwolinski.

Northeast Nuclear Energy Company, et al., Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of amendment request: January 28, 1986

Description of amendment request: The proposed changes apply to the auxiliary electrical power system. The proposed amendment would change technical specification:

1. 3.9.A.3a by replacing "27.6 kv line" with "23 kv line" (postponed)

2. 3.9.B.2 by replacing "operating" with "operable" and eliminating "and the isolation condenser system is operable"

3. 3.9.B.3 by substituting a new requirement whenever power is unavailable from reserve station service transformer (RSST)

4. by renumbering existing T.S. 3.9.B.3 to 3.9.B.4 and changing 27.6 to 23 kv (postponed).

5. Base 3.9.B by replacing "operating" with "operable", eliminating the requirement for isolation condenser operability and adding a new paragraph relating to conditions for continued reactor operation without power from the RSST.

Basis for proposed no significant hazards consideration determination: Following telephone discussions on February 24, 26, March 3 and 21, 1986 between NRC and NNECO representatives, NNECO submittal dated January 28, 1986 was modified. On March 24, 1986, the licensee provided substitute technical specification pages ¾ 9-2 and 9-3 replacing page ¾ 9-2 and withdrew page ¾ 9-1 of the January 28, 1986 proposed technical specification revisions. Substitute Page ¾ 9-2 corrects a typographical error in section 3.9.B.3 (i.e. 3.4.F. changed to 3.5.F) and restores the 27 kv in the renumbered section 3.9.B.4. (consistent with withdrawal of TS page ¾ 9-1). T.S. page ¾ 9-3 with renumbered paragraph (3.9.B.3 to 3.9.B.4) was also provided. It was unintentionally omitted in the January 28, 1986 submittal.

NNECO has reviewed the proposed revisions in accordance with 10 CFR 50.92, and has concluded that they do not involve a significant hazards consideration. The basis for this conclusion is that the criteria of 10 CFR 50.92(c) are not compromised, a conclusion which is supported by the determinations made pursuant to 10 CFR 50.59. The proposed change is not precisely enveloped by the examples in 48 FR 14870 of amendments that are considered not likely to involve a significant hazards consideration. The licensee noted in a telecopy dated March 24, 1986 that the changes do not involve a significant hazards consideration because the changes would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated:

(a) Replacing "operating" with "operable" eliminates the requirement to operate the emergency power sources during reduced offsite power availability. The requirement for "operation" is an unnecessary challenge to the safety equipment. Frequent operation and testing of the emergency power sources increases the probability of failure of these power sources. In addition, operation of the diesel generator and gas turbine generator loaded increased this fault potential, reducing their reliability. Thus, this change is an improvement in terms of safety.

(b) Eliminating the requirement for isolation condenser availability would permit continued power operation with the plant condenser available as a heat sink. The existing FSAR analysis already discounts the availability of the isolation condenser and offsite power in the accident situation.

(c) The new paragraph in T.S. 3.9.B.3 adds more restrictions on plant operation without the RSST and has no impact on the design basis analysis.

Therefore, this change not increase the probability or consequences of an accident.

(2) Create the possibility of a new or different kind of accident from any accident previously evaluated:

(a) Unnecessary exposure of the emergency power sources to electrical and mechanical damage will be eliminated. No realistic failure modes are introduced by this change.

(b) Deleting the requirement for isolation condenser availability yields an improved plant response to the postulated set of failures.

(c) The new LCO addressing operation without the RSST provides specific requirements which are in accordance with Regulatory Guide 1.93, "Availability of Electric Power Sources."

This change does not create any new situations with regards to events previously evaluated in the FSAR, and therefore, the possibility of a new a or different kind of accident has not been created.

(3) Involve a significant reduction in a margin of safety:

(a) The restrictive requirement to operate the emergency power sources during reduced offsite power availability is an unnecessary challenge. Loading the generators requires that they be paralleled with the degraded offsite power system, subjecting the units to increased fault potential, and significantly increasing the probability of damaging the emergency power sources at a time when their reliability is very critical.

(b) The FSAR accident evaluation was performed without taking credit for an operating isolation condenser. This change will allow for continued power operation when the isolation condenser is unavailable for 24 hours, with more decay heat removal operations available (the main condenser). This is a more favorable condition than the currently required immediate shutdown in a loss of offsite power situation with loss of the isolation condenser.

(c) More restrictions on plant operation have been made and this is conservative with respect to the design basis assumption.

Therefore, the margin of safety is not significantly reduced.

Based on the information provided by the licensee, the staff proposes to determine that the license amendment request, as modified, involves no significant hazards considerations.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Attorney for licensee: Gerald Garfield, Esquire, Day, Berry, & Howard, Counselors at Law, City Place, Hartford, Connecticut 06103-3499.

NRC Project Director: Christopher I. Grimes.

Notheast Nuclear Energy Company, et al., Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of amendment request: February 27, 1986.

Description of amendment request: The proposed amendment clarifies functional testing requirements for the safety/relief valve (SRV) position indication system. The proposed change revises technical specification 4.6.E.5 to read per operating cycle instead of every 18 months and adds the statement "Due to the inaccessibility of the pressure switches in the drywell, the functional test shall consist of injection of a simulated signal into the monitoring channel rather than into the instrument" to technical specification 4.6.E.4.

Basis for proposed no significant hazards consideration determination: On March 21, and April 8, 1986, following NNECO/NRC telephone discussions related to the completeness of the NNECO technical specification change request considering Generic Letter 86-03, NNECO telecopied additional information as a supplemental to the February 27, 1986 submittal. NNECO has reviewed the proposed change, in accordance with 10 CFR 50.92, and has concluded that it does not involve a significant hazards consideration. Operation of Millstone Unit No. 1 in accordance with this change would not:

(1) *Involve a significant increase in the probability or consequences of an accident previously evaluated.* Changing the surveillance cycle from once per 18 months to once per operating cycle brings the surveillance in line with current 18-20 month cycle lengths while allowing some flexibility in meeting the surveillance requirement if the cycle length fluctuates such that it is more or less than 18 months. The probability of any accident is not increased by allowing the surveillance cycle to follow the normal fuel cycle which could be more or less than the previously prescribed 18 months, nor is the consequence or probability of an accident previously evaluated increased by the point of injection of a simulated signal into the circuitry of a channel for monitoring the valve position of the SRVs. The valve position indication system is isolated from both the SRV control circuitry and the reactor coolant system pressure. Thus, no mode exists by which either electrical or mechanical failure of the pressure switches could degrade operation of the SRVs being monitored.

(2) *Create the possibility of a new or different kind of accident from any previously analyzed.* It has been determined that a new or different kind of accident is not possible as a result of this change. The surveillance frequency and/or surveillance methods for systems that have only a passive monitoring function do not create the possibility of a new or different kind of accident.

(3) *Involve a significant reduction in a margin of safety.* The point of introduction of the test signal into the monitoring system is in keeping with maintaining the monitoring system as testable as possible during power operation. Because of the proven operational stability of the pressure switches used for this installation, the seismicity of sensor mountings and the annunciation of circuit failure should the pressure switches fail, no margin of safety is affected by the change.

Additionally, the Commission has provided guidance concerning the application of the standards in 10 CFR 50.92 by providing certain examples (48 FR 14870, April 6, 1983). The proposed change is most clearly enveloped by example (i) of examples considered not likely to involve a significant hazards consideration, a purely administrative change to technical specifications; for example, a change to achieve consistency throughout the technical specification, correction of an error or a change in nomenclature. The proposed change only clarifies functional testing and, therefore, is only administrative in nature.

Based on the information provided by the licensee and the staff safety evaluation for Amendment 98 to Provisional Operating License No. DPR-21 for Millstone Nuclear Power Station, Unit No. 1, which addresses functional testing requirements, the staff proposes to determine that the license amendment request involves no significant hazards consideration.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

NRC Project Director: Christopher I. Grimes.

Northern States Power Company, Docket No. 50-263, Monticello Nuclear Generating Plant, Wright County, Minnesota

Date of amendment request: March 7, 1986.

VOL 51 ISS 78 AP 23 1986 UMI

Description of amendment request: The proposed amendment would change the Technical Specifications (TS) necessary for the operation of Cycle 12. The changes are as follows: (1) Add four ARTS (Average Power Range Monitor, Rod Block Monitor and Technical Specification Improvements Program) curves to the TS, (2) Modify Table 3.11.1 to reflect the addition of Maximum Average Planar Linear Heat Generation Rate (MAPLHGR) for the new BP8DRB299L fuel type; (3) Change the title of Table 3.11.2 and Minimum Critical Power Ratio (MCPR) limits for the fuel types listed in the table. The new title "Rated Minimum Critical Power Ratio" would be abbreviated as "MCPR(100)." And (4) Administrative changes to text and the tables for correct references to reflect the TS changes in the above three items.

Basis for proposed no significant hazards consideration determination: The Commission has provide standards for determining whether a significant hazards considerations determination exists as stated in 10 CFR 50.92(c). For Item (1) "Addition of ARTS curves", the licensee states the proposed amendment would not involve a significant increase in the probability or consequences of an accident previously evaluated. This change has no effect on the probability or consequences of previously evaluated accidents, since the same information is being used to determine the limiting MAPLHGR and MCPR values as in the existing specifications and only the location of the curves is changing.

The proposed amendment would not create the possibility of a new or different kind of accident from any accident previously analyzed. This change would not create the possibility of a new or different kind of accident, since the same information is being used to determine the limiting MAPLHGR and MCPR values as in the existing specifications and only the location of the curves is changing.

The proposed amendment would not involve a significant reduction in the margin of safety. This change has no effect on margin of safety, since the same curves are being used to determine the limiting MAPLHGR and MCPR values as in the existing specifications and only the location of the curves is changing.

In Item 2 above, the licensee proposes use of a new fuel type (BP8DRB299L, GE–7 Barrier Fuel) for Cycle 12 operation. In addition, five columns of Table 3.11.2 have been combined into two and MAPLHGR limits for the P8DRB284LB fuel type are extended to 45,000 MWD/ST. The licensee's evaluation of the proposed changes states that the proposed amendment would not involve a significant increase in the probability or consequences of an accident previously evaluated because the methods used to analyze the Loss of Coolant Accident response of the BP8DRB299L and P8DRB284LB fuel types conform to 10 CFR Part 50 Appendix K requirements and are identical to those previously used. The results of the Loss of Coolant Accident response for BP8DRB299L fuel demonstrate compliance with 10 CFR Part 50, Appendix K.

The proposed amendment would not create the possibility of a new or different kind of accident from any accident previously analyzed because the Loss of Coolant Accident response demonstrates the similarity of this fuel type to previously analyzed fuel.

The proposed amendment would not involve a significant reduction in the margin of safety because the Loss of Coolant Accident response demonstrates compliance with 10 CFR Part 50 Appendix K. The infinite multiplication factor for the new fuel type is 1.25 which would conform with the requirements in Section 5.5 of the Monticello TS. Therefore, the addition of BP8DRB299L fuel and MAPLHGR extension of the P8DRB284LB fuel type would not involve a significant reduction in the margin of safety. This change is the result of a reactor core reloading in which no fuel assemblies are significantly different from those found acceptable previously in Monticello reloads.

In Item (3) above, MCPR limits are changed for fuel types listed in Table 3.11.2. This is the result of the transient analysis performed for the Cycle 12 operation. The changes in the title of the table and the abbreviations are administrative in nature. The licensee has evaluated the proposed change and states that the proposed amendment will not involve a significant increase in the probability or consequences of an accident previously evaluated because the proposed changes are the result of evaluation of the Cycle 12 transient analyses. The results demonstrate that the transient analyses results are within all acceptable criteria.
Therefore, this change would not involve a significant increase in the probability or consequences of an accident previously evaluated. With respect to thermal-hydraulic stability, it was not necessary to perform a stability analysis for Cycle 12, since Cycle 12 is typical of previously evaluated cores which had an acceptable stability margin.

The proposed amendment would not create the possibility of a new or different kind of accident from any accident previously analyzed because this reload is very similar to previous reloads.

The proposed amendment would not involve a significant reduction in the margin of safety as demonstrated by the transient analyses. This change is the result of a reactor core reloading in which no fuel assemblies are significantly different from those found acceptable previously in Monticello reloads. For these reasons, the proposed changes do not involve a significant hazards consideration.

In addition to the above changes, there are several administrative changes (Item 4) associated with the TS changes described in Items 1 through 3 (e.g., correction of the references, table of contents, associated bases of TS changes, change in the title of the table, etc.). The Commission has provided guidance concerning the application of the standards for making a no significant hazards consideration determination by providing certain examples (48 FR 14870). One of these examples (i), is a change that constitutes a purely administrative change to TS: for example, a change to achieve consistency throughout the TS, correction of an error, or a change in nomenclature. The administrative changes associated with the changes proposed in Items 1, 2 & 3 and grouped together as Item 4 fall in this category and thus the staff proposes to determine that these changes involve no significant hazards considerations.

The staff has reviewed the licensee's no significant hazards consideration determination and agrees with the licensee's analysis. Therefore, the staff proposes to determine that the application for amendment involves no significant hazards consideration.

Local Public Document Room location: Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

NRC Project Director: John A. Zwolinski.

Pacific Gas and Electric Company, Docket No. 50–133, Humboldt Bay Power Plant, Unit No. 3 Eureka, California

Date of amendment request: December 16, 1983, as revised March 7, 1986.

Description of amendment request: The licensee requests that license condition E.2.e be deleted. License condition E.2.e was established by the Order of the NRC dated May 21, 1976. The license condition required the reinstatement of a microseismic monitoring network to gather data for seismic studies as a part of the conditions for restarting Humboldt Bay Power Plant, Unit No. 3 (the facility). Since the above Order was issued the licensee has decided not to restart the facility and has submitted a decommissioning plan.

Basis for proposed no significant hazards consideration determination: License condition E.2.e was established to require a seismic data collection system as part of the conditions for restarting the facility following its shutdown on July 2, 1976. We have evaluated the proposed deletion of license condition E.2.e in accordance with 10 CFR Part 50.92. The proposed change would not:

(1) Involve a significant increase in the probability or consequences of an accident previously evaluated. The microseismic network was required to obtain seismic information for studies related to the restart of the facility. It does not provide any function related to facility operations or the present shutdown condition of the facility, nor is it used in conjunction with any safety related system. Thus, the probability of an accident previously evaluated could not be affected by discontinuing operation of the network. In addition, the network does not provide mitigation of the consequences of any accidents. Therefore, the proposed amendment would not increase the probability or consequences of an accident previously evaluated.

(2) Create the possibility of a new or different kind of accident from any previously evaluated because it was not installed for any safety related function and does not provide any function related to the operation or maintenance of the facility.

(3) Involve a significant reduction in the margin of safety because the monitoring network does not perform any safety related function and, therefore, could not contribute to the margin of safety. Thus, the deletion of the requirement for the microseismic monitoring network will not reduce the margin of safety.

Therefore, based on the above considerations and the fact that the facility is permanently shutdown the NRC Staff has determined that this proposed amendment will not involve a significant hazards consideration.

Local Public Document Room location: Eureka-Humboldt County Library, 421 I Street (County Court House) Eureka, California 95501.

Attorney for licensee: Phillip A. Crane, Jr., Pacific Gas and Electric Company, Post Office Box 7442, San Francisco, California 94120.

NRC Project Director: Herbert N. Berkow.

Power Authority of the State of New York, Docket No. 50–286, Indian Point Unit No. 3, Westchester County, New York

Date of amendment request: July 1, 1985, as revised March 10, 1986.

Description of amendment request: This notice describes a revision to an application dated July 1, 1985, which was noticed on August 15, 1985 (50 FR 32801). The subject of the application relates to the Low Temperature Overpressure Protection System (LTOPS).

The revision contained in this application is based on the results of a recent reevaluation concerning the simplified use of LTOPS by the control room operators by including plant specific instrument uncertainties into the related Technical Specifications. Accordingly, the values given for the maximum permissible temperature differential between steam generators and RCS were reduced to account for total instrument errors. These values appear in the action statements of Section 3.1.A.1.h. (Pages 3.1–1a and 3.1–1b) and the curve block notes on the related figures (Figures 3.1.A–1 through 3.1.A–4).

In addition, it should be noted that the errors associated with RCS pressure and pressurizer level were also reevaluated. It was verified that the indicated parameters, provided by control room readings, account for the related process measurement uncertainties.

The purpose of the revision is to enhance the operators' use of the LTOPS Technical Specifications. This result will be achieved by enabling the operators to use direct control room readings, rather than having to compensate for various instrument errors themselves.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92. A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with a proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) Create the possibility of a new of different kind of accident from any accident previously evaluated; or (3) Involve a significant reduction in a margin of safety.

A discussion of these standards as they relate to this amendment follows:

(1) Does the proposed license amendment involve a significant increase in the probability or consequences of an accident previously evaluated?

Neither the probibility nor the consequences of an accident are increased since only the operating requirements for Reactor Coolant Pump RCP starts, in the LTOPS range of operation, are adjusted to compensate for temperature related instrument errors. The secondary to primary maximum allowable temperature differential is reduced, thereby minimizing a possible heat input into the reactor vessel following the start of an RCP.

(2) Does the proposed license amendment create the possibility of a new or different kind of accident from any accident previously evaluate?

The possibility of a new kind of accident is not created since the initiating event for the heat input case is not changed, nor are any physical plant modifications being made. The proposed change will simplify the operators's use of the LTOPS Technical Specifications.

(3) Does the proposed amendment involve a significant reduction in a margin of safety?

By incorporating the instrument errors in the LTOPS Technical Specfications, the margin of safety regarding the reactor vessel pressure-temperature limits is not decreased. The calculated LTOPS temperature related measurement uncertainties for the maximum temperature differential between the steam generators and RCS do not take credit for any of the Appendix G curve conservatisms.

Based on the above, the staff proposes to determine that the proposed changes do not involve a significant hazards consideration.

NRC Project Directorate: Steven A. Varga.

Southern California Edision Company et. al., Docket No. 50–206, San Onofre Nuclear Generating Station, Unit No. 1, San Diego County, California

Date of amendment request: November 7, 1985.

VOL 51 ISS 78 AP 23 1986 UMI

Description of amendment request: The proposed change will delete the requirement to obtain a gross activity sample of the reactor at least once every 72 hours while in operational modes 5 and 6 (cold shutdown and refueling). Currently, existing technical specification 4.1 and Table 4.1.2 require sampling of the reactor coolant system (RCS) at least once every 72 hours in all operational modes.

Basis for proposed no significant hazards consideration determination: In the November 7, 1985 submittal, Southern California Edison Company (the licensee) stated that the proposed change has been determined not to constitute a significant hazards consideration as defined by 10 CFR 50.92. The licensee stated the following:

The basis for obtaining gross activity samples of the RCS is to detect potential increase in primary coolant activity which could impact the site boundary dose consequences in the event of a transient or accident. The associated Limiting Condition for Operation (Specification 3.1.1.) provides time constraints for power operation with increased RCS activity, but not constraints are given for Modes 5 and 6 operation. The premise on which RCS activity limits exist is to limit the potential transfer of RCS inventory beyond the fission product barriers. The worst case accident scenario would be a steam generator tube rupture during power operation. Assuming significant failed fuel prior to the transient, 10 CFR Part 100 dose limits may be exceeded.

Since the proposed change will eliminate, requiring RCS gross activity sampling for Modes 5 and 6 only, at which time the RCS pressure is very low with little or no potenial for transfer of RCS activity beyond the fission product barrier, the consequences of a transient (for which sampling is intended to limit) will not be impacted by the change. Therefore, operation of the facility in accordance with the proposed change will not involve a significant increase in the probability or consequences of an accident previously evaluated.

As stated above, the proposed change involves sampling of the RCS during periods when the RCS is at very low or atmospheric pressure. Based on this low pressure, the probability of transfer of the RCS activity beyond the fission product barriers is very low. Since the premise for RCS activity is ultimately to mitigate the dose consequences of a transient during startup or power operation, the consequences of operation of the facility in accordance with the proposed change are bounded by the more limiting conditions experienced during startup of a new or different kind of accident from any accident previously evaluated.

The margin of safety for Specification 4.1 is established by the associated Limiting Condition for Operation (LCD) (Specification 3.1.1). This LCO contains provisions to continue startup or power operation for pre-established durations in accordance with the projected dose consequences for a transient during that period of time. Since the assumed transient requires a high pressure in the RCS, and the proposed change relates only to periods when the RCS is at very low or atmospheric pressure, the margin of safety will not be impacted by the proposed change. Therefore, operation of the facility in accordance with the proposed change will not involve a significant reduction in a margin of safety.

The staff has reviewed the licensee's submittal and agrees with the licensee's conclusion with respect to 10 CFR 50.92. Therefore, the staff proposes to determine that the proposed action involves no significant hazards consideration.

Southern California Edison Company et al., Docket No. 50-206, San Onofre Nuclear Generating Station, Unit No. 1, San Diego County, California

Date of amendment request: December 17, 1985, and supplemented April 1, 1986 which revises a previous submittal dated June 8, 1984.

Description of amendment request: By letter dated December 17, 1985, Southern California Edison Company (SCE) modified Proposed Change No. 136 regarding fire protection equipment operability and surveillance requirements that had been previously requested on June 8, 1984 and noticed in the Federal Register on July 24, 1984 (49 FR 29922). The changes submitted on December 17, 1985 were requested as a result of the NRC staff's review of the June 8, 1984 submittal. The proposed changes are in seven general areas as described below.

Basis for proposed no significant hazards consideration determination: The first change deals with the concept of Fire Area accessibility for fire watches and patrols as a part of the Action requirements in the event that certain fire protection systems or equipment become inoperable. The concept of temporary inaccessibility of a fire area (due to radiation or other safety hazards) had been confused in the June 1984 submittal with the permanent inaccessibility during plant operation of certain other fire areas (e.g. containment). The ACTION statements which require the establishment of fire watches or fire patrols have been modified in the December 17, 1985 revised Technical Specifications (TS) to more clearly explain when such fire watches or patrols are required.

The Commission has provided guidance concerning the application of the standards for determining whether a significant hazards consideration exists by providing certain examples (48 FR 14870). Example (i) of actions not likely to involve a significant hazards consideration involves a purely administrative change to technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature. The proposed change described above is consistent with Example (i) since it is a clarification of wording to correct a possible error and to achieve consistency throughout the fire protection TS. On this basis, the staff proposes to determine that the change does not involve a significant hazards consideration.

The second change is associated with the elimination of a proposed alternative to the fire watch patrols required by the ACTION statements. In the event of inoperability of certain fire suppression or detection systems, the June 1984 proposed TS allowed as an alternative in lieu of a fire watch patrol, the establishment of the operability of the detection system in a fire area if the suppression system was inoperable; or the establishment of the operability of the suppression system, if the detection system was operable. The NRC staff indicated that this alternative was unacceptable; thus it has been eliminated from the December 17, 1985 revised Technical Specifications.

The Commission's Example (ii) of actions not likely to involve a signficant hazards consideration relates to "a change that constitutes an additional limitation, restriction, or control not presently included in the Technical Specifications, for example, a more stringent surveillance requirement." The elimination of the above-described alternative actions allowed if fire suppression or detection systems became inoperable is a more stringent requirement than the original proposal of June 1984. Thus this change is similar to Example (ii) of the Commission's guidance and on this basis the staff proposes to determine that it does not involve a significant hazards consideration.

The third change is related to the surveillance frequency of fire doors. The June 1984 proposed TS would have reduced the frequency of this surveillance. The NRC staff indicated that this deviation from Standard Technical Specification (STS)

surveillance frequencies was unacceptable. Thus the surveillance requirements for fire doors in the December 17, 1985 proposal have been increased to be consistent with the STS. Since the surveillance requirements will become more stringent, this change is consistent with Example (ii) of Commission's guidance discussed above. On this basis, the staff proposes to determine that the change does not involve a significant hazards consideration.

The fourth change relates to the use of automatic suppression as a compensatory measure when fire barriers become inoperable. Technical Specification 3.14.VII proposed in June 1984 stated that in event a fire barrier separating redundant safe shutdown equipment becomes inoperable, required actions were to either establish the operability of the fire detectors or the automatic suppression system in the area, or to establish a continuous fire watch. The December 17, 1985 submittal revised this TS so that in the event a fire barrier becomes inoperable, both the operability of the fire detectors on one side of the barrier and an hourly patrol must be established; otherwise a continuous fire watch is required. However, in certain areas in lieu of operable fire detectors, the establishment of the operability of certain specified automatic suppression systems is allowed in conjunction with an hourly fire patrol. This change is an additional limitation since it requires that operability be established for both fire detectors (or suppression systems in certain specific cases), *and* an hourly fire patrol whereas the previous proposal only required that the operability of fire detectors *or* automatic suppression systems be established. Since this change is an additional limitation, it is similar to Example (ii) of the Commission's guidance and on this basis the staff proposes to determine that it does not involve a significant hazards consideration.

The fifth change made by the December 17, 1985 submittal is the revision of Table 3.14.3, "Fire Detection Instruments," to further update the listing of the detector configuration at the plant. TS 3.14 VII requires the fire detectors shown in Table 3.14.3 to be operable whenever equipment in the associated fire zones is required to be operable. As indicated in the June 1984 proposal, this table was updated to reflect the new detectors added since the last issuance of the table. The revised table provided on December 17, 1985 reflects additional changes made to the fire detection systems as documented in the Updated Fire Hazards Analysis.

The changes to detectors in the Control Room Administration Building areas proposed by the December 17, 1985 submittal result in an increased number of fire detectors, and therefore represent more stringent operability requirements. Consequently, this proposed change is similar to the Example (ii) of the Commission's guidance on change not likely to involve significant hazards considerations. On this basis, the staff proposes to determine that the proposed change does not involve a significant hazards consideration.

The changes to Table 3.14.3 relating to the Sphere Enclosure Building result in a reduction in the number of fire detectors in that area. By letter dated April 1, 1986, the licensee stated:

The reduced number of detectors in the Sphere Enclosure Building shown in Table 3.14.3 will not involve a significant increase in the probability or the consequences of an accident previously evaluated. This reduction is a result to plant modifications to replace the electrical penetrations. The old penetrations included a metal enclosure on the outboard side of containment which contained terminal blocks for penetration cabling. The enclosure contained thermal fire detectors which monitored the rate of temperature rise of the volume contained in the enclosure. The new replacement penetrations do not include the metal enclosures. Therefore, the thermal fire dectors would no longer be effective and have been removed. The remaining detectors in the fire zone will provide sufficient coverage to ensure timely detection of potential fires in the area.

Since the replacement penetrations are not enclosed, the detectors would not provide additional fire protection and their removal has been shown to be acceptable based on the ability of the existing instruments to detect a fire in the area in sufficient time to take appropriate action. Therefore, the removal of these detectors from Table 3.14.3 will not result in a new or different kind of accident that has not been previously evaluated.

The margin of safety for Technical Specification 3.14 and Table 3.14.3 is provided by early detection of a fire. The thermal detectors removed from Table 3.14.3 only provided detection in the penetration enclosures. Since detection for the replacement penetration will be adequately provided by existing detectors in the fine zone operation of the facility will not involve a significant reduction in th margin of safety.

The staff has reviewed the licensee's above statement and agrees with the licensee's conclusions. Therefore, the staff proposes to determine that the proposed action involves no significant hazards considerations.

The licensee's June 1984 proposal included a specification in all ACTION statements to note that if certain fire protection equipment was inoperable, the provisions of Technical Specification 3.0.A do not apply. TS 3.0.A states that reactor shutdown is required if the limiting conditions for operation are not met and the required action is not taken. However, License Amendment No. 83, issued on November 2, 1984 removed TS 3.0.A and replaced it with TSs 3.0.3 and 3.0.4, which are consistent with the NRC's Standard Technical Specifications. Thus, the licensee's December 17, 1985 proposed Technical Specifications were modified to state that neither TS 3.0.3 or TS 3.0.4 is applicable in the event that certain fire protection equipment is inoperable. This modification is consistent with the NRC's Standard Technical Specifications. TS 3.0.3 is identical to old TS 3.0.A. The staff concludes that the proposed change to renumber the references to old TS 3.0.A, which will be TS 3.0.3, is administrative in nature and is, therefore, consistent with Example (i) of the Commission's guidance discussed above. On this basis, the staff proposes to determine that the proposed change does not involve a significant hazards consideration.

Existing Technical Specification 3.0.4 prohibits entry into an operational mode unless all limiting conditions for operation (LCO) are met without reliance on the provisions contained in the action statements. The proposed change to add the statement that TS 3.0.4 is not applicable when fire protection equipment LCO's are not met is consistent with the Standard Technical Specifications. This change is acceptable since these action statements are designed to provide an equivalent level of fire protection as was provided by the original LCO. Hence, it is acceptable to change operational modes without meeting all fire protection LCO's, as long as the Action statements are met.

Therefore, the proposed change will not result in facility operation that will involve a significant increase in the probability or consequences of an accident previously evaluated, since operation in accordance with the fire protection action statements provides equivalent fire protection as does compliance with the limiting conditions for operation. Similarly, operation of the facility in accordance with the proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated and will not involve a significant reduction in a margin of safety. On this basis, the staff proposes to conclude that the

BEST COPY AVAILABLE

VOL 51 ISS 78 AP 23 1986 UMI

proposed change does not involve a significant hazards consideration.

The final changes related to backup fire suppression capability required when a suppression system is inoperable. Existing TS 3.14.B(3) requires that if a fire hose station is inoperable, and additional equivalent capacity fire hose shall be routed to the area from an operable hose station within 1 hour.

The December 17, 1985 submittal proposes to replace this action with the establishment of backup means of fire suppression, if applicable, within 4 hours and within 4 hours posting of signs above the inoperable hose station and related valves.

The phrase "if applicable" refers to the licensee's intent to define backup fire suppression as the response of the station fire brigade if an operable water source is available within 300 feet. If an operable water source is not available within 300 feet, fire hoses will be run to establish this backup suppression capability. The existing action statements for the LCO's for the other fire suppression systems (foam, sprinklers, spray and Halon) also would be revised to include the phrase "if applicable."

These proposed changes reflect the overall improvement in fire protection capabilities including detection and suppression at the San Onofre 1 site. With improved detection and fire fighting capabilities, both automatic systems and manual, a slight increase (from 1 to 4 hours) in the time to take action in response to an inoperable fire hose will not significantly increase the probability or consequences of a fire on result in a significant decrease in margins of safety.

The intent of running a fire hose to an area with an inoperable suppression system is to ensure that any equipment needed for fire fighting would be available if required. The enhanced capabilities of the fire brigade, including two fire trucks with hoses and other equipment, provide assurance that prompt suppression will be provided. Routing a hose beforehand a backup suppression is needed only when the fire hose cannot be provided by the fire brigade truck, i.e., if the distance to the water source is longer than the hose carried on the truck (300 feet). The proposed definition of backup suppression, therefore, does not affect the probability of an accident already considered nor does it create the possibility of a new kind of accident. With the fire fighting capabilities of the San Onofre fire brigade, the lack of a routed fire hose in the area with an inoperable suppression system will not significantly affect the consequences of a fire or significantly reduce a margin of safety.

Therefore, the staff proposes to conclude that the proposed changes do not involve a significant hazards consideration.

Local Public Document Room location: Main Library, University of California, P.O. Box 19557, Irvine, California 92713.

NRC Project Director: George E. Lear.

Southern California Edison Company et al., Docket No. 50-206, San Onofre Nuclear Generating Station, Unit No. 1, San Diego County, California

Date of amendment request: December 19, 1985.

Description of amendment request: The proposed amendment contains four different changes described below.

(1) Existing Technical Specification 3.7.1.B states that if in Modes 1, 2, 3, or 4, with one or two offsite electrical power circuits inoperable or one or two diesel generators inoperable or a combination of one offsite circuit and one diesel generator inoperable, then the operability of the remaining A.C. power sources must be demonstrated (a) by verifying correct circuit breaker alignments and power availability of the remaining offsite circuits within one hour and at least once per eight (8) hours thereafter, and (b) by starting the remaining diesel generators within one hour and at least once each eight (8) hours thereafter. The proposed amendment would require that the initial diesel test start be performed with 24 hours for loss of either one offsite circuit or one diesel generator, and within 8 hours for loss of two offsite circuits or one offsite circuit and one diesel generator. The requirement to repeatedly start the diesel generator(s) every eight hours after a successful initial test would be eliminated.

(1) Existing Technical Specifications 3.7.1.B requires that if a diesel generator becomes inoperable, it must be restored to operable status within 72 hours or the plant be brought to cold shutdown within the next 36 hours. However, the existing Technical Specifications do not provide any limit on the frequency of diesel inoperability or the total number of days lost due to inoperability over a given period of time. The proposed change provides a limit of 800 hours on the combined out-of-service time available for the two diesel generators in one year (365 consecutive days). Should additional time be needed in a specific situation, the proposed change requires that the NRC be notified of the circumstances. Having thus established a minimum availability goal, this proposed change then increases the existing 72 hour individual out-of-service limit to 7 days (168 hours), thereby permitting greater flexibility in handling diesel generator malfunction and/or servicing needs without recourse to plant shutdown. Both of these proposed limits are applicable to Modes 1, 2, 3, and 4 only.

(3) In Items 1 through 5 of Technical Specification 3.7.1.B, the existing designation "Periodic Testing Requirement," for action statements A and B.1.A of Technical Specification 4.4, has been changed to "Surveillance Requirement."

(4) The first two paragraphs of the *Basis* to Technical Specification 3.7 have been revised to reflect the fact that four (instead of three) San Diego Gas & Electric Company high-voltage lines presently serve San Onofre. The last two paragraphs of the *Basis* have been revised to incorporate a discussion of the proposed out-of-service time limits and to add editorial clarifications.

Basis for proposed no significant hazards consideration determination: In the December 19, 1985 submittal, Southern California Edison Company (the licensee) stated that the proposed change has been determined not to constitute a significant hazards consideration as defined by 10 CFR 50.92. The licensee stated the following:

(a) *Surveillance Starts.* As noted under Description this proposed change affects only the surveillance requirements pertaining to the diesels and not those pertaining to the offsite circuits. Upon loss of required A.C. power, only one surveillance start is deemed necessary to confirm the operability of a diesel generator. By eliminating the repeat diesel surveillance starts as presently required at 8 hour intervals, this proposed change will prevent premature diesel engine degradation and contribute to enhanced plant safety over the long term. Whereas the existing Technical Specifications require demonstration of diesel generator operability within one hour of the initial power loss, this proposed change permits a delay of up to 24 hours after losing one source and 8 hours after losing two sources. These new time limits conform to Generic Letter 84-15 and are consistent with the philosophy to minimize wear on the diesel engine parts. These limits will permit the inoperable power source(s) to be repaired and restored if possible while avoiding and unscheduled diesel start. Although the new limits are a relaxation from the existing surveillance requirements, it is not considered a significant relaxation, in light of the requirement to test the offsite circuits within 1 hour of the inital power loss and every 8 hours thereafter for the duration of the loss. If the inoperable power source cannot be restored to service within a specified time interval, the Technical Specifications require plant shutdown within the next 36 hours. The specified time interval varies according to the type of loss and its safety significance: 2 hours for loss of two diesel generators, 12 hours for loss of one offsite circuit and one diesel generator, 24 hours for loss of two offsite circuits, (eight offsite circuits presently serve San Onofre) 72 hours for loss of one offsite circuit, and 7 days (168 hours) for loss of one diesel generator.

By emphasizing both long term diesel reliability and immediate plant safety requirements under different loss situations, a decrease in the probability or consequences of an accident is obtained.

(b) *Out of Service Time Limits.* Increasing the individual out of service limit from 72 hours to 7 days does not involve a significant increase in the probability or consequences of an accident previously evaluated, considering that

1. The Safety requirement to be in cold shutdown within 36 hours if the out-of-service limit has been exceeded and the inoperable power source remains inoperable is unchanged. (In practice, it takes about 12 hours to achieve cold shutdown from Model 1 temperature conditions).

2. The annual limit will insure that the actual out-of-service time is in all cases within reasonable limits and unnecessary diesel idle time is avoided.

3. In the history of San Onofre Unit 1, the switchyard has never been completely de-energized. Presently eight offsite transmission circuits serve San Onofre, whereas only two circuits are required by the Technical Specifications.

The proposed 800 hour limit on the total annually allowed diesel out of service time in Modes 1, 2, 3 and 4 will serve as an incentive in scheduling and completing all diesel maintenance in such a manner that diesel availability remains high. If downtime in excess of the 800 hour limit is needed, the Technical Specifications require notification to the NRC instead of requiring plant shutdown. This provision is based on the recognition that exceeding the 800 hour limit in itself does not represent an unsafe condition but each individual case should be evaluated in the light of all the relevant factors and concerns. Based on the above, it is concluded that the introduction of an annual out of service limit will not result in the probability or consequences of an accident previously evaluated being increased.

(c) *Periodic Testing Requirement.* The change from "Periodic Testing Requirement" to "Surveillance Requirement is editorial (no safety significance).

(d) *Basis to Technical Specification 3.7.* The various changes to the *Basis* are only for the purposes of updating and clarifying the text and including a discussion of the proposed out of service time limits. These changes do not affect the actual Technical Specifications.

These proposed changes do not change the configuration of the plant, or its manner of operation but rather, for sake of prolonging diesel engine life and providing better diesel maintenance, these changes reduce the amount of diesel testing and increase the time allowed for diesel repair and maintenance in individual cases. The safety requirement to complete cold shutdown within 36 hours if a limiting condition for operation is not met remains in place. Based on these considerations, these proposed changes do not create the possibility of a new or different kind of accident from any previously evaluated. By preventing premature diesel generator degradation and by limiting the total amount of diesel engine downtime spent annually on repairs, maintenance, and servicing in Modes 1 through 4, the overall plant safety will actually be increased, without causing a significant reduction in any specific margin of safety.

The staff has reviewed the licensee's submittal and agrees with the licensee's conclusion with respect to 10 CFR 50.92. Therefore, the staff proposes to determine that the proposed action involves no significant hazards consideration.

Local Public Document Room Location: Main Library, University of California, P.O. Box 19557, Irvine, California 92713.

Attorney for licensee: Charles R. Kocher, Assistant General Counsel, James Beoletto, Esquire, Southern California Edison Company, P.O. Box 800 Rosemead, California 91770.

NRC Project Director: George E. Lear.

Southern California Edison Company et al., Docket No. 50-206, San Onofre Nuclear Generating Station, Unit No. 1, San Diego County, California

Date of amendment request: March 28, 1986.

Description of amendment request: Existing Technical Specification (TS) 4.10 delineates surveillance requirements for high energy fluid piping systems outside primary containment to monitor the continuing integrity of these systems. Periodic inservice inspection (ISI) of these piping systems provides a means for timely detection of flaws prior to failure of the piping. This inspection program henceforth referred to as the augmented ISI, is performed in areas where safety systems are not protected from any postulated breaks in the high energy fluid piping systems outside containment. A more comprehensive program, henceforth referred to as the overall ISI, establishes surveillance requirements for all Class 1, 2, and 3 pressure retaining components and their supports and is provided by Technical Specification 4.7, Inservice Inspection Requirements.

The purpose of the March 28, 1986 proposed change is to modify existing TS 4.10 to allow revision of the augmented ISI schedule to consistent with that of the overall ISI as delineated by Technical Specification 4.7. This revision will allow the consistent application of ISI techniques on a plant wide basis.

The existing TS 4.10 Part A. (2).b requires that the augmented ISI be conducted during successive 3 1/3 year periods (40 months) and shall be updated to comply, to the extent practical, with the requirements in editions of Section XI of the ASME Code and Addenda in effect no more than six months prior to the start of each 40 month period, with due consideration given to physical access. Accordingly, TS 4.10 requires that the licensee, at present, use the 1980 Edition through 1981 Winter Addenda of Section XI of the ASME Code, henceforth referred to as the 1980 Edition, on the limited scope of structures and components noted above. The overall ISI program, however, is based on the 1974 Edition through 1975 Summer Addenda of Section XI for the ASME Code, henceforth referred to as the 1974 Edition.

The program that San Onofre Unit 1 current implements for augmented ISI of high energy lines outside of containment specifies that welds in these lines be 100% volumetrically inspected. Application of the 1980 Edition would instead require that the licensee perform a volumetric inspection of the inner one-third of the weld and perform a surface examination of the weld to be inspected.

Basis for proposed no significant hazards consideration determination: In the March 28, 1986 submittal, Southern California Edison Company (the licensee) stated that the proposed change has been determined not to constitute a significant hazards consideration as defined by 10 CFR 50.92. The licensee stated the following:

This proposed change modifies the technical specifications for the augmented inservice inspection (ISI) of specific high energy lines outside containment to be consistent with the overall ISI program. The acceptability of consequences for the spectrum of accidents associated with the overall ISI program ensures that consistent application of ISI techniques will provide early detection of flaws and continued structural integrity of high energy lines. Therefore, it is concluded that operation of the facility in accordance with this proposed change will not involve a significant increase in the probability or consequences of an accident previously evaluated.

This proposed change will modify the technical specifications to require revision of the augmented ISI program on a 120 month schedule, consistent with the remainder of

VOL 51 ISS 78 AP 23 1986 UMI

the ISI program. It has been previously determined that the overall ISI program is appropriate for early detection of flaws in high energy lines. Further, this proposed change will allow continued application of an inspection technique currently being used at San Onofre Unit 1. Therefore, it is concluded that operation of the facility in accordance with this proposed change will not create the possibility of a new or different kind of accident from any accident previously evaluated.

This proposed change will allow revision of the augmented ISI program on an appropriate schedule. The revised schedule will be consistent with the overall ISI program and will ensure continue structural integrity of the effected piping systems over their service lifetime. This change will not involve a revision to the frequency at which inservice inspections are performed nor will it revise the current inspection technique. Based on these considerations, this change will not impact the margin of safety of this technical specification as defined by the ability to detect a potential flaw in a timely manner. Therefore, it is concluded that operation of the facility in accordance with this proposed change will not involve a significant reduction in a margin of safety.

The staff has reviewed the licensee's submittal and agrees with the licensee's conclusion with respect to 10 CFR 50.92. Therefore, the staff proposes to determine that the proposed action involves no significant hazards consideration.

Local Public Document Room location: Main Library, University of California, P.O. Box 19557, Irvine, CA 92713.

NRC Project Director: George E. Lear.

Virginia Electric and Power Company, Docket Nos. 50–338 and 50–339, North Anna Power Station, Units No. 1 and No. 2, Louisa County, Virginia

Date of amendment request: December 19, 1985.

Description of Amendment Request: The proposed changes would revise the NA–1&2 Technical Specifications (TS) regarding Emergency Diesel Generator (EDG) surveillance testing. These changes would revise the present NA–1 TS surveillance test requirements by reducing the starting and loading practices for each test, and reducing the number of tests which apply to both routine surveillance and special tests. The proposed changes for NA–1 are in accordance with the appropriate recommendations provided in the Commission's Generic Letter 84–15, "Proposed Staff Actions to Improve and Maintain Diesel Generator Reliability" dated July 2, 1984. Additionally, the instant proposed changes for NA–1 are identical (except as noted below) to the Commission approved NA–2 Amendment No. 48 issued on April 25, 1985, which also addressed the subject of improving and maintaining EDG reliability.

A proposed change for NA–1 (which is different from the already approved NA–2 Amendment No. 48) would clarify the inconsistent usage of a defined termed that currently appears in the NA–2 TS in Surveillance Requirement (SR) 4.8.1.1.2.c Specifically, the proposed change would substitute the words "rotating test basis" for the words "STAGGERED TEST BASIS." The original intent of the SR was to require the fast starting and loading of the EDG's once every six months and to sequentially utilize one of three different initiating signals for each of these tests. This proposed change does not alter the original intent of the SR, but provides additional clarification of the requirement. This change is also being proposed for NA–2. Finally, administrative changes have been proposed for the NA–2 TS which correct three typographical errors.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR Part 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The probability of occurrence or the consequences of an accident or malfunction of equipment important to safety previously evaluated is not increased by the proposed changes. Reducing the test frequency and modifying starting and loading requirements consistent with Generic Letter 84–15 recommendations will enhance diesel reliability by minimizing severe test conditions which can lead to premature failures. Also, the possibility for an accident or malfunction of a type different than previously evaluated is not created since the proposed changes affect only testing frequency, starting and loading practices and have no actual impact on any previously analyzed accident in the Final Safety Analysis Report. Finally, the margin of safety as defined in the basis for any Technical Specification is not reduced. The changes in the testing requirements do not adversely affect the capability of the diesels to perform their function. Rather, the purpose of the changes is to increase overall diesel generator reliability. Therefore, based on these considerations and the criteria given above, the Commission has made a proposed determination that the amendment request involves no significant hazards consideration.

Based on the above, the proposed amendments will not result in a significant hazards consideration as specified in 10 CFR Part 50.92(c). Therefore, the NRC staff proposes to determine that the standards for determining that the proposed amendments to the licenses involve no significant hazards consideration are met, and that operation of the facility in accordance with the proposed amendments would not involve a significant hazards consideration.

NRC Project Director: Lester S. Rubenstein.

Virginia Electric and Power Company, Docket Nos. 50–338 and 50–339, North Anna Power Station, Units No. 1 and No. 2, Louisa County, Virginia

Date of amendment request: January 3, 1986.

Description of Amendment Request: The proposed change would revise the NA–1&2 Technical Specifications (TS) by changing the negative end-of-cycle (EOC) moderator temperature coefficient (MTC) limit from the current value of -4.0×10^{-4} delta k/k°F to -4.4×10^{-4} delta k/k°F and change the corresponding 330 parts per million (ppm) equilibrium boron concentration value from -3.1×10^{-4} delta k/k°F to -3.3×10^{-4} delta k/k°F. In addition, because of the difficulty in performing MTC measurements near end of hot full power reactivity, the proposed changes would eliminate the MTC testing at EOC provided a measurement at less than or equal to ( ) 60 ppm is less negative than -4.0×10^{-4} delta k/k°F. The proposed changes would update the EOC MTC limits to reflect current plant operating conditions. In addition, the proposed changes conservatively envelope plant operating conditions for a proposed core uprate to 2893 Megawatts thermal (MWt).

The NA–1&2 TS require that the MTC be confirmed as the fuel cycle approaches the 0 ppm boron concentration end point of EOC conditions. The negative EOC MTC limit is currently -4.0×10^{-4} delta k/k°F in the NA–1&2 TS (Section 3.1.1.4.b). The value of the EOC MTC is measured upon reaching an equilibrium boron concentration of 300 ppm. The current TS value for this measurement point is -3.1×10^{-4} delta k/k°F (Section 4.1.1.4.b). If the measured MTC is within this value, no further checks of MTC against the EOC negative MTC limit are necessary. If the measured MTC at the 300 ppm boron check point violates the TS value, operation of the unit may continue if MTC measurements are taken at least every 14 effective full power days and found to be within the -4.0×10^{-4} delta k/k°F EOC limit.

Bases Section 3/4.1.1.4 of the NA–1&2 TS identifies the source for the MTC limit and the conversions used to derive the value for measurement comparison at the 300 ppm equilibrium boron concentration point. The most negative MTC value is based on the limiting moderator density coefficient (MDC), used in the NA–1&2 Chapter 15 Final Safety Analyses Report analyses.

The resulting EOC negative MTC limit and negative MTC value at the 300 ppm equilibrium boron concentration measurement point are -4.4×10^{-4} delta k/k/°F and -3.3×10^{-4} delta k/k/°F, respectively. The differences between these values and the current TS of limits of -4.0×10^{-4} delta k/k/°F and -3.1×10^{-4} delta k/k/°F are primarily due to a difference in the derivative of water density with respect to temperature at the current core operating conditions.

Once the equilibrium boron concentration falls below about 60 ppm, dilution operations take an extended amount of time due to the large required volume of dilution water. For example, dilution of the Reactor Coolant System from 50 ppm to 40 ppm requires charging of about 17,000 gallons of primary grade water and would require over 2 hours. These extended dilution times make reliable MTC measurements difficult to obtain due to any of a variety of fluctuations in the system conditions which could take place over this time interval.

As a result of this difficulty, the proposed change to TS 4:1.3.4.b would eliminate further MTC measurements provided a measurement of 60 ppm equilibrium boron (all rods withdrawn, rated thermal power conditions) is less negative than -4.0×10^{-4} delta k/k/°F. Calculations have shown that this condition the -4.4×10^{-4} delta k/k/°F limit will always be met at the licensed end of cycle, conservatively accounting for the effects of control rods, burnup, boron concentration and end of cycle coastdown.

The proposed TS continue to ensure that the acceptance criteria for the NA–1&2 UFSAR accident analyses are met. The current NA–1&2 UFSAR accident analyses were reviewed and it has been concluded that none of the accidents are impacted by this proposed change. The limiting value used in the UFSAR safety analysis is the positive MDC limit value, and this value is not changed by the proposed TS changes, thus, the current analyses remain bounding.

Basis for proposed no significant hazards consideration determination: The Commission has provided standards for determining whether a signficant hazards consideration exists as stated in 10 CFR Part 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

Based on the discussion above, the proposed change does not increase the probability of occurrence or the consequences of accidents important to safety as previously evaluated in the safety analysis. The limiting value of the MDC used in the transient analyses has not changed and the current accident analyses remain bounding. Also, the possibility for an accident or malfunction of a different type than any evaluated in the Safety Analysis Report is not created. This change does not affect any of the physical components in any of the plant systems and therefore does not produce any new or unique accident precursors. Finally, the margin of safety, as defined in the basis for the affected Technical Specifications, is not changed. Since the analyses remain bounding, there is no reduction in any of the plant safety margins involved.

Based on the above, the proposed amendment will not result in a significant hazards consideration as specified in 10 CFR Part 50.92(c). Therefore, the NRC staff proposes to determine that the standards for determining that the proposed amendments to the license involve no significant hazards consideration are met, and that operation of the facility in accordance with the proposed amendments would not involve a signficant hazards consideration.

Local Public Document Room location: Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia 23093 and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

NRC Project Director: Lester S. Rubenstein.

Virginia Electric and Power Company, Docket No. 50–338, North Anna Power Station, Unit No. 1, Louisa County, Virginia

Date of amendment request: May 17, 1985, as superseded November 15, 1985.

Description of amendment request: The proposed change would correct erorrs in the Technical Specifications (TS) of seismic instrument range and testing requirements. The proposed change would also delete the functional test requirement for the Auxiliary Building Mat, Reactor Heat Removal (RHR) Pipe Support and Component Cooling Heat Exchanger Support. In addition, the proposed change would modify the scope of the semiannual channel functional test of the containment mat triaxial recorder.

As presently specified, TS Table 3.3–7 lists the instrument measurement range to be 0g to 34g for the triaxial response spectrum recorders. The correct range should be 1.0 H_z to 30 H_z and is consistent with the American National Standards Institute (ANSI)/American Nuclear Society (ANS).

The current surveillance requirements for seismic monitoring instrumentation require semi-annual functional tests for the four triaxial response recorders listed in TS Table 4.3–4. Three of these recorders (the Auxiliary Building Mat, RHR Pipe Support and Component Cooling Heat Exchanger Support) are passive devices with no remote indications. Guidance provided by NRC Regulatory Guide 1.12, 1974, and ANSI/ANS Standard 2.2, 1978, indicate that these recorders do not require a channel functional test. Table 1 of ANSI/ANS Standard 2.2 on frequency of maintenance specifically recommends that no channel functional test be performed for self contained, passive instruments. The proposed change

VOL 51 ISS 78 AP 23 1986 UMI

would revise the specifications to be consistent with current regulatory guidance and also the manufacturer's recommendations.

The fourth of these triaxial response recorders is the Containment Mat triaxial response recorder. This recorder is an inaccessible, active device with a remote indication (annunciator). Present surveillance requirements as specified in the NA–1 TS require semiannual functional testing of this recorder. The containment mat triaxial response recorder is the only one of these passive devices with a remote indication (annunciator). The recorder itself is primarily a mechanical device, consisting of an event recording plate and a scriber. During a seismic event, the scriber will record scriber shank deflection by etching the motion on the plate. This plate would subsequently be removed for post-event analysis. The associated annunciator is used to alert the operator that the device has recorded scriber motion. Within the recorder, the annunciator circuitry consists of alarm contacts which interface with the scriber should significant motion occur. The current NA–1 TS require that this instrument be opened and the scriber be moved by hand until the contacts close and a light in the remote indicator illuminates to satisfy the channel functional test requirements.

Past semi-annual functional testing of the containment mat recorder has required containment entry (at power) which requires commensurate protective clothing self-contained breathing apparatus and limited access time because of ALARA concerns. Past semi-annual testing has also resulted in damage to the equipment such as a bent scriber shank or bent annunciator contacts since personnel must manipulate the scriber with bulky protective gloves. Also, based on past semi-annual testing, corrosion problems and broken contacts have occurred. It is postulated that the occurrence of corrosion within the recorder has been caused by the introduction of highly humidity environments into the internals of the containment mat triaxial device during functional testing.

The NRC staff finds the requirement to open the Containment Mat recorder and manipulate the scriber for the semi-annual Channel Functional Test to be unwarranted and, therefore, should be deleted. However, the proposed changes to the NA–1 TS would require a visual inspection and annunciator check (using the keyswitch) on a semi-annual basis. Finally, the TS, as presently specified, also require a calibration of the triaxial response recorder during refueling operations and include the Channel Functional Test.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of these standards by providing certain examples which were published in the Federal Register on April 6, 1983 (48 FR 14870). Examples of actions not likely to involve a significant hazard consideration include actions specified as (i) purely administrative changes to the TS to correct an error and (vii) changes made to conform with the regulations where the change results in very minor changes to facility operations clearly in keeping with the regulations. Also, the Commission has provided standards for determining whether a significant hazards consideration exists as stated in 10 CFR 50.92(c). A proposed amendment to an operating license for a facility involves no significant hazards considerations if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The portion of the proposed change which addressed the instrument measurement range is similar to example (i) in that it corrects an incorrectly specified frequency range for the triaxial response spectrum recorders. The correct range is specified in the North Anna Updated Final Safety Analysis Report and is also consistent with applicable ANSI standards. Therefore, this portion of the change is enveloped by example (i).

The portion of the proposed change which addresses the three triaxial response recorders (Auxiliary Building Mat, RHR Pipe Support and Component Cooling Heat Exchanger Support) is similar to example (vii) in that the proposed change for the deletion of the periodic functional testing for the components is clearly within the acceptable criteria (NRC Regulatory Guides, ANSI Standards and manufacturer's recommendations) for the components. In fact, both current regulatory guidance and the manufacturer's recommendations indicate that the functional test requirement may be detrimental to proper equipment functioning. Assurance that the equipment will perform its intended function continues to be provided through periodic calibration requirements. Thus, this portion of the change is enveloped by example (vii). The portion of the proposed change which addresses the Containment Mat triaxial response recorder will not increase the probability or consequences of a malfunction of equipment previously evaluated in the NA–1&2 UFSAR. Rather, this portion of the proposed change will enhance instrument availability by eliminating an instrument test which has a high probability of damaging the response recorder. Also, the possibility of a new or different kind of accident from that which was previously evaluated in the NA–1&2 UFSAR has not been created. The change only modifies a surveillance test without reducing the capability of the response recorder to perform its intended function. Finally, the proposed change for the response recorder does not involve a significant reduction in a safety margin since operability of the remote indication will be verified by functional test. Moreover, operability is enhanced by eliminating a potential damaging test of the response recorder. Therefore, based on the above, the proposed change involving the response recorder will not result in a significant increase in the probability or consequences of an accident previously considered, will not create the possibility of a new or different accident from any evaluated previously, and will not significantly reduce the margin of safety.

Thus, the proposed changes as discussed above are either enveloped by examples (i) and (vii) as published in the Federal Register (48 FR 14870) or the criteria specified in 10 CFR 50.92(c). Therefore, the NRC staff proposes to determine that the standards for determining that the proposed change in its entirety involves no significant hazards considerations are met, and that operation of the facility in accordance with the proposed changes would not involve a significant hazards consideration.

Local Public Document Room locations: Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia 23093 and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Attorney for licensee: Michael W. Maupin, Esq., Hunton, Williams, Gay and Gibson, P.O. Box 1535, Richmond, Virginia 23212.

NRC Project Director: Lester S. Rubenstein.

Virginia Electric and Power Company, Docket No. 50–338, North Anna Power Station, Unit No. 1, Louisa County, Virginia

Date of amendment request: February 5, 1985.

Description of amendment request: The proposed change to the NA–1 Technical Specifications (TS) would revise Table 3.3.–1. Table 3.3.–1 identifies instrument operability requirements and associated action statements for Reactor Trip System Instrumentation.

The proposed changes to Table 3.3–1 correct a typographical error in the action statements for the Overtemperature Delta T and Overpower Delta T trip function instrumentation. Action statement number 2 is presently specified. The correct action statement number is 7. Correcting this error makes the NA–1 TS consistent with NA–2 and the Westinghouse Standard Technical Specifications.

The licensee believes that the presently specified number is the result of a typographical error which was introduced during initial plant licensing. Action statement number 2 is clearly not applicable as it refers to nuclear instrumentation inoperability.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of standards for determining whether a proposed action involves a significant hazards consideration by providing certain examples (See 48 FR 14870). Example (i) states: "A purely administrative change to technical specifications: for example, a change to achieve consistency throughout the technical specifications, correction of an error, or a change in nomenclature." The proposed change falls within the envelope of example (i) since the change would achieve consistency between the NA–1&2 TS and correct a typographical error presently existing in the NA–1 TS.

Local Public Document Room locations: Board of Supervisors Office, Louisa County Courthouse, Louisa, Virginia 23093 and the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901.

Attorney for licensee: Michael W. Maupin, Esq., Hunton, Williams, Gay and Gibson, P.O. Box 1535, Richmond, Virginia 23212.

NRC Project Director: Lester S. Rubenstein.

Virginia Electric and Power Company, Docket Nos. 50–280 and 50–281, Surry Power Station, Unit Nos. 1 and 2, Surry County, Virginia

Date of amendment request: December 13, 1985.

Description of amendment request: The proposed amendments to the Surry Power Station, Unit Nos. 1 and 2 licenses (DPR–32 and DPR–37, respectively) provide for the incorporation of the requirement to adhere to the Integrated Implementation Schedule Plan (the Plan). As stated to the NRC by letter dated December 13, 1985, Virginia Electric and Power Company (VEPCO) has conducted a comprehensive compilation and assessment of current and planned work issues, both regulatory and non-regulatory, and has developed a "schedule" for resolution of the issues. The proposed amendments would become effective on the date of issuance by the NRC for a period of three years, and may be renewed upon application by VEPCO.

The Plan describes the responsibilities and requirements associated with the process of incorporated the issues, initiated by the NRC or the licensee, into the Integrated Schedule. The "schedule" refers to the actual schedule of tasks/issues to be performed in the future. The proposed license condition specifies that the Plan shall be followed by the licensee from and after the effective date of the proposed amendments, and that changes to the dates for completion of issues may require a license amendment. In particular, all Schedule A issues, that is, issues established by existing rule, order, license condition, or technical specification, shall be changed only in accordance with applicable NRC procedures. Schedule B issues are comprised of:

(i) Regulatory issues of either a generic or plant specific nature identified by the NRC, which have dates committed to by the licensee, and which would result in either (a) plant modifications, (b) procedure revisions, or (c) changes in facility staffing requirements, and;

(ii) All other issues identified by VEPCO or other agencies.

Specifically, changes to the Plan and its issue resolutions and schedules shall be in accordance with the provisions of the Plan, and are summarized as follows:

(a) Changes to issue resolutions and/or schedules for Schedule A issues will continue to be sought through the applicable NRC approval process (e.g., license amendment, exemption or Order-date extension process).

(b) Changes to issue resolutions and/or schedules for Schedule B issues will require VEPCO to provide the NRC with prior notification of such changes to enable further explanation or discussion.

(c) Provisions have been established in the Plan for incorporating new regulatory issues into Schedules A and B as these are identified or formalized by rule, order or license condition by the NRC.

The objective of this program is to enable the licensee to utilize improved control of available resources and to perform required activities in a manner which would enhance plant safety. Concurrently, this program provides a method to assess, coordinate and schedule all necessary work at the facility including the performance of regulatory requirements. Periodic updating of the Integrated Implementation Schedule Plan for both Schedule A and B items shall occur semiannually. The revised Integrated Implementation Schedule Plan will include a progress summary, the identification of changes since the last update report, and a summary of the reasons for schedule changes associated with regulatory issues.

VEPCO recognizes that this proposed plan may require future modifications. Accordingly, the licensee will submit the proposed changes to the NRC as amendment applications.

Basis for proposed no significant hazards consideration determination: The Commission has provided guidance concerning the application of the standards for determining whether a no significant hazards exists by providing certain examples (48 FR 14870). An example of an action not likely to involve a significant hazards consideration is Example (ii) which states in part "A change that constitutes an additional limitation, restriction, or control not presently included in the technical specifications . . . ." The entire proposed program plan places additional limitations and controls on activities to be performed for and at the facility. The proposed Plan is also designed to facilitate the licensee's action in satisfying regulatory issues more efficiently and effectively. All proposed revisions to the Plan must receive prior NRC approval. All changes to Schedule A items (as discussed above) must also receive prior NRC approval.

Therefore, since the incorporation of the Integrated Implementation Schedule Plan involves changes similar to those encompassed by Example (ii), the staff proposes to determine that the proposed

VOL 51 ISS 78 AP 23 1986 UMI

application does not involve a significant hazards consideration.

Local Public Document Room location: Swem Library, College of William and Mary, Williamsburg, Virginia 23185.

Attorney for licensee: Mr. Michael W. Maupin, Hunton and Williams, Post Office Box 1535, Richmond, Virginia 23213.

NRC Project Director: Lester S. Rubenstein.

Washington Public Power Supply System, Docket No. 50-397, WNP-2, Richland, Washington

Date of amendment request: January 17, 1986.

Description of amendment request: This proposed amendment, if approved, will modify the WNP-2 Technical Specifications by changing Technical Specification Table 3.6.4.3-1, "Motor Operated Valves Thermal Overload Protection" to add valves previously omitted, add valves as as result of system upgrades, and remove valves having no safety related function.

The valves previously omitted from the Technical Specifications Table were inadvertently left out of the original table when the Technical Specifications were created prior to licensing. The valves being added resulted from the fuel pool cooling modifications that were committed to prior to licensing and were recently effected. The valves being removed from the table were incorrectly inserted when the Table was created as they are not used in any safety related system.

Basis for no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from an accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has determined, and the staff agrees, that the requested amendment does not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated because the proposed changes and additions to the list do not deviate from the existing overload design criteria and the removal of non-safety related valves from the list has no affect on the probability or consequences of a previously evaluated addident; or (2) create the possibility of a new or different kind of accident from an accident previously evaluated because the overload design criteria have not been changed, the additions have adhered to the criteria and the deletion of non-safety related valves does not introduce a new or different kind of accident; or (3) involve a significant reduction in a margin of safety because as discussed in (1) the added valves conform to the overload design criteria and hence do not challenge a safety margin and the removal of non-safety related valves can not impact a safety margin.

Based on our review of the proposed modification, the staff finds that there exists reasonable assurance that this proposed change will have little or no impact on the public health and safety. Accordingly, the Commission proposes to determine that the proposed change to the WNP-2 Technical Specifications involves no significant hazards considerations.

Local Public Document Room: Richland Public Library, Swift and Northgate Streets, Richland, Washington 99352.

Attorney for the Licensee: Nicholas Reynolds, Esquire, Bishop, Liberman, Cook, Purcell and Reynolds, 1200 Seventeenth Street NW, Washington, DC 20036.

NRC Project Director: E. Adensam.

Washington Public Power Supply System, Docket No. 50-397, WNP-2, Richland, Washington

Dates of Amendment Request: January 17, 1986 and February 18, 1986.

Description of Amendment Request: This proposed amendent, if approved, will modify the WNP-2 Technical Specification Table 3.6.3-1, "Primary Containment Isolation Valves" to reflect: (1) Corrections and additions to the Excess Flow Check Valve listings, Traversing Incore Probe System valve listings, and equipment qualification limits; (2) reidentify certain valves in accordance with current Supply System practices; (3) add valves previously omitted; (4) provide clarification to notes in the table; (5) correct typographical errors; and (6) delete maximum isolation time listings for valve not performing an automatic containment isolation function.

Table 3.6.3-1 is provided to list containment isolation valves and to ensure operability of these valves so that the containment atmosphere can be isolated from the outside environment in the event of a release of radioactive material to the containment. Section (a) of the table provides those valves and maximum isolation time limits allowed so that on an automatic isolation demand, the containment will be isolated from the outside environment consistent with the assumptions used in the Final Safety Analysis Report Design Base Accident LOCA analyses.

Basis for no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from an accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

The licensee has determined, and the staff agrees, that the requested amendment does not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated because the proposed isolation time deletions do not affect the response of the plant to a primary containment isolation demand and the remainder of the changes merely provide corrections to listings in the table that were previously evaluated in the Final Safety Analysis Report; or (2) create the possibility of a new or different kind of accident from an accident previously evaluated because the changes are corrections and therefore can not introduce new or different accident scenarios and the deletion of isolation times for valves not required to isolate automatically does not alter systems or conditions previously evaluated; or (3) involve a significant reduction in a margin of safety because no safety related functions (limits for containment isolation) will be changed as a result of this proposed amendment.

Based on our review of the proposed modification, the staff finds that there exists reasonable assurance that this proposed change will have little or no

impact on the public health and safety. Accordingly, the Commission proposes to determine that the requested change to the WNP-2 Technical Specifications involves no significant hazards considerations.

Local Public Document Room: Richland Public Library, Swift and Northgate Streets, Richland, Washington 99352.

Attorney for the Licensee: Nicholas Reynolds, Esquire, Bishop, Liberman, Cook, Purcell and Reynolds, 1200 Seventeenth Street NW., Washington, DC 20036.

NRC Project Director: E. Adensam.

Washington Public Power Supply System, Docket No. 50-397, WNP-2, Richland, Washington

Date of amendment request: February 26, 1986.

Description of amendment request: The proposed amendment would revise the WNP-2 Technical Specifications (TS) to support the operation of WNP-2 at full rated power during the upooming Cycle 2. The proposed amendment request to support this reload changes the Technical Specifications in the following areas: (1) Establishes operating limits for all fuel types for the upooming Cycle 2 operation; (2) reflects the replacment of approximately 132 initial core fuel assemblies with Exxon Nuclear Company (ENC) fuel assemblies for the upcoming Cycle 2 operation; and (3) modifies the Bases section of the Technical Specification to account for the use of Exxon fuel assemblies.

To support the license amendment request for operation of WNP-2 during Cycle 2, the Supply System submitted as attachments to the application the following:

I. WNP-2 Cycle 2 Reload Summary Report (WPPSS-EANF-101) Includes the Startup Physics Program
II. WNP-2 Cycle 2 Reload Analysis (XN-NF-86-01, Rev 1)
III. WNP-2 Cycle 2 Plant Transient Analysis (XN-NF-85-143, Rev 1)
IV. WNP-2 LOCA-ECCS Analysis MAPLHGR Results (XN-NF-85-139)
V. Technical Specification Changes

During the first refueling outage approximately 132 General Electric (GE) initial fuel assemblies (approximately one fifth of the core) will be replaced with new but substantially similar Exxon, Type XN-1 (8 x 8 bundles, 2.72 (weight) percent enrichment), fuel assemblies.

Basis for proposed no significant hazards consideration determination: The proposed amendment to the WNP-2 Technical Specifications to support this reload is very similar to Example (iii) provided by the Commission (48 Federal Register 14870, April 6, 1983) of the types of amendments not likely to involve significant hazards considerations. Example (iii) is an amendment to reflect a core reload where:

(1) No fuel assembles significantly different from those found previously acceptable to the Commission for a previous core at the facility in question are involved;

(2) No significant changes are made to the acceptance criteria for the Technical Specifications;

(3) The analytical methods used to demonstrate conformance with the Technical Specifications and regulations are not significantly changed; and

(4) The NRC has previously found such methods acceptable.

This reload will consist of 764 assemblies, approximately 632 of which are once burned GE fuel assemblies and approximately 132 of which are new ENC, Type XN-1 fuel assemblies. The Exxon fuel assemblies are very similar to the GE fuel assemblies except for slight differences in the mechanical, thermal-hydraulic and nuclear design.

Although the Exxon fuel is very similar to the GE fuel, the slight differences in mechanical, thermal-hydraulic and nuclear design of the bundles, and the use of different analysis methodologies, required that a wide range of reanalyses be performed by Exxon. These reanalyses included reanalyzing for anticipated operational occurrences, performing LOCA and MAPLHGR analyses for the Exxon fuel and analyzing for the rapid drop of a high worth control rod to assure that excessive energy will not be deposited in the fuel. Analyses for normal operation of the reactor consisted of fuel evaluations in the areas of mechanical, thermal-hydraulic and nuclear design.

The use of the ENC type XN-1 fuel assemblies and the associated analytical methods used for the Cycle 2 reload analyses have been previously approved by the NRC Staff for use in other boiling water reactors (BWR's). Based on these prior reviews, the NRC staff has determined that there are only small differences between the use of Exxon and GE analytical methods.

Another difference between Cycle 1 core and the Cycle 2 core reload is the core loading pattern. Cycle 1 is a standard GE BWR/5 initial core configuration consisting of fuel assemblies of similar enrichments placed in a specific zone within the core. In constrast the Cycle 2 core will be based on the conventional scatter load principle where fresh reload assemblies are scatter loaded throughout the core except for the center region and the core periphery. Changing from a zone core loading pattern used during the first fuel cycle to a scatter loading pattern for the new reload assemblies during the second cycle is an accepted reload method that has been approved by the NRC staff for other BWR plant reloads.

Thus this core reload involves the use of fuel assemblies that are not significantly different from those found previously acceptable to the Commission for a previous core at this facility. The proposed amendment would change the Technical Specifications to reflect new operating limits associated with the fuel to be inserted into the core based on the new core physics and are within the acceptance criteria. In the analyses supporting this reload, there have been no significant changes in acceptance criteria for the Technical Specification and those analytical methods used have previously been found acceptable by the NRC.

The only difference between this reload and Example (iii) provided by the NRC is related to the use of the Exxon analytical methods which are slightly different from the GE methods used for Cycle 1 as noted above. The Exxon analytical results are not significantly different from those previously found acceptable to the NRC for the initial core at WNP-2 and the methods previously have been approved by the NRC staff for use in other BWR's.

In addition to the similarity between the proposed amendment and the Commission's Example (iii), the Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 59.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from an accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

On the basis of evaluation performed in accordance with 10 CFR 50.92, and the fact that the analytical methods used have been approved previously by the NRC staff and do not provide results significantly different, the Supply System has concluded, and the staff agrees, that operation of WNP-2 in accordance with the proposed reload amendment would not: (1) Involve a significant increase in the probability or

VOL 51 ISS 78 AP 23 1986 UMI

consequences of an accident previously evaluated because the proposed changes to the Technical Specification reflect new operating limits associated with the fuel to be inserted in the core and which are based on reanalyses using the new core physics with results that remain within the previous acceptance criteria; (2) create the possibility of a new or different kind of accident from any accident previously evaluated because the ENC fuel technology and the design of the fuel is not significantly different from that used in the initial core which previously has been found acceptable to the NRC staff; or (3) involve a significant reduction in the margin of safety because the calculated safety limit for the new core is identical to that for the initial core.

Based on our review of the proposed modification, the staff finds that there exists reasonable assurance that this proposed change will have little or no impact on the public health and safety. Accordingly, the Commission proposes to determine that the requested change to the WNP–2 Technical Specifications involves no significant hazards considerations.

Local Public Document Room: Richland Public Library, Swift and Northgate Streets, Richland, Washington 99352.

Attorney for the Licensee: Nicholas Reynolds, Esquire, Bishop, Liberman, Cook, Purcell and Reynolds, 1200 Seventeenth Street NW, Washington, DC 20036.

NRC Project Director: E. Adensam.

Washington Public Power Supply System, Docket No. 50–397, WNP–2, Richland, Washington

Date of Amendment Request: March 28, 1986.

Description of Amendment Request: This proposed amendment, if approved, will change a license condition of the WNP–2 Operating License NPF–21. Attachment 2, Paragraph 3. (a) of License Condition 2.C (16), now requires that the licensee shall implement (install or upgrade) requirements of Regulatory Guide 1.97, Rev. 2, with the exception of flux monitoring, prior to startup following the first refueling outage. The licensee has requested that implementation of this requirement be delayed until the second refueling outage for two specific systems: Suppression Pool Level Monitoring and Post Accident Sampling System (PASS).

The Supply System has been unable to demonstrate that the installed suppression poll level monitoring system is able to meet the accuracy requirements under post accident environmental conditions as originally specified in the design specifications. This failure to demonstrate accuracy has required pursuit of alternative designs. The selection process requires extended lead time for material procurement (up to 52 weeks) which does not provide sufficient time to replace the existing system on the present refueling schedule. The currently installed system will remain in service until the new system is installed. The parameter sensed by this instrumentation (i.e., suppression pool water level) is relied upon to mitigate the consequences of an accident and used with the plant emergency procedures to determine actions necessary to maintain primary containment integrity, but other methods for determining suppression poll level are in place and will be made available for use prior to startup from the current refueling (R1) outage.

For the PASS system there are six Process Sampling Radioactive (PSR) valves that the Supply System has analytically determined may fail when exposed to post accident environmental conditions added to service conditions resulting from heat tracing and insulating. Heat tracing and insulating these valves is accomplished in order to prevent plate-out of radioiodine and moisture condensation from the containment air sample thereby providing a more representative sample. In the event these valves become inoperable, alternate methods utilizing other plant instrumentation are available to measure the containment gas composition and thereby follow the extent of core damage and other post accident conditions.

Basis for no significant hazards consideration determination: The Commission has provided standards for determining whether a significant hazards consideration exists (10 CFR 50.92(c)). A proposed amendment to an operating license for a facility involves no significant hazards consideration if operation of the facility in accordance with the proposed amendment would not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from an accident previously evaluated; or (3) involve a significant reduction in a margin of safety.

With respect to the suppression pool level monitoring system, the Supply System has determined, and the staff agrees, that the requested amendment does not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated because the instrument signals are not used as control signals, perform no automatic mitigating function, and are duplicated by other instrumentation; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated because the alternate methods to be employed are sufficiently accurate and reliable to direct actions necessary to respond as required by the emergency procedures; or (3) involve a significant reduction in a margin of safety because no protective functions are affected.

With respect to the PASS PSR valves, the Supply System has determined, and the staff agrees, that the proposed amendment does not: (1) Involve a significant increase in the probability or consequences of an accident previously evaluated because these valves have no accident mitigation function; they provide a capability to determine the extent of an accident and that capability is also supported by other plant instrumentation; or (2) create the possibility of a new or different kind of accident from an accident previously evaluated because no system modifications are involved; or (3) involve a significant reduction in a margin of safety because, if the valves fail they will fail in the closed position thus preserving their primary containment isolation function; otherwise they provide no direct mitigating function as discussed in (1), above.

Based on our review of the proposed modifications, the staff finds that there exists reasonable assurance that this proposed change will have little or no impact on the public health and safety. Accordingly, the Commission proposes to determine that the requested change to the WNP–2 Technical Specifications involves no significant hazards considerations.

PREVIOUSLY PUBLISHED NOTICES OF CONSIDERATION OF ISSUANCE OF AMENDMENTS TO OPERATING LICENSES AND PROPOSED NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION AND OPPORTUNITY FOR HEARING

The following notices were previously published as separate individual notices. The notice content was the same as above. They were published as individual notices because time did not allow the Commission to wait for this bi-weekly notice. They are repeated here because the bi-weekly notice lists all amendments proposed to be issued involving no significant hazards consideration.

For details, see the individual notice in the Federal Register on the day and page cited. This notice does not extend the notice period of the original notice.

Arkansas Power and Light Company, Docket No. 50–368, Arkansas Nuclear One, Unit 2, Pope County Arkansas

Date of amendment request: December 20, 1985.

Brief description of amendment: Technical Specification changes to revise Section 6 (Administrative Controls).

Date of publication of individual notice in Federal Register: February 5, 1986 (51 FR 4545).

Expiration data of individual notice: March 6, 1986.

Local Public Document Room location: Tomlinson Library, Arkansas Tech University, Russellville, Arkansas 72801.

Duke Power Company, et al., Docket No. 50–413, Catawba Nuclear Station, Unit 1, York County, South Carolina

Date of amendment request: February 12, 1986, as supplemented March 3, 4, and 11, 1986.

Brief description of amendment: The amendment would extend, on a one-time basis, by a maximum of five months until the first refueling outage those 18-month Technical Specification surveillances associated with the Engineered Safety Features which can only be conducted with Unit 1 in COLD SHUTDOWN or REFUELING.

Date of publication of individual notice in Federal Register: March 21, 1986 (51 FR 9905).

Expiration date of individual notice: April 21, 1986.

Local Public Document Room location: York County Library, 138 East Black Street, Rock Hill, South Carolina, 29730.

Kansas Gas and Electric Company, Kansas City Power and Light Company, Kansas Electric Power Cooperative, Inc., Docket No. 50–482, Wolf Creek Generating Station, Coffey County, Kansas

Date of amendment request: January 20, 1986.

Brief description of amendment: The proposed amendment would revise Tecnnical Specifications to implement the Relaxed Axial Offset Control (RAOC) mode of operation after fuel burnup of 8000 MWD/MTU (megawatt days/metric ton of uranium) is achieved.

Date of publication of individual notice in Federal Register: March 20, 1986 (51 FR 9728).

Expiration date of individual notice: April 21, 1986.

Local Public Document Room location: William Allen White Library, Emporia State University, Emporia, Kansas and the Washburn University School of Law, Topeka, Kansas.

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE

During the period since publication of the last bi-weekly notice, the Commission has issued the following amendments. The Commission has determined for each of these amendments that the application complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment to Facility Operating License and Proposed No Significant Hazards Consideration Determination and Opportunity for Hearing in connection with these actions was published in the Federal Register as indicated. No request for a hearing or petition for leave to intervene was filed following this notice.

Unless otherwise indicated, the Commission has determined that these amendments satisfy the criteria for categorical exclusion in accordance with 10 CFR 51.22. Therefore, pursuant to 10 CFR 51.22 (b), no environmental impact statement or environmental assessment need be prepared for these amendments. If the Commission has prepared an environmental assessment under the special circumstances provision in 10 CFR 51.12(b) and has made a determination based on that assessment, it is so indicated.

For further details with respect to the action see (1) the applications for amendments, (2) the amendments, and (3) the Commission's related letters, Safety Evaluation and/or Environmental Assessments as indicated. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC, and at the local public document rooms for the particular facilities involved. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Licensing.

Baltimore Gas & Electric Company, Docket Nos. 50–317 and 50–318, Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, Calvert County, Maryland

Date of application for amendments: February 22, 1985 and October 25, 1985 (partial responses).

Brief description of amendments: The amendments change the Unit 1 and Unit 2 Technical Specifications (TS) to: (1) Revise the Basis for the Containment Isolation Signal (CIS)/Safety Injection Actuation Signal (SIAS) setpoint for containment high pressure in TS Basis 2.2.1, "Reactor Trip Setpoints"; (2) change the allowable scheduling for moderator temperature coefficient (MTC) determination as required by TS 4.1.1.4.2c, "Moderator Temperature Coefficient"; (3) require that two charging pumps, required to be operable above 80% power, each be provided with an independent power supply per TS 3.1.2.4, "Charging Pumps—Operable" (Unit 1 only); (4) provide for additional channels associated with measurement of containment water level and change the statement regarding implementation of remedial actions in TS 3/4.3.3.6, "Post-Accident Instrumentation"; (5) correct a syntax error in TS 3.4.4, "Pressurizer" and a spelling error in TS 3/4.6.1.1., "Containment Integrity"; (6) update and clarify the reporting requirements of TS 6.9.2, "Special Reports"; (7) delete the Surveillance Requirements of TS 4.5.2g, "ECCS Subsystems T_{avg} [greater than or equal to] 300 °F"—and redesignate the remaining Surveillance Requirements; (8) delete the reference to the 1971 Edition of the ASME Boiler and Pressure Vessel Code in TS Basis 3/4.7.1.1, "Safety Valves"; (9) delete a seismic sway arrester (snubber) from the operability and Surveillance Requirements of TS 3/4.7.8, "Snubbers" (Unit 1 only); (10) replace a reference in TS Basis 3/4.3.3.4, "Meteorological Instrumentation", with an alternate reference; (11) Allow the use of a containment atmosphere grab sampling capability as a backup to the hydrogen analyzers in TS 3.6.5.1, "Hydrogen Analyzers," and (12) incorporate additional reporting requirements in TS 6.9.2, "Special Reports."

The remaining issue associated with BG&E's applications dated February 22, 1985 and October 25, 1985 will be addressed in future correspondence.

Date of issuance: April 14, 1986.

VOL 51 ISS 78 AP 23 1986 UMI

Effective date: April 14, 1986.
Amendment Nos.: 117 and 99.
Facility Operating License Nos. DPR–53 and DPR–69. Amendments revised the Technical Specifications.
Date of initial notice in **Federal Register:** March 12, 1986 (51 FR 8584 at 8587) and January 15, 1986 (51 FR 1868 at 1870).
The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated April 14, 1986.
No significant hazards consideration comments received: No.
Local Public Document Room location: Calvert County Library, Prince Frederick, Maryland.

Carolina Power & Light Company, Docket No. 50–324, Brunswick Steam Electric Plant, Unit 2, Brunswick County, North Carolina

Date of application for amendment: August 12, 1985.
Brief description of amendment request: The amendments change the Technical Specifications relating to the surveillance requirements for the suppression pool cooling mode of the Residual Heat Removal System.
Date of issuance: March 27, 1986.
Effective date: March 27, 1986.
Amendment Nos.: 97 and 122.
Facility Operating License Nos. DPR–71 and DPR–62: Amendments revised the Technical Specifications.
Date of initial notice in **Federal Register:** September 25, 1985 (50 FR 38910).
The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 27, 1986.
No significant hazards consideration comments received: No.
Local Public Document Room location: Southport, Brunswick County Library, 109 W. Moore Street, Southport, North Carolina 28461.

Commonwealth Edison Company, Docket No. 50–373, La Salle County Station, Unit 1, La Salle County, Illinois

Date of Amendment Request: October 2, 1985.
Brief Description of Amendment: This amendment revises the La Salle Unit 1 Technical Specifications to reflect the replacement of eight 26-inch and two 8-inch vent and purge isolation valves with valves manufactured by Clow Corporation. These new valves meet all the requirements for containment vent and purge isolation valves. Since the new valves are qualified to close from any position, including the full open (90°) position, the Technical Specification 3.6.1.8, 4.6.1.8.1, and associated basis 3/4.6.1.8 are revised to remove the 50° limit on valve opening. This limit was required until original valves were replaced by new valves capable of closing during a loss-of-coolant accident or a steam line break. In addition, the new Clow valves do not contain resilient seals; and therefore, the once per 92 days leakage surveillance is no longer required. Technical Specification 4.6.1.8.2 is deleted. The purpose of the accelerated leakage rate testing (every 92 days) was to provide an early indication of material seal degradation. Finally, since these Clow valves are air operated, no thermal overload bypass functions are required. Technical Specification 3.8.3.3 is revised to delete these valves from Table 3.8.3.3–1.
The above items addressed in this amendment will be completed prior to startup after the first refueling.
Date of Issuance: April 2, 1986.
Effective Date: Upon startup following the first refueling outage.
Amendment No.: 37.
Facility Operating License No. NPF–11: Amendment revised the Technical Specifications.
Date of Initial Notice in **Federal Register:** October 23, 1985 (50 FR 43023).
The Commission's related evaluation of the amendment is contained in a Safety Evaluation date April 2, 1986.
No significant hazards consideration comments received: None.
Local Public Document Room Location: Public Library of Illinois Valley Community College Rural route No. 1, Oglesby, Illinois 61348.

Commonwealth Edison Company, Docket Nos. 50–373 and 50–374, La Salle county Station, Units 1 and 2, La Salle County, Illinois

Dates of amendment requests: February 7, 1986, as supplemented by letter dated March 5, 1986.
Brief description of amendments: The amendments to Operating License NPF–11 and Operating License NPF–18 revise the La Salle Units 1 and 2 Technical Specifications to eliminate the chlorine monitoring system because of recent surveys indicating that chlorine is not and has not been shipped in bulk quantities by highway, railroad, or river near the La Salle County Station. This basis of elimination of the chlorine monitors is from Regulatory Guide 1.78, "Assumptions of Evaluating the Habitability of a Nuclear Power Plant Control Room during a Postulated Hazardous Chemical Release," which states that chlorine stored or situated at a distance greater than five miles from the control room need not be considered in evaluating the habitability of the control room. The closest industries to La Salle County Station, where chlorine is stored, are greater than five miles away and the railroad and highways are further than five miles. Only the Illinois River is approximately 4.7 miles north of the station; however, in recent surveys the indication is that shipments of bulk chlorine are extremely low.
Date of issuance: April 11, 1986.
Effective date: April 11, 1986.
Amendment Nos: 38 and 20.
Facility Operating Licenses Nos. NPF–11, and NPF–18. Amendments revised the Technical Specifications.
Date of initial notice in **Federal Register:** March 12, 1986 (51 FR 48588).
The Commission's related evaluation of the amendment is contained in a Safety Evaluaton dated April 11, 1986.
No significant hazards consideration comments received: No.
local Public Document Room Location: Public Library of Illinois valley Community College, Rural Route No. 1, Oglesby, Illinois 61346.

Connecticut Yankee Atomic Power Company, Docket No. 50–213, Haddam Neck Plant, Middlesex County, Connecticut

Date of appication of amendment: January 30, 1986.
Brief description of amendment: the license amendment revises the plant technical specifications by: (1) Reducing the allowable leakage rate of reactor coolant outside containment from six (6) liters/hr tothree (3) liters/hr; (2) identifying additional potential sources of reactor coolant leakage outside of containment, such as normal makeup, seal injection and loop fill lines; and (3) changing the value tag number designations for two check valves in the emergency core cooling system.
Date of issuance: April 14, 1986
Effective date: April 14, 1986.
Amendment No. 73.
Facility Operating License No. DPR–61. Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** March 12, 1986 (51 FR 8589). The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 14, 1986.
No significant hazards consideration comments received: No.
Local Public Document Room location: Russell Library, 124 Broad Street, Middletown, Connecticut 06457.

Connecticut Yankee Atomic Power Company, Docket No. 50–213, Haddam Neck Plant, Middlesex County, Connecticut

Date of application for amendment: December 11, 1985.

Brief discription of amendment: The license amendment changes the technical specifications that are directly related to the fuel cycle design and safety analyses for plant operation during cycle 14. The technical specification change include: (1) The definition of quadrant power tilt ratio; (2) setpoints for protection instrumentation; (3) isothermal coefficient of reactivity; (4) limit heat generation rates; (5) power distribution monitoring and controls; and (6) reactor coolant system flow, temperature and pressure.
Date of issuance: April 14, 1986.
Effective date: April 14, 1986.
Amendment No. 74.
Facility Operating License No. DPR–61. Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** January 29, 1986 (51 FR 3713).
The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 14, 1986.
No significant hazards consideration comments received: No.
Local Public Document Room location: Russell Library, 124 Broad Street, Middletown, Connecticut 06457.

Dairyland Power Cooperative, Docket No. 50–409, La Crosse Boiling Water Reactor, Vernon County, Wisconsin

Date of application for amendment: February 4, 1986.
Brief description of amendment: The amendment replaces the 1 KVA 1C inverter with a 5 KVA unit, adds a static transfer switch to the new inverter, and increases the generator plant battery's capacity from 480 amp-hours to 840 amp-hours.
Date of issuance: April 14, 1986.
Effective date: April 14, 1986.
Amendment No. 48.
Provisional Operating License No. DPR–45. Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** March 12, 1986 (51 FR 8589).
The Commission's related evaluation for the license amendment is contained in a Safety Evaluation dated April 14, 1986.
No significant hazards consideration comments received: No.
Local Public Document Room location: La Crosse Public Library, 800 Main Street, La Crosse, Wisconsin 54601.

Duke Power Company, Docket Nos. 50–369 and 50–370, McGuire Nuclear Station, Units 1 and 2, Mecklenburg County, North Carolina

Date of application for amendment: January 21, 1986, as revised March 17, 1986.
Brief description of amendments: The amendments revise a surveillance requirement associated with Technical Specification 3/4.6.1.2d to permit an alternate means of leak testing two containment penetrations associated with the ice condenser refrigeration system.
Date of issuance: April 1, 1986.
Effective date: April 1, 1986.
Amendment Nos.: 53 and 34.
Facility Operating License Nos. NPF–9 and NPF–17. Amendments revised the Technical Specifications.
Date of initial notice in **Federal Register:** February 24, 1986 (51 FR 6475).
The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 1, 1986.
No significant hazards consideration comments received: No.
Local Public Document Room location: Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223.

Duke Power Company, Docket Nos. 50–369 and 50–370, McGuire Nuclear Station, Units 1 and 2, Mecklenberg County, North Carolina

Date of application for amendments: July 22, 1985, as supplemented September 11, 1985.
Brief description of amendments: The amendments change Technical Specifications to increase the allowed out-of-service times for Reactor Trip System analog channels.
Date of issuance: April 7, 1986.
Effective date: April 7, 1986.
Amendment Nos.: 54 and 35.
Facility Operating License Nos. NPF–9 and NPF–17. Amendments revised the Technical Specifications.
Date of initial notice in **Federal Register:** December 18, 1985 (50 FR 51622).
The Commission's related evaluation of the amendments is contained in a Safety Evaluation dated April 7, 1986.
No significant hazards consideration comments received: No.
Local Public Document Room location: Atkins Library, University of North Carolina, Charlotte (UNCC Station), North Carolina 28223.

Duquesne Light Company, Docket No. 50–334, Beaver Valley Power Station, Unit No. 1, Shippingport, Pennsylvania

Date of application for amendment: January 24, 1986.
Brief description of amendment: The amendment changes the Technical Specifications for Beaver Valley Unit No. 1 to (1) add "Mode 4" to Table 4.3–2 so it is consistent with Table 3.3–3, and (2) change Surveillance Requirement 4.4.6.3 by replacing "operational conditon 1" with "Mode 1" to provide consistency current nomenclature.
Date is issuance: April 14, 1986.
Effective date: April 14, 1986.
Amendment No.: 101.
Facility Operating License No. DPR–66. Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** March 12, 1986 (51 FR 8590).
The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 14, 1986.
No significant hazards consideration comments received: No.
Local Public Document Room location: B.F. Jones Memorial Library, 663 Franklin Avenue, Aliquippa, Pennsylvania 15001.

Iowa Electric Light and Power Company, Docket No. 50.331, Duane Arnold Energy Center, Linn County, Iowa

Date of application for amendment: January 3, 1986.
Brief description of amendment: This amendment revises the Technical Specifications to change (a) Main Stream Line high radiation scram setpoint, (b) Main Stream tunnel high radiation setpoint, and (c) the associated bases explaining the rationale for the changes.
Date of issuance: March 27, 1986.
Effective date: March 27, 1986.
Amendment No: 131.
Facility Operating License No. DPR–49. Amendment revised the Technical Specifications.
Date of initial notice in **Federal Register:** February 26, 1986 (51 FR 6826).
The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 27, 1986.
No significant hazards consideration comments received: No.
Local Public Document Room location: Cedar Rapids Public Library, 500 First Street, S.E., Cedar Rapids, Iowa 52401.

Mississippi Power & Light Company, Middle South Energy, Inc., South Mississippi Electric Power Association, Docket No. 50–416, Grand Gulf Nuclear Station, Unit 1, Clairborne County, Mississippi

Date of application for amendment: November 14, 1985, as revised March 21, 1986.

VOL 51 ISS 78 AP 23 1986 UMI

Brief description of amendment: The amendment modifies the Technical Specifications relating to the offsite organization and the Nuclear Production Department and License Condition 2.C.(28).

Date of issuance: April 10, 1986.
Effective date: April 10, 1986.
Amendment No. 10.
Facility Operating License No. NPF-29. Amendment revised the Technical Specifications and License Condition 2.C.(28).

Date of initial notice in **Federal Register:** December 3, 1985 (50 FR 49633).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 10, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Hinds Junior College, McLendon Library, Raymond, Mississippi 39154.

Nebraska Public Power District, Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: April 22, 1985.

Brief description of amendment: The amendment changes the Technical Specifications to incorporate a section describing the conditions for peforming various special tests, and to outline in one place the conditions to be met for refueling.

Date of issuance: April 9, 1986.
Effective date: April 9, 1986.
Amendment No.: 97.
Facility Operating License No. DPR-62. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** July 17, 1985 (50 FR 29011).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 9, 1986.

No siginficant hazards consideration comments received: No.

Local Public Document Room location: Auburn Public Library, 118 15th Street, Auburn, Nebraska 68305.

Nebraska Public Power District, Docket No. 50-298, Cooper Nuclear Station, Nemaha County, Nebraska

Date of amendment request: May 31, 1985 supplemented August 21, 1985.

Brief Description of amendment: The amendment changes the Technical Specifications to reflect the addition of a Halon fire suppression system and fire detectors in the station service water pump room as part of the Appendix R fire protection program.

Date of issuance: April 10, 1986.
Effective date: April 10, 1986.
Amendment No.: 96.
Facility Operating License No. DPR-62. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** September 25, 1985 (50 FR 28916).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 10, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Auburn Public Library, 118 15th Street, Auburn, Nebraska 68305.

Northeast Nuclear Energy Company, et al., Docket No. 50-245, Millstone Nuclear Power Station, Unit No. 1, New London County, Connecticut

Date of application for amendment: October 30, 1985.

Brief description of amendment: The amendment approves tachnical specifications to allow control rods to be either electrically or hydraulically disarmed when control rods are inserted and refuel interlocks or reactor protection system trip functions are inoperable.

Date of issuance: April 4, 1986.
Effective date: April 4, 1986.
Amendment No. 110.
Provisional Operating License No. DPR-21. This amendment revised the technical specifications and the license.

Date of initial notice in **Federal Register:** February 25, 1986 (51 FR 6827).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 4, 1986.

No significant hazards consideration comments received: None.

Local Public Document Room location: Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut 06385.

Northern States Power Company, Docket No. 50-263, Monticello Nuclear Generating Plant, Wright County, Minnesota

Date of application for amendment: June 27, 1985.

Brief description of amendment: The amendment revises the Technical Specifications to implement the requirements of NUREG-0737, Item II.K.3.16, "Improvement to Reduce Challenges and Failure of Safety/Relief Valves" requirements. The two changes are: (1) In Section 2.4.B, increase the safety/relief valve set-actuation setpoint from 1108 psig to 1120 psig (2). In Table 3.2.7, increase the low-low set logic opening and closing setpoints for Reactor Coolant System Pressure by 12 psig.

Date of issuance: April 8, 1986.
Effective date: June 1, 1986.
Amendment No.: 43.
Facility Operating License No. DPR-22. Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** September 11, 1985 (50 FR 37087).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 8, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota 55401.

Northern States Power Company, Docket Nos. 50-282 and 50-306, Prairie Island Nuclear Generating Plant, Unit Nos. 1 and 2, Goodhue County, Minnesota

Date of application for amendment: January 13, 1986, supplemented by letter dated March 25, 1986.

Description of amendment request: The proposed amendments would: (1) Add reference to the WRB-1 DNB correlation for Westinghouse fuel and identify that the W-3 DNB correlation will be used for Exxon fuel. (2) Delete reference to the "moderator temperature coefficient" in Specification 3.1.F.1. In place of the existing restriction on isothermal temperature coefficient, require the isothermal temperature coefficient to be below 5 pcm/°F when below 70 percent power and negative above 70 percent power. Change the associated bases. Replace the existing action statement, specification 3.1.F.3, with the Standard Technical Specification action statements, specification 3.1.1.3, except the requirement to submit a special report in ten days has changed to allow 30 days to submit the report. (3) Change the volume requirement for the accumulators from "between 1250 and 1282.9 cubic feet to 1270 #20" cubic feet in specification 3.3A.1.b.(2). (4) Change the peaking factors limits in Section 3.10 as follows:

	Old value	New value
F_q	2.32	2.30
$F_{\Delta H}$	1.55	1.60
$F_{\Delta H}$ equation	$1+0.2(1-P)$	$1+0.3(1-P)$

Note: The old F_q for Westinghouse fuel was 2.21.

Revise the peaking factor equations on page TS.2.1-2. Delete definitions of

$BU(E_i)$ and E_i in the specification and references to them in the bases.

Increase the required high neutron flux trip setpoint reduction from 1 percent to 3.33 percent for each percent that measured $F_{\Delta H}$ exceeds the limit. Revise the bases of Section 3.10, as necessary, for the peaking factor changes. The bases have also been edited to remove some outdated information, e.g., deletion of the definition of the term $F_q(z)$, deletion of a description of the $F_{\Delta H}$ uncertainties and deletion of a discussion of rod bow. Delete Figure TS.3.10-7, renumber the next sequentially numbered curve and delete references to the curve. (5) On Figure TS.3.10-5, delete the third line segment and extend the second line segment to the 12 foot level. Change the associated bases.

Date of Issuance: April 3, 1986.
Effective date: April 3, 1986.
Amendment Nos.: 77 and 70.
Facility Operating License Nos. DPR-42 and 60. Amendments revise the Technical Specifications.

Date of initial notice in the **Federal Register:** February 26, 1986 (51 FR 6828).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated March 31, 1986.

No significant hazard consideration comments received: No.

Local Public Document Room location: Environmental Conservation Library, Minneapolis Public Library, 300 Nicollet Mall, Minneapolis, Minnesota.

Pennsylvania Power and Light Company, Docket Nos. 50-387 and 50-388, Susquehanna Steam Electric Station, Units 1 and 2, Luzerne County, Pennsylvania

Date of application for amendments: April 11, 1985 as supplemented on August 15, September 11, November 4, December 4, 1985, and March 27, 1986.

Brief description of amendments: These amendments revise the Susquehanna Unit 1 and Unit 2 Technical Specifications to support long term operation with one recirculation loop out of service (Single Loop Operation (SLO)). These changes incorporate a new SLO Technical Specification, 3.4.1.1.2.a.

These amendments which support long term SLO change the Technical Specifications in the following manner: (1) Limit the allowable pump speed during SLO; (2) increase the Minimum Critical Power Ratio (MCPR) Safety Limit by 0.01; (3) establish appropriate Average Power Range Monitor (APRM) Flow Biased Scram Trip setpoints; (4) revise the Maximum Average Planar Linear Heat Generation Rate (MAPLHGR) limits; and (5) revise the Rod Block Monitor (RBM)/APRM Control Rod Block setpoints. The licensee has additionally included as Applicability section and appropriately revised SURVEILLANCE REQUIREMENTS for long term SLO. The amendments also update the Bases section to reflect the addition of Technical Specification 3.4.1.1.2.a for SLO.

Date of Issuance: April 11, 1986.
Effective date: April 11, 1986.
Amendment Nos.: 56 and 26.
Facility Operating License Nos. NPF-14 and NPF-22: Amendment revised the Technical Specifications.

Dates of initial notice in the **Federal Register:** November 20, 1985 (50 FR 47867).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 11, 1986.

No significant hazard consideration comments received: No.

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701.

Pennsylvania Power and Light Company, Docket No. 50-387, Susquehanna Steam Electric Station, Unit 1, Luzerne County, Pennsylvania

Date of application for amendment: January 16, 1986, as supplemented on March 18, 1986.

Brief description of amendments: This amendment revised the Unit 1 Technical Specification (TS) to support the operation of the Susquehanna Steam Electric Station (SSES), Unit 1 at full rated power during Cycle 3 operation. This amendment revises the Technical Specifications in the following areas: (1) Establishes new operating limits for all fuel types to be used during Cycle 3 operation; (2) establishes Average Power Range Monitor setpoints; (3) reflects the replacement of approximately two fifths of the core with Exxon 8×8/2.89 w/o U235 (Exxon fuel assemblies fuel type XN-2) for Cycle 3 operation; and (4) modifies the bases section.

Date of issuance: April 11, 1986.
Effective date: Upon startup following the Unit 1 second refueling outage.
Amendment No.: 57.
Facility Operating License No. NPF-14: Amendment revised the Technical Specifications.

Date of initial notice in **Federal Register:** March 12, 1986 (51 FR 8599).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 11, 1986.

No significant hazards consideration comments received: No.

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franklin Street, Wilkes-Barre, Pennsylvania 18701.

Pennsylvania Power and Light Company, Docket Nos. 50-388, Susquehanna Steam Electric Station, Unit 2, Luzerne County, Pennsylvania

Date of application for amendment: October 10, 1985.

Brief description of amendment: In the licensee's submittal the licensee requested that: (1) Technical Specification 4.8.4.1.a.1 be modified to achieve a greater level of clarity for this surveillance, which was previously ambiguous in cases where no trip setpoint or response time was provided. The difference between the current Technical Specification and this revision is in specifying how acceptance criteria are met for each type of breaker, i.e., magnetic-only (HFB-M) and thermal-magnetic (HFB-TM-KB-TM). The degree of testing for a given breaker remains unchanged due to this revision; (2) Technical Specification Table 3.8.4.1-1 be revised to reflect the replacement of magnetic-only circuit breakers with thermal-magnetic circuit breakers. Changing the containment penetration over-current protection from magnetic-only to thermal-magnetic circuit breakers allows detection of substantially lower short circuit currents; and (3) Additional change to Table 3.8.4.1-1 involving deletion of: Frame Rating/UL, Trip Setpoints and Response Time from the table. Addtional editoral changes were also proposed.

Date of Issuance: April 1, 1986.
Effective date: Upon start-up following the Unit 2 first refueling outage.
Amendment No.: 24.
Facility Operating License No. NPF-22. Amendments revised the Technical Specifications.

Date of initial notice in the **Federal Register:** December 30, 1985 (50 FR 53234).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 1, 1986.

No significant hazard consideration comments received: No.

Local Public Document Room location: Osterhout Free Library, Reference Department, 71 South Franking Street, Wilkes-Barre, Pennsylvania

VOL 51 ISS 78 AP 23 1986 UMI

Pennsylvania Power and Light Company, Docket No. 50-388, Susquehanna Steam Electric Station, Unit 2, Luzerne County, Pennsylvania

Date of application for amendment: December 19, 1985.

Brief Description of Amendment: This amendment changes the Unit 2 Technical Specifications. The setpoint for MSIV isolation on reactor vessel water level has been changed from Level 2 to Level 1 in order to reduce the number of challenges to the Safety Relief Valves (SRV). The change is consistent with the NRC recommendations in Item 16 of NUREG-0737, Section II.K.3, "Reduction of Challenges and Failures of Relief Valves—Feasibility Study and System Modification."

Date of issuance: April 1, 1986.

Effective Date: Upon startup following the Unit 2 first refueling outage.

Amendment No.: 25.

Facility Operating License No. NPF-22: Amendment revised the Technical Specifications.

Dates of Initial Notice in **Federal Register:** February 26, 1986 (51 FR 6829).

The Commission's related evaluation of the amendment is contained in a Safety Evaluation dated April 1, 1986.

No comments were received regarding the Commission's proposed no significant hazards consideration determination: No.

[Docket No. 50-323]

Pacific Gas and Electric Co., Diablo Canyon Nuclear Power Plant, Unit 2; Exemption

Correction

In FR Doc. 86-5055, beginning on page 8055 in the issue of Friday, March 7, 1986, make the following corrections: On page 8056, in the third column, the third line from the bottom should read "February 21, 1986 and shall submit".

BILLING CODE 1505-01-M

Containment Performance Design Objective; Workshop Meeting

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of Workshop.

SUMMARY: The safety goals for nuclear power plants, currently in the final stages of evaluation by the Nuclear Regulatory Commission, include two qualitative goals, supported by quantitative objectives with respect to mortality risks, core-melt frequency, and safety-cost trade-offs. In response to a recommendation by the Advisory Committee on Reactor Safeguards, the NRC staff has undertaken development of a containment performance design objective (CPDO) for the Commission's consideration for possible addition to the safety goals. The NRC staff will hold a workshop to obtain the views of experts on the issues inherent in the development and implementation of a CPDO. These views will be taken into account by staff in the CPDO formulation process. The invited experts will have diverse backgrounds with special knowledge of nuclear power plants in general, and containments in particular.

DATE AND TIME: May 12, 1986, 9:00 a.m. to approximately 6:00 p.m.; May 13, 8:30 a.m. to 12:00 noon.

ADDRESS: This meeting will be held at Cliffside Inn, Route 340, Harper's Ferry West Virginia 25425.

Send comments to John Philips, Rules and Procedures Branch, Division of Rules and Records, Nuclear Regulatory Commission, Washington, DC 20555.

FOR FURTHER INFORMATION CONTACT: Pradyot K. Niyogi, Division of Risk Analysis and Operations, Office of Nuclear Regulatory Research, Washington, DC 20555, (301) 443-7512.

SUPPLEMENTARY INFORMATION: To assist in the efficient conduct of the workshop, participants will receive an information package, which includes: (a) Purpose and scope of the workshop; (b) background on the safety goals and their status; (c) a detailed agenda with guidelines for discussion objectives and scope; and (d) the report "containment Performance Design Objective: Options, Implementation, and Issues," which contains descriptions of some CPDO option seleted for evaluation with discussions of pros and cons, the outline of a CPDO implementation approach, and identification of recognized issues of CPDO structure and implementation.

The workshop will be designed to obtain expert views on issues such as the merits and drawbacks of adding a CPD to the safety goals, and the choice among options for a CPDO formulation approach.

Active participation in the workshop will be limited to invitees, but the workshop will be open to the public for attendance as observers. Members of the public may send written comments on topics related to the workshop; limited verbal comments will be permitted at the workshop at specified times. A verbatim record will be kept, and a highlights report will be published. Prospective attendees should notify Pradyot K. Niyogi at (301) 443-7512 by May 6, 1986, of their intention to attend, to facilitate planning for accommodations. The information package for the workshop will be sent to observers upon request and will be available in the Public Document room, 1717 H Street, Washington, DC 20555. While comments will be welcome at any time, these will be particularly useful if received by June 13, 1986.

Dated at Rockville, Maryland, this 16th day of April 1986.

For the Nuclear Regulatory Commission.

Malcolm L. Ernst,

Director, Division of Risk Analysis and Operations, Office of Nuclear Regulatory Research.

[FR Doc. 86-9105 Filed 4-22-86; 8:45 am]

BILLING CODE 7590-01-M

Advisory Committee on Reactor Safeguards Subcommittee on Thermal Hydraulic Phenomena; Revised Agenda

The notice previously published on Monday, April 14, 1986 (51 FR 12663) concerning a meeting of the ACRS Subcommittee on Thermal Hydraulic Phenomena scheduled for April 29 and 30, 1986, Room 1046, 1717 H Street, NW., Washington, DC has been revised as noted below:

The agenda for the subject meeting shall be as follows:

Tuesday, April 29 1986—1:30 P.M. until 5:00 P.M.

Wednesday, April 30, 1986—8:30 A.M. until 5:00 P.M.

The Subcommittee will: (1) Continue its review of the NRC's proposal to revise 10 CFR 50.46 and Appendix K, and (2) continue discussions on defining the thermal hydraulic safety issues of most importance that need to be addressed in the future. All other items regarding this meeting remain the same as previously announced.

Dated April 18, 1986.

Thomas G. McCreless,

Assistant Executive Director for Technical Activities.

[FR Doc. 86-9103 Filed 4-22-86; 8:45 am]

BILLING CODE 7590-01-M

[Docket No. 50-336]

Northeast Nuclear Energy Co., et al.; Granting of Exemption From Fire Protection Program

The U.S. Nuclear Regulatory Commission (the Commission) has granted an Exemption from certain requirements of Appendix R to 10 CFR Part 50 to Northeast Nuclear Energy Company, et al. (the licensee). The Exemption relates to the fire protection program for the Millstone Nuclear Power Station, Unit No. 2 (the facility) located in the Town of Waterford, Connecticut. The Exemption is effective as of April 15, 1986.

A complete area-wide automatic fire suppression system will not be required for the Closed Cooling Water Pump Area, the Boric Acid Pumps Area, the Boric Acid Batch Tank-Chemical Addition Tank Area, the Cable Vault, the Main Control Room, the Intake Building, and the Charging Pump Room. The auxiliary feedwater pumps located in the Auxiliary Feed Pump Pit, the safe shutdown systems and related cables located in the Boric Acid Tank-Chemical Addition Tank Area and the service water pumps located in the Intake

Building will not be required to be separated by a complete 3-hour fire-rated barrier. Redundant shutdown related cables located in the Cable Vault and the charging pumps and related cables located in the Charging Pump Room will not be required to be separated by a complete 1-hour fire-rated barrier or by more than 20 feet with no intervening combustible material. Redundant shutdown divisions within the Control Room will not be required to have physical separation. Finally, the alternate shutdown capability will not be required to be independent of the Control Room. The Exemption is granted mainly on the basis that the existing fire protection, coupled with proposed modifications at Millstone Unit 2, is the most practical method for meeting the intent of Appendix R and literal compliance would not significantly enhance the fire protection capability. Details are provided in the Exemption.

The requests for the Exemption comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations which are set forth in the Exemption.

Pursuant to 10 CFR 51.32, the Commission has determined that the issuance of the Exemption will have not significant impact on the environment (51 FR 5120).

For further details with respect to this action, see (1) the requests for exemptions dated March 1 and July 2, 1982, April 15 and May 25, 1983, and January 31 and August 7, 1985, (2) the Commission's letter dated April 15, 1986 (3) the Exemption dated April 15, 1986, and (4) the staff's Safety Evaluation dated April 15, 1986. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC and at the Waterford Public Library, 49 Rope Ferry Road, Waterford, Connecticut. A copy of items (2), (3), and (4) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of PWR Licensing–B.

Dated at Bethesda, Maryland, this 15th day of April 1986.

For the Nuclear Regulatory Commission.

Ashok C. Thadani,

Director, PWR Project Directorate No. 6, Division of PWR Licensing–B.

[FR Doc. 86-9106 Filed 4-22-86; 8:45 am]

BILLING CODE 7590-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Implementation of Modifications in Specialty Steel Import Relief

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: This notice modifies the Tariff Schedules of the United States (TSUS) to implement changes in allocations within the alloy tool steel category for Japan.

EFFECTIVE DATE: April 21, 1986.

FOR FURTHER INFORMATION CONTACT: Marie Haugen, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, (202) 377-4036.

SUPPLEMENTARY INFORMATION: Presidential Proclamation 5074 of July 19, 1983 (48 FR 32239), provided for the temporary imposition of increased tariffs and quantitative restrictions on certain stainless steel and alloy tool steel products imported into the United States, pursuant to section 203 of the Trade Act of 1974. Proclamation 5074 authorizes the U.S. Trade Representative to take such actions and perform such functions for the United States as may be necessary to administer and implement the relief, including negotiating orderly marketing agreements and allocating quota quantities on a country-by-country basis. The U.S. Trade Representative is also authorized to make modifications in the TSUS headnote or items proclaimed by the President in order to implement such actions.

Pursuant to the above authority, the U.S. Trade Representative has determined that certain quota quantities within the alloy tool steel category for Japan should be modified.

In confirmity with the above, subpart A, part 2 of Appendix to the TSUS is modified as follows:

(1) Item 926.22 is modified by increasing the quota quantity for "Japan" to "1633" short tons for the period of April 20, 1986 through July 19, 1986.

(2) Item 926.23 is modified by decreasing the quota quantity for "Japan" to "563" short tons for the period of April 20, 1987 through July 19, 1987.

Clayton Yeutter,

United States Trade Representative.

[FR Doc. 86-9271 Filed 4-23-86; 11:06 am]

BILLING CODE 3190-01-M

SECURITIES AND EXCHANGE COMMISSION

[File No. 22-14963]

Application and Opportunity For Hearing; Citicorp

April 18, 1986.

Notice is hereby given that Citicorp (the "Applicant") has filed an application under clause (ii) of section 310(b)(1) of the Trust Indenture Act of 1939 (the "Act") for a finding that the trusteeship of United States Trust Company of New York (the "Trust Company") under four existing indentures, and two Pooling and Servicing Agreements (the "Agreements") each dated as of February 1, 1986 under which certificates evidencing interests in a pool of mortgage loans have been issued, is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify the Trust Company from acting as Trustee under either of such indentures or the Agreements.

Section 310(b) of the Act provides in part that if a trustee under an indenture qualified under the Act has or shall acquire any conflicting interest it shall within ninety days after ascertaining that it has such a conflicting interest, either eliminate the conflicting interest or resign as trustee. Subsection (1) of section 310(b) provides, with certain exceptions, that a trustee under a qualified indenture shall be deemed to have a conflicting interest in such trustee is trustee under another indenture under which securities of an obligor upon the indenture securities are outstanding. However, under clause (ii) of subsection (1), there may be excluded from the operaton of the subsection another indenture under which other securities of the same obligor are outstanding, if the issuer shall have sustained the burden of proving, on application to the Commission and after opportunity for hearing thereon, that trusteeship under both the qualified indenture and such other indenture is not so likely to involve a material conflict of interest as to make it necessary in the public interest or for the protection of investors to disqualify such trustee from acting as trustee under one of such indentures.

The Applicant alleges that: (1) The Trust Company currently is acting as Trustee under four indentures in which the Applicant is the obligor. The indenture dated as of February 15, 1972 involved the issuance of Floating Rate

VOL 51 ISS 78 AP 23 1986 UMI

Notes due 1988, the indenture dated as of March 15, 1977 involved the issuance of various series of unsecured and unsubordinated Notes, the indenture dated as of August 25, 1977 involved the issuance of Rising-Rate Notes, Series A and the indenture dated as of April 21, 1980 involved the issuance of various series of unsecured and unsubordinated Notes. Said indentures were filed as, respectively, Exhibits 4(a), 2(b), 2(b), and 2(a) to Applicant's respective Registration Statements Nos. 2–42915, 2–58355, 2–58396 and 2–64862 filed under the Securities Act of 1933, and have been qualified under the Trust Indenture Act of 1939. Said four indentures are hereinafter called the Indentures and the securities issued pursuant to the Indentures are hereinafter called the Notes.

(2) The Applicant is not in default in any respect under the Indentures or under any other existing indenture.

(3) On February 24, 1986, the Trust Company entered into a Pooling and Servicing Agreement dated as of February 1, 1986 (the "1986–A Agreement") with Citibank, N.A., Originator and Servicer, and Citicorp Homeowners, Inc., under which there were issued on February 24, 1986 Mortgage Pass-Through certificates, Series 1986–A 10.50% Pass-Through Rate (the "Series 1986–A Certificates"), which evidence fractional undivided interests in a pool of conventional one-to-four-family mortgage loans (the "1986–A Mortgage Pool") originated and serviced by Citibank, N.A. and having adjusted principal balances aggregating $104,826,271.22 at the close of business on February 1, 1986, which mortgage loans were assiged to the Trust Company as Trustee simultaneously with the issuance of the Series 1986–A Certificates. On February 24, 1986, Applicant, the parent of Citibank, N.A., entered into a guaranty of even date (the "1986-A Guaranty") pursuant to which applicant agreed, for the benefit of the holders of the Series 1986–A Certificates, to be liable for 5.5% of the initial aggregate principal balance of the 1986–A Mortgage Pool and for lesser amounts in later years pursuant to the provisions of the 1986–A Guaranty. The 1986–A Guaranty states that Applicant's obligations thereunder rank *pari passu* with all unsecured and unsubordinated indebtedness of Applicant, and accordingly, if enforced against Applicant, the 1986–A Guaranty would rank on a parity with the obligations evidenced by the Notes. The Series 1986–A Certificates were registered under the Securities Act of 1933 (Registration Statement on Forms S–11 and S–3, File No. 33–780) as part of a delayed or continuous offering of $1,000,000 aggregate amount of Mortgage Pass-Through Certificates pursuant to Rule 415 under the Act. The Series 1986–A Certificates were offered by a Prospectus Supplement Dated February 13, 1986, supplemental to a Prospectus dated October 9, 1985. The 1986–A Agreement has not been qualified under the Trust Indenture Act of 1939.

(4) On February 24, 1986, the Trust Company entered into a Pooling and Servicing Agreement dated as of February 1, 1986 (the "1986–B Agreement") with Citbank, N.A., Originator and Servicer, and Citicorp Homeowners, Inc., under which there were issued on February 24, 1986, Mortgage Pass-Through Certificates, Series 1986–B 10.00% Pass-Through Rates (the "Series 1986–B Certificates"), which evidence fractional undivided interests in a pool of conventional one-to-four-family mortgage loans (the "1986–B Mortgage Pool") originated and serviced by Citibank, N.A. and having adjusted principal balances aggregating $51,017,629.42 at close of business on February 1, 1986, which mortgage loans were assigned to the Trust Company as Trustee simultaneously with the issuance of the Series 1986–B Certificates. On February 24, 1986, Applicant, the parent of Citibank, N.A., entered into a Guaranty of even date (the "1986–B Guaranty) pursuant to which Applicant agreed, for the benefit of the holders of the Series 1986–B Certificates, to be liable for 5.5% of the initial aggregate principal balance of the 1986–B Mortgage Pool and for lesser amounts in later years pursuant to the provisions of the 1986–B Guaranty. The 1986–B Guaranty states that Applicant's obligations thereunder rank *pari passu* with all unsecured and unsubordinated indebtedness of Applicant, and accordingly, if enforced against Applicant, the 1986–B Guaranty would rank on a parity with the obligations evidenced by the Notes. The Series 1986–B Certificates were registered under the Securities Act of 1933 (Registration Statement on Forms S–11 and S–3, File No. 33–780) as part of a delayed or continuous offering of $1,000,000,000 aggregate amount of Mortgage Pass-Through Certificates pursuant to Rule 415 under the Act. The Series 1986–B Certificates were offered by a Prospectus Supplement dated February 14, 1986 supplemental to a Prospectus dated October 9, 1985. The 1986–B Agreement has not been qualified under the Trust Indenture Act of 1939.

The 1986–A Agreement and the 1986–B Agreement are hereinafter called the 1986 Agreements and the 1986–A Guaranty and the 1986–B Guaranty are hereinafter called the 1986 Guarantees.

(5) The obligations of Applicant under the Indentures and the 1986 Guarantees are wholly unsecured, are unsubordinated and rank *pari passu*. Any differences that exist between the provisions of the Indentures and the 1986 Guarantees are unlikely to cause any conflict of interest among the trusteeships of the Trust Company under the Indentures and the 1986 Agreements.

(6) The Applicant Company has waived notice of hearing, waived hearing, and waived any and all rights to specify procedures under Rule 8(b) of the Commission's Rules of Practice in connection with this matter.

For a more detailed statement of the matters of fact and law asserted, all persons are referred to said application, File No. 22–14943, which is a public document on file in the office of the Commission's Public Reference Section, 450 Fifth Street NW., Washington, DC.

Notice is Further Given that any interested person may, not later than May 13, 1986, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of law or fact raised by said application which he desires to controvert, or may request that he be notified if the Commission should order a hearing thereon.

Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, DC 20549. At any time after said date, the Commission may issue an order granting the application upon such terms and conditions as the Commission may deem necessary or appropriate in the public interest and for the protection of investors, unless a hearing is ordered by the Commission.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010–01–M

[File No. 81–728]

Application and Opportunity for Hearing: Dataserv, Inc.

April 18, 1986.

Notice is hereby given that Dataserv, Inc., ("Applicant") has filed an application pursuant to Section 12(h) of the Securities Exchange Act of 1934, as amended, (the "1934 Act") for an order exempting Applicant from the registration requirements under Section 12(g) of the 1934 Act.

For a detailed statement of the information presented, all persons are referred to the application which is on file at the offices of the Commission in the Public Reference Room, 450 Fifth Street NW., Washington, DC 20549.

Notice is further given that any interested person not later than May 13, 1986, may submit to the Commission in writing his views or any substantial facts bearing on the application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert.

Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponement thereof. At any time after that date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 8010–01–M

[Release No. 35–24065]

Filings Under the Public Utility Holding Company Act of 1935 ("Act")

April 17, 1986.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated there under. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendment(s) thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by May 12, 1986 to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the addresses specified below. Proof of service (by affidavit, or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

Middle South Utilities, Inc., et al. (70–7119)

Middle South Utilities, Inc., ("Middle South"), a registered holding company, 225 Baronne Street, New Orleans, Louisiana 70112, has filed an amendment to the declaration filed pursuant to section 12(b) of the Act and Rule 45 thereunder.

A notice of the original declaration was issued on June 20, 1985, HCAR No. 23739. Middle South now proposes to guarantee the performance by Middle South Services, Inc. ("Services") of its lease obligations with respect to two new computer systems, and any upgrading thereof, without recourse to Services first being required. The leases are noncancellable during the initial 48-month terms thereof except in certain circumstances. Rental payments during the initial 48-month terms of the leases are being made by Services in monthly installments in the amounts of $175,893 and $170,737, respectively. Services may also subsequently determine to upgrade the new computer systems. Monthly rental payments by Services therefor would not be expected to exceed $137,500 and $127,000, respectively.

Eastern Utilities Associates (70–7761)

Eastern Utilities Associates ("EUA"), P.O. Box 2333, Boston, Massachusetts 02107, a registered holding company, has filed amendments to its application-declaration in this proceeding pursuant to sections 6(a), 7, 9(a), and 10 of the Act and Rule 50(a)(5) promulgated thereunder.

EUA, through Montaup Electric Company ("Montaup"), a wholly owned, generation and transmission company, presently has a 2.89989% joint ownership interest in the Seabrook nuclear generating project ("Seabrook Project"). There are fifteen other owners which are tenants in common with Montaup ("Participants") under an Agreement for Joint Ownership, Construction and Operation of New Hampshire Nuclear Units, dated as of May 1, 1973, as amended from time to time. On October 15, 1985 (HCAR No. 23866), notice was given of EUA's proposal, if necessary approvals are received, to acquire through a new, wholly owned, New Hampshire subsidiary, EUA Power Corporation ("EUA Power"), the interests of four Participants: Bangor Hydro-Electric Company ("Bangor") 2.17391%; Central Maine Power Company ("CMP") 6.04178%; Central Vermont Public Service Company ("Central Vermont") 1.59096%; and Maine Public Service Company ("MPSC") 1.46058%, (collectively, "Sellers").

Certain changes have been made in the proposed transactions, including the following: EUA will make additional payments aggregating $30.9 million as follows: $6.0 million to Bangor, $16.5 million to CMP, $4.4 million to Central Vermont, and $4.0 million to MPSC. EUA Power expects to make all payments (except in the case of CMP) in cash or immediately available funds but, if EUA and CMP (or any of the other Sellers) agree, it is proposed that payments to such Seller or Sellers may include one or more promissory notes secured by mortgages and security interests, or otherwise. It is further proposed that EUA Power issue $288 million of notes rather than $170 million. Certain changes have also been made in the terms of EUA Power's proposed preferred stock.

Southwestern Electric Power Company (70–7248)

Southwestern Electic Power Company ("Swepco"), P.O. Box 21106, Shreveport, Louisiana 71156, an electric utility subsidiary of Central and South West Corporation, a registered holding company, has filed an application-declaration pursuant to sections 6(a), 7, 9(a), 10, and 12(c) of the Act and Rules 42 and 50 thereunder.

Swepco proposes to issue and sell up to $125,000,000 of its first mortgage bonds in one or more series with a maturity of up to 30 years in accordance with alternative competitive bidding procedures. The proceeds are to be used in connection with the following proposals by Swepco: (1) To repurchase for cash, through tender offers, the outstanding $5,166,000 principal amount of the company's First Mortgage Bonds, Series R, 15–1/2%, due May 1, 2012, and $80,000,000 principal amount of the company's First Mortgage Bonds, Series S, 11-3/8%, due August 1, 2015; (2) to redeem the outstanding 200,000 shares of the company's 8.64% Preferred Stock, par value $100.00 per share, at the

BEST COPY AVAILABLE

VOL 51 ISS 78 AP 23 1986 UMI

general redemption price of $104.21 per share plus accrued and unpaid dividends to the redemption date; and (3) to provide funds for the defeasance of the outstanding $17,125,000 principal amount of Titus County Fresh Water Supply District No. 1, Pollution Control Revenue Bonds, 1981 Series A (Southwestern Electric Power Company Project), 12-1/8%, due August 1, 2011. Additional funds required for such proposed repurchases, redemption, and defeasance will be provided from internally generated funds or short-term borrowings. Open market and negotiated purchases are proposed to be made after the expiration of the tender offers with terms no more favorable to the holders than those of the tender offers.

Central Power and Light Company (70-7249)

Central Power and Light Company ("CPL"), P.O. Box 2121, Corpus Christi, Texas 78403, a subsidiary of Central and South West Corporation, a registered holding company, has filed an application-declaration pursuant to sections 6(a), 7, 9(a), 10, and 12(c) of the Act and Rules 42 and 50 thereunder.

CPL proposes to issue and sell up to $100 million of its first mortgage bonds and $100 million of its debentures in accordance with alternative competition bidding procedures. The proceeds are to be used in connection with CPL's proposed acquisition, for cash by tender offer, of up to $85 million aggregate principal amount of its outstanding first mortgage bonds and up to $100,742,000 aggregate principal amount of its outstanding debentures in two series. Open market and negotiated purchases are proposed to be made after the expiration of the tender offers with terms no more favorable to the holders than those of the tender offers.

West Texas Utilities Company (70-7250)

West Texas Utilities Company ("WTU"), 301 Cypress, Abilene, Texas 79601, a subsidiary of Central and South West Corporation, a registered holding company, has filed an application-declaration pursuant to sections 6(a), 7, 9(a), 10, and 12(c) of the Act and Rules 42 and 50 thereunder.

WTU proposes to issue and sell up to $80 million of its First Mortgage Bonds, Series O, in accordance with alternative competitive bidding procedure. The proceeds will be used, together with internally generated funds, if necessary, to repurchase for cash by tender offer ("Tender Offer") up to $50 million of its outstanding First Mortgage Bonds, Series M, and up to $815,000 of its 16-1/8% Debentures, Series 1982.

WTU presently intends to hold open the Tender Offer for up to ten days but, if market conditions require or particular security holders require, WTU requests authority to shorten or extend the Tender Offer period. In addition, WTU request authority to purchase securities from individual security holders after the expiration of the Tender Offer on terms no more favorable to such security holders than the terms extended pursuant to the Tender Offer.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

John Wheeler,

Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area #2231]; Amdt. #4]

Declaration of Disaster Area; California

The above-numbered Declaration (51 FR 7514), as amended (51 FR 8610, 51 FR 9912 and 51 FR 12256), is hereby further amended in accordance with the Notice of Amendment to the President's declaration, dated March 12, 1986, to include the adjacent Counties of Trinity and Nevada in the State of California because of damage from severe storms, landslides, mudslides and flooding beginning on or about February 12, 1986. All other information remains the same, i.e., the termination date for filing applications for physical damage is the close of business on April 24, 1986, and for economic injury until the close of business on September 2, 1986.

(Catalog of Federal Domestic Assistance Programs Nos. 59002 and 59008.)

Dated: March 13, 1986.

Gerald J. Fico, Jr.,

Acting Deputy Associate Administrator for Disaster Assistance.

BILLING CODE 8025-01-M

[Application No. 09/09-5369]

Application for License To Operate as a Small Business Investment Co.; Best Finance Corp.

Notice is hereby given of the filing of an application with the Small Business Administration (SBA) pursuant to § 107.102 (1986) by Best Finance Corporation, 2883 W. Olympic Boulevard, Los Angeles, California 90006, for a license to operate as a small business investment company (SBIC) under the Small Business Investment act of 1958 (the Act), as amended (15 U.S.C. 661 et seq.).

The proposed officers, directors and shareholders are:

Name	Title or relationship	Percentage of shares owned
Robert G. Brown, 13503 De Ancala Dr., La Mirada, CA 90638.	General Manager	0
Ray-Sek Yun, 831 5th Street, Los Angeles, CA 90006.	President/Director	25
In-Cho Hwang, 3763 North Prestwick Dr., Los Angeles, CA 90027.	Secretary/Director	25
Duk-Soo Yum, 19220 Fagen Ave., Cerritos, CA 90701.	Chief Financial Officer/Director.	25
Yeon-Yong Rong, 1112 Fairview Dr., La Canada, CA 91011.	Director	25

The Applicant will begin operations with a capitalization of $1,000,000 and will be a source of equity capital and long term loan funds for qualified small business concerns.

The Applicant will conduct its operations in the State of California.

As a small business investment company under section 301(d) of the Act, the Applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Act and will provide assistance solely to small concerns which will contribute to a well balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the application include the general business reputation and character of the proposed owners and management, and the probability of successful operations of the new company under their management including profitability and financial soundness in accordance with the Act and Regulations.

Notice is further given that any person may, not later than 30 days from the date of publication of this Notice, submit written comments on the proposed SBIC to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street NW., Washington, DC 20416.

A copy of the Notice will be published in a newspaper of general circulation in Los Angeles, California.

Dated: April 16, 1986.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies)

Robert G. Lineberry,

Deputy Associate Administrator for Investment.

DEPARTMENT OF STATE

National Committee of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Meeting

The Department of State announces that the National Committee of the U.S. Organization for the International Telegraph and Telephone Consultative Committee CCITT) will meet on Tuesday, May 13, 1986, in Room 1107, Department of State, 2201 C Street, NW., Washington, DC. The meeting will begin at 1:00 p.m.

The National Committee assists in the resolution of administrative/procedural problems pertaining to U.S. CCITT activities; provides advice on matters of policy and positions in the preparation for CCITT Plenary Assemblies and meetings of the International Study Groups; provides advice and recommendations in regard to the work of the U.S. CCITT study Groups; and recommends the disposition of proposed U.S. contributions to the international CCITT which are submitted to the Committee for consideration.

The purpose of the meeting is to:

a. Discuss and adopt U.S. positions to upcoming CCITT Study Group Special "S";

b. Assess need for U.S./Canada meeting to discuss Special "S" and ISDN charging principles.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. Prior to the meeting, persons who plan to attend should so advise the office of Mr. Earl Barbely, State Department, Washington, D.C.; telephone (202) 647-6700. All attendees must use the C Street entrance to the building.

Dated: April 11, 1986

Earl S. Barbely,

Acting Director, Office of Technical Standards and Development.

BILLING CODE 4710-07-M

Study Group A of the U.S. Organization for the International Telegraph and Telephone Consultative Committee (CCITT); Meeting

The Department of State announces that Study Group A of the U.S. Organizations for the International Telegraph and Telephone Consultative Committee (CCITT) will meet on Tuesday, May 13, 1986 at 9:30 a.m. in Room 1107, Department of State, 2201 C Street NW., Washington, DC.

Study Group A deals with international telecommunications policy and services.

The purpose of this meeting is to:

a. Debrief of PTC-1 and CCITT Study Group I Working Party Meetings in Montevideo;

b. Finalize U.S. Delegation to CCITT Meeting, to be held in Kobe, Japan;

c. Review CCITT contributions, both U.S. and others, for Study Group III meeting in Kobe; and

d. Prepare future program for upcoming meetings of Study Group I, III, PC-WATTC, etc.

Members of the general public may attend the meeting and join in the discussion, subject to the instructions of the Chairman. Admittance of public members will be limited to the seating available. In that regard, entrance to the Department of State building is controlled and entry will be facilitated if arrangements are made in advance of the meeting. Prior to the meeting, persons who plan to attend should so advise the office of Mr. Earl Barbely, State Department, Washington, D.C.; telephone (202) 647-6700. All attendees must use the C Street entrance to the building.

Dated: April 16, 1986.

Earl S. Barbely,

Acting Director, Office of Technical Standards and Development.

BILLING CODE 4710-07-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Certain Industry Advisory Committees; Determination of Closing of Meetings

The Industry Advisory Committees for Trade Policy Matters (including the Industry Policy Advisory Committee, the Committee of Chairmen of Industry of Advisory Committees, the Industry Sector Advisory Committees, and the Industrry Functional Advisory Committees) (the Advisory Committees) have been established to advise the United States Trade Representative and the Secretary of Commerce, in accordance with subsection 135(a) of the Trade Act of 1974, as amended. These groups will be providing advice on trade matters referred to in section 102 of the Trade Act of 1974; as amended: with respect to the operation of any trade agreement once entered into; and with respect to other matters arising in connection with the administration of the trade policy of the United States.

I, therefore, determine that meetings of the Advisory Committees will be concerned with matters the disclosure of which would seriously compromise the Government's negotiating objectives or bargaining positions and with matters listed in section 552b(c) of Title 5 of the United States Code. Therefore, meetings of the Advisory Committees will be closed to the public unless otherwise determined by the United States Trade Representatives or his designee.

Clayton Yeutter,

United States Trade Representative.

BILLING CODE 3190-01-M

DEPARTMENT OF THE TREASURY

Office of the Secretary

[Department Circular—Public Debt Series—No. 15-86]

Treasury Notes of April 30, 1988, Series Y-1988

Washington, April 17, 1986.

1. Invitation for Tenders

1.1. The Secretary of the Treasury,

VOL 51 ISS 78 AP 23 1986 UMI

under the authority of Chapter 31 of Title 31, United States Code, invites tenders for approximately $9,750,000,000 of United States securities, designated Treasury Notes of April 30, 1988, Series Y-1988 (CUSIP No. 912827 TN 2), hereafter referred to as Notes. The Notes will be sold at auction, with bidding on the basis of yield. Payment will be required at the price equivalent of the yield of each accepted bid. The interest rate on the Notes and the price equivalent of each accepted bid will be determined in the manner described below. Additional amounts of the Notes may be issued to Government accounts and Federal Reserve Banks for their own account in exchange for maturing Treasury securities.

2. Description of Securities

2.1. The Notes will be dated April 30, 1986, and will accrue interest from that date, payable on a semiannual basis on October 31, 1986, and each subsequent 6 months on April 30 and October 31 through the date that the principal becomes payable. They will mature April 30, 1988, and will not be subject to call for redemption prior to maturity. In the event any payment date is a Saturday, Sunday, or other nonbusiness day, the amount due will be payable (without additional interest) on the next-succeeding business day.

2.2. The Notes are subject to all taxes imposed under the Internal Revenue Code of 1954. The Notes are exempt from all taxation now or hereafter imposed on the obligation or interest thereof by any State, any possession of the United States, or any local taxing authority, except as provided in 31 U.S.C. 3124.

2.3. The Notes will be acceptable to secure deposits of Federal public monies. They will not be acceptable in payment of Federal taxes.

2.4. Notes in registered definitive form will be issued in denominations of $5,000, $10,000, $100,000, and $1,000,000. Notes in book-entry form will be issued in multiples of those amounts. Notes will not be issued in bearer form.

2.5. Denominational exchanges of registered definitive Notes, exchanges of Notes between registered definitive and book-entry forms, and transfers will be permitted.

2.6. The Department of the Treasury's general regulations governing United States securities apply to the Notes offered in this circular. These general regulations include those currently in effect, as well as those that may be issued at a later date.

3. Sale Procedures

3.1. Tenders will be received at Federal Reserve Banks and Branches and at the Bureau of the Public Debt, Washington, DC 20239, prior to 1:00 p.m., Eastern Standard time, Wednesday, April 23, 1986. Noncompetitive tenders as defined below will be considered timely if postmarked no later than Tuesday, April 22, 1986, and received no later than Wednesday, April 30, 1986.

3.2. The par amount of Notes bid for must be stated on each tender. The minimum bid is $5,000, and larger bids must be in multiples of that amount. Competitive tenders must also show the yield desired, expressed in terms of an annual yield with two decimals, e.g., 7.10%. Fractions may not be used. Noncompetitive tenders must show the term "noncompetitive" on the tender form in lieu of a specified yield.

3.3. A single bidder, as defined in Treasury's single bidder guidelines, shall not submit noncompetitive tenders totaling more than $1,000,000. A noncompetitive bidder may not have entered into an agreement, nor make an agreement to purchase or sell or otherwise dispose of any noncompetitive awards of this issue prior to the deadline for receipt of tenders.

3.4. Commercial banks, which for this purpose are defined as banks accepting demand deposits, and primary dealers, which for this purpose are defined as dealers who make primary markets in Government securities and are on the list of reporting dealers published by the Federal Reserve Bank of New York, may submit tenders for accounts of customers if the names of the customers and the amount for each customer are furnished. Others are permitted to submit tenders only for their own account.

3.5. Tenders for their own account will be received without deposit from commercial banks and other banking institutions; primary dealers, as defined above; Federally-insured savings and loan associations; States, and their political subdivisions or instrumentalists; public pension and retirement and other public funds; international organizations in which the United States holds membership; foreign central banks and foreign states; Federal Reserve Banks; and Government accounts. Tenders from all others must be accompanied by full payment for the amount of Notes applied for, or by a guarantee from a commercial bank or a primary dealer of 5 percent of the par amount applied for.

3.6. Immediately after the deadline for receipt of tenders, tenders will be opened, followed by a public announcement of the amount and yield range of accepted bids. Subject to the reservations expressed in section 4, noncompetitive tenders will be accepted in full, and then competitive tenders will be accepted, starting with those at the lowest yields, through successively higher yields to the extent required to attain the amount offered. Tenders at the highest accepted yield will be prorated if necessary. After the determination is made as to which tenders are accepted, an interest rate will be established, at a ⅛ of one percent increment, which results in an equivalent average accepted price close to 100.000 and a lowest accepted price above the original issue discount limit of 99.500. That stated rate of interest will be paid on all of the Notes. Based on such interest rate, the price on each competitive tender allotted will be determined and each successful competitive bidder will be required to pay the price equivalent to the yield bid. Those submitting noncompetitive tenders will pay the price equivalent to the weighted average yield of accepted competitive tenders. Price calculations will be carried to three decimal places on the basis of price per hundred, e.g., 99.923, and the determinations of the Secretary of the Treasury shall be final. If the amount of noncompetitive tenders received would absorb all or most of the offering, competitive tenders will be accepted in an amount sufficient to provide a fair determination of the yield. Tenders received from Government accounts and Federal Reserve Banks will be accepted at the price equivalent to the weighted average yield of accepted competitive tenders.

3.7. Competitive bidders will be advised of the acceptance of their bids. Those submitting noncompetitive tenders will be notified only if the tender is not accepted in full, or when the price at the average yield is over par.

4. Reservations

4.1. The Secretary of the Treasury expressly reserves the right to accept or reject all or all tenders in whole or in part, to allot more or less than the amount of Notes specified in Section 1, and to make different percentage allotments to various classes of applicants when the Secretary considers it in the public interest. The Secretary's action under this section is final.

5. Payment and Delivery

5.1. Settlement for the Notes allotted must be made at the Federal Reserve Bank or Branch or at the Bureau of the Public Debt, wherever the tender was submitted. Settlement on Notes allotted to institutional investors and to others whose tenders are accompanied by a guarantee as provided in section 3.5. must be made or completed on or before Wednesday, April 30, 1986. Payment in full must accompany tenders submitted by all other investors. Payment must be in cash; in other funds immediately available to the Treasury; in Treasury bills, notes, or bonds maturing on or before the settlement date but which are not overdue as defined in the general regulations governing United States securities; or by check drawn to the order of the institution to which the tender was submitted, which must be received from institutional investors no later than Monday, April 28, 1986. In addition, Treasury Tax and Loan Note Option Depositories may make payment for the Notes allotted for their own accounts and for accounts of customers by credit to their Treasury Tax and Loan Note Accounts on or before Wednesday, April 30, 1986. When payment has been submitted with the tender and the purchase price of the Notes allotted is over par, settlement for the premium must be completed timely, as specified above. When payment has been submitted with the tender and the purchase price is under par, the discount will be remitted to the bidder.

5.2. In every case where full payment has not been completed on time, an amount of up to 5 percent of the par amount of Notes allotted shall, at the discretion of the Secretary of the Treasury, be forfeited to the United States.

5.3. Registered definitive securities tendered in payment for the Notes allotted are not required to be assigned if the new Notes are to be registered in the same names and forms as appear in the registrations or assignments of the securities surrendered. When the new Notes are to be registered in names and forms different from those in the inscriptions or assignments of the securities presented, the assignment should be to "The Secretary of the Treasury for (Notes offered by this circular) in the name of (name and taxpayer identifying number)". Specific instructions for the issuance and delivery of the new Notes, signed by the owner or authorized representative, must accompany the securities presented. Securities tendered in payment must be delivered at the expense and risk of the holder.

5.4. Registered definitive Notes will not be issued if the approriate identifying number as required on tax returns and other documents submitted to the Internal Revenue Service (e.g., an individual's social security number or an employer identification number) is not furnished. Delivery of the Notes in registered definitive form will be made after the requested form of registration has been validated, the registered interest account has been established, and the Notes have been inscribed.

6. General Provisions

6.1. As fiscal agents of the United States, Federal Reserve Banks are authorized, as directed by the Secretary of the Treasury, to receive tenders, to make allotments, to issue such notices as may be necessary, to receive payment for, to issue and deliver the Notes on full-paid allotments, and to maintain, service, and make payment on the Notes.

6.2. The Secretary of the Treasury may at any time supplement or amend provisions of this circular if such supplements or amendments do not advesely affect existing rights of holders of the Notes. Public announcement of such changes will be promptly provided.

6.3. The Notes issued under this circular shall be obligations of the United States, and, therefore, the faith of the United States Government is pledged to pay, in legal tender, principal and interest on the Notes.

Gerald Murphy,

Fiscal Assistant Secretary.

UNITED STATES INFORMATION AGENCY

Culturally Significant Objects Imported For Exhibition; Determination

Notice is hereby given of the following determination: Pursuant to the authority vested in me by the act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and Delegation of Authority of June 27, 1985 (50 FR 27393, July 2, 1985), I here-by determine that the objects to be included in the exhibit, "Treasures of Hungary: Gold and Silver from the Ninth to Nineteenth Century" (included in the list [1] filed as a part of this determination) imported from abroad for the temporary exhibition without profit within the United States are of cultural significance. These objects are imported pursuant to a loan agreement between the Smithsonian Institution Traveling Exhibition Services (SITES) and the Hungarian National Museum. I also determine that the temporary exhibition or display of the listed exhibit objects at the Cooper-Hewitt Museum, New York, New York, beginning on or about May 20, 1986, to on or about August 10, 1986; the Art Institute of Chicago, Chicago, Illinois, beginning on or about September 6, 1986, to on or about November 2, 1986; the Santa Barbara Museum of Art, Santa Barbara, California, beginning on or about December 6, 1986, to on or about February 1, 1987; the Blaffer Gallery, Houston, Texas; and at other nonprofit exhibitions beginning on or about May 23, 1987, to on or about January 3, 1988, is in the national interest.

Public notice of the determination is ordered to be published in the **Federal Register.**

Dated: April 17, 1986.

Thomas E. Harvey,

General Counsel and Congressional Liaison.

Sunshine Act Meetings

Federal Register
Vol. 51, No. 78
Wednesday, April 23, 1986

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

CONTENTS

	Item
Federal Mine Safety and Health Commission	1
Federal Reserve System	2
International Trade Commission	3
Interstate Commerce Commission	4
Nuclear Regulatory Commission	5
Occupational Safety and Health Review Commission	6

1

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION

April 18, 1986.

TIME AND DATE: 10:00 a.m., Tuesday, April 22, 1986.

PLACE: Room 600, 1730 K St., NW., Washington, D.C.

STATUS: Closed (Pursuant to 5 U.S.C. 552b(c)(10)).

MATTERS TO BE CONSIDERED: In addition to the previously announced item, the Commission will consider and act upon the following:

2. Commission Procedural Rule 44, 29 CFR § 2700.44, dealing with temporary reinstatement of miners.

It was determined by a unanimous vote of Commissioners that this item be added to the meeting and that no earlier announcement of the addition was possible.

CONTACT PERSON FOR MORE INFO: Jean Ellen, 202-653-5629.

Jean H. Ellen,

Agenda Clerk.

BILLING CODE 6735-01-M

2

FEDERAL RESERVE SYSTEM (BOARD OF GOVERNORS)

TIME AND DATE: 11:00 a.m., Monday, April 28, 1986.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, N.W., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Compressed work week policy.

2. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

3. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Ms. Joseph R. Coyne, Assistant to the Board; (202) 452-3204. You may call (202) 452-3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: April 21, 1986.

William W. Wiles,

Secretary of the Board.

INTERNATIONAL TRADE COMMISSION

[USITC SE-86-12A/13/A]

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT:

PREVIOUSLY ANNOUNCED TIME AND DATE OF THE MEETINGS: 2:00 P.M., Monday, April 14, 1986; and 11:00 A.M., Friday, April 18, 1986.

CHANGES IN THE MEETINGS:

Meeting scheduled for Monday, April 14, 1986 is cancelled.

Addition of agenda items for Friday, April 18, 1986:

3. Agenda
4. Minutes
5. Ratification List
6. Any items left over from previous agenda.

In conformity with 19 CFR 201-37(b), Commissioners Stern, Eckes, Lodwick, and Rohr determined by unanimous vote that Commission business required the cancellation of the meeting scheduled for Monday, April 14, 1986, and required the change in subject matter of the meeting on April 18, 1986 by addition of the agenda items, and affirmed that no earlier announcement of the addition to the agenda was possible, and directed the issuance of this notice at the earliest practicable time. Commissioners Liebeler and Brunsdale were not present for the deliberations.

CONTACT PERSON FOR MORE INFORMATION: Kenneth R. Mason, Secretary, (202) 523-0161.

Kenneth R. Mason,

Secretary.

Part II

Environmental Protection Agency

40 CFR Part 60
Standards of Performance for New Stationary Sources; Calciners and Dryers in Mineral Industries; Proposed Rule

VOL 51 ISS 78 AP 23 1986 UMI

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 60

[AD-FRL-2939-8]

Standards of Performance for New Stationary Sources; Calciners and Dryers in Mineral Industries

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed Rule and Notice of Public Hearing.

SUMMARY: The proposed standards would limit emissions of particulate matter (PM) from new, modified, and reconstructed calciners and dryers at mineral processing plants. The proposed standards implement section 111 of the Clean Air Act and are based on the Administrator's determination that emissions from the source categories that include mineral calciners and dryers, cause, or contribute significantly to, air pollution which may reasonably be anticipated to endanger public health or welfare. The intent is to require new, modified, and reconstructed mineral calciners and dryers to control emissions to the level achievable by the best demonstrated system of continuous emission reduction, considering costs, nonair quality health, and environmental and energy impacts.

A public hearing will be held, if requested, to provide interested parties an opportunity for oral presentations of data, views, or arguments concerning the proposed standards.

DATES: *Comments.* Comments and requests for a public hearing must be received on or before July 7, 1986.

Public Hearing. If anyone contacts EPA requesting to speak at a public hearing by May 14, 1986, a public hearing will be held on June 9, 1986, beginning at 10:00 a.m. Persons interested in attending the hearing should call Ms. Shelby Journigan at (919) 541-5578 to verify that a hearing will be held.

Request To Speak at Hearing. Persons wishing to present oral testimony must contact EPA by May 14, 1986.

ADDRESSES: *Comments.* Comments should be submitted (in duplicate if possible) to: Central Docket Section (LE-131), Attention Docket Number OAQPS-A-82-39, U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460.

Public Hearing. If anyone contacts EPA requesting a public hearing, it will be held at EPA's Office of Administration Auditorium, Research Triangle Park, North Carolina. Persons interested in attending the hearing or wishing to present oral testimony should notify Ms. Shelby Journigan, Standards Development Branch (MD-13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number (919) 541-5578.

Background Information Document. The Background Information Document (BID) for the proposed standards may be obtained from the U.S. EPA Library (MD-35), Research Triangle Park, North Carolina 27711, telephone number (919) 541-2777. Please refer to "Calciners and Dryers in Mineral Industries—Background Information for Proposed Standards" [EPA-450/3-85-025a].

Docket. Docket No. A-82-39, containing supporting information used in developing the proposed standards, is available for public inspection and copying between 8:00 a.m. and 4:00 p.m., Monday through Friday, at EPA's Central Docket Section, West Tower Lobby, Gallery 1, Waterside Mall, 401 M Street SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Mr. Doug Bell or Mr. David Painter (919) 541-5624, Standards Development Branch, concerning regulatory decisions and the standard, or Mr. Kenneth Durkee (919) 541-5595, Industrial Studies Branch, concerning technical aspects of the industries and control technologies. The address for all parties is Emission Standards and Engineering Division (MD-13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

SUPPLEMENTARY INFORMATION:

I. Introduction

A. New Source Performance Standards—General

New source performance standards (NSPS) implement Section 111 of the Clear Air Act. The NSPS are issued for categories of sources which cause, or contribute significantly to, air pollution which may reasonably be anticipated to endanger public health or welfare. They apply to new stationary sources of emissions, i.e., sources whose construction, reconstruction, or modification begins after a standard for them is proposed.

An NSPS requires these sources to control emissions to the level achievable by "best demonstrated technology," or "BDT," which is defined in item B.3 below.

B. NSPS Decision Scheme

An NSPS is the product of a series of decisions related to certain key elements for the source category being considered for regulation. The elements identified in this "decision scheme" are generally the following:

1. *Source category to be regulated.* Usually an entire industry but can be a process or group of processes within an industry.

2. *Pollutant(s) to be regulated.* The particular substance(s) emitted by the source that the standard will regulate.

3. *Best demonstrated technology.* The technology on which the Agency will base the standards, i.e.,

> • • • application of the best technological system of continuous emission reduction which (taking into consideration the cost of achieving such emission reduction, and any nonair quality health and environmental impact and energy requirements) the Administrator determines has been adequately demonstrated. [Section 111(a)(1)].

For convenience, this will be referred to as "best demonstrated technology" or "BDT."

4. *Affected facility.* The pieces or groups of equipment that comprise the sources to which the standards will apply.

5. *Emission points to be regulated.* Within the affected facility, the specific physical location emitting pollutants (e.g., vents, stacks, and equipment leaks).

6. *Format for the standard.* The form in which the standards are expressed, i.e., as a percent reduction in emissions, as pollutant concentrations, or as equipment standards.

7. *Actual standards.* Based on what BDT can achieve, the maximum permissible emissions.

> Note.—In general, standards do not require that a specific technology be used to achieve them. The source owner/operator may select the method for achieving the pollution control required.

8. *Other possible considerations.* In addition, NSPS often include: standards for visible emissions, modification/reconstruction considerations, monitoring requirements, performance test methods, and reporting and recordkeeping requirements.

C. Overview of This Preamble

This preamble will:

1. Summarize the important features of the NSPS by discussing the conclusions reached with respect to each of the elements in the decision scheme.

2. Describe the environmental, energy, and economic impacts of the NSPS.

3. Present a rationale for each of the decisions in the decision scheme.

4. Discuss administrative requirements relevant to this action.

II. Summary of the NSPS

A. Source Category To Be Regulated

The proposed standards would apply to new, modified, and reconstructed calciners and dryers at mineral processing plants. For the purpose of the proposed standards, a mineral processing plant is any facility that processes or produces any of the following minerals or their concentrates: alumina, ball clay, bentonite, diatomite, feldspar, fire clay, fuller's earth, gypsum, industrial sand, kaolin, lightweight aggregate (clay, shale, and slate), magnesium compounds, perlite, roofing granules, talc, titanium dioxide, and vermiculite.

The affected facility for mineral processing plants in each of the industries listed above would be each calciner and each dryer. The types of dryers to which the proposed standards would apply include: rotary (direct), rotary (indirect), fluid bed, vibrating-grate, flash, and spray dryers. The types of calciners to which the proposed standards would apply include: rotary, flash, and kettle calciners; multiple hearth furnaces; and expansion furnaces.

The following processes and process units used at mineral processing plants would not be regulated under the NSPS: vertical shaft kilns in the magnesium compounds industry; the chlorination-oxidation process in the titanium dioxide industry; coating kilns, mixers, and aerators in the roofing granules industry; and tunnel kilns, tunnel dryers, apron dryers, and grinding equipment that also dries the process material used in any of the 17 mineral industries. The reasons for their exclusion are discussed in Section IV.A. of this preamble.

B. Pollutant(s) To Be Regulated

The proposed standards would limit emissions of PM from new, modified, and reconstructed mineral calciners and dryers.

C. Best Demonstrated Technology

The BDT is the technology for emission reduction on which the proposed emission standards are based. The BDT for controlling emissions from calciners and dryers in this source category is the use of a fabric filter, wet scrubber, or electrostatic precipitator (ESP). In cases where either of two control devices can be used on the same type of process unit and both devices are cost effective, both control devices are considered BDT.

Many of the control devices on existing calciner and dryer facilities are, or are capable of, achieving emission levels below the State implementation plan (SIP) level. This same control technology that is used at existing plants can also be used at new plants to achieve the NSPS. However, in most cases, facilities that become subject to the NSPS will only have to perform control device maintenance more frequently than is typical at existing plants, or modify control device operating parameters (i.e., increase the pressure drop on a wet scrubber) from those at existing facilities to ensure compliance with the NSPS. By requiring better operation and maintenance procedures, the NSPS will preclude the deterioration in performance of new source control devices to the PM SIP levels or to the allowable State opacity limits.

D. Affected Facility

The affected facility in each mineral industry is the calciner or dryer process unit. Feed and product conveyors are not considered part of the affected facility.

E. Format for the Standards

The format selected for these standards would be the concentration of PM emissions per standard unit of gas flow, i.e., grams of particulate per dry standard cubic meter of gas (g/dscm) (grains per dry standard cubic foot of gas [gr/dscf]).

F. Actual Standards

The proposed standards would limit the concentration of PM at the outlet of a control device to 0.09 g/dscm (0.04 gr/dscf) for calciners and for calciners and dryers installed in series and 0.057 g/dscm (0.025 gr/dscf) for dryers.

G. Standard for Visible Emissions

Stack emissions would also be limited to 10 percent opacity for process units controlled with dry control devices. The visible emissions standard would not apply to affected facilities that use wet scrubbers to control emissions. Instead, monitoring and reporting of the operating parameters of wet scrubbers (pressure drop and liquid flow rate) would be required to indicate that the control device is properly operated and maintained on a routine basis.

H. Modification/Reconstruction Considerations

According to the General Provisions (40 CFR 60.14), a modification is defined as certain physical or operational changes to an existing facility that would increase the PM emission rate to the atmosphere from that facility. If a raw material or fuel change occurs for which the calciner or dryer was originally designed, the change is not considered a modification. However, if a change is made that allows a unit to burn a fuel or process a new material for which it was not originally designed and any increase in PM emissions occurs because of this change, the change is considered to be a modification.

According to the General Provisions (40 CFR 60.15), reconstruction is defined as the replacement of the components of an existing facility to the extent that (1) the fixed capital cost of the new components exceeds 50 percent of the fixed capital cost required to construct a comparable new facility and (2) it is technically and economically feasible for the facility to meet the applicable standards. Because replacement or refurbishing of equipment parts subject to high temperatures, abrasion, and impact (e.g., end seals, flights refractory lining) is performed on a regular basis, it is considered routine maintenance rather than reconstruction or modification.

I. Compliance Testing

Under the proposed standards, compliance tests for PM emissions would be required for all air pollution control devices on new, modified, and reconstructed calciners and dryers. The PM emissions would be measured using EPA Reference Method 5 to determine compliance with the stack emissions standards. Visible emissions from dry control devices would be measured using EPA Reference Method 9.

J. Monitoring Requirements

With the exception of the four process unit/control device combinations discussed below, the owner or operator of a calciner or dryer who uses a fabric filter or a dry ESP control device to comply with the mass emissions standards would be required to install, calibrate, maintain, and operate a continuous monitoring system to measure and record the opacity of emissions discharged into the atmosphere from the control device. In lieu of a continuous opacity monitoring system, the owner or operator of a gypsum flash or kettle calciner or of a perlite rotary dryer or expansion furnace who uses a dry control device could have a certified observer record three 6-minute averages of the opacity of visible emissions from the control device, once per week of operation, in accordance with EPA Reference Method 9.

When a wet scrubber is used to comply with the calciner or dryer mass emission standard, the owner or operator would be required to install, calibrate, maintain, and operate

VOL 51 ISS 78 AP 23 1986 UMI

monitoring devices that continuously measure and record the pressure loss of the gas stream through the scrubber and the scrubbing liquid flow rate to the scrubber. The pressure loss monitoring device must be certified by the manufacturer to be accurate within ±1 inch of water column (in. w.c.) gauge pressure and must be calibrated on a simiannual basis in accordance with manufacturer's instructions. The liquid flow rate monitoring device must be certified by the manufacturer to be accurate within ±5 percent of design scrubbing liquid flow rate and must be calibrated on a semiannual basis in accordance with the manufacturer's instructions.

K. Reporting and Recordkeeping

The proposed standards would require industry to provide the reports required under the General Provisions (40 CFR 60.7, 60.8 and 60.11). The General Provisions require the owner or operator of an affected facility to notify the Administrator or his designated representative of the construction, anticipated startup, actual startup, and control system performance test of an affected facility, including initial compliance testing for the visible emissions standards.

During the most recent performance test, an average value of each wet scrubber operating parameter will be determined for the control device. Exceedances of this value, defined as less than 90 percent or greater that 110 percent of the average pressure drop, or less than 80 percent or greater than 120 percent of the average liquid flow rate, will be required to be reported to the Administrator semiannually. All 6-minute periods during which the average opacity from dry devices is greater than 10 percent will also be required to be reported semiannually.

III. Impacts of the NSPS

At present, 48 industry/process unit combinations are known to exist. A total of 87 model facilities were developed to represent one to three production sizes for each industry/process unit combination. As a result, no single "typical facility" exists that can be used as the basis for analyzing the impacts of the proposed standards. Instead, impacts were determined for model facilities representative of the typical-size process unit for each of the 48 industry/process unit combinations. There are expected to be 198 affected facilities in the first 5 years after the NSPS would become applicable. Of the 198 affected facilities, 94 will be constructed to provide new production capacity and 104 will replace existing facilities. Impacts to the NSPS were based on this projection.

A. Air

In the fifth year after the NSPS would become applicable (1990), nationwide emissions of PM would decrease by 7,900 Mg (8,800 tons) compared to emissions allowed under typical SIP's. This represents a 78 percent reduction in emissions.

B. Water

The standards would not produce adverse water pollution impacts.

C. Solid Waste

The nationwide increase in solid waste (as a sludge containing 70 percent moisture) in 1990 would be 7,500 Mg (8,300 tons), compared to the SIP level.

D. Noise

The noise introduced by air pollution control devices at new or modified facilities (e.g., fan noise) would not significantly increase the noise levels beyond those already produced by processing equipment at the plant.

E. Radiation

There will be no radiation impacts resulting from the proposed standards.

F. Energy

In the fifth year after the NSPS would become applicable, the maximum increase in energy consumption for mineral calciner and dryer control devices nationwide would be 17,000 megawatt-hours (MWh), compared to the SIP level for typical facilities. This incremental energy requirement due to the NSPS to operate control equipment would be less than 1 percent of the energy demands to operate the calciner and dryer process units.

G. Control Costs

1. *Nationwide Costs.* Based on industry growth projections, it is estimated that 62 new calciners and 32 new dryers will be installed in the first 5 years that the NSPS is in effect. In addition, during this same time period it is expected that 60 calciners and 44 dryers will be replaced at existing facilities at the end of their useful lives.

The total nationwide incremental capital cost of pollution control equipment in 1990 would range from $2.2 to $3.0 million under the proposed standards compared to the SIP level. The variation in costs is due to those process units for which either a fabric filter or a wet scrubber could be installed. If only wet scrubbers were installed, the capital cost of installation would be lower than if only fabric filters were installed.

The total nationwide incremental annualized cost of pollution control equipment in 1990 would range from $0.7 to $1.0 million. If only wet scrubbers were installed where an option exists, the annualized costs would be higher than if only fabric filters were installed because of the additional energy costs associated with operating a scrubber and the product recovery credits associated with operating a fabric filter.

At the 94 new facilities, capital control costs would be incurred for wet scrubbers and ESP's where the control device design parameters (pressure drop, plate area) are upgraded to achieve an NSPS emission limit more stringent than the SIP emission limit. For these same facilities, annualized control costs would be incurred under the NSPS for fabric filters because of improved operation and maintenance and for wet scrubbers and ESP's because of the energy demand associated with upgraded design parameters. For the 104 new process units that are projected in the first 5 years of the NSPS to replace existing units at the end of their useful lives, capital control device costs would increase over baseline levels in 23 percent of the cases as a result of upgrading the design of the control devices (e.g., increased pressure drop for a wet scrubber). In 11 percent of the cases, the existing wet scrubber control devices are operated at pressure drops that achieve both the SIP and NSPS emission limits, and, therefore, no incremental capital costs would be incurred as a result of the NSPS. In 66 percent of the cases, fabric filters installed to meet SIP emission limits would achieve the NSPS emission limit with improved operation and maintenance. Therefore, there is no capital cost increase for fabric filter control devices. The annualized control device costs for these 104 projected process units would increase as a result of improved operation and maintenance of fabric filters (66 percent of the cases) or as a result of upgrading the design of a wet scrubber or ESP (23 percent of the cases). As with the capital costs, annualized control costs would not change in 11 percent of the cases where wet scrubbers achieve both the SIP and NSPS emission limits.

H. Economic Effects

The projected growth and profitability of the 17 mineral industries are not expected to be affected adversely by implementation of the NSPS. For 15 of the 17 industries included in the analysis, the product price increases that would be required as a result of implementation of the NSPS would typically be less than 0.5 percent. Typical-size facilities in the fire clay and lightweight aggregate industries could experience product price increases of 1 and 1.75 percent, respectively, as a result of implementation of the NSPS. Additional discussion about the economic effects on these two industries in presented in Section IV.C.5 of this preamble.

IV. Rational for Proposed Standards

A. Selection of Source Category

1. *Threat to Public Health and Welfare Posed by Mineral Calciners and Dryers.* The mineral industries being covered by the NSPS already have been shown to be major contributors to air pollution that may reasonably be anticipated to endanger public health or welfare. There are 6 source categories currently listed on the NSPS priority list (44 FR 49225, August 21, 1979, revised January 8, 1982) that include 15 of the 17 mineral industries being covered by the NSPS. Number 13 on the priority list is Nonmetallic Mineral Processing, which includes sand and gravel, clay (ball clay, bentonite, fuller's earth, kaolin), talc, feldspar, diatomite, and vermiculite. Number 14 on the priority list, Metallic Mineral Processing, includes aluminum and titanium. The lightweight aggregate industry (clay, shale, and slate) is Number 32 on the NSPS priority list. Numbers 34, 46, and 54 on the priority list are Gypsum, Brick and Related Clay Products (fire clay), and Perlite, respectively. For the Brick and Related Clay Products source category, only calcining and drying of raw materials prior to firing of the brick are included in this source category.

The two industries covered by the NSPS that are currently not included in the Nonmetallic Mineral Processing or Metallic Mineral Processing source categories listed on the priority list are roofing granules and magnesium compounds. The Agency is proposing to expand these two source categories (Nos. 13 and 14) to include roofing granules and magnesium compounds. Roofing granules logically belong in the Nonmetallic Mineral Processing source category and magnisum compounds belong in the Metallic Mineral Processing source category and are, therefore, being added. The calciner and dryer processing units in these two industries process materials that can be controlled with similar effectiveness, costs, and control techniques as calciner and dryer units in the other industries being covered by the NSPS.

2. *Inclusions and Exclusions from the Source Category.* The standards would apply to new, modified, and reconstructed calciners and dryers used in the 17 mineral industries discussed above. Drying in defined as the removal of uncombined (free) water from the mineral material through direct or indirect heating. Calcining is the removal of combined (chemically bound) water and/or gases from the mineral material through direct or indirect heating. Combined calciner/dryer systems, which are common in the diatomite industry, would also be included and would be required to meet the emission limits established for calciners.

The following processes or process units will not be regulated under the NSPS: barite and borate manufacturing, iron ore pelletizing, pumice and sodium sulfate manufacturing, chlorination/oxidation processes in the titanium dioxide industry, apron and tunnel dryers, grinding mills that dry process material, coating kilns in the roofing granules industry, vertical shaft kilns in the magnesium compounds industry, and coolers. The reasons for their exclusion are discussed below.

In 1981, all mineral industries were reviewed to ascertain which industries had process equipment that could be considered dryers or calciners. The following 20 industries were selected for further analysis in the generic source category: alumina, ball clay, barite, bentonite, borates, diatomite, feldspar, fire clay, fuller's earth, industrial sand, iron ore pelletizing, kaolin, magnesium compounds, magnesium metal, pumice, roofing granules, sodium sulfate, talc, titanium dioxide, and vermiculite. Five of these original 20 industries, barite, magnesium metal, pumice, sodium sulfate, and iron ore pelletizing were subsequently dropped from consideration due to their limited growth potential. In addition, the Agency determined that chlorination/oxidation processes in the titanium dioxide industry did not involve the use of calciners or dryers to remove water, and, therefore, these processes were also dropped from this generic source category. The borate industry was dropped from further consideration along with the following process units: apron dryers, tunnel dryers, coolers, grinders that also dry process material, coating kilns in the roofing granules industry, and vertical shaft kilns in the magnesium compounds industry. The borate industry was dropped from further consideration because the potential emission reduction below the baseline level in the fifth year would be less than 91 Mg (100 tons) for the entire industry. Apron dryers and tunnel dryers are used infrequently and are typically uncontrolled at existing facilities. Based on State compliance test data, apron and tunnel dryers have uncontrolled particulate emission levels lower than the proposed emission limit for other mineral dryers. All cooler types were also dropped from further consideration because of their lack of emission reduction potential. Grinding equipment that also dries the process material is currently regulated by the nonmetallic minerals NSPS for any of the industries covered by the NSPS. Two other process units, coating kilns and vertical shaft kilns, were deleted because they did not fit the definition of a typical calciner. Coating kilns used in the roofing granules industry bake colored clay pigments onto already dried granules. Vertical shaft kilns are used in the magnesium compounds industry, and they sinter the raw material after it has been calcined in a multiple hearth furnace.

B. Pollutant(s) to be Regulated

1. *Particulate matter.* Particulate matter is the principal pollutant emitted to the atmosphere from mineral calciners and dryers. Nationwide PM emissions in 1990 from calciners and dryers in the 17 mineral industries would be approximately 10,200 Mg (11,300 tons) under existing SIP regulations. Continuous emission reduction systems are available that would reduce emissions as much as 78 percent below the SIP level.

2. *Other Pollutants Considered.* Most calciners and dryers are fired with natural gas and generate oxides of nitrogen (NO_x) and small quantities of sulfur dioxide (SO_2) as combustion products. It is expected that natural gas will continue to be the primary fuel used to fire most of these units. Bentonite, fire clay, and lightweight aggregate are the only industries covered by the NSPS that routinely use coal for fuel. None of the data obtained from the 17 industries showed the usage of NO_x or SO_2 control technology.

The Agency tested one fire clay rotary calciner and four lightweight aggregate rotary kilns to obtain an SO_2 data base for future investigation of SO_2 emissions. The results of these five tests are presented in the BID for the NSPS. and they indicate that both fire clay and lightweight aggregate rotary calciners show a potential to be major sources of SO_2 emissions. This limited data base is insufficient, however, to develop technology transfer for SO_2 control from other source categories, such as

VOL 51 ISS 78 AP 23 1986 UMI

industrial boilers, that use flue gas desulfurization systems for SO_2 control.

Data for NO_x emissions were obtained for five rotary calciners in the fire clay, lightweight aggregate, and titanium dioxide industries. These data show that both fire clay and lightweight aggregate rotary calciners are potential major sources of NO_x emissions. However, control technology for NO_x emissions has not been demonstrated on mineral calciners.

Because SO_2 and NO_x control technologies are not used in the 17 mineral industries, and because the data base is insufficient at this time to develop technology transfer for SO_x and NO_x control, the Agency is not regulating SO_2 and NO_x emissions from mineral calciners and dryers.

C. Selection of Best Demonstrated Technology

Section 111 of the Clean Air Act requires that standards of performance reflect BDT, which is the technology that yields the greatest emission reduction without imposing unreasonable impacts. *Essex Chemical Corp. v Ruckelshaus*, 486 F.2d 427. (D.C. Cir. 1973).

1. *Applicable Control Technologies.* An efficient PM collection device used in the mineral industries is the fabric filter. Data gathered during emission tests on fabric filters used to control emissions from a variety of calciners and dryers indicate that variations in the size distribution of PM and the mineral processed do not typically affect fabric filter performance. Other collection devices used in the mineral industries include dry ESP's and wet scrubbers. Dry ESP's are used only in the alumina, bentonite, gypsum, lightweight aggregate, and magnesium compounds industries. Both fabric filters and ESP's can achieve greater than 99 percent PM collection efficiency for calciner and dryer emissions in a variety of mineral industries.

The effectiveness of wet scrubbers for the control of calciner and dryer PM emissions is directly related to the pressure drop across the scrubber. The collection efficiency for a given particle size distribution increases as pressure drop increases. Pressure drops for wet scrubber-controlled calciners and dryers range form 0.5 to 70 in. w.c. For example, higher pressure drops are required for the smaller particle size distributions of titanium dioxide than are required for the larger particle size distributions of industrial sand to achieve the same emission limit.

The cost of operating pollution control equipment for calciners and dryers increases with increased maintenance and improved efficiency. Fabric filters must be equipped with heat-resistant bag materials such as Teflon® or Nomex® to control PM entrained in heated gas streams from calciners and dryers. The cost of complying with an emission limit increases as the emission limit decreases because more labor hours are required to maintain the fabric filter in its most efficient state. Maintenance of ESP's also must be performed more frequently to achieve greater emission reduction. In addition, the specific collection area of an ESP may need to be increased or multistage ESP's may need to be used to obtain a greater PM emission reduction. The cost of operating a wet scrubber increases with increasing pressure drop because of the additional energy required to achieve the higher pressure drop across the scrubber.

In many instances, a particular calciner or dryer could be controlled by either a dry control device (fabric filter or ESP) or a wet scrubber. For these units, wet scrubbers would typically have lower capital costs and higher annualized costs than fabric filters or ESP's.

2. *Regulatory Alternatives Considered.* The EPA considered the following regulatory alternatives as the means of achieving control of emissions:

a. Regulatory Alternative I (RA I) is equivalent to no additional regulatory action beyond that required by typical SIP's, i.e., baseline. Allowable PM emission limits under SIP's vary widely as discussed below.

Individual States use a variety of regulations and formulas to determine allowable PM emissions from calciners and dryers used in mineral processing industries. For the determination of RA I levels for each process unit, each mineral industry was surveyed, and the number and type of control devices used to control PM emissions from calciners and dryers were tabulated. The most commonly used control device on each process unit was selected as baseline control technology for that type of unit. To determine the range of emissions allowed by States for a particular industry, concentration emission limits equivalent to allowable emissions under the SIP's were calculated for each size and type of model process unit. Typical size process units were then used to develop a single, nationwide average SIP emission limit using a weighted average of total production by State. If the calculated baseline emission limit was greater than 0.45 g/dscm (0.20 gr/dscf) and the baseline control technology was a fabric filter, it was assumed, based upon EPA studies relating plume opacities to mass concentrations of PM, that the typical State opacity limits of 20 percent are more stringent than the corresponding SIP mass emission limits. For these cases, a baseline emission concentration that would approximate an exhaust gas opacity of 20 percent, i.e., 0.34 g/dscm (0.15 gr/dscf), was selected for evaluation.

Data obtained from EPA-conducted tests or from State compliance tests approved by EPA show that, in some instances, controlled emission levels from calciners and dryers at existing facilities are significantly lower than the mass emission limits stipulated by the appropriate SIP regulations. Therefore, the same control technology that is used at existing facilities could also be used at affected facilities to achieve the NSPS. However, in many cases, facilities subject to the NSPS would have to perform control device maintenance more frequently than is typical at existing plants or modify control device operating parameters from those at existing facilities to ensure compliance with the NSPS. By requiring better operation and maintenance procedures, the NSPS would reduce the deterioration in performance of new source control devices to the SIP levels or to the allowable State opacity limits.

b. Regulatory Alternative II (RA II) is equivalent to an emission control level for both calciners and dryers of 0.09 g/dscm (0.04 gr/dscf). As discussed below, the results of emission tests and scrubber performance modeling indicate that this level could be achieved by all affected facilities in all of the 17 mineral industries.

c. Regulatory Alternative III (RA III) is equivalent to an emission control level for calciners of 0.09 g/dscm (0.04 gr/dscf) and an emission control level for dryers of 0.057 g/dscm (0.025 gr/dscf). The emission test results indicate that a higher degree of emission control for dryers versus calciners is achievable. The additional emission reduction achievable by RA III over RA II requires only a small amount of additional maintenance on the control devices for dryers.

Emission test data from 52 source tests comprise the data base. Of the 52 tests, 25 were conducted on dryers. These data show that all ESP- and fabric filter-controlled dryers can achieve the emission level associated with RA III of 0.057 g/dscm (0.025 gr/dscf) during normal operation. Tests of 15 wet scrubber-controlled dryers in 7 industries indicate that for 10 of the 15 dryers, relatively low-energy wet scrubbers (3- to 10-in. w.c. pressure drop) were able to reduce emissions to less than the level of RA III. The other five dryers were unable to achieve the level of RA III with a low-energy scrubber. The emissions for all 15 dryers averaged 0.04 g/dscm (0.02 gr/dscf) and never exceeded 0.09 g/dscm (0.04 gr/dscf).

Of the 52 source tests comprising the data base, 27 tests were conducted on calciners. These data show that all ESP- and fabric filter-controlled calciners can achieve the emission level associated with RA III of 0.09 g/dscm (0.04 gr/dscf) during normal operation. Of the 27 tests, 9 tests were conducted on wet scrubber-controlled calciners in 5 industries. Of the nine tests, six of the calciners had emissions at or below the level of RA III. The concentration of PM emissions from these units averaged 0.09 g/dscm (0.04 gr/dscf) and never exceeded 0.17 g/dscm (0.08 gr/dscf).

Several dryers and calciners tested did not meet the emission limits of RA III using low-energy wet scrubbers as control equipment. To evaluate the performance of a higher energy scrubber on these systems, an EPA computerized scrubber model, as described in EPA report No. EPA–600/7–78–026, was used. These analyses indicate that dryers that had emissions in excess of 0.057 g/dscm (0.025 gr/dscf) could be controlled below that level by increasing scrubber pressure drops from 2 to 15 in. w.c. Calciners could be controlled to below 0.09 g/dscm (0.04 gr/dscf) with 17- to 24-in. w.c. pressure drop scrubbers in place of low-energy scrubbers (6 to 14 in. w.c.) now in use. Higher pressure drops (17 to 43 in. w.c.) are required for industries such as titanium dioxide, whose calciner and dryer emissions are composed of smaller particles, than are required for industries such as fuller's earth (11 in. w.c.), whose calciner and dryer emissions are composed of larger particles.

Representatives of the lightweight aggregate industry commented at the National Air Pollution Control Techniques Advisory Committee meeting that it would be unreasonable to require the pressure drop of wet scrubbers used to control rotary calciners to be increased by 13 in. w.c. to reduce emissions from certain tested facilities, which had emissions ranging from 0.10 to 0.11 g/dscm (0.042 to 0.048 gr/dscf), to the NSPS level of control. However, the 13 in. w.c. is the increase in the pressure drop that would be required to reduce emissions from the SIP level (0.20 g/dscm [0.09 gr/dscf]) to the NSPS level (0.09 g/dscm [0.04 gr/dscf]) of control. The pressure drop would have to be increased by only 3 to 5 in. w.c. to reduce emissions from the tested facilities to the NSPS level of control.

Electrostatic precipitators are used primarily in the alumina, bentonite, and magnesium compounds industries. Test data for ESP-controlled process units were obtained for a bentonite dryer, two alumina calciners, and two magnesium compounds calciners. Emissions from the dryer were 0.014 g/dscm (0.006 gr/dscf), and emissions from the calciner ranged from 0.037 to 0.056 g/dscm (0.016 to 0.025 gr/dscf).

There are 19 process unit combinations where no emission data were obtained. For these cases, one of two approaches was used to demonstrate whether the emission limit of RA III is achievable for that process unit: (1) Transfer of fabric filter technology from similar process units in other mineral industries whose PM emissions are more difficult to control than emissions from process units for which no data are available, or (2) if wet scrubbers were used on existing process units of the type in question, then the scrubber performance model discussed earlier was used to determine the pressure drop required by a venturi scrubber to achieve the emission limit of RA III. For both of these approaches, it was necessary to determine the process units that are most difficult to control. The Agency collected grab samples of the product materials from all process units for which emission data were unavailable and performed sieve analyses on them to determine particle size distributions. Similar analyses were performed for grab samples of materials collected during EPA-conducted emission tests. Analysis of the results of the sieve analyses indicates that the products of bentonite rotary dryers (69 percent less than 1.2 μm), fire clay rotary dryers (49 percent less than 1 μm), and kaolin multiple hearth furnaces (62 percent less than 2 μm), have the smallest particle size distributions of all of the process units covered by the NSPS. Emission tests were performed on process units utilizing these three materials. The bentonite rotary dryer was controlled by a fabric filter and had emissions of 0.047 g/dscm (0.02 gr/dscf). The fire clay rotary dryer was controlled by a 12-in. w.c. pressure drop scrubber and had emissions of 0.088 g/dscm (0.038 gr/dscf). The kaolin multiple hearth furnace was also controlled by a 12-in. w.c. pressure drop scrubber and had emissions of 0.047 g/dscm (0.020 gr/dscf).

In addition to the sieve analyses and outlet mass emission data obtained, inlet PM loading to the control device was measured during the emission tests conducted by the Agency. The highest loading, 259 g/dscm (113 gr/dscf), was measured at the inlet of a product recovery cyclone preceding a fabric filter controlling the bentonite rotary dryer. The inlet loading to the wet scrubber controlling the fire clay rotary dryer was 12 g/dscm (5 gr/dscf). The kaolin multiple hearth furnace had an inlet loading concentration of 9 g/dscm (4 gr/dscf).

These data are representative of the most difficult to control process unit combinations covered by the NSPS. Technology transfer analysis of the fabric filter-controlled bentonite dryer, with controlled emissions of 0.047 g/dscm (0.02 gr/dscf), indicates that other fabric filter-controlled calciners and dryers processing minerals with larger particle size distributions and lower inlet loading concentrations can achieve the emission limits of RA III. Similarly, wet scrubber-controlled calciners and dryers processing materials with a larger particle size distribution and lower inlet concentration than fire clay or kaolin can achieve the emission limits of RA III with the appropriate pressure drop.

The scrubber performance model was used to determine the pressure drop required to achieve the emission limits of RA III for those units for which emission test data were unavailable and for those units controlled by low-energy wet scrubbers whose emissions exceeded the emission limits of RA III. For those units for which emission test data were unavailable, input variables for the scrubber model were based on the smallest inlet particle size distribution and highest inlet loading concentration obtained from emission test data for process units that had similar or smaller product material particle size distributions. Modeling of scrubber performance was performed on 17 process units in 10 industries. The estimated pressure drop for larger materials such as industrial sand and roofing granules was approximately 3 in. w.c. Smaller-sized materials such as fire clay, kaolin, and titanium dioxide would require scrubber pressure drops of 14 to 43 in. w.c. to achieve the emission limits of RA III. For both fabric filter- and wet scrubber-controlled mineral calciners and dryers, the data base supports the achievability of the emission limits of RA III by the most difficult to control process units. Emission test data for ESP-controlled calciners and dryers were all below the emission limits of RA III and, therefore, ESP-controlled calciners and dryers can also achieve the emission limits of RA III.

VOL 51 ISS 78 APR 23 1986 UMI

3. *Environmental Impacts.* The environmental impacts associated with the NSPS include air, water, solid waste, and noise. The primary air pollution impact is from PM emissions. Regulatory Alternative I is equivalent to no additional regulatory action beyond that required by typical SIP's, i.e., baseline. As shown in Tables 1 and 2, the emission reduction attributable to RA II would be 3,550 Mg (3,920 tons) for dryers and 3,970 Mg (4,370 tons) for calciners in the fifth year (1990). The emission reduction attributable to RA III would be 4,000 Mg (4,420 tons) for dryers and 3,970 Mg (4,370 tons) for calciners in the fifth year. The total annual PM emission reduction below baseline for all dryers and calciners in the fifth year for RA II would be 7,500 Mg (8,300 tons), or 73 percent. The total annual PM emission reduction below baseline for all dryers and calciners in the fifth year for RA III is 7,900 Mg (8,800 tons), or 78 percent.

TABLE 1.—REGULATORY ALTERNATIVE IMPACTS FOR DRYERS

Regulatory alternative considered	Emission reduction, Mg/yr [a]	Average cost effectiveness versus baseline, $/Mg	Average incremental cost effectiveness, $/Mg [b]
I (baseline)	(c)		
II	3,550 [d]	360	360
III	4,000 [d]	370	310

[a] Emission reduction range for typical size units. Reduction credit was given to the fabric filter where an option exists. Breakdowns are based on existing percentages of each device.
[b] Incremental cost effectiveness—additional cost of next-more-restrictive control technique.
[c] Emission reduction attributable to the SIP versus uncontrolled dryers = 397,300 Mg/yr.
[d] Emission reduction below baseline.

TABLE 2.—REGULATORY ALTERNATIVE IMPACTS FOR CALCINERS

Regulatory alternative considered	Emission reduction, Mg/yr [a]	Average cost effectiveness versus baseline, $/Mg	Average incremental cost effectiveness, $/Mg [b]
I (baseline)	(c)		
II and III [d]	3,970 [e]	410	410

[a] Emission reduction range for typical size units. Reduction credit was given to the fabric filter where an option exists. Breakdowns are based on existing percentages of each device.
[b] Incremental cost effectiveness—additional cost of next-more-restrictive control technique.
[c] Emission reduction attributable to the SIP versus uncontrolled calciners = 156,600 Mg/yr.
[d] The level of control for calciners for both RA II and RA III is 0.09 g/dscm.
[e] Emission reduction below baseline.

Wet scrubbers are the only control devices on calciners and dryers in the mineral industries that generate wastewater streams requiring treatment or disposal. Typically, a PM-contaminated water stream from a scrubber is pumped to a settling pond on the site and not discharged into navigable waterways. The solids settle in the pond, and the water is recirculated to the scrubber. When solids fill the pond, the pond can be dredged, and the solids can be landfilled, or a new pond can be constructed. Therefore, there would be no adverse water pollution impacts due to implementation of any of the regulatory alternatives.

The material collected by fabric filters and ESP's is typically recycled back to the production process or is sold directly. Therefore, little solid waste is generated by fabric filters and ESP's. The main source of solid waste would be the solids in the sludge produced by wet scrubbers. Typical dewatered sludge from a settling pond contains about 30 percent solids. The solids in the sludge are mainly the mineral processed by the dryers and calciners. The nationwide solid waste (as sludge containing 70 percent moisture) increase over baseline levels in 1990 would be 7,000 Mg (7,700 tons) for RA II and 7,500 Mg (8,300 tons) for RA III. In the case of the titanium dioxide industry, the sludge generated by wet scrubbers is recycled to the process, and, therefore, no solid waste is generated. Solid wastes from dryers and calciners in mineral industries presently are not classified as hazardous wastes under the Resource Conservation and Recovery Act.

The noise introduced by air pollution control devices that would be required by either RA II or RA III will not significantly increase the noise levels beyond those already produced by processing equipment at the plant.

4. *Energy Impacts.* Operation of fabric filters, ESP's, and wet scrubbers to control PM emissions requires electrical energy. For RA II and RA III, the nationwide annual increase in energy demand of control devices over baseline levels would be 16,000 MWh and 17,000 MWh, respectively. These values represent the highest incremental electric energy requirement between fabric filters and wet scrubbers where an option exists. The additional energy required to operate the control equipment under RA II and RA III compared to RA I is less than 1 percent of the energy demand to operate the dryer and calciner process units. Therefore, the application of additional emisson control above the baseline level will not significantly increase the electrical energy demand of the mineral processing plants.

5. *Economic Impacts.* To determine the economic impacts of the proposed NSPS on each of the 17 mineral industries, financial analysis techniques were applied to the model facilities to evaluate the affordability of the pollution controls. The principal technique employed is the calculation of the maximum percent product price increase. The annualized control costs of RA III were used in the analysis because these costs are generally higher than those of RA II but are still considered to be reasonable. However, in a number of cases the annualized control costs for the two alternatives are the same and, in a few cases, the RA III costs are lower due to the product recovery credits resulting from fabric filter use, a high product value, and the greater emission reduction achieved under RA III compared to RA II.

The effect on product prices from implementation of the NSPS using the least costly control option for each of the model facilities in the 17 industries could range from a slight product price decrease for some industries to an increase of 1.75 percent for the lightweight aggregate industry. The product price increase for 15 of the 17 industries would typically be less than 0.5 percent. For the fire clay industry, a typical-size vibrating-grate dryer by itself has a 0 percent product price increase. However, the combination of a typical-size rotary dryer (0.28 percent) and a typical-size rotary calciner (0.95 percent) to produce a single product could have a 1.2 percent product price increase. Although the possible percent product price increases for fire clay and lightweight aggregate are higher than for the other 15 industries, these increases are not expected to have a significant effect on the output of either industry.

6. *Cost and Cost Effectiveness.* The Agency is not requiring that any particular control device by used to meet the recommended standards. It is technically possible to meet the emission levels associated with RA III with any of the control technologies currently in use in each respective industry. For every industry, there is at least one control technology that is cost effective. It is the improved operation and maintenance of these devices that enables the same control device to achieve a lower emission level under RA II or RA III than under RA I (e.g., the same scrubber would be operated at a higher pressure drop or fabric filter bags are replaced more frequently).

The cost-effectiveness (C/E) values for the model sizes of each process unit would range from a net credit of $1,000/Mg ($910/ton) to a cost of $5,500/Mg ($5,000/ton) for RA II versus baseline. All but one process unit, however, would have C/E values of less than or equal to $1,700/Mg ($1,500/ton) for RA II versus baseline. As shown in Tables 1 and 2, the average C/E for the least costly control option for all model sizes of calciners and dryers used in the 17 industries would be $410/Mg ($370/ton) and $380/Mg ($350/ton), respectively, for RA II versus baseline. The C/E of the perlite rotary dryer controlled by a fabric filter is $5,500-Mg ($5,000/ton). This unit has a high C/E because the emission reduction potential is small while the cost of achieving this small amount of emission reduction is relatively high. However, the additional emission reduction that would be achieved under RA III would decrease the C/E to $2,200/Mg ($2,000/ton), which is reasonable.

For RA III versus baseline, the C/E would range from a net credit of $1,000/Mg ($940/ton) to $2,200/Mg ($2,000/ton). As shown in Tables 1 and 2, the average industry-wide C/E for calciners and dryers would be $410/Mg ($370/ton) and $270/Mg ($250/ton), respectively.

For RA III versus RA II, the C/E values for the model sizes of dryers would range from a net credit of $1,200/Mg ($1,100/ton) to $1,900/Mg ($1,700/ton). The average incremental C/E for dryers for RA III versus RA II is $310/Mg ($280/ton). Because the emission levels of RA II and RA III are the same for calciners, there is no average incremental C/E value.

The C/E values are highly dependent on the product recovery credits for dry control devices. The product values used to calculate product recovery credits ranged from $9.00/Mg ($8.00/ton) for gypsum to $1,430/Mg ($1,300/ton) for titanium dioxide. The high dollar value of mineral materials such as titanium dioxide results in large product recovery credits, and, therefore, negative C/E values for some dry control devices. For this same reason, if only wet scrubbers are used where an option exists, the C/E is typically higher than it would be if only fabric filters are used.

7. *Rationale for selecting Regulatory Alternative III.* Comparison of the regulatory alternatives indicates that RA III would result in a significant reduction in PM emissions with minimal adverse water pollution, solid waste, and noise impacts. For RA III, the increase in energy consumption compared to baseline levels would not be significant and the costs and economic impacts would be reasonable. Selection of RA III results in the maximum emission reduction below baseline levels at a reasonable cost for this source category. The data base indicates that dryers can achieve a lower emission limit than calciners can achieve, across all 17 industries, without a significant additional cost compared to the additional emission reduction obtained. Therefore, RA III was selected as the recommended emission limit for regulation of calciner and dryer emissions.

D. Selection of Affected Facility

1. *General Principles.* The choice of the affected facility is based on the Agency's interpretation of Section 111 of the Clean Air Act and on the judicial construction of its meaning. See *ASARCO, Inc.*, v. *EPA*, 578 F. 2d 319 (D.C. Cir. 1978). Under this section, standards of performance must apply to new stationary sources of pollution, i.e., sources that begin construction, reconstruction, or modification after EPA proposes the standards.

"Source" is defined as "any building, structure, facility, or installation which emits or may emit any air pollutant" [Section 111(a)(3)]. Most industrial plants, however, consist of numerous pieces or groups of equipment that emit air pollutants and that may be viewed as "sources." The EPA therefore uses the term "affected facility" to designate the equipment, within a particular kind of plant, that is chosen at the "source" covered by a given standard.

In designating the affected facility, EPA determines which piece or group of equipment is the appropriate unit (the source) for separate emission standards in the particular industrial context involved. The determination is made in light of the terms and purpose of section 111. One major consideration in this decision is that a narrow designation usually brings replacement equipment under standards of performance sooner.

If, for example, an entire plant is designated as the affected facility, the standards would cover no part of the plant unless the replacement causes the plant as a whole to be "modified" or "reconstructed." The plant as a whole is *modified* only if its aggregate emissions are increased by the physical change in it, or by the change in its method of operating. Similarly, the plant is *reconstructed* only if: (1) Its cost of replacement exceeds 50 percent of the fixed capital costs required to build a comparable new facility and (2) meeting the applicable standards is technologically and economically feasible.

On the other hand, if each piece of equipment is designated as the affected facility, then as each piece is replaced, the new piece will be a new source subject to the standard. Since one purpose of section 111 is to minimize emissions by achieving emission limitation reflection BDT at all new sources, a narrow designation of the affected facility is generally the appropriate choice. It ensures that the standard will cover new emission sources within plants as they are installed. For this reason, the proposed NSPS would designate each calciner and dryer as the affected facility because to do so would maximize the coverage of the standards without causing unreasonable costs or other unreasonable impacts.

2. *Other Affected Facilities.* The definition of an affected facility in each mineral processing industry is each calciner or dryer process unit. Selection of other affected facilities for the NSPA was not required because the equipment other than calciners and dryers, i.e., crushers, grinding mills, screening operations, bucket elevators, belt conveyors, bagging operations, storage bins, and enclosed truck or railcar loading stations, is already covered by the metallic and nonmetallic minerals NSPS.

3. *Rational for Selecting Affected Facility.* Designation of each calciner and each dryer as the affected facility will ensure the greatest emission reductions and will ensure that replacement calciners and dryers will be regulated by the NSPS. This designation will also maximize the coverage of the standards by the modification and reconstruction provisions. Therefore, each calciner and each dryer is designated as an affected facility.

E. Selection of Emission Sources

The emission sources to be regulated are calciners and dryers. Particulate matter emissions from calciners and dryers are typically controlled by a fabric filter, wet scrubber, or an ESP. To ensure that all PM emissions from affected facilities are regulated by the proposed standards, it is necessary to have an emission limit. A visible emission standard would also be enforced for dry control devices.

F. Selection of Format for Standards.

1. *Alternative Formats Considered.* Two different formats could be selected to limit stack emissions from calciners and dryers at mineral processing plants. These are: (1) A mass standard, limiting emissions in terms of mass emissions per unit of production, and (2) a concentration standard, limiting the concentration of PM in the effluent gases.

2. *Rational of Format Selection.* A mass standard may appear more meaningful than other formats because it relates directly to the quantity of emissions discharged to the atmosphere. However, a major disadvantage of a mass standard for calciners and dryers is that, typically, the production or feed rate of a process operation is not

VOL 51 ISS 78 AP 23 1986 UMI

measured over the short term. Thus, an accurate determination of the weight of material processed through an affected facility during compliance testing would not be possible under typical plant operating conditions.

A concentration format (g/dscm [gr/dscf]) was selected for the recommended emission limits of the NSPS because of its ease of enforcement across 17 different mineral industries and because it adequately reflects best demonstrated technology. Monitoring of the production process is not necessary to determine compliance with the PM emission limits. However, the process unit must be operated at its maximum production rate during compliance testing. A concentration-based standard could be circumvented by adding dilution air to the gas stream. However, this is unlikely to occur at mineral calciner and dryer facilities because the size and operating costs of fans and motors increases with increasing gas volume to be moved. Also, the General Provisions contain adequate language to allow enforcement agencies to prevent such attempts to circumvent the standards.

To help ensure that air pollution control systems are properly installed, operated, and maintained, a visible emissions standard also is being proposed for all facilities controlled by fabric filters and dry ESP's. As discussed later in this preamble, a visible emissions standard for scrubbers would not be a meaningful indication of scrubber performance at mineral processing plants. However, the monitoring of operating parameters of wet scrubbers (pressure drop across the unit and scrubber liquid flow rate) would be required by the proposed standards.

G. Selection of Actual Standards

1. *Rationale for Standards Selected.* Section 111 of the Clean Air Act allows the Agency to distinguish among classes, types, and sizes within categories of new sources for the purpose of establishing standards. In the NSPS, based upon an analysis of the available test data, it was necessary to establish a separate standard for calciners, dryers, and calciners and dryers installed in series. The standards selected represent the levels of control achievable with the best system of continuous emission reduction.

2. *Need for Multiple Standards.* As discussed earlier, fabric filters, wet scrubbers, and ESP's are used to control PM emissions from calciners and dryers at mineral processing plants.

Results of emission tests approved by EPA were obtained for 25 dryers in 12 industries for all dryer types. All test results were less than 0.057 g/dscm (0.025 gr/dscf) except for four dryers controlled by low-energy wet scrubbers and one dryer controlled by a fabric filter. The scrubber modeling analysis indicated that the four dryers controlled by low-energy wet scrubbers could achieve an emission level of 0.057 g/dscm (0.025 gr/dscf) with a high-energy wet scrubber. One dryer controlled by a fabric filter had an emission concentration of 0.059 g/dscm (0.026 gr/dscf). The test report for this dryer states that most of the emissions were caused by leakage through a closed bypass damper. The fabric filter should have been able to achieve an emission limit of 0.09 g/dscm (0.025 gr/dscf) if no leakage had occurred.

Results of emission tests conducted or approved by EPA also were obtained for 26 calciners in 9 industries for all calciner types. All test results were less than 0.09 g/dscm (0.04 gr/dscf) except for three calciners controlled by low-energy wet scrubbers. Again, the scrubber modeling analysis indicated that these three calciners achieve an emission level of 0.09 g/dscfm (0.04 gr/dscf) with a high-energy scrubber. Therefore, an emission level of 0.057 g/dscm (0.025 gr/dscf) was selected for dryers, and an emission level of 0.09 g/dscm (0.04 gr/dscf) was selected for calciners.

The available data for calciners and dryers operated in series indicate that the proposed PM emission concentration of 0.04 gr/dscf for calciners can be achieved. Because the data did not indicate that the more stringent PM concentration of 0.057 g/dscm (0.025 gr/dscf) proposed for dryers can be achieved, the Agency is proposing that the NSPS for calciners and dryers operated in series be established at the less stringent concentration of 0.09 g/dscm (0.04 gr/dscf) and requests that interested individuals provide additional comments on this proposal during the public comment period.

H. Visible Emission Standards

Section 302(1) of the Act defines "standard of performance" to include "any requirement relating to the operation or maintenance of a source to assure continuous emission reduction."

1. *Reason for Including Visible Emission Standards.* A 10 percent opacity limit (based on 6-minute averages) is proposed for dryers and calciners in all 17 mineral industries using dry control devices (fabric filters and dry ESP's) to control emissions. A visible emission standard is included in the NSPS to ensure that dry control devices are properly operated and maintained. This visible emission standard will also serve as a tool for enforcement personnel in determining whether a facility should be tested for compliance with the mass standard.

2. *Rationale for These Provisions.* The opacity of visible emissions from a dry control device on an affected facility would be limited to 10 percent. This visible emission limit is based on 313 6-minute averages obtained during tests conducted on fabric filters used to control emissions from 6 calciners and 3 dryers in 5 industries and on 3 data points obtained during 1 test on a dry ESP used to control emissions from a flash calciner. The highest average opacity reading observed at any of the fabric filters was 8.3 percent, and the highest individual reading was 10 percent. The 8.3 percent 6-minute average opacity was measured at the outlet of a bentonite rotary dryer. Bentonite rotary dryer product material has the smallest sieve analysis particle size distribution of all of the mineral materials being covered by the NSPS. Process units for which both outlet mass and visible emission data are unavailable have larger product particle size distributions than those for which data are available and, therefore, would be expected to have lower opacities. In addition, the bentonite rotary dryer, with mass emissions of 0.05 g/dscm (0.02 gr/dscf), was in compliance with the proposed mass emission limit of 0.057 g/dscm (0.025 gr/dscf). The minerals with the largest percentage of small particles (≥ 50 percent less than 2.5 μm) in the outlet gas stream have maximum average opacities of less than 1 percent. All of these units also comply with the proposed mass emission limits. From these data, it can be concluded that process units for which both mass and visible emission data are unavailable would be less difficult to control than those for which data are available and could, therefore, achieve the proposed mass emission limits and a 10 percent visible emission standard under normal operating conditions.

The highest average opacity reading observed at the outlet of the flash calciner ESP was 6.7 percent, and the highest individual reading was 10 percent. The flash calciner had mass emissions of 0.057 g/dscm (0.025 gr/dscf) and, therefore, had mass emissions below the level of the proposed mass standard. When the opacity data from the ESP were normalized to the largest stack diameter known to exist on an ESP in the mineral industries, the average opacity at the normalized stack diameter was 7.1 percent. Therefore, all ESP's on calciners and dryers in the mineral industries should be capable of meeting a visible emission limit of 10 percent under normal operating conditions.

Based on the results of the visible emission tests, a 10 percent opacity limit is being proposed to ensure the proper operation and maintenance of dry air pollution control devices on calciners and dryers. This standard, as shown by the data presented above and in the BID, is achievable in all cases through the application of properly designed, operated, and maintained fabric filters and dry ESP's. Facilities controlled with wet scrubbers would be exempt from the proposed visible emission standard as discussed below.

3. *Other Considerations.* The visible emissions standard for stack emissions would be applicable in all cases unless EPA were to approve establishment of a special or adjusted visible emission standard under the provisions of 40 CFR 60.11(e). The provisions allow an owner or operator to apply to EPA for establishment of an adjusted visible emission standard for any source that meets the applicable concentration standard (demonstrated through performance tests under conditions established by EPA) but is unable to meet the visible emission standard, despite operating and maintaining the control equipment so as to minimize opacity. An adjusted visible emission standard might be established, for example, where an unusually large diameter stack precludes compliance with the proposed opacity limit.

Wet scrubber control devices frequently have a steam plume exiting from their exhaust stacks. Under these conditions, EPA Reference Method 9 specifies that the opacity of emissions be determined at a point after the steam plume has dissipated. Thus, opacity of emissions is determined at some variable distance from the stack outlet at a point where the emissions have been diluted. This distance and the amount of dilution vary with gas moisture content and meteorological conditions. Therefore, on a nationwide basis, an opacity limit for scrubber-controlled mineral calciners and dryers is not as demonstrative of proper operation and maintenance as the monitoring of pressure drop and liquid flow rate. Monitoring of wet scrubber parameters is discussed in Section IV.J of this preamble.

I. Modification/Reconstruction Considerations

A modification is defined as certain physical or operational changes to an existing facility that result in an increased emission rate of any pollutant to which the standards apply (40 CFR 60.14). Upon modification, an existing facility becomes an affected facility and, therefore, becomes subject to the NSPS. Routine maintenance procedures such as replacement or repair of calciner or dryer components subject to high temperatures and impact (e.g., end seals, flights, refractory lining) would not constitute a modification (40 CFR 60.14(e)(1)). Additional activities considered routine maintenance for calciners and dryers in mineral industries are described in Chapter 5 of the BID for the NSPS, referenced in the ADDRESSES section of this preamble.

When expansions at existing plants take place, usually a completely new calciner or dryer is added. Such an increase in production would not be considered a modification but rather a new source. Calcining and drying operations usually operate below 100 percent of capacity and are capable of handling increased throughput without additional equipment. If a new raw feed material is used or a fuel change occurs for which the calciner or dryer was originally designed, the change is not considered a modification. However, if a conversion is made allowing a unit to burn a fuel or to process a new material for which it was not originally designed, and an increase in emissions occurs because of this change, the change is considered to be a modification (40 CFR 60.14(e)(4)).

An existing facility may become subject to an NSPS if it is reconstructed. Reconstruction is defined in 40 CFR 60.15 as the replacement of the components of an existing facility to the extent that: (1) The fixed capital cost of the new components exceeds 50 percent of the fixed capital cost required to construct a comparable new facility and (2) it is technically and economically feasible for the facility to meet the applicable standards. Because EPA considers reconstructed facilities to constitute new construction rather than modification, reconstruction determinations are made irrespective of changes in emission rates.

If an owner or operator of an existing facility is planning to replace components and the fixed capital cost of the new components exceeds 50 percent of the fixed cost of a comparable new facility, the owner or operator must notify the appropriate EPA regional office 60 days before the construction of the replacement commences, as required under 40 CFR 60.15(d).

These modification and reconstruction provisions should not cause many calciners and dryers in the 17 mineral industries to become affected facilities because most of the physical and operational changes made to existing calciners and dryers are considered routine maintenance. Calciners and dryers at existing plants are more likely to become affected facilities when they are replaced by new process units at the end of their useful lives. Owners and operators of modified, reconstucted, or replaced facilities controlled by wet scrubbers of ESP's will probably incur retrofit costs if the design operating parameters of the existing wet scrubber or ESP must be increased to achieve the emission limit of the proposed NSPS. However, the cost of retrofitting wet scrubbers or ESP's would be similar to the cost of installing wet scrubbers or ESP's on new facilities because site-specific factors that might normally increase retrofit costs (e.g., availability of land and configuration of equipment) typically are not limiting factors at mineral processing plants. If site-specific factors are limiting at a plant, the capital cost of retrofiting wet scrubbers or ESP's may be greater than the capital cost of wet scrubbers and ESP's installed on new facilities (e.g., more ductwork). However, the annualized costs of retrofitting wet scrubbers or ESP's would not differ significantly from the annualized cost of wet scrubbers and ESP's installed on new facilities. Owners and operators of modified, reconstructed, or replaced facilities controlled by fabric filters should not incur retrofit costs because the emission limits of the proposed NSPS can be achieved by increasing the operation and maintenance of fabric filters.

J. Monitoring Requirements

Section 302(1) of the Act defines "standards of performance" to include "any requirement relating to the operation or maintenance of a source to assure continuous emission reduction." Section 114(a) authorizes EPA to require sources to monitor, test, keep records, and make reports.

With the exception of the four process unit/control device combinations discussed below, the owner or operator of a calciner or dryer who uses a dry control device to comply with the mass emission standard will be required to install and operate a continuous monitoring system to measure the opacity of emissions discharged into the atmosphere from the control device. In lieu of a continuous opacity monitoring system, the owner or operator of a gypsum flash or kettle calciner or of a perlite rotary dryer or expansion furnace who uses a dry control device could have a certified observer make three 6-minute observations of the opacity of visible emissions from the

VOL 51 ISS 78 APR 23 1986 UMI

control device, once per week of operation using EPA Reference Method 9.

When a wet scrubber control device is used to comply with the calciner or dryer mass emission standard, the owner or operator would be required to install and operate a monitoring device to continuously measure and record the pressure loss of the gas stream through the scrubber and the scrubbing liquid flow rate to the scrubber.

1. *Rationale for Including Monitoring Requirements.* Visible emission limits will help ensure that proper fabric filter and ESP operation and maintenance procedures are performed and monitored. This monitoring can indicate when fabric filter bags are torn or loose and when ESP electrodes are damaged or malfunctioning. Similarly, monitoring of scrubber pressure loss and liquid flow rate can indicate malfunctions in the water pumping equipment, blockage of pipes, and the need to adjust the variable throat opening (if applicable).

Monitoring of visible emissions from dry control devices and recording of exceedances of the 10 percent opacity limit by a certified observer or a continuous monitoring system will alert industry and enforcement personnel of potential violations of the mass emission standard. Continuous opacity monitoring using a transmissometer is an effective means of ensuring the proper operation and maintenance of particulate control equipment. As a result, operation of a transmissometer is an integral part of the improved control device operation and maintenance practices that account for the emission reduction below baseline levels associated with RA III.

The absence of an opacity limit in the NSPS for wet scrubber emissions requires that an alternative method be used to ensure proper operation and maintenance of these devices. Therefore, to monitor the potential degradation in the performance of wet scrubbers over time, the proposed standards would require the owner or operator of wet scrubbers to measure and record selected control device operating parameters. These recorded values would then be available to enforcement and industry personnel for comparison against the range of values of each operating parameter recorded during the performance test when the mass emission limit was being met. Under Section 60.7(d) of the General Provisions, the owner or operator is required to maintain the monitoring records at the source for a minimum of 2 years and to make these records available for inspection, upon request, by Agency personnel or their representatives.

The Agency believes that changes in the values of operating parameters from those measured during a performance test are good indicators for an owner or operator and an enforcement agency to use to verify proper operation and maintenance of a control device. Not maintaining the operating parameters at levels within the range recorded during the performance test could indicate a violation of the requirements to properly operate and maintain the control equipment, as stated in Section 60.11(d) of the General Provisions.

Although periods of excursions from, or reductions in, the various operating parameters would not, of themselves, constitute a violation of the numerical emission limit, they may indicate to an enforcement agency the need to conduct a performance test. The results of the performance test would be used to determine compliance with the numerical emission limit in accordance with Section 60.11(a) of the General Provisions.

To evaluate the cost of continuous opacity monitoring systems under RA III, the annual operating cost of the transmissometer was added to the annual operating cost of the PM control device, and the C/E of control was calculated. With the exception of the four process unit/control device combinations discussed below, all of the C/E values were less than or equal to $3,080/Mg ($2,700/ton). The C/E was $4,590/Mg ($4,170/ton) for the gypsum flash calciner, $3,080/Mg ($2,760/ton) for the gypsum kettle calciner, $3,670/Mg ($3,340/ton) for the perlite rotary dryer, and $7,530/Mg ($6,840/ton) for the perlite expansion furnace.

For the gypsum flash and kettle calciners and the perlite rotary dryer and expansion furnace, a less costly monitoring method could be used. The C/E of control, including a certified observer to obtain three 6-minute averages of the opacity of visible emissions once per week of operation of these facilities in accordance with EPA Reference Method 9, would range from $1,740 Mg ($1,580/ton) to $2,760/Mg ($2,510/ton).

K. Performance Test Methods

1. *Method Selected.* Under the proposed standards, performance tests for PM emissions would be required for all air pollution control devices on calciners and dryers. Particulate matter would be measured by Reference Methods 1, 2, 3, 4, and 5 to determine compliance with the stack emission standards. Compliance with the visible emissions standard would be determined using Reference Method 9 to measure stack opacity as 6-minute averages.

2. *Applicability of Method 5 to Standard.* Reference Method 5 provides the concentration of PM in the stack exhaust gas stream as g/dscm (gr/dscf). The NSPS requires that calciners achieve a level of 0.09 g/dscm (0.04 gr/dscf) and that dryers achieve a level of 0.057 g/dscm (0.025 gr/dscf). Method 5, therefore, provides an accurate determination of compliance directly, without requiring any additional monitoring of the production process (e.g., production rate).

L. Reporting and Recordkeeping Requirements

Section 302(1) of the Act defines "standard of performance" to include "any requirement relating to the operation or maintenance of a source to assure continuous emission reduction." Section 114(a) authorizes EPA to require sources to monitor, test, keep records, and make reports.

The owner or operator of a dry control device controlling PM emissions from an affected calciner or dryer facility will be required to record visible emissions using a continuous monitoring system, or to have a certified observer record three 6-minute averages (24 consecutive readings each) of the opacity of visible emissions from the control device, once per week of operation, in accordance with EPA Reference Method 9, as described in Section IV.J. of this preamble.

When a wet scrubber is used to control particulate emissions from an affected calciner or dryer facility, the owner or operator will be required to record both the pressure loss of the gas stream through the scrubber and the scrubbing liquid flow rate to the scrubber once per day of normal operation.

Each owner or operator will be required to submit written reports semiannually of exceedances of the 10 percent visible emission limit and any exceedances of the wet scrubber operating parameters discussed above. For the purpose of these reports, an exceedance of wet scrubber operating parameters is defined as less than 90 percent or greater than 110 percent of the average pressure drop, or less than 80 percent or greater than 120 percent of the average liquid flow rate determined during the most recent performance test successfully passed to demonstrate compliance with the mass emission limit. The owner or operator will be required to submit written documentation of semiannual calibrations of monitoring devices as part of the semiannual reports.

Records of the measurements discussed in this section must be retained for at least 2 years. The requirements of this section remain in force until and unless the Agency, in delegating enforcement authority to a State under Section 111(c) of the Act, approves reporting requirements or an alternative means of compliance surveillance adopted by such State. In that event, affected facilities within the State will be relieved of the obligation to comply with this section provided that they comply with the requirements established by the State. [Section 114 of the Clean Air Act, as amended (42 U.S.C. 7414)].

V. Administrative Requirements

A. Public Hearing

A public hearing will be held, if requested, to discuss the proposed standards in accordance with Section 307(d)(5) of the Clean Air Act. Persons wishing to make oral presentations should contact EPA at the address given in the **ADDRESSES** section of this preamble. Oral presentations will be limited to 15 minutes each. Any member of the public may file a written statement with EPA before, during, or within 30 days after the hearing. Written statements should be addressed to the Central Docket Section address given in the **ADDRESSES** section of this preamble.

A verbatim transcript of the hearing and written statements will be available for public inspection and copying during normal working hours at EPA's Central Docket Section in Washington, D.C. (see **ADDRESSES** section of this preamble).

B. Docket

The docket is an organized and complete file of all the information submitted to or otherwise considered by EPA in the development of this proposed rulemaking. The principal purposes of the docket are: (1) to allow interested parties to identify and locate documents so that they can effectively participate in the rulemaking process and (2) to serve as the record in case of judicial review (except for interagency review materials [Section 307(d)(7)(A)]).

C. Clean Air Act Procedural Requirements

1. *Administrator Listing—Section 111.* As prescribed in Section 111 of the Clean Air Act, as amended, establishment of standards of performance for calciners and dryers in mineral industries was preceded by the Administrator's determination (40 CFR 60.16 44 FR 49222, dated August 21, 1979 and 40 CFR 60.16 47 FR 950, dated January 8, 1982) that these sources contribute significantly to air pollution which may reasonably be anticipated to endanger public health or welfare.

2. *Periodic Review—Section 111.* This regulation will be reviewed 4 years from the date of promulgation as required by the Clean Air Act. This review will include an assessment of such factors as the need for integration with other programs, the existance of alternative methods, enforceability, improvements in emission control technology, and reporting requirements.

3. *External Participation—Section 117.* In accordance with Section 117 of the Act, publication of this proposal was preceded by consultation with appropriate advisory committees, independent experts, and Federal departments and agencies. In addition, numerous meetings were held with industry representatives and trade associations during development of the proposed standards. The Administrator will welcome comments on all aspects of the proposed regulation, including economic and technological issues.

Comments are also specifically invited on the achievability of the standard with regard to calciners and dryers combined in series. Any comments submitted to the Administrator on this issue should contain specific information and data pertinent to an evaluation of the magnitude and severity of its impact and suggested alternative courses of action that could avoid this impact.

4. *Economic Impact Assessment—Section 317.* Section 317 of the Clean Air Act requires the Administration to prepare an economic impact assessment for any new source standard of performance promulgated under Section 111(b) of the Act. An economic impact assessment was prepared for the proposed regulations and for other regulatory alternatives. All aspects of the assessment were considered in the formulation of the proposed standards to ensure that the proposed standards would represent the best system of emission reduction considering costs. The economic impact assessment is included in the BID.

D. Office of Management and Budget Reviews

1. *Paperwork Reduction Act.* The information collection requiements in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* Comments on these requirements should be submitted to the Office of Information and Regulatory Affairs of OMB, marked "Attention: Desk Officer for EPA," as well as to EPA. The final rule will respond to any OMB or public comments on the information collection requirements.

2. *Executive Order 12291 Review.* Under Executive Order 12291, EPA must judge whether a regulation is "major" and therefore subject to the requirement of a Regulatory Impact Analysis. This proposed regulation is not major because it would result in none of the adverse economic effects set forth in Section 1 of the Order as grounds for finding a regulation to be major. The total nationwide incremental annualized costs in the fifth year after the standards would go into effect would range from $0.7 to $1.0 million, less than the $100 million established as the first criterion for a major regulation in the Order. The maximum estimated price increase of 1.75 percent associated with the proposed standards would not be considered a "major increase in costs or prices" specified as the second criterion in the Order. The economic analysis of the proposed standards' effect on the industry did not indicate any significant adverse effects on competition, investment, productivity, employment, innovation, or the ability of U.S. firms to compete with foreign firms (the third criterion in the Order).

This regulation was submitted to OMB for review as required by Executive Order 12291. All written communications between EPA and OMB are in the docket.

E. Regulatory Flexibility Act Compliance

The Regulatory Flexibility Act of 1980 requires the identification of potentially adverse impacts of Federal regulations upon small business entities. The Act specifically requires the completion of a Regulatory Flexibility Analysis in those instances where small business impacts are possible. The EPA definition of significant effect involves four tests: (1) Prices for small entities rise 5 percent or more, assuming costs are passed on to consumers; or (2) annualized investment costs for pollution control are greater than 20 percent of total capital spending; or (3) control costs as a percentage of sales for small entities are 10 percent greater than control costs as a percentage of sales for large entities; or (4) the requirements of the regulation are likely to result in closures of small entities.

The Act's definition of "small business" is based on definitions developed by the Small Business Administration (SBA). The SBA's definitions are listed in 13 CFR Part 121

BEST COPY AVAILABLE

VOL 51 ISS 78 AP 23 1986 UMI

by Standard Industrial Classification (SIC) categories. For most of the mineral dryer and calciner industries, the SBA defines a small business as one with 500 or fewer employees (the 2 exceptions are gypsum and titanium dioxide, each of which is 1,000 employees). As part of the development of this proposed standard a considerable amount of effort has been devoted to the task of identifying small businesses in the 17 industries. Steps that have been taken to identify small businesses include an extensive review of standard financial reference sources such as Moody's and Standard & Poor's, a mailing of Section 114 information requests, and an electronic data base search. Most of the mineral dryer and calciner industries do include small businesses according to the SBA definition. Because the standard under consideration here is an NSPS, the standard would apply to all businesses (both small and large) in the 17 industries, and as a result the test of a substantial number of small businesses is met.

Although there are a substantial number of small businesses, the measure of significant effects is not likely to be met. As described earlier, the absolute level of the percent product price increases is quite small for most of the industries, typically about 0.5 percent or less. Thus, the first test is never triggered. Neither are the second or fourth tests triggered. The third test is occasionally triggered, but the absolute sizes of the numbers are so small as to make this test inapplicable. For example, in the diatomite industry, a small flash dryer (4 Mg/h) has control costs as a percentage of sales that are 23 percent higher than the corresponding percentage for a larger flash dryer (11 Mg/h). But the absolute levels of these two percentages are 0.16 percent and 0.13 percent, and the 23 percent difference between them is virtually meaningless. Thus, because the absolute level of the percent product price increases is quite small for most of the industries, and because the tests are presented as guidelines, an interpretation of the spirit and purpose of the Act indicates that the industries do not exceed the Act's tests. Because these standards impose no adverse economic impacts, a Regulatory Flexibility Analysis has not been conducted.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this rule, if promulgated, will not have a significant economic impact on a substantial number of small business entities.

List of Subjects in 40 CFR Part 60

Air pollution control, Reporting and recordkeeping requirements, Incorporation by reference, Intergovernmental relations, Metallic minerals, and Nonmetallic minerals.

Dated: April 12, 1986.

Lee M. Thomas,

Administrator.

PART 60—[AMENDED]

It is proposed that 40 CFR Part 60 be amended as follows:

1. The authority citation for Part 60 continues to read as follows:

Authority: Secs. 101, 111, 114, 301(a), Clean Air Act as amended (42 U.S.C. 7401, 7411, 7414, 7601).

2. By adding a new Subpart UUU consisting of §§ 60.730 through 60.736 as follows:

Subpart UUU—Standards of Performance for Calciners and Dryers in Mineral Industries.

Sec.

60.730 Applicability and designation of affected facility.
60.731 Definitions.
60.732 Standards for particulate matter.
60.733 Reconstruction.
60.734 Monitoring of emissions and operations.
60.735 Recordkeeping and reporting requirements.
60.736 Test methods and procedures.

Subpart UUU—Standards of Performance for Calciners and Dryers in Mineral Industries

§ 60.730 Applicability and designation of affected facility.

(a) The affected facility to which the provisions of this subpart apply is each calciner and dryer at mineral processing plants. Feed and product conveyors are not considered part of the affected facility.

(b) An affected facility that is subject to the provisions of Subpart LL, metallic mineral processing plants, is not subject to the provisions of this subpart.

(c) The owner or operator of any facility under paragraph (a) of this section that commences construction, modification, or reconstruction after April 23, 1986, is subject to the requirements of this subpart.

§ 60.731 Definitions.

As used in this subpart all terms not defined herein shall have the meaning given them in the Clean Air Act and in Subpart A of this part.

"Calciner" means the equipment used to remove combined (chemically bound) water and/or gases from mineral material through direct or indirect heating. This definition includes expansion furnaces and multiple-hearth furnaces.

"Control device" means the air pollution control equipment used to reduce particulate matter emissions released to the atmosphere from one or more affected facilities.

"Dryer" means the equipment used to remove uncombined (free) water from mineral material through direct or indirect heating.

"Installed in series" means a calciner and dryer installed such that the exhaust gases from one flow through the other and then the combined exhaust gases are discharged to the atmosphere.

"Mineral processing plant" means any facility that processes or produces any of the following minerals or their concentrates: alumina, ball clay, bentonite, diatomite, feldspar, fire clay, fuller's earth, gypsum, industrial sand, kaolin, lightweight aggregate, magnesium compounds, perlite, roofing granules, talc, titanium dioxide, and vermiculite. The following processes and process units used at mineral processing plants would not be regulated under the NSPS: vertical shaft kilns in the magnesium compounds industry; the chlorination-oxidation process in the titanium dioxide industry; coating kilns, mixers, and aerators in the roofing granules industry; and tunnel kilns, tunnel dryers, apron dryers, and grinding equipment that also dries the process material used in any of the 17 mineral industries.

§ 60.732 Standards for particulate matter.

Each owner or operator of any affected facility which is subject to the requirements of this subpart shall comply with the emission limitations set forth in this secton on and after the date on which the initial performance test, required by § 60.8 is completed, but not later than 180 days after the initial startup, whichever date comes first. No emissions shall be discharged into the atmosphere from any affected facility that:

(a) Contain particulate matter in excess of 0.09 gram per dry standard cubic meter (g/dscm) (0.04 grain per dry standard cubic foot [gr/dscf]) for calciners and for calciners and dryers installed in series and in excess of 0.057 g/dscm (0.025 gr/dscf) for dryers; and

(b) Exhibit greater than 10 percent opacity, unless the emissions are discharged from an affected facility using a wet scrubbing control device.

§ 60.733 Reconstruction.

The cost of replacement of equipment subject to high temperatures and abrasion on processing equipment shall not be considered in calculating either the "fixed capital cost of the new components" or the "fixed capital cost that would be required to construct a comparable new facility" under § 60.15. Calciner and dryer equipment subject to high temperatures and abrasion are: end seals, flights, and refractory lining.

§ 60.734 Monitoring of emissions and operations.

(a) With the exception of the process units described in paragraph (b) of this section, the owner or operator of an affected facility subject to the provisions of this subpart who uses a dry control device to comply with the mass emission standard shall install, calibrate, maintain, and operate a continuous monitoring system to measure and record the opacity of emissions discharged into the atmosphere from the control device. Each owner or operator who uses a continuous monitoring device to comply with the requirements of this paragraph shall recalibrate the device semiannually in accordance with procedures under § 60.13.

(b) In lieu of a continuous opacity monitoring system required in paragraph (a) of this section, the owner of operator of a gypsum flash or kettle calciner or of a perlite rotary dryer or expansion furnace who uses a dry control device may have a certified visible emissions observer measure and record three 6-minute averages of the opacity of visible emissions to the atmosphere once per week of operation in accordance with EPA Reference Method 9.

(c) The owner or operator of an affected facility subject to the provisions of this subpart who uses a wet scrubber to comply with the mass emission standard for any affected facility shall install, calibrate, maintain, and operate monitoring systems that continuously measure and record the pressure loss of the gas stream through the scrubber and the scrubbing liquid flow rate to the scrubber. The pressure loss monitoring device must be certified by the manufacturer to be accurate within ±1 inch of water column gauge pressure. The liquid flow rate monitoring device must be certified by the manufacturer to be accurate within ±5 percent of design scrubbing liquid flow rate. All monitoring devices required under this paragraph are to be recalibrated semiannually in accordance with manufacturer's instructions.

§ 60.735 Recordkeeping and reporting requirements.

(a) Records of the measurements required in § 60.734 of this subpart must be retained for at least 2 years.

(b) Each owner or operator shall submit written reports semiannually of exceedances of control device operating parameters required to be monitored by § 60.734 of this subpart. Each owner or operator also shall submit written reports semiannually that document corrective maintenance required as a result of semiannual calibrations of the monitoring device that is required in § 60.734. For this purpose of these reports, exceedances are defined as all 6-minute periods during which the average opacity from dry control devices is greater than 10 percent, or any wet scrubber pressure drop that is less than 90 percent or greater than 110 percent, or each wet scrubber liquid flow rate that is less than 80 percent or greater than 120 percent of the average value recorded according to Section 60.736(c) during the most recent performance test that demonstrated compliance with the particulate matter standard.

(c) The requirements of this section remain in force until and unless the Agency, in delegating enforcement authority to a State under Section 111(c) of the Clean Air Act, approves reporting requirements or an alternative means of compliance surveillance adopted by such State. In that event, affected facilities within the State will be relieved of the obligation to comply with this section provided that they comply with the requirements established by the State.

§ 60.736 Test methods and procedures.

(a) Reference methods in Appendix A of this part, except as provided under § 60.8(b), shall be used to determine compliance with the standards prescribed under § 60.732 as follows:

(1) Method 1 for sample and velocity traverses;

(2) Method 2 for stack gas velocity and volumetric flow rate;

(3) Method 3 for stack gas dry molecular weight;

(4) Method 4 for stack gas moisture content;

(5) Method 5 for the measurement of particulate emissions; and

(6) Method 9 for the opacity of visible emissions.

(b) The sampling time for each test run shall be at least 2 hours and the minimum volume of gas sampled shall be 1.7 dscm (60 dscf).

(c) During the initial performance test of a wet scrubber, the owner or operator shall measure and record an arithmetic average of both the change in pressure of the gas stream across the scrubber and the scrubbing liquid flow rate.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 15; at 9 am.

WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.

RESERVATIONS: Laurence Davey 202-523-3517

Title 3—

The President

Proclamation 5464 of April 22, 1986

National School Library Month, 1986

By the President of the United States of America

A Proclamation

The accumulation of information, the acquisition of knowledge, and the application of that knowledge to solve problems or enhance life are principal functions of American education. At every level, school libraries offer a great range of resource materials that greatly enrich education and increase the knowledge and understanding of all Americans.

Young people often develop a lifelong love of reading because of their exposure to books in school libraries. Furthermore, researchers are often motivated by the vast resources of university and special libraries as they dedicate themselves to studying the problems of society. School libraries and their dedicated staffs make an incalculable contribution to our educational system.

The Congress, by Senate Joint Resolution 52, has designated the month of April 1986 as "National School Library Month" and has authorized and requested the President to issue a proclamation in observance of this occasion.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby proclaim the month of April 1986 as National School Library Month. I invite the Governors of every State, principals, teachers, educators, students, parents, and all Americans to observe this month with appropriate activities to heighten the awareness of the importance of school libraries.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-second day of April, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Ronald Reagan

Proclamation 5485 of April 22, 1986

Asian/Pacific American Heritage Week, 1986

By the President of the United States of America

A Proclamation

Americans who have come from Asian and Pacific countries have made notable contributions to our Nation in a wide range of fields, including science, the arts, medicine, law, literature, agriculture, industry, commerce, and government. Through the rich and varied traditions and heritages of their homelands, they have greatly enhanced America's culture and the lives of all Americans.

This Nation fittingly honors its citizens of Asian and Pacific descent. They have brought to our country an industriousness that boosts our economy and a passion for freedom that rejuvenates American ideals. We are grateful to Asian and Pacific Americans for their unwavering support for the unalienable rights to life, liberty and the pursuit of happiness that form the core of the American ethos. Through their bravery and perseverance, they have provided us with a moving testament to the universality of the human thirst for political freedom.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim the week beginning May 4, 1986, as Asian/Pacific American Heritage Week, and call upon all people of the United States to observe this week with appropriate ceremonies and activities.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-second day of April, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Proclamation 5466 of April 22, 1986

Mother's Day, 1986

By the President of the United States of America

A Proclamation

By tradition, the second Sunday in May is designated as Mother's Day, one of America's best-loved holidays. It gives us all a special occasion to honor our own, and to praise the unique dignity of motherhood, one of life's highest callings.

Thomas Jefferson called motherhood "the keystone of the arch of matrimonial happiness," and we must always remember that with love, strength, and fortitude, the American mother assisted in the settlement, development, and prosperity of our country. Her contributions to the well-being of the family, the community, and the Nation are beyond all reckoning. A Jewish saying sums it up: "God could not be everywhere—so He created mothers."

The role of the mother has changed constantly in our society, but its fundamental meaning abides: love and caring. The modern mother is conquering new worlds. She continues to be the heart of the family and the hearth of the home. Where mothers are honored and loved, the family is strong. And where the family is strong the nation is strong.

In recognition of the magnificent contributions of mothers to their families and to the Nation, the Congress, by a joint resolution approved May 8, 1914 (38 Stat. 770), has designated the second Sunday in May of each year as Mother's Day and requested the President to call for its appropriate observance.

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, do hereby request that Sunday, May 11, 1986, be observed as Mother's Day. I urge all Americans to express their love and honor to their mothers and to reflect on the importance of motherhood to the well-being of our country. I direct Government officials to display the flag of the United States on all Federal government buildings, and I urge all citizens to display the flag at their homes and other suitable places on that day.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-second day of April, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Proclamation 5467 of April 22, 1986

Father's Day, 1986

By the President of the United States of America

A Proclamation

Each year the third Sunday in June is designated as Father's Day, a day on which we honor our Nation's fathers for everything they do for their families and for America.

Today fatherhood is sometimes drily described as a craft or an occupation, something which competes with career or outside pursuits for time and attention. Contemporary books and articles offer reams of advice to mothers and fathers on how to improve as parents and better manage their time at home and with their children. In this era of new demands and stresses on families, we frequently forget just what it is that is special about fatherhood, what makes it not a part of life, but a path in life that has, in every generation, the power to create and renew.

Fatherhood, after all, is about childhood. Fatherhood is walking the floor at midnight with a sick baby that cannot sleep; fatherhood is an arm around the shoulders of a child crying because a balloon is lost; fatherhood is repairing a bicycle wheel for the umpteenth time knowing that it won't last more than the afternoon. Fatherhood is guiding a youth through the wilderness of adolescence toward the vast expanse of adulthood; fatherhood is holding tight when all else seems to be falling apart; and fatherhood is letting go when it is time to part. Fatherhood is long hours at the blast furnace or in the fields, behind the wheel or in front of a computer screen, working a twelve-hour shift or doing a six-month tour of duty. In short, fatherhood is giving one's all, from a child's first day of life on, from the break of day to its end—on the job, in the household, but, most of all, in the heart.

From the vantage point of his love and responsibility, a father sees the future and dedicates himself to doing whatever is necessary to bring his family safely through. No father performs any of these tasks with thought of thanks or reward. The things that gratify him most are those that represent success in what he has labored to impart to his children: strength of character and conviction, love of family and country, a sense of right and wrong, and, above all, a spirit of thanksgiving for the generous gift of life itself.

Because human nature often keeps us from recognizing how great another's sacrifice is until we assume similar burdens, many of us realize for the first time how dearly we were prized only when we ourselves become parents. On this day for fathers, all of us have a special opportunity to say thanks to America's dads for their selflessness and devotion. We also have a chance to say a prayer for fathers everywhere—for their health and strength if they are with us, or for their blessing if this day finds them smiling down from heaven's bright corridors. Truly, for the labor and legacy of our families and our freedoms, we cannot thank them enough.

VOL 51 ISS 79 AP 24 1986 UMI

NOW, THEREFORE, I, RONALD REAGAN, President of the United States of America, in accordance with a joint resolution of the Congress approved December 28, 1970 (36 U.S.C. 142a), do hereby proclaim Sunday, June 15, 1986, as Father's Day. I invite the States and communities and the people of the United States to observe that day with appropriate ceremonies as a mark of appreciation and abiding affection for their fathers. I direct government officials to display the flag of the United States on all Federal government buildings, and I urge all Americans to display the flag at their homes and other suitable places on that day.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-second day of April, in the year of our Lord nineteen hundred and eighty-six, and of the Independence of the United States of America the two hundred and tenth.

Notice of April 22, 1986

Continuation of Nicaraguan Emergency

On May 1, 1985, by Executive Order No. 12513, I declared a national emergency to deal with the threat to the national security and foreign policy of the United States constituted by the actions and policies of the Government of Nicaragua. Because those actions and policies continue to pose an unusual and extraordinary threat to the national security and foreign policy of the United States, the national emergency declared on May 1, 1985, must continue in effect beyond May 1, 1986. Therefore, in accordance with Section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)), I am continuing the national emergency with respect to Nicaragua. This notice shall be published in the **Federal Register** and transmitted to the Congress.

Ronald Reagan

Rules and Regulations

Federal Register
Vol. 51, No. 79
Thursday, April 24, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Federal Crop Insurance Corporation

7 CFR Part 400

[Amdt. No. 2; Docket No. 0084A]

General Administrative Regulations; Information Collection Requirements Under the Paperwork Reduction Act; OMB Control Numbers

AGENCY: Federal Crop Insurance Corporation, USDA.

ACTION: Final rule.

SUMMARY: The Federal Crop Insurance Corporation (FCIC) hereby amends Subpart H in Part 400, Chapter IV, Title 7 of the Code of Federal Regulations, listing the control numbers assigned by the Office of Management and Budget (OMB) to information collection requirements contained in all regulations issued by FCIC, for the purpose of including the control number assigned by OMB to information collection requirements with respect to FCIC's Standard Reinsurance Agreement.

EFFECTIVE DATE: April 24, 1986.

FOR FURTHER INFORMATION CONTACT: Peter F. Cole, Secretary, Federal Crop Insurance Corporation, U.S. Department of Agriculture, Washington, DC 20250, telephone (202) 447-3325.

SUPPLEMENTARY INFORMATION: This rule relates to internal agency management. Therefore, pursuant to 5 U.S.C. 553, it is found upon good cause that notice and other public procedure with respect thereto are impracticable and contrary to the public interest, and good cause is found for making this rule effective less than 30 days after publication in the Federal Register.

Further, since this rule relates to internal agency management it is exempt from the provisions of Executive Order 12291. Lastly, this action is not a major rule as defined in Pub. L. 96-354, the Regulatory Flexibility Act, and thus is exempt from the provisions of the Act.

The Office of Management and Budget (OMB) regulations (5 CFR Part 1320; 48 FR 13666, March 31, 1983), titled "Controlling Paperwork Burdens on the Public", requires FCIC to publish currently valid OMB control numbers for each collection of information requirement contained in its regulations. These numbers must be published in a manner that will ensure codification into the Code of Federal Regulations.

FCIC hereby amends 7 CFR Part 400, Subpart H to include the information collection control number issued by OMB with respect to FCIC's Standard Reinsurance Agreement.

List of Subjects in 7 CFR Part 400

Administrative practice and procedure; Information collection requirements; OMB control numbers.

Final Rule

In accordance with the provisions of 5 CFR 1320, and the Paperwork Reduction Act, Pub. L. 96-511 (44 U.S.C., Chapter 35), the Federal Crop Insurance Corporation hereby amends the General Administrative Regulations; Information Collection Requirements Under the Paperwork Reduction Act: OMB Control Numbers, found at 7 CFR Part 400, Subpart H, effective upon publication in the Federal Register, in the following instances:

1. The authority citation for 7 CFR Part 400, Subpart H, continues to read as follows:

Authority: 5 U.S.C. 1320, Pub. L. 96-511 (44 U.S.C., Chapter 35).

2. 7 CFR 400.86(b) is amended by adding the following:

§ 400.86 Display.

* * * * *

(b) * * *

Standard Reinsurance Agreement, 0563-0010.

(Expiration Date June 30, 1986).

* * * * *

Done in Washington, DC, on April 1, 1986.

Edward Hews,

Acting Manager, Federal Crop Insurance Corporation.

[FR Doc. 86-9180 Filed 4-23-86; 8:45 am]

BILLING CODE 3410-08-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 85-ASO-10]

Revocation of Transition Area, Tallassee, AL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment revokes the transition area which was predicated on the Tallassee, Alabama, Municipal Airport. The airport has been temporarily deactivated and the instrument approach procedures, which previously established the need for the transition area, have been canceled. This action will raise the base of controlled airspace, within a 6.5-mile radius of the former airport site, from 700 feet to 1,200 feet above the surface.

EFFECTIVE DATE: 0901 UTC, July 3, 1986.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Supervisor, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On Thursday, December 26, 1985, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by revoking a transition area and raising the base of controlled airspace from 700 feet to 1,200 feet above the surface, within a 6.5-mile radius of the Tallassee Municipal Airport site (50 FR 52797). The former Tallassee Municipal Airport has been changed from a public-use to a private-use facility. Sikorsky Aircraft Company, owner of the airport site, has temporarily deactivated the airport but plan to reopen it in the 1988/1989 time period. The deactivation resulted in cancellation of instrument approach procedures thus negating the need for the transition area at this time.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. Comments were received from Sikorsky

VOL 51 ISS 79 AP 24 1986 UMI

Aircraft Company, the City of Tallassee, the Governor of Alabama, and the Alabama Department of Economic and Community Affairs. All parties commenting requested that the transition area not be revoked as it was thought such action would affect future plans for expansion and use of the airport. This in turn was viewed as having a potential adverse effect on the future development of the area.

The temporary deactivation of the airport for a period of four to five years precludes the conduct of Instrument Flight Rule (IFR) operations to or from the airport site. Transition areas are established for the protection of arriving and departing IFR aircraft operations. As such operations are not now being conducted, there is no longer an existing need for the transition area.

We have assured Sikorsky Aircraft Company, that when the airport is reactivated, appropriate actions to redesignate the necessary airspace and IFR procedures required for aeronautical activities will be accomplished. The revocation of the transition area at this time will not impede future development of the Sikorsky facilities at Tallassee. This amendment is the same as that proposed in the notice. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations revokes the Tallassee, Alabama, transition area and raises the floor of controlled airspace in the vicinity of the former municipal airport from 700 to 1,200 feet above the surface.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Excutive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition area.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 108(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. By amending § 71.181 as follows:

Tallassee, AL—[Removed]

By removing the title and text.

Issued in East Point, Georgia, on April 8, 1986.

Thomas H. Protiva,

Manager, Air Traffic Division, Southern Region.

[FR Doc. 86-9111 Filed 4-23-86; 8:45 am]

BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 85-ASO-27]

Alteration of Control Zone, Anniston, AL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment reduces the size of the Anniston, Alabama, control zone arrival extension. The arrival extension, as presently described, was predicated upon an instrument approach precedure which was based on the Anniston radio beacon. The radio beacon was decommissioned several months ago due to on-airport construction and the associated instrument approach procedure was cancelled. While an arrival extension is still required for another existing instrument approach procedure, it requires much less airspace. Thus, the floor of controlled airspace in an area southwest of the airport may be raised from the surface to 700 feet above the surface. In addition, the present description of the control zone contains a provision which permits use of the FAA's Notice to Airmen (NOTAM) system to publicize the effective days and hours of the control zone. As the Anniston Flight Service Station, which is located on the airport, operates on a full-time basis, this NOTAM provision is no longer required and will be removed from the control zone description.

EFFECTIVE DATE: 0901 UTC, August 28, 1986.

FOR FURTHER INFORMATION CONTACT: Donald Ross, Supervisor, Airspace Section, Airspace and Procedures Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone: (404) 763-7646.

SUPPLEMENTARY INFORMATION:

History

On Friday, December 27, 1985, the FAA proposed to amend Part 71 of the Federal Aviation Regulations (14 CFR Part 71) by reducing the size of the arrival extension associated with the Anniston, Alabama, control zone. The geographical coordinates of the airport will be corrected in this action as those presently listed are slightly in error. In addition, the provision which permits changes in hours of operation of the control zone by NOTAM will be removed from the description as it is no longer required (50 FR 52931). Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. This amendment is the same as that proposed in the notice. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in FAA Handbook 7400.6B dated January 2, 1986.

The Rule

This amendment to Part 71 of the Federal Aviation Regulations alters the Anniston, Alabama, control zone by reducing the size of an arrival extension by deleting reference to a decommissioned radio beacon and by removing a provision which permits changing effective times of the control zone through use of the FAA NOTAM system.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zone.

Adoption of the Amendment

PART 71—[AMENDED]

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 108(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

Adoption of the Amendment

§ 71.171 [Amended]

2. § 71.171 is amended as follows:

Within a 5-mile radius of Anniston-Calhoun County Airport (lat. 33°35'17" N., long. 85°51'28" W.); within 2 miles each side of the Anniston southwest localizer course, extending from the 5-mile radius zone to the LOM.

Issued in East Point, Georgia, on April 8, 1986.

Thomas H. Protiva,

Manager, Air Traffic Division, Southern Region.

AGENCY: Federal Trade Commission.

ACTION: Consent Order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair acts and practices and unfair methods of competition, this consent order requires the Rhode Island Board of Accountancy, the sole licensing authority for CPAs and PAs in the state, among other things, to cease prohibiting accountants in the state from seeking business by truthful advertisements or other non-deceptive forms of solicitation. Respondent may continue to impose restrictions authorized by the state legislature against dishonest or fraudulent practices and against persons who falsely identify themselves as accountants.

DATE: Compliant issued July 10, 1984. Decision issued Feb. 25, 1986.[1]

FOR FURTHER INFORMATION CONTACT: FTC/B-851, Charles W. Corddry, Washington, DC 20580. (202) 724-1269.

SUPPLEMENTARY INFORMATION: On Friday, November 29, 1985, there was published in the Federal Register, 50 FR 49063, a proposed consent agreement with analysis In the Matter of Rhode Island Board of Accountancy, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered its order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

The prohibited trade practices and/or corrective actions, as codified under 16 CFR Part 13, are as follows: Subpart—Coercing and Intimidating: § 13.367 Members. Subpart—Combining or Conspiring: § 13.384 Combining or conspiring; § 13.395 To control marketing practices and conditions; § 13.497 To terminate or threaten to terminate contracts, dealings, franchises, etc. Subpart—Corrective Actions and/or Requirements: § 13.533 Corrective actions and/or requirements; § 13.533-20 Disclosures; § 13.533-45 Maintain records. Subpart—Cutting Off Supplies or Service: § 13.655 Threatening disciplinary action or otherwise.

Social Security Administration

20 CFR Parts 404 and 416

Social Security Benefits and Supplemental Security Income; Personal Appearance Demonstration Projects

AGENCY: Social Security Administration, HHS.

ACTION: Final rule.

SUMMARY: These regulations describe how we will carry out the personal appearance demonstration projects which are required by section 8 of Pub. L. 98-460, the Social Security Disability Benefits Reform Act of 1984. The demonstration projects will test, on a

VOL 51 ISS 79 AP 24 1986 UMI

limited basis, the use of personal appearance interviews in connection with initiitial determinations about disability or blindness which are made by State agencies. The demonstration projects will involve disability cases under title II of the Social Security Act (the Act) as well as blindness and disability cases in the Supplemental Security Income (SSI) program under title XVI of the Act. Participants in the demonstrations will be selected randomly from among individuals who have applied for benefits but have not received an initial determination about their eligibility, and from among individuals who have been receiving benefits but whose condition is being reviewed to determine whether they are still disabled or blind.

Under the demonstration projects, individuals who are selected to participate will be provided an opportunity for an interview with a State agency disability examiner prior to any initial determination of ineligibility. In some locations a State agency medical consultant may participate in the interview together with the disability examiner, although the rest of this preamble will refer to the interviewer(s) as the disability examiner. Medical examinations will not be conducted as part of the interview process. The demonstration projects will be conducted in several States. Their purpose is to test whether an interview with the State agency disability examiner at this stage of the decisionmaking process will result in a better evaluation of the person's condition and simplify and expedite the decisionmaking process.

DATE: These regulations are effective April 24, 1986.

FOR FURTHER INFORMATION CONTACT: Cliff Terry, Office of Regulations, 3–B–4 Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone (301) 594–7519.

SUPPLEMENTARY INFORMATION: We published these regulations as a Notice of Proposed Rulemaking (NPRM) on December 27, 1985 (50 FR 53120). Public comments received are discussed below.

Pub. L. 98–460, the Social Security Disability Benefits Reform Act of 1984, enacted October 9, 1984, addresses selected aspects of the standards and procedures for determining whether people are disabled or blind for purposes of eligibility for benefits under titles II and XVI of the Act. (In the rest of this preamble, we use "disability" and "disabled" to include blindness.) A much-discussed issue in the past few years has been the process of reviewing the condition of people already receiving disability benefits to determine whether they continue to be disabled. One point of concern in that process has been the fact that the initial determination as to whether an individual's disability has ceased is based on a paper review of the evidence in the individual's case record, and is usually made without the adjudicator having personally observed the individual or having heard firsthand the individual's own description of his or her condition. The decisionmaking process is the same for new applications for disability benefits, and the same concerns have been voiced about it.

Section 6 of Pub. L. 98–460 calls for demonstration projects to test the use of personal appearance interviews at the initial stage of the decisionmaking process for continuing disability reviews and for initial disability claims under both title II and title XVI of the Act. Under section 6 of Pub. L. 98–460, the Secretary of Health and Human Services (the Secretary) is required to conduct demonstration projects in which beneficiaries who are undergoing continuing disability review, and claimants who have just applied for disability benefits, are provided an opportunity for an interview with the State agency disability examiner prior to any initial determination of ineligibility.

Existing Procedures

Our first level of decisionmaking about a person's eligibility or continuing eligibility for benefits is called an "initial determination." The initial determination of whether a person is disabled for purposes of title II or title XVI benefits is usually made by a State agency under the regulations at 20 CFR Part 404, Subpart Q, and Part 416, Subpart J. The State agency employees who make the determination are a physician or psychologist called a medical consultant and a nonphysician called a disability examiner. (The rest of this preamble will call them the decisionmaking team.) This will clarify several references which in the NPRM were written as if the disability examiner were the sole decisionmaker. The disability examiner must be qualified to interpret and evaluate medical reports and other evidence relating to a person's physical or mental impairments and, as necessary, to determine the capacities of the person to perform substantial gainful activity as defined at 20 CFR §§ 404.1572 and 416.972. A person who is dissatisfied with the initial determination in his or her case has three levels of administrative appeal available. The first level of appeal is called reconsideration. The second and third levels, respectively, are a hearing before an administrative law judge (ALJ) and a review by the Appeals Council.

Section 4 of Pub. L. 97–455, enacted January 12, 1983, effective with reconsiderations requested after 1983, provided a new reconsideration process which we call a disability hearing. The statute makes disability hearings available to title II beneficiaries who request reconsideration of an initial determination that the physical or mental impairment on the basis of which benefits have been payable has ceased, did not exist, or is no longer disabling. The disability hearing is a face-to-face evidentiary hearing before a disability hearing officer, usually a State agency employee. Under the Secretary's rulemaking authority, our final regulations published January 3, 1986 (51 FR 288) provided the same kind of hearing in comparable title XVI cases.

A principal goal of the disability program is to provide benefits under the law in as accurate and timely a manner as possible. To accomplish this, the Social Security Administration (SSA) has operated under procedures designed to assure that all relevant evidence is obtained and considered in making disability determinations at the State agency level of decisionmaking and to provide an opportunity for face-to-face appeal of an initial unfavorable State agency decision at a later stage in the decision process.

Under existing procedures, an initial determination as to whether the claimant (the person who has applied for benefits) or beneficiary (the person whose entitlement has been established) is disabled or continues to be disabled is usually made by the State agency on the basis of the evidence (written medical and vocational reports) in the person's case file. Currently, the claimant or beneficiary can give us or have us get any additional or new information on paper, including reports from doctors, hospitals, employers or others, that he or she believes we should have before the determination is made. The claimant or beneficiary also talks to an SSA district office employee, but the SAA employee does not make the disability determination in the great majority of cases, namely those where the determination is based on medical/vocational factors. The SSA employee writes down all pertinent information the claimant or beneficiary tells the employee, and anything the employee observes by seeing and hearing the claimant or beneficiary that may be relevant in evaluating his or her condition. The SSA employee then sends this information and any

information or evidence the claimant or beneficiary provided on paper to the State agency.

The State agency evaluates the available evidence and obtains any additional evidence necessary, including reports from the individual's own medical sources as well as reports from physicians who examined the individual at the State agency's request. The State agency then makes an initial determination as to whether the individual is disabled on the basis of the evidence in the case file. In the process of appealing an unfavorable determination, at a later stage in the decisionmaking process, a beneficiary or claimant is entitled to a face-to-face meeting with a decisionmaker (a disability hearing officer or an administrative law judge (ALJ)).

The Demonstration Projects

In passing Pub. L. 98–460, Congress decided we should test potential changes in the disability determination process by offering a face-to-face interview between the claimant or beneficiary and the State agency disability examiner at the first stage of decisionmaking. The Ways and Means Committee of the House of Representatives stated: "The committee believes that such a meeting at the initial stage in the adjudicative process would permit State agency disability examiners to better assess the individual's residual functional capacity and assure that all relevant medical and vocational information has been obtained. Moreover, an interview at the initial State agency level, rather than at some later stage, would both simplify and expedite the decisionmaking process." (H.R. Rep. No. 618, 98th Cong. 2d Sess. 17 (1984)).

Accordingly, sections 6 (d) and (e) of Pub. L. 98–460 require us, as soon as practicable after October 9, 1984, the date of enactment, to implement demonstration projects in which the opportunity for a personal appearance is provided to disability claimants and beneficiaries prior to an initial disability determination or periodic review cessation determination by a State agency under titles II and XVI of the Act.

For determinations in continuing disability review cases, the provision specifies that the opportunity for a personal appearance at the initial level of decisionmaking takes place of the evidentiary hearing at the reconsideration level of review which is required under section 205(b)(2) of the Act. For initial claims, the statute does not specify that the opportunity for a personal appearance at the initial level of decisionmaking will replace the reconsideration level of review, but the legislative history indicates that this was Congress's intent. Additionally, we see no advantage to maintaining the reconsideration level of appeal for these initial claims. By providing the claimant with a predecision notice followed by the opportunity to submit additional evidence and to meet face-to-face with a member of the decisionmaking team, we are, in effect, folding the reconsideration process into the initial step of adjudication. To offer a reconsideration in such cases would only delay cases from moving through the appeals process.

The demonstrations involving claimants are to be conducted in at least five States and the demonstrations involving beneficiaries are to be conducted in at least five States. We are required to report to Congress on the demonstration projects, together with any recommendations, by December 31, 1986.

Section 6(d) of Pub. L. 98–460 requires us to implement these demonstration projects in continuing disability review cases where the review is required by section 221(i) of the Act (periodic review cases) or is made under title XVI of the Act. However, our regulations also include "medical improvement expected" cases in the demonstrations. These are the cases which are selected for continuing disability review because medical improvement was expected. We decided to include these cases because the issues to be decided are the same as in the periodic review cases, and excluding "medical improvement expected" cases would lengthen the time required to obtain adquate sample sizes with which to assess the results of the demonstrations.

We publishing final regulations to inform people who may be selected to participate in the demonstration projects of the change in the procedures for deciding their cases and of the change of their appeal rights. We emphasize, however, that the demonstration projects are only tests of a different method of getting evidence of disability; the projects do not involve changes in standards used for determining whether or not a person is disabled.

Our regulations describe the demonstration projects and explain the procedures and the individual's rights in connection with the interview.

The regulations specify that, in connection with his or her interview, the claimant or beneficiary has the right to——

(1) Meet face-to-face with a State agency disability examiner before a medical/vocational denial or cessation determination is made;

(2) Have us or the State agency assist in getting evidence;

(3) Be represented at the interview;

(4) Review the evidence in the file either on or before the date of the interview;

(5) Present additional evidence at the interview; and

(6) Present witnesses at the interview.

The claimant or beneficiary and his or her representative or witnesses may be eligible for reimbursement under the State agency's rules for travel expenses incurred in connection with the interview if the distance from the person's residence or office (whichever he or she travels from) to the interview site exceeds 75 miles.

The regulations specify that the first level of appeal from the State agency initial determination following the opportunity for an interview (regardless of whether or not the claimant or beneficiary takes advantage of the opportunity) is a hearing before an ALJ.

We will select people to participate in the demonstrations from among claimants in all or part of at least five States and from among beneficiaries in all or part of at least five States. We will select participants randomly from among individuals who will have their initial determinations about disability made by a State agency under § 404.1613 or § 416.1013. Thus, people whose disability determinations will not be made by a State agency will not be included in the projects. For example, SSA offices (rather than State agencies) determine that people are not disabled if they are in fact performing substantial gainful activity in spite of their medical condition. We plan to include in the demonstrations all kinds of State agency cases except those described in items (4) through (7) below, but because unforeseen circumstances may arise, we have provided in item (8) for exclusion of any cases we may find it would be impractical to include.

For people in the following categories, State agencies will continue to make disability determinations without the interviews required by Pub. L. 98–460:

(1) People not randomly selected to participate in the demonstration projects;

(2) People who can be determined to be disabled on the basis of the evidence in their files;

(3) People who, without good cause, fail to make a timely reply to (or who decline) the offer of an interview (however, their first level of appeal of our disability determination in these

VOL 51 ISS 79 AP 24 1986 UMI

cases will also be a hearing before an ALJ);

(4) People who have been determined not disabled but whose cases are being reexamined under the new disability standards in accordance with the Social Security Disability Benefits Reform Act of 1984;

(5) Beneficiaries whose condition was not expected to improve and whose continuing disability reviews result in a determination that they are still disabled without the need for any face-to-face contact with SSA or the State agency;

(6) Claimants who, after being selected to participate in a project, move to an area where the State agency is not participating in a project for claimants;

(7) Beneficiaries who, after being selected to participate in a project, move to an area where the State agency is not participating in a project for beneficiaries; and

(8) People the Social Security Administration finds it would be impractical to include in the projects.

We are excluding the people described in item (4) above from the demonstration projects because these people, although their cases are being reexamined, have already been through a disability determination process (including, in some cases, several levels of administrative review) and including them in the demonstration could possibly deter the expeditious processing of their cases and might bias the results of the demonstrations.

Exclusion (5) above was not listed in the NPRM. Although section 221(i) of the Act requires that the eligibility of individuals with permanent impairments be reviewed at such times as we determine to be appropriate, we expect the large majority of these reviews to result in determinations of continuing disability. For this reason, and to minimize the burden placed on these people by the continuing disability reviews, we are setting up a special procedure for them that emphasizes folder reviews and telephone contact with them by the State agency to verify that the impairment(s) is continuing. This special process for continuing disability reviews of beneficiaries whose impairment(s) was not expected to improve should eliminate the need for most of them to visit a Social Security office. Because we expect most of these beneficiaries to be found still disabled after only minimum review, we do not believe inclusion of their cases in the demonstration sample would add to what we learn from the demonstrations. However, any beneficiary whose continuing disability review requires more than the minimum review provided by the special procedure, will be eligible for random selection into the demonstration sample of cases.

As item (2) above implies, the State agency will offer the opportunity for an interview only after concluding that a determination based only on the written reports in the case record would be a denial or cessation. The regulations indicate that where this occurs, the State agency will mail the individual a notice informing him or her of the preliminary unfavorable determination and to the opportunity for an interview before a formal determination is made. The notice will state that the individual has 30 days from the date he or she receives the notice to request an interview but explain that this deadline can be extended for good cause under the standards in §§ 404.911 and 416.1411. (The existing regulations at §§ 404.901 and 416.1401 explain that the date the individual receives notice means "5 days after the date on the notice, unless you show us that you did not receive it within the 5-day period.")

If the claimant or beneficiary makes a timely request for an interview, the State agency will mail a notice of its time and place at least 20 days in advance, unless the claimant or beneficiary waives (in writing) his or her right to the 20-day advance notice. The claimant or beneficiary will be informed that he or she should not waive the right to the 20-day advance notice if he or she needs time to get ready for the interview. If a claimant or beneficiary waives (in writing) his or her right to the 20-day advance notice, an interview will be scheduled as soon as possible and the State agency will mail a notice of the time and place of the interview at least 10 days in advance, unless the interview is scheduled by telephone as explained below.

Occasionally, for the convenience of all parties involved, an interview may be scheduled by telephone. In such instances, the State agency will mail a notice of the time and place of the interview only if it is scheduled for a date not less than 5 days from the date the telephone arrangements were made. If an interview was scheduled by telephone and the claimant or beneficiary does not appear for the interview, one of the following actions will be taken:

(1) If a notice of the time and place of the interview was not mailed at least 20 days before the scheduled date of the interview and the claimant or beneficiary did not waive (in writing) his or her right to the 20-day advance notice, the disability examiner will automatically schedule another interview. The State agency will mail a notice of the time and place of the interview at least 20 days in advance.

(2) If a notice of the time and place of the interview was not mailed to the claimant or beneficiary and he or she waived (in writing) his or her right to the 20-day advance notice, the disability examiner will automatically schedule another interview. The State agency will mail a notice of the time and place of the interview at least 10 days in advance.

In any case where the 20-day advance notice (or, if the right to the 20-day advance notice is waived, the 10-day or 5-day notice) of the interview was mailed to the claimant or beneficiary and he or she does not appear for the interview, the decisionmaking team will make a determination as to whether the claimant or beneficiary is disabled based on the evidence in his or her case file. A written notice of that determination will be mailed to the claimant or beneficiary at his or her last known address.

At the request of the claimant or beneficiary, the State agency may allow up to 15 days after the interview for receipt of additional evidence which was not available at that time. The State agency may also obtain additional evidence, including a consultative medical examination as described in §§ 404.1517 and 416.917 or a report from the treating physician, after the interview if it believes it is necessary for a sound determination.

In preparing our report to Congress on the demonstration projects, we will evaluate them primarily by comparing the demonstration procedures with our usual procedures in terms of such things as—

(1) Elapsed time to final decision either from the claimant's application or from starting the review of the beneficiary's continued eligibility;

(2) Acceptance rate for interviews offered;

(3) Frequency of favorable determinations;

(4) Accuracy of determinations;

(5) Appeal rates;

(6) Reversal rates on appeal; and

(7) Program and administrative costs.

Public Comments

We received four letters of comments on the NPRM. The following summarizes and responds to the comments.

Comment: The final regulations should list the States and/or parts of States where the demonstrations will be held, "to avoid confusion" and particularly to alert legal services offices and private attorneys who handle many disability claims.

Response: We have not listed the locations where the demonstrations will be held in the regulations because the locations and tentative and subject to change. Tentatively, however, we expect the demonstrations to be conducted in Alabama, California, Georgia, Maine, Missouri, and New Jersey for continuing disability review cases, and in Arizona, Michigan, Mississippi, Montana, Nebraska, New Hamphire, and Oregon for initial claim cases.

Comment: We should not exclude from the demonstrations people who have been determined not disabled but whose cases are being reexamined under the new disability standards in accordance with Pub. L. 98-460. Without these cases, the sample cases will be mostly beneficiaries whose condition had not been expected to improve and the sample will therefore be unrepresentative. If we exclude the people whose cases are being reexamined, we should also exclude both people whose condition had not been expected to improve and the "medical improvement expected" cases, people whose condition had been expected to improve. Both groups are extreme cases that should be excluded from the demonstrations to assure they do not bias the results.

Response: The sample of cases in the demonstrations will be varied in nature, and we believe the sample will be more representative without the cases being reexamined under Pub. L. 98-460 than with them. Some of these reexamination cases have already been through multiple levels of administrative review. They represent a unique, one-time workload. We will plan to exclude them from the demonstrations.

We do not believe inclusion of the "medical improvement expected" cases will make the sample unrepresentative; they are fully typical of our permanent, ongoing workload. We do not plan to exclude them. Additionally, beneficiaries whose condition had not been expected to improve are also part of our ongoing workload and will be eligible for selection for the demonstrations, unless their continuing disability review requires only the minimum review as explained earlier in this preamble.

Comment: We should delete the provision for excluding from the demonstrations people we find it would be impractical to include. State agencies will use this provision to avoid holding interviews with people who are considered violent, live in remote areas, do not speak English, or in any other way are difficult to deal with. Part of the purpose of the experiment is to deal with potential problem situations in order to learn how severe the problems are and how well they can be overcome.

Response: We have retained the provision. The circumstances of the demonstrations are sufficiently novel that we believe we cannot make an absolute commitment to offer interviews without allowing exclusion for some strong but unforeseeable reason. However, we also strongly agree that a vital part of the experiment's purpose is to gain experience in dealing with potential problem situations. We will not permit a State agency to make its own decision to exclude a person from the demonstrations because the State agency believes inclusion would be impractical. No one can be excluded on this basis without prior approval of SSA, and we will not approve exclusion except after strong justification.

Comment: The regulations should specify that the notice offering a person the opportunity for an interview will (a) stress that generally it will not be a good idea to waive written notice of the interview if the person would like to secure representation or believes there is additional evidence that could be supplied, (b) provide a list of the evidence in file, and (c) provide very specific information about why the disability examiner believes that that evidence requires a determination that the person is not disabled.

Response: The notice will inform the claimant or beneficiary that he or she should not waive the right to the 20-day advance notice if he or she needs time to get ready for the interview. The notice will also inform the person of the right to have a representative and to supply additional evidence. Additionally, the notice will list the evidence in file and explain specifically why it requires a determination that the person is not disabled. We do not believe these matters need to be set out in detail in the regulations.

Comment: The regulations should provide that the claimant or beneficiary may request a bilingual or sign language interpreter.

Response: The form for accepting the offer of an interview will provide a box for the claimant or beneficiary to check to request an interpreter, and one will be provided if requested. We do not believe this needs to be in the regulations.

Comment: The rules for how much notice of a scheduled interview a person will get, whether the notice will be written, and what happens if the person does not appear at an interview scheduled by telephone are confusing and should be simplified.

Also, when an interview is to be rescheduled after the person does not appear as originally scheduled, rescheduling should be automatic; the person should not have to seek it.

Response: We agree that the rules are complicated, because they tell exactly what will happen in each of several different combinations of circumstances. However, we believe they accomplish their purpose. That purpose is to provide maximum flexibility in scheduling while protecting the claimant's or beneficiary's right to adequate notice by spelling out the limits on that flexibility. Flexibility of scheduling is important not only for administrative efficiency but for giving people prompt determinations on their cases.

We intended that, where the regulations provide for rescheduling after nonappearance, rescheduling would be automatic. We have revised the regulations to make that clear.

Comment: The regulations should require the State agency to telephone any person who is offered the opportunity for an interview and does not reply within the 30-day time limit, because the person may be mentally ill, mentally retarded, illiterate, or otherwise unable to reply effectively to the notice. Since the demonstrations are tests of ways to improve the adjudicatory process, data on the results of these calls should be considered in the evaluation of the demonstrations.

Response: Special efforts to contact a claimant or beneficiary are already standard State agency practice whenever there is any indication that the person may be unable to reply effectively. Therefore, we do not believe it is necessary to add a requirement for these efforts to the regulations. The results of these efforts will be considered in evaluation of the demonstrations.

Comment: The interviews should be held in places accessible to persons using wheelchairs and to other handicapped persons.

Response: We will ensure that no one is unable to have an interview because his or her impaired mobility makes the location inaccessible.

Comment: Travel expense reimbursement should be available for travel of less than the 75 miles stated in paragraph (g) of the proposed regulations, because claimants and beneficiaries, their representatives, and their witnesses will seldom have to travel that far for an interview.

Response: Indeed, we intend that State agencies will make every effort to require claimants and beneficiaries to travel much less than 75 miles to interviews. (How far their representatives and witnesses have to

VOL 51 ISS 79 AP 24 1986 UMI

travel, of course, is beyond the State agencies' control.)

Our policy of not paying travel expenses for travel less than 75 miles parallels our policy on travel reimbursement in connection with disability hearings and ALJ hearings. For travel for those purposes the 75-mile minimum is mandated explicitly by the current HHS appropriations act in SSI cases, and we think it would be clearly inappropriate to apply a different reimbursement rule in title II cases, in which there is less reason to presume financial need.

Comment: The interview should not be conducted by the same disability examiner who participated in the preliminary conclusion that the claimant or beneficiary is not disabled. The disability examiner who has participated in that preliminary conclusion will be prejudiced against the claimant or beneficiary.

Response: Although, in the majority of cases, we expect the interview to be conducted by the same person who participated in the preliminary conclusion, the interviewer may not always be the same person. (We have revised the regulations to clarify that fact.) We do not believe the decisionmaking team who reached the preliminary conclusion will be prejudiced, because we see the interview as a neutral means of ensuring that all relevant evidence is obtained as part of the information-gathering process. Additionally, the team's primary responsibility is to make an accurate determination, and since their final determination will be subject to review by SSA, every real incentive will be to make an accurate final determination, regardless of whether it agrees with the preliminary conclusion.

Comment: Where a State agency medical consultant participates in the interview along with the disability examiner, this may be intimidating to the claimant or beneficiary. Therefore, where the State agency uses the two-person team, it should be stressed to the claimant or beneficiary that he or she is entitled to be represented and that it is possible to obtain free legal representation.

In addition, if the claimant or beneficiary is not represented, we should permit only one member of the two-person team to question the claimant or beneficiary.

Also, we should compare the results of interviews by a two-person team with the results of one-person interviews to see if there is a difference.

Response: Our notices to claimants and beneficiaries will emphasize in every case that they are entitled to be represented at the interview and that it may be possible to obtain free legal representation.

We will not limit questioning to one member of a two-person team because the main purpose of the medical consultant's participation is to ask any relevant questions, which may, in fact, be beneficial to the claimant's and beneficiary's interests. We do not believe the two-person team will be intimidating.

If we do experiment with use of a two-person team, we will compare the results of one- and two-person interviews to see if there is a difference.

Comment: The regulations should allow the disability examiner to subpoena records and to swear in witnesses.

Also, the regulations should require the disability examiner to show any notes he or she makes of the interview (if they are the State agency's only record of the interview) to the claimant or beneficiary, so that the claimant or beneficiary can put a written statement into the record rebutting any errors he or she believes appear in the disability examiner's notes. Otherwise any errors in the disability examiner's notes of the interview, especially inaccurately or incompletely recorded statements of the claimant or beneficiary, may prejudice the administrative law judge hearing if one is later held.

Response: Our experience has been that we can obtain all relevant evidence without subpoenas; therefore, we do not believe it is necessary to provide for subpoenas in connection with these interviews. Additionally, in order to keep the interview informal so that the claimant or beneficiary will feel relaxed enough to speak freely, we have also determined that it is necessary that witnesses not be sworn in.

The disability examiner's notes on the interview will be part of the case file, which the claimant or beneficiary or his or her representative is welcome to examine at any time. The claimant or beneficiary or his or her representative is also welcome to submit any written statement he or she wishes at any time, and it will become part of the case file too.

Comment: The regulations should provide for the disability examiner to allow more than 15 days after the interview, at the claimant's or beneficiary's request, for receipt of evidence which was not available at the time of the interview. One commenter said that, where the claimant or beneficiary receives less than 20 days notice of the interview, the disability examiner should allow up to 30 days after the interview for submission of additional evidence. The claimant or beneficiary may need the additional time to get evidence.

Response: We believe that our procedures for notifying claimants and beneficiaries about the interview process, and the consistent emphasis in our notices and interviews on securing updated medical evidence, make it unnecessary to have a more open-ended period for securing evidence after the interview. When understood in this context, we believe that the 15-day limitation on post-interview submittal of evidence is reasonable and unlikely to impose undue hardship on any claimant or beneficiary. In addition, we will assist claimants and beneficiaries in obtaining evidence.

Comment: The provision in paragraph (h) of §§ 404.906 and 416.1406 of the regulations for the disability examiner to obtain additional evidence after the interview, including a consultative medical examination, should also provide for seeking evidence from the claimant's or beneficiary's treating physician.

Response: We agree and have revised paragraph (h) of the regulations accordingly.

Comment: We should not file our report to Congress on the demonstrations until after they are completed.

Response: Section 6 of Pub. L. 98-460 requires us to report to Congress by December 31, 1986.

Comment: The regulations should state the factors we will consider in evaluating the demonstrations and the types of information we require the State agencies to record, because these things are critical to the project.

Response: The evaluation factors are listed in this preamble. In addition, our instructions to the State agencies for recording information about the demonstrations are being given to the State agencies in a separate comprehensive manual. We do not believe it is necessary to repeat this voluminous and detailed material in the regulations.

Regulatory Procedures

Executive Order 12291

These final regulations have been reviewed under Executive Order 12291. The will not have an annual effect on the economy of $100 million or more and do not meet any of the other criteria for a major regulation. Therefore, regulatory impact analysis is not required.

Regulatory Flexibility Act

We certify that these final regulations will not have a significant economic impact on a substantial number of small entities because the regulations will affect only individuals and States. Therefore, a regulatory flexibility analysis as provided in Pub. L. 96-354, the Regulatory Flexibility Act, is not required.

Paperwork Reduction Act

The information collection requirements contained in §§ 404.908(d) and 416.1406(d) and the form SSA-311 [Acknowledgement of Offer of Interview] which will be enclosed with the pre-denial notices, have been approved by the Office of Management and Budget under the Paperwork Reduction Act of 1980 and assigned OMB control number 0960-0415.

Subpart J of Part 404 and Subpart N of Part 416 of 20 CFR are amended as follows:

PART 404—[AMENDED]

1. The authority citation for Subpart J of Part 404 is revised to read as follows:

Authority: Secs. 205 and 1102 of the Social Security Act, sec. 8 of Reorganization Plan No. 1 of 1953, sec. 6 of Pub. L. 98-460; 53 Stat. 1368, 49 Stat. 647, 98 Stat. 1802 (42 U.S.C. 405 and 1302).

2. Section 404.906 is added to read as follows:

§ 404.906 Opportunity for personal appearance interview before initial disability denial or cessation determination—demonstration projects.

(a) *Applicability and scope.* Notwithstanding any other provision in this Part or Part 422, we are establishing the procedures set out in this section for demonstration projects involving certain initial determinations about eligibility or continued eligibility for benefits based on disability. There will be two types of demonstration projects: projects involving individuals who have applied for benefits but have not received an initial determination about their eligibility, and projects involving individuals who have been receiving benefits but whose condition is being reviewed to determine whether they are still disabled. Each of the two types of projects will be conducted in at least five States. Projects may be conducted on a Statewide basis or in only part of the State. Participants will be selected randomly from among individuals who will have their initial determinations about disability made by a State agency (see §§ 404.1503 and 404.1613), excluding—

(1) Individuals who have been determined not disabled but whose cases are being reexamined under the new disability standards in accordance with Pub. L. 98-460;

(2) Beneficiaries whose condition was not expected to improve and whose continuing disability reviews result in a determination that they are still disabled without the need for any face-to-face contract with SSA or the State agency;

(3) Claimants who, after being selected to participate in a project, move to an area where the State agency is not participating in a project for claimants;

(4) Beneficiaries who, after being selected to participate in a project, move to an area where the State agency is not participating in a project for beneficiaries; and

(5) Individuals the Social Security Administration finds it would be impractical to include in the projects.

(b) *Summary of procedure.* The individuals selected to participate will be given an opportunity, before any initial determination is made that they are not disabled, for a personal appearance interview with the State agency disability examiner who, along with a State agency medical consultant, will make the disability determination. (The rest of this section will call them the decisionmaking team.) In some locations, a State agency medical consultant may participate in the interviews together with the disability examiner, although the rest of this section will refer to the interviewer(s) as the disability examiner. Medical examinations will not be conducted as part of the interview process. The reconsideration level of review will be eliminated for individuals who are given the opportunity for an interview under the demonstration projects. Thus, for individuals who are given the opportunity for an interview, whether or not they take advantage of the opportunity, the first level of appeal from the initial determination will be a hearing before an administrative law judge. Determinations for individuals not included in the projects will be made under current usual procedures. The demonstration projects will begin as soon as practicable and will end as soon as a large enough sample of cases is completed to permit proper evaluation of the demonstration projects, but no later than December 31, 1987.

(c) *Authority and purpose.* The demonstration projects are required by section 6 of Pub. L. 98-460, the Social Security Disability Benefits Reform Act of 1984. Their purpose is to test whether a face-to face interview with the State agency disability examiner at this stage of the decisionmaking process will result in a better evaluation of the person's condition, assure that all relevant information is obtained, and simplify and expedite the decisionmaking process. The projects are only tests of a different method of getting evidence of disability; they do not involve changes in standards used for determining whether or not a person is disabled.

(d) *Procedures for cases included in the projects.* If you are selected to participate in the projects, the State agency disability examiner will review all medical and vocational evidence in your file, including any you provided and any the State agency obtained, just as under the usual procedures. If the decisionmaking team then determines that you are disabled, you will receive a written notice of that determination as under usual procedures. But if the decisionmaking team believes the evidence in your file requires a determination that you are not disabled, they will mail a written notice to you at your last known address telling you their preliminary conclusion and why they believe that such a determination is required. The notice will also tell you that before a formal determination about your disability is made, you may have an interview with the State agency disability examiner if you request it within 30 days after the date you receive the notice. The disability examiner who interviews you may or may not be the same one who participated in the preliminary conclusion that you are not disabled. If you make a late request for an interview but show in writing that you had good cause under the standards in § 404.911 for missing the deadline, the disability examiner will extend the deadline. If you do not request an

VOL 51 ISS 79 AP 24 1986 UMI

interview, or if you requested an interview and notice of its time and place was mailed to you as provided in this paragraph (or paragraph (e)(2) of this section) but you do not appear for the interview, the decisionmaking team will make a determination as to whether you are disabled based on the evidence in your cause file. A written notice of that determination will be mailed to you at your last known address. The notice will state the reasons for the determination and its effect, and will inform you of the right to a hearing before an administrative law judge. If you do request an interview within the 30-day time period (or within the extended time period if you make a late request and the disability examiner extends the time period under the good cause provision as provided above), the disability examiner will mail a notice to you at your last known address informing you of the time and place of your interview. The notice will be mailed at least 20 days before the date of the interview, unless you waive (in writing) your right to the 20-day advance notice. You should not waive this right if you need time to get ready for the interview. If you do waive this right, an interview will be scheduled for you as soon as possible and a notice of the time and place of your interview will be mailed to you at your last known address. In this instance, the notice will be mailed at least 10 days before the date of the interview, unless arrangements for the interview are made by the telephone as explained in paragraph (e) of this section. (Approved under OMB control number 0960–0415)

(e) *Interviews scheduled by telephone.* Notwithstanding paragraph (d) of this section, occasionally, for the convenience of all parties involved and as a means of processing your case sooner, arrangements for the time and place of the interview may be made by telephone. If such arrangements are made and the interview is scheduled for a date not less than 5 days from the date of the telephone arrangements, a notice will be mailed to you at your last known address, confirming the time and place of the interview. If an interview is scheduled for a date less than 5 days from the date of the telephone arrangements, a notice confirming the interview will not be mailed to you. If an interview is scheduled by telephone and you do not appear for the interview, one of the following actions will be taken:

(1) If a notice of the time and place of the interview was not mailed at least 20 days before the scheduled date of the interview and you did not waive (in writing) your right to the 20-day advance notice explained in paragraph (d) of this section, the disability examiner will automatically schedule another interview for you. A notice informing you of the time and place of the rescheduled interview will be mailed to you at your last known address. The notice will be mailed at least 20 days before the date of the interview.

(2) If a notice of the time and place of the interview was mailed to you, and you waived (in writing) your right to the 20-day advance notice explained in paragraph (d) of this section, the decisionmaking team will make a determination as to whether you are disabled based on the evidence in your case. A written notice of that determination will be mailed to you at your last known address.

(3) If a notice of the time and place of the interview was not mailed to you, and you waived (in writing) your right to the 20-day advance notice explained in paragraph (d) of this section, the disability examiner will automatically schedule another interview for you. A notice informing you of the time and place of the rescheduled interview will be mailed to you at your last known address. The notice will be mailed at least 10 days before the date of the interview.

(f) *Change in time or place of interview.* If you are unable to travel or have some other reason why you cannot attend your interview at the scheduled time or place, you should request at the earliest possible date that the time or place be changed. The disability examiner will change the time or place if there is good cause for doing so under the standards in § 404.936 (c) and (d).

(g) *Your rights.* In connection with your interview—

(1) You may request that we or the State agency assist you in obtaining pertinent evidence about your disability;

(2) You may have a representative, appointed under Subpart R of this Part, at your interview, or you may represent yourself;

(3) You or your representative may review the evidence in your case file, either on the date of your interview or at an earlier time at your request;

(4) You or your representative may present additional evidence and bring witnesses to support your case at your interview; and

(5) You, your representative, and your witnesses may be eligible for reimbursement under the State agency's rules for travel expenses incurred in connection with your interview if the distance from the person's residence or office (whichever he or she travels from) to the interview site exceeds 75 miles.

(h) *After your interview.* At your request, the disability examiner may allow up to 15 days after your interview for receipt of evidence which was not available at the time of the interview. The disability examiner may also obtain additional evidence, including a consultative medical examination as described in § 404.1517 or a report from your treating physician, after the interview if he or she believes it is necessary for a sound determination. The decisionmaking team will then determine whether you are disabled. A written notice of the determination made in your case will be mailed to you at your last known address. The notice will state the reasons for the determination and its effect, and will inform you of the right to a hearing before an administrative law judge.

(i) *Effect of the State agency's determination for project participants.* The State agency decisionmaking team's determination is an initial determination that is binding unless—

(1) You request a hearing before an administrative law judge within the time period described in paragraph (j) of this section, and a decision is made; or

(2) The initial determination is revised as provided in § 404.987.

(j) *Appeal rights for project participants.* If you were given the opportunity for an interview (whether or not you requested or appeared for the interview) and you are dissatisfied with the initial determination, you may request a hearing before an administrative law judge. You must file your request for this hearing within 60 days after the date you receive notice of the initial determination (or within the extended time period if we extend the time as provided in § 404.933(c)). Section 404.933 explains how to request a hearing before an administrative law judge. (See §§ 404.929–404.961 for the rules concerning administrative law judge hearings.)

(Approved by the Office of Management and Budget under control number 0960–0415)

PART 416—[AMENDED]

3. The authority citation for Subpart N of Part 416 is revised to read as follows:

Authority: Sec. 1102, 1631(c), and 1633 of the Social Security Act, sec. 6 of Pub. L. 98–460; 49 Stat. 647, 86 Stat. 1475, 86 Stat. 1476, 98 Stat. 1802 (42 U.S.C. 1302, 1383, 1383b).

4. Section 416.1406 is added to read as follows:

§ 416.1406 Opportunity for personal appearance interview before initial disability denial or cessation determination—demonstration projects

(a) *Applicability and scope.* Notwithstanding any other provision in this Part or Part 422, we are establishing the procedures set out in this section for demonstration projects involving certain initial determinations about eligibility or continued eligibility for benefits based on disability. (For purposes of this section, "disability" and "disabled" include blindness.) There will be two types of demonstration projects: projects involving individuals who have applied for benefits but have not received an initial determination about their eligibility, and projects involving individuals who have been receiving benefits but whose condition is being reviewed to determine whether they are still disabled. Each of the two types of projects will be conducted in at least five States. Projects may be conducted on a Statewide basis or in only part of the State. Participants will be selected randomly from among individuals who will have their initial determinations about disability made by a State agency (see §§ 416.903 and 416.1013), excluding—

(1) Individuals who have been determined not disabled but whose cases are being reexamined under the new disability standards in accordance with Pub. L. 98–460;

(2) Beneficiaries whose condition was not expected to improve and whose continuing disability reviews result in a determination that they are still disabled without the need for any face-to-face contact with SSA or the State agency;

(3) Claimants who, after being selected to participate in a project, move to an area where the State agency is not participating in a project for claimants;

(4) Beneficiaries who, after being selected to participate in a project, move to an area where the State agency is not participating in a project for beneficiaries; and

(5) Individuals the Social Security Administration finds it would be impractical to include in the projects.

(b) *Summary of procedure.* The individuals selected to participate will be given an opportunity, before any initial determination is made that they are not disabled, for a personal appearance interview with the State agency disability examiner who, along with a State agency medical consultant, will make the disability determination. (The rest of this section will call them the decisionmaking team.) In some locations, a State agency medical consultant may participate in the interviews together with the disability examiner, although the rest of this section will refer to the interviewer(s) as the disability examiner. Medical examinations will not be conducted as part of the interview process. The reconsideration level of review will be eliminated for individuals who are given the opportunity for an interview under the demonstration projects. Thus, for individuals who are given the opportunity for an interview, whether or not they take advantage of the opportunity, the first level of appeal from the initial determination will be a hearing before an administrative law judge. Determinations for individuals not included in the projects will be made under current usual procedures. The demonstration projects will begin as soon as practicable and will end as soon as a large enough sample of cases is completed to permit proper evaluation of the demonstration projects, but no later than December 31, 1987.

(c) *Authority and purpose.* The demonstration projects are required by section 6 of Pub. L. 98–460, the Social Security Disability Benefits Reform Act of 1984. Their purpose is to test whether a face-to-face interview with the State agency disability examiner at this stage of the decisionmaking process will result in a better evaluation of the person's condition, assure that all relevant information is obtained, and simplify and expedite the decisionmaking process. The projects are only tests of a different method of getting evidence of disability; they do not involve changes in standards used for determining whether or not a person is disabled.

(d) *Procedures for cases included in the projects.* If you are selected to participate in the projects, the State agency disability examiner will review all medical and vocational evidence in your file, including any you provided and any the State agency obtained, just as under the usual procedures. If the decisionmaking team then determines that you are disabled, you will receive a written notice of that determination as under usual procedures. But if the decisionmaking team believes the evidence in your file requires a determination that you are not disabled, they will mail a written notice to you at your last known address telling you their preliminary conclusion and why they believe that such a determination is required. The notice will also tell you that before a formal determination about your disability is made, you may have an interview with the State agency disability examiner if you request it within 30 days after the date you receive the notice. The disability examiner who interviews you may or may not be the same one who participated in the preliminary conclusion that you are not disabled. If the make a late request for an interview but show in writing that you have good cause under the standards in § 416.1411 for missing the deadline, the disability examiner will extend the deadline. If you do not request an interview, or if you requested an interview and notice of its time and place was mailed to you as provided in this paragraph (or paragraph (e)(2) of this section) but you do not appear for the interview, the decisionmaking team will make a determination as to whether you are disabled based on the evidence in your case file. A written notice of that determination will be mailed to you at your last known address. The notice will state the reasons for the determination and its effect, and will inform you of the right to a hearing before an administrative law judge. If you do request an interview within the 30-day time period (or within the extended time period if you make a late request and the disability examiner extends the time period under the good cause provision as provided above), the disability examiner will mail a notice to you at your last known address informing you of the time and place of your interview. The notice will be mailed at least 20 days before the date of the interview, unless you waive (in writing) your right to the 20-day advance notice. You should not waive this right if you need time to get ready for the interview. If you do waive this right, an interview will be scheduled for you as soon as possible and a notice of the time and place of your interview will be mailed to you at your last known address. In this instance, the notice will be mailed at least 10 days before the date of the interview, unless arrangements for the interview are made by the telephone as explained in paragraph (e) of this section. (Approved under OMB control number 0960–0415)

(e) *Interviews scheduled by telephone.* Notwithstanding paragraph (d) of this section, occasionally, for the convenience of all parties involved and as a means of processing your case sooner, arrangements for the time and place of the interview may be made by telephone. If such arrangements are made and the interview is scheduled for a date not less than 5 days from the date of the telephone arrangements, a notice will be mailed to you at your last known address, confirming the time and place of the interview. If an interview is scheduled for a date less than 5 days from the date of the telephone arrangements, a notice confirming the interview will not be mailed to you. If an

VOL 51 ISS 79 AP 24 1986 UMI

interview is scheduled by telephone and you do not appear for the interview, one of the following actions will be taken:

(1) If a notice of the time and place of the interview was not mailed at least 20 days before the scheduled date of the interview and you did not waive (in writing) your right to the 20-day advance notice explained in paragraph (d) of this section, the disability examiner will automatically schedule another interview for you. A notice informing you of the time and place of the rescheduled interview will be mailed to you at your last known address. The notice will be mailed at least 20 days before the date of the interview.

(2) If a notice of the time and place of the interview was mailed to you, and you waived (in writing) your right to the 20-day advance notice explained in paragraph (d) this section, the decisionmaking team will make a determination as to whether you are disabled based on the evidence in your case file. A written notice of that determination will be mailed to you at your last known address.

(3) If a notice of the time and place of the interview was not mailed to you, and you waived (in writing) your right to the 20-day advance notice explained in paragraph (d) of this section, the disability examiner will automatically schedule another interview for you. A notice informing you of the time and place of the rescheduled interview will be mailed to you at your last known address. The notice will be mailed at least 10 days before the date of the interview.

(f) *Change in time or place of interview.* If you are unable to travel or have some other reason why you cannot attend your interview at the scheduled time or place, you should request at the earliest possible date that the time or place be changed. The disability examiner will change the time or place if there is good cause for doing so under the standards in § 416.1436 (c) and (d).

(g) *Your rights.* In connection with your interview—

(1) You may request that we or the State agency assist you in obtaining pertinent evidence about your disability;

(2) You may have a representative, appointed under Subpart O of this Part, at your interview, or you may represent yourself;

(3) You or your representative may review the evidence in your case file, either on the date of your interview or at an earlier time at your request;

(4) You or your representative may present additional evidence and bring witnesses to support your case at your interview; and

(5) You, your representative, and your witnesses may be eligible for reimbursement under the State agency's rules for travel expenses incurred in connection with your interview if the distance from the person's residence or office (whichever he or she travels from) to the interview site exceeds 75 miles.

(h) *After your interview.* At your request, the disability examiner may allow up to 15 days after your interview for receipt of evidence which was not available at the time of the interview. The disability examiner may also obtain additional evidence, including a consultative medical examination as described in § 416.917 or a report from your treating physician, after the interview if he or she believes it is necessary for a sound determination. The decisionmaking team will then determine whether you are disabled. A written notice of the determination made in your case will be mailed to you at your last known address. The notice will state the reasons for the determination and its effect, and will inform you of the right to a hearing before an administrative law judge.

(i) *Effect of the State agency's determination for project participants.* The State agency decisionmaking team's determination is an initial determination that is binding unless—

(1) You request a hearing before an administrative law judge within the time period described in paragraph (j) of this section, and a decision is made; or

(2) The initial determination is revised as provided in § 416.1487.

(j) *Appeal rights for project participants.* If you were given the opportunity for an interview (whether or not you requested or appeared for the interview) and you are dissatisfied with the initial determination, you may request a hearing before an administrative law judge. You must file your request for this hearing within 60 days after the date you receive notice of the initial determination (or within the extended time period if we extend the time as provided in § 416.1433(c)). Section 416.1433 explains how to request a hearing before an administrative law judge. (See §§ 416.1429–416.1461 for the rules concerning administrative law judge hearings.)

BILLING CODE 4190-11-M

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

Schedules of Controlled Substances; Extension of Temporary Placement of 3-Methylfentanyl into Schedule I

AGENCY: Drug enforcement Administration, Justice.

ACTION: Final rule.

SUMMARY: This final rule is issued by the Administrator of the Drug Enforcement Administration (DEA) to extend the temporary scheduling of the narcotic substance, 3-methylfentanyl in Schedule I of the Controlled Substances Act (CSA) (21 U.S.C. 801 *et seq.*). The temporary scheduling of 3-methylfentanyl was due to expire on April 25, 1986. This notice will extend the time period for six months or until 3-methylfentanyl is placed in Schedule I pursuant to the scheduling procedure outlined in 21 U.S.C. 811(a), whichever occurs first.

EFFECTIVE DATE: April 25, 1986.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr., Chief, Drug Control Section, Drug Enforcement Administration, Washington, D.C. 20537, Telephone: (202) 633-1366.

SUPPLEMENTARY INFORMATION:

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Narcotics, Prescription drugs.

On March 25, 1985, the Administrator of the Drug Enforcement Administration issued a final rule in the **Federal Register** amending § 1308.11(g) to temporarily place 3-methylfentanyl into Schedule I of the Controlled Substances Act pursuant to the emergency scheduling provisions of 21 U.S.C. 811(h). This action which became effective on April 25, 1985 was based on a finding by the Administrator that the emergency scheduling of 3-methylfentanyl was necessary to avoid an imminent hazard to the public safety. Section 201(h)(2) of the CSA (21 U.S.C. 811(h)(2)) provides that the emergency scheduling of a substance expires at the end of one year from the effective date of the order. However, if a rulemaking proceeding to schedule the substance has been initiated pursuant to section 201(a)(1) of the CSA (21 U.S.C. 811(a)(1)), the temporary scheduling may be extended for up to six months. Under this provision, the temporary scheduling of 3-methylfentanyl which is due to expire on April 25, 1986, will be extended until October 25, 1986, or until the date on which a final rule, published as a result of the formal rulemaking proceeding, is effective; whichever occurs first.

Pursuant to 21 U.S.C. 811(h)(2) and since proceedings have been initiated in accordance with 21 U.S.C. 811(a)(1) to schedule 3-methylfentanyl, the Administrator hereby orders that the temporary scheduling of 3-methylfentanyl be extended to October 25, 1986 or until the conclusion of the rulemaking proceeding, whichever occurs first.

Pursuant to Title 5, United States Code, section 605(b), the Administrator certifies that the extended scheduling of 3-methylfentanyl in Schedule I of the Controlled Substances Act will have no impact upon small businesses or other entities whose interests must be considered under the Regulatory Flexibility Act (Pub. L. 96-354). The substance, 3-methylfentanyl, has no legitimate use or manufacturer in the United States.

It has been determined that the extension of the temporary placement of 3-methylfentanyl in Schedule I of the CSA under the emergency scheduling provision is a statutory exception to the requirements of Executive Order 12291 (46 FR 13193).

Dated: April 21, 1986.

John C. Lawn,

Administrator, Drug Enforcement Administration.

BILLING CODE 4410-09-M

28 CFR Part 16

[AAG/A Order No. 7-86]

Exemption of Records Systems Under the Privacy Act

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: On December 17, 1985, the Department of Justice, Criminal Division, issued proposed regulations to exempt certain portions of a new system of records entitled "Office of Special Investigations Displaced Persons Listings, JUSTICE/CRM-027" from subsection (d) of the Privacy Act pursuant to 5 U.S.C. 552a(k)(2). The exemption is required because access to these records could inform the subject of the identity of witnesses and informants. Thus, the release of such information could present a serious impediment to effective law enforcement by endangering the physical safety of witnesses or informants; by leading to the improper influencing of witnesses, the destruction of evidence, or the fabrication of testimony; or by otherwise preventing the successful completion of an investigation.

DATE: This rule will be effective on or before April 24, 1986.

ADDRESS: J. Michael Clark, Assistant Director, General Services Staff, Justice Management Division, Department of Justice, Room 9002, 601 D Street, NW., Washington, D.C. 20530.

FOR FURTHER INFORMATION CONTACT: J. Michael Clark, 272-6474.

SUPPLEMENTAL INFORMATION: The proposed rule with invitation to comment was published in the **Federal Register** on December 17, 1985 (50 FR 51410). The public was given 30 days to comment; however, no comments were received.

This order relates to individuals rather than small business entities. Nevertheless, pursuant to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601-612, its is hereby stated that the order will not have "a significant economic impact on a substantial number of small entities."

List of Subjects in 28 CFR Part 16

Administrative Practice and Procedure; Courts; Freedom of Information; Privacy; and Sunshine Act.

Pursuant to the authority vested in the Attorney General by 5 U.S.C. 552a and delegated to me by Attorney General Order No. 793-78 28 CFR 16.91 is amend to adding paragraphs (s) and (t) as set forth below.

Dated: March 19, 1986.

W. Lawrence Wallace,

Assistant Attorney General for Administration.

1. The authority for Part 16 continues to read as follows:

Authority: 28 U.S.C. 509, 510; 5 U.S.C. 301, 552, 552a; 31 U.S.C. 483a unless otherwise noted.

2. 28 CFR 16.91 is amended by adding paragraphs (s) and (t).

§ 16.91 Exemption of Criminal Division Systems—Limited Access, as indicated.

* * * * *

(s) The following system of records is exempted from 5 U.S.C. 552a(d).

Office of Special Investigations Displaced Persons Listings (JUSTICE/CRM-027).

This exemption applies to the extent that the records in this system are subject to exemption pursuant to 5 U.S.C. 552a(k)(2).

(t) Exemption from subsection (d) is justified for the following reasons:

(1) Access to records contained in this system could inform the subject of the identity of witnesses or informants. The release of such information could present a serious impediment to effective law enforcement by endangering the physical safety of witnesses or informants; by leading to the improper influencing of witnesses, the destruction of evidence, or the fabrication of testimony; or by otherwise preventing the successful completion of an investigation.

[FR Doc. 86-9166 Filed 4-23-86; 8:45 am]
BILLING CODE 4410-01-M

28 CFR Part 16

[AAG/A Order No. 6-86]

Exemption of Records Systems Under the Privacy Act

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: On January 9, 1986 (51 FR 986), the Department of Justice published notice that it would modify the proposed regulations published on April 7, 1983 (48 FR 15160), to amend Title 28 of the Code of Federal Regulations, Part 16, Subpart E, "Exemption of Records Systems Under the Privacy Act." The January 9, regulations were published to: (1) Clarify that the Department's Freedom of Information Act and Privacy Act (FOIA/PA) systems would be exempt only to the extent that they contain law enforcement- or investigative-type information and (2) remove exemptions and other proposed changes which had been offered to achieve clarity and consistency with reorganizations but which, for administrative reasons, had to be withdrawn or republished as a separate proposed rule.

SUPPLEMENTARY INFORMATION: A section by section explanation of proposals throughout Part 16 was provided under "Supplementary Information" in the April 7 regulations. These proposals remain unchanged except that, pursuant to oral comments received from the Office of Management and Budget, those sections relating to exemption of the Department's FOIA/PA systems have been further revised as indicated above. Further, for administrative reasons, the proposal to revise §§ 16.71 and 16.88 and to add § 16.72, has been withdrawn and published as a separate proposed rule.

VOL 51 ISS 79 AP 24 1986 UMI

in addition, the proposal to change § 16.92 has been withdrawn.

One public comment was received. The commentator incorrectly assumed that the U.S. Parole Commission was claiming new exemptions under § 16.85. As was explained in the initial proposal on April 7, 1983 (and referenced on January 9, 1986), the U.S. Parole Commission made minor changes to § 16.85 by changing system number identifiers and by adding specificity to the statutory authority, i.e., by changing "5 U.S.C. 552a(j)" to "5 U.S.C. 552a(j)(2)."

This order relates to individuals rather than small business entities. Nevertheless, pursuant to the requirements of the Regulatory Flexibility Act, 5 U.S.C. 601–612, it is hereby stated that the order will not have "a significant economic impact on a substantial number of small entities."

List of Subjects in 28 CFR Part 16

Administrative Practice and Procedure, Courts, Freedom of Information, Privacy, and Sunshine Act.

DATE: This rule will be effective April 24, 1986.

ADDRESS: Assistant Director, General Services Staff, Justice Management Division, Department of Justice, Room 9062, 601 D Street NW., Washington, DC 20530.

FOR FURTHER INFORMATION CONTACT: J. Michael Clark, (202) 272–6474.

Pursuant to the authority vested in the Attorney General by 5 U.S.C. 552a and delegated to me by Attorney General Order No. 793–78, Title 28 of the Code of Federal Regulations, Part 16, Subpart E, is amended as set forth below.

Dated: April 4, 1986.

W. Lawrence Wallace,

Assistant Attorney General for Administration.

1. The authority for Part 16 continues to read as follows:

Authority: 28 U.S.C. 509, 510; 5 U.S.C. 301, 552, 552a; 31 U.S.C. 483a unless otherwise noted.

§ 16.73 [Redesignated]

1a. Section 16.73 is redesignated as § 16.74.

2. Section 16.76 is amended by revising the undesignated paragraphs following (a)(1) and (c)(1); by revising paragraph (b); by adding a sentence to the end of paragraph (d)(1); by removing paragraph (g)(1) and redesignating paragraph (g)(2) as (g)(1); and by adding paragraph (h).

§ 16.76 Exemption of Justice Management Division Systems.

(a) * * *

(1) * * *

This exemption applies only to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a(j)(2).

(b) Exemption from subsection (c)(3) is justified for the following reasons:

(1) Pub. L. 91–513 (Controlled Substances Act), Sec. 404(b) states that the nonpublic record "shall be retained by the Department of Justice solely for the purpose of use by the courts in determining whether or not, in subsequent proceedings, such person qualifies under this subsection."

(2) Information in this system consists of arrest records, including those of co-defendants. The records include reports of informants and investigations. Therefore, access could disclose investigative techniques, reveal the identity of confidential sources, and invade the privacy of third parties.

(c) * * *

(1) * * *

This exemption applies only to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a (j)(2) and (k)(5).

(d) Exemption from subsection (d) is justified for the following reason:

(1) * * * Access may also reveal information relating to actual or potential criminal investigations.

* * * * *

(h) Consistent with the legislative purpose of the Privacy Act of 1974, the Justice Management Division will grant access to non-exempt material in FOIA/PA records. Exemptions will apply only to the extent that other correspondence or internal memoranda retained with the request file contain investigatory material for law enforcement purposes.

3. Section 16.81 is amended by revising paragraphs (a), (b)(11), (d), and (e).

§ 16.81 Exemption of United States Attorneys Systems—Limited Access.

(a) The following systems of records are exempt from 5 U.S.C. 552a(c) (3) and (4), (d), (e) (1), (2) and (3), (e)(4) (G) and (H), (e) (5) and (8), (f), and (g):

(1) Citizen Complaint Files (JUSTICE/USA–003).

(2) Civil Case Files (JUSTICE/USA–005).

(3) Consumer Complaints (JUSTICE/USA–006).

(4) Criminal Case Files (JUSTICE/USA–007).

(5) Kline-District of Columbia and Maryland-Stock and Land Fraud Interrelationship Filing System (JUSTICE/USA–008).

(6) Major Crimes Division Investigative Files (JUSTICE/USA–010).

(7) Prosecutor's Management Information System (PROMIS) (JUSTICE/USA–011).

(8) United States Attorney, District of Columbia Superior Court Division, Criminal Files (JUSTICE/USA–012).

(9) Pre-trial Diversion Program Files (JUSTICE/USA–014).

These exemptions apply to the extent that information in these systems is subject to exemption pursuant to U.S.C. 552a(j)(2), (k)(1) and (k)(2).

(b) * * *

(11) From subsection (g) because these systems of records are compiled for law enforcement purposes and have been exempted from the access provisions of subsections (d) and (f).

* * * * *

(d) The following system of records is exempt from 5 U.S.C. 552a(c) (3) and (4), (d), (e) (1), (2) and (3), (e)(4) (G) and (H), (e) (5) and (8), (f), and (g):

(1) Freedom of Information Act/Privacy Act Files (JUSTICE/USA–008)

These exemptions apply to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a(j)(2), (k)(1) and (k)(2).

(e) Because this system contains Department of justice civil and criminal law enforcement, investigatory records, exemptions from the particular subsections are justified for the following reasons:

(1) From subsection (c)(3) because the release of the disclosure accounting would permit the subject of a criminal investigation and/or civil case or matter under investigation, in litigation, or under regulatory or administrative review or action to obtain valuable information concerning the nature of that investigation, case or matter, and present a serious impediment to law enforcement or civil legal activities.

(2) From subsection (c)(4) because an exemption is being claimed for subsection (d) of the Act (Access to Records), rendering this subsection inapplicable to the extent that this system of records is exempted from subsection (d).

(3) From subsection (d) because access to the records contained in these systems would inform the subject of a criminal or civil investigation, matter or case of the existence of such, and provide the subject with information that might enable him to avoid detection, apprehension or legal obligations, and present a serious impediment to law enforcement and other civil remedies. Amendment of the records would interfere with ongoing criminal law enforcement proceedings and impose an impossible

administrative burden by requiring criminal investigations to be continuously reinvestigated.

(4) From subsection (e)(1) because in the course of criminal investigations and/or civil investigations, cases or matters, the United States Attorneys often obtain information concerning the violation of laws or civil obligations other than those relating to an active case or matter. In the interests of effective law enforcement and civil litigation, it is necessary that the United States Attorneys retain this information since it can aid in establishing patterns of activity and provide valuable leads for other agencies and future cases that may be brought within the United States Attorneys' offices.

(5) From subsection (e)(2) because to collect information to the greatest extent possible from the subject individual of a criminal investigation or prosecution would present a serious impediment to law enforcement in that the subject of the investigation would be placed on notice of the existence of the investigation and would therefore be able to avoid detection, apprehension, or legal obligations and duties.

(6) From subsection (e)(3) because to provide individuals supplying information with a form stating the requirements of subsection (e)(3) would constitute a serious impediment to law enforcement in that it could compromise the existence of a confidential investigation, reveal the identity of confidential sources of information, and endanger the life and physical safety of confidential informants.

(7) From subsections (e)(4) (G) and (H) because this system of records is exempt from the individual access provisions of subsection (d) and the rules provisions of subsection (f).

(8) From subsection (e)(5) because in the collection of information for law enforcement purposes it is impossible to determine in advance what information is accurate, relevant, timely, and complete. With the passage of time, seemingly irrelevant or untimely information may acquire new significance as further investigation brings new details to light and the accuracy of such information can only be determined in a court of law. The restrictions of subsection (e)(5) would inhibit the ability of trained investigator and intelligence analysts to exercise their judgment in reporting on investigations and impede the development of intelligence necessary for effective law enforcement.

(9) From subsection (e)(8) because the individual notice requirements of subsection (e)(8) could present a serious impediment to law enforcement as this could interfere with the United States Attorneys' ability to issue subpoenas and could reveal investigative techniques and procedures.

(10) From subsection (f) because this system has been exempted from the individual access provisions of subsection (d).

(11) From subsection (g) because the records in this system are generally compiled for law enforcement purposes and are exempt from the access provisions of subsections (d) and (f), rendering subsection (g) inapplicable.

4. Section 16.85 is amended by revising paragraph (a).

§ 16.85 Exemption of U.S. Parole Commission Systems—Limited access.

(a) The following systems of records are exempt from 5 U.S.C. 552(c) (3) and (4), (d), (e) (2) and (3), (e)(4) (G) and (H), (e)(8), (f) and (g):

(1) Docket Scheduling and Control System (JUSTICE/PRC–001).

(2) Inmate and Supervision Files System (JUSTICE/PRC–003).

(3) Labor and Pension Case, Legal File, and General Correspondence System (JUSTICE/PRC–004).

(4) Statistical, Educational and Developmental System (JUSTICE/PRC–006).

(5) Workload Record, Decision Result, and Annual Report System (JUSTICE/PRC–007).

These exemptions apply only to the extent that information in those systems is subject to exemptions pursuant to 5 U.S.C. 552a(j)(2).

* * * * *

5. Section 16.90 is amended by revising paragraphs (e) and (f) as follows:

§ 16.90 Exemption of Civil Rights Division Systems—Limited Access.

* * * * *

(e) The following system of records is exempt from 5 U.S.C. 552a (c)(3), (d), and (g):

(1) Freedom of Information/Privacy Act Records (JUSTICE/CRT–010).

These exemptions apply to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a (j)(2) and (k)(2).

(f) Because this system contains Department of justice civil and criminal law enforcement, investigatory records, exemptions from the particular subsections are justified for the following reasons:

(1) From subsection (c)(3) because the release of the disclosure accounting may enable the subject of an investigation to gain valuable information concerning the nature and scope of the investigation and seriously hamper law enforcement efforts.

(2) From subsection (d) because access to records in this system would compromise ongoing investigations and reveal investigative techniques. In addition, certain of these records may be subject to protective orders entered by Federal courts to protect their confidentiality, and many are copies of documents which are the property of State agencies and were obtained under express or implied promises to strictly protect their confidentiality. This system also contains investigatory material compiled by the Equal Opportunity Commission pursuant to its authority under 42 U.S.C. 2000e–8. Provisions of 42 U.S.C. 2000e–5(b), 42 U.S.C. 2000e–8(e), and 44 U.S.C. 3508 make it unlawful to make public in any manner whatsoever any information obtained by the Commission pursuant to the authority. Amendment of the records would interfere with ongoing criminal law enforcement proceedings and impose an impossible administrative burden by requiring criminal investigations to be continuously reinvestigated.

(3) From subsection (g) because exemption from subsection (d) will render the previsions on suits to enforce subsection (d) inapplicable.

6. Section 16.91 is amended by revising paragraphs (q) and (r).

§ 16.91 Exemption of Criminal Division Systems—Limited Access.

* * * * *

(q) The following system of records is exempt from 5 U.S.C. 552a(c) (3) and (4), (d), (e) (1), (2) and (3), (e)(4) (G), (H) and (I), (e) (5) and (8), (f), and (g):

(1) Freedom of Information/Privacy Act Records (JUSTICE/CRM–024)

These exemptions apply to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a(j)(2), (k)(1) and (k)(2).

(r) Because this system contains Department of Justice civil and criminal law enforcement, investigatory records, it is exempted for the reasons set forth from the following provisions of 5 U.S.C. 552a:

(1)(c)(3). The release of the disclosure accounting would present a serious impediment to law enforcement by permitting the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to determine whether he is the subject of investigation, or to obtain valuable information concerning the nature of that investigation and the information obtained, or to identify witnesses and informants.

(2)(c)(4). Since an exemption is being claimed for subsection (d) of the Act (Access to Records), this subsection is inapplicable to

VOL 51 ISS 79 AP 24 1986 UMI

the extent that this system of records is exempted from subsection (d).

(3)(d). Access to records contained in this system would enable the subject of an investigation of an actual or potential criminal or civil case or regulatory violation to determine whether he or she is the subject of investigation, to obtain valuable information concerning the nature and scope of the investigation, and information or evidence obtained as to his/her activities, to identify witnesses and informants, or to avoid detection or apprehension. Such results would prevent the successful completion of the investigation, endanger the physical safety of witnesses or informants, lead to the improper influencing of witnesses, the destruction of evidence, or the fabrication of testimony, and thereby present a serious impediment to effective law enforcement. Amendment of the records would interfere with ongoing criminal law enforcement proceedings and impose an impossible administrative burden by requiring criminal investigations to be continuously reinvestigated.

(4)(e)(1). In the course of criminal or other law enforcement investigations, cases, and matters, the Criminal Division will occasionally obtain information concerning actual or potential violations of law that are not strictly within its statutory or other authority, or items compile information in the course of an investigation which may not be relevant to a specific prosecution. In the interests of effective law enforcement, it is necessary to retain such information since it can aid in establishing patterns of criminal activity and can provide valuable leads for Federal and other law enforcement agencies.

(5)(e)(2). To collect information to the greatest extent practicable from the subject individual of a criminal investigation or prosecution would present a serious impediment to law enforcement. The nature of criminal and other investigative activities is such that vital information about an individual can only be obtained from other persons who are familiar with such individual and his/her activities. In such investigations it is not feasible to rely upon information furnished by the individual concerning his own activities.

(6) (e)(3). To provide individuals supplying information with a form stating the requirements of subsection (e)(3) would constitute a serious impediment to law enforcement in that it could compromise the existence of a confidential investigation or reveal the identity of witnesses or confidential informants.

(7)(e)(4) (G) and (H). These subsections are inapplicable to the extent that this system is exempt from the access provisions of subsection (d) and the rules provisions of subsection (f).

(8)(e)(4)(I). The categories of sources of the records in this system have been published in the Federal Register in broad generic terms in the belief that this is all that subsection (e)(4)(I) of the Act requires. In the event, however, that this subsection should be interpreted to require more detail as to the identity of sources of the records in this system, exemption from this provision is necessary to protect the confidentiality of the sources of criminal and other law enforcement information. Such exemption is further necessary to protect the privacy and physical safety of witnesses and informants.

(9) (e)(5). In the collection of information for criminal law enforcement purposes it is impossible to determine in advance what information is accurate, relevant, timely, and complete. With the passage of time, seemingly irrelevant or untimely information may acquire new significance as further investigation brings new details to light and the accuracy of such information can often only be determined in a court of law. The restrictions of subsection (e)(5) would inhibit the ability of trained investigators, intelligence analysts, and government attorneys in exercising their judgment in reporting on information and investigations and impede the development of criminal or other intelligence necessary for effective law enforcement.

(10)(e)(8). The individual notice requirements of subsection (e)(8) could present a serious impediment to law enforcement as this could interfere with the ability to issue warrants or subpoenas and could reveal investigative techniques, procedures, or evidence.

(11)(f). This subsection is inapplicable to the extent that this system is exempt from the access provisions of subsection (d).

(12)(g). Because some of the records in this system contain information which was compiled for law enforcement purposes and have been exempted from the access provisions of subsection (d), subsection (g) is inapplicable.

* * * * *

7. Section 16.93 is amended by revising paragraphs (e) and (f).

§ 16.93 Exemption of Tax Division Systems—Limited Access.

* * * * *

(e) The following system of records is exempt from 5 U.S.C. 552a (c)(3), (c)(4), (d), (e)(1), (e)(2), (e)(3), (e)(4), (G), (e)(4)(H), (e)(4)(I), (e) (5) and (8), (f), and (g).

(1) Freedom of Information—Privacy Act Request Files (JUSTICE/TAX–004) These exemptions apply to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a(j)(2) and (k)(2).

(f) Because this system contains Department of Justice civil and criminal law enforcement, investigatory records, it is exempted for the reasons set forth from the following provisions of 5 U.S.C. 552a:

(1)(c)(3). The release of the disclosure accounting would present a serious impediment to law enforcement by permitting the subject of a investigation of an actual or potential criminal, civil, or regulatory violation to determine whether he is the subject of investigation, or to obtain valuable information concerning the nature of that investigation and the information obtained, or to identify witnesses and informants.

(2)(c)(4). Since an exemption is being claimed for subsection (d) of the Act (Access to Records), this subsection is inapplicable to the extent that this system of records is exempted from subsection (d).

(3)(d). Access to records contained in this system would inform the subject of an actual or potential criminal tax investigation of the existence of that investigation, of the nature and scope of the investigation, of the information and evidence obtained as to his or her activities, and of the identity of witnesses or informants. Such access would, accordingly, provide information that could enable the subject to avoid detection, apprehension, and prosecution. This result, therefore, would constitute a serious impediment to effective law enforcement not only because it would prevent the successful completion of the investigation but also because it could endanger the physical safety of witnesses or informants, lead to the improper influencing of witnesses, the destruction of evidence, of the fabrication of testimony. Amendment of the records would interfere with ongoing criminal law enforcement proceedings and imposes an impossible administrative burden by requiring criminal investigations to be continuously reinvestigated.

(4)(e)(1). In the course of criminal tax and related law enforcement investigations, cases, and matters, the Tax Division will occasionally obtain information concerning actual or potential violations of law that may not be technically within its statutory or other authority, or it may compile information in the course of an investigation which may not be relevant to a specific prosecution. In the interests of effective law enforcement, it is necessary to retain some or all of such information since it can aid in establishing patterns of criminal activity and can provide valuable leads for Federal and other law enforcement agencies.

(5)(e)(2). To collect information to the greatest extent practicable from the subject individual of a criminal investigation or prosecution would present a serious impediment to law enforcement because the subject of the investigation or prosecution would be placed on notice as to the existence of the investigation and would therefore be able to avoid detection or apprehension, improperly influence witnesses, destroy evidence, or fabricate testimony.

(6)(e)(3). To provide individuals supplying information with a form which includes the information required by subsection (e)(3) would constitute a serious impediment to law enforcement, i.e., it could compromise the existence of a confidential investigation or reveal the identity of witnesses or confidential informants.

(7)(e)(4) (G) and (H). These subsections are inapplicable to the extent that this system is exempt from the access provisions of subsection (d) and the rules provisions of subsection (f).

(8)(e)(4)(I). The categories of sources of the records in this system have been published in the Federal Register in broad generic terms in the belief that this is all that subsection (e) (4) (I) of the Act requires. In the event, however, that this subsection should be interpreted to require more detail as to the identity of sources of the records in this system,

exemption from this provision is necessary to protect the confidentiality of the sources of criminal tax and related law enforcement information. Such exemption is further necessary to protect the privacy and physical safety of witnesses and informants.

(9)(e)(5). In the collection of information for criminal tax enforcement purposes it is impossible to determine in advance what information is accurate, relevant, timely, and complete. With the passage of time, seemingly irrelevant or untimely information may acquire new significance as further investigation brings new details to light. Furthermore, the accuracy of such information can often only be determined in a court of law. The restrictions of subsection (e)(5) would inhibit the ability of government attorneys in exercising their judgement in reporting on information and investigations and impede the development of criminal tax information and related data necessary for effective law enforcement.

(10)(e)(8). The individual notice requirements of subsection (e)(8) could present a serious impediment to law enforcement as this could interfere with the ability to issue warrants or subpoenas and could reveal investigative techniques, procedures, or evidence.

(11)(f). This subsection is inapplicable to the extent that this system is exempt from the access provisions of subsection (d).

(12)(g). Because the records in this system are generally compiled for law enforcement purposes and are exempt from the access provisions of subsection (d), subsection (g) is inapplicable.

8. Section 16.96 is amended by revising paragraph (g).

§ 16.96 Exemption of Federal Bureau of Investigation Systems—Limited access.

* * * * *

(g) The following system of records is exempt from 5 U.S.C. 552a(c) (3) and (4), (d), (e)(1), (2) and (3), (e)(4) (G) and (H), (e)(8), (f), and (g): National Crime Information Center (NCIC) (JUSTICE/FBI–001). This exemption applies only to the extent that information in the system is subject to exemption pursuant to 5 U.S.C. 552a(j)(2) and (k)(3).

* * * * *

§ 16.97 [Amended]

9. Section 16.97, paragraph (a)(8), is amended by removing the word "Tax" and inserting the word "Tort." Further, paragraph (c), last sentence, is amended by removing the quotation marks.

10. Section 16.100 is amended by revising the section heading and the first sentence of paragraph (a)(1).

§ 16.100 Exemption of Office of Justice Programs—Limited access.

(a) * * *

(1) The Civil Rights Investigative System (JUSTICE/OJP–008). * * *

* * * * *

11. Section 16.103 is amended by revising the section heading and paragraph (a)(1) as follows:

§ 16.103 Exemption of the INTERPOL-United States National Central Bureau (INTERPOL-USNCB) System.

(a) * * *

(1) The INTERPOL-United States National Central Bureau (INTERPOL-USNCB) (Department of Justice) INTERPOL-USNCB Records System (JUSTICE/INTERPOL–001). This exemption applies only to the extent that information in this system is subject to exemption pursuant to 5 U.S.C. 552a (j)(2), (k)(2), and (k)(5).

Coast Guard

33 CFR Part 100

[CGD3 86–06]

Temporary Regatta Regulation; National Sweepstakes Regatta, Redbank, NJ

AGENCY: Coast Guard, DOT.

ACTION: Temporary regulation with request for comments.

SUMMARY: The Coast Guard is temporarily changing the effective dates for the regulation governing the annual National Sweepstakes Regatta. This powerboat race is normally held on the third weekend in August but this year has been scheduled for July 12 and 13 because it must precede the national competition which is scheduled to take place the second or third week in August this year.

DATES: This temporary regulation becomes effective on July 12, 1986 and terminates on July 13, 1986. Comments on this regulation must be received on or before June 9, 1986.

ADDRESSES: Comments should be mailed to Commander (b), Third Coast Guard District, Governors Island, New York, NY 10004–5098. The comments will be available for inspection and copying at the Boating Safety Office, Building 110, Governors Island, New York, NY. Normal office hours are between 8:00 a.m. and 4:30 p.m., Monday through Friday, except holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Mr. Lucas A. Dlhopolsky, (212) 668–7974.

SUPPLEMENTARY INFORMATION: In accordance with 5 U.S.C. 553, a notice of proposed rulemaking has not been published for this regulation. Following normal rulemaking procedures is unnecessary. The permanent regulation for this regatta (33 CFR 100.307) provides notice that the dates may be changed by publication in the Federal Register. In addition, the change of dates should have little or no economic impact and no adverse comments are anticipated. Although this regulation is published as a final rule without prior notice, and opportunity for public comment is nevertheless desirable to ensure that the regulation is both reasonable and workable. Accordingly, persons wishing to comment may do so by submitting written comments to the office listed under **"ADDRESSES"** in this preamble. Commenters should include their names and addresses, identify the docket number (CGD3 86–06) for this regulation, and give reasons for their comments. Based upon comments received, the regulation may be changed.

Drafting Information

The drafters of this notice are Mr. Lucas A. Dlhopolsky, Project Officer, Boating Safety Office, and Ms. MaryAnn Arisman, Project Attorney, Third Coast Guard District Legal Office.

Discussion of Regulation

The National Sweepstakes Regatta is a powerboat race event which is held annually on the Navesink River near Redbank, NJ. The event is sponsored by the National Sweepstakes Regatta

VOL 51 ISS 79 AP 24 1986 UMI

Association of Redbank, NJ. Since this two day event is traditionally held each year in the same location, involving the same kind of racing vessels, a permanent amendment to Part 100 of Title 33, Code of Federal Regulations: § 100.307, was promulgated in 1985. As stated in that section, the effective period for this event each year was to be the third weekend (Saturday and Sunday) in August unless otherwise specified in the Third District Local Notice to Mariners and in a Federal Register Notice. Announcements in these publications would provide the public with full and adequate notice of the dates and times of this annual powerboat race. The race is sanctioned by the American Powerboat Association and is well known to the boaters and residents of the area. The 1986 running of this event will be on July 12 and 13 instead of the third weekend in August in order to select those qualified to participate in the national competition which will be held this year in Oregon on the second or third week of August. In all other respects, this event will be the same as it has been in past years. The oval race course will be approximately 1.25 miles in length. Races will be held on both days on a section of the Navesink River just east of the N.J. Route 35 Bridge. Race heats will be run both days from approximately 10:00 a.m. to 6:00 p.m. with up to 100 hydroplane powerboats participating each day. The sponsor will place several temporary buoys on the river to mark both the race course and spectator areas. There will be two race committee boats anchored within the oval course, one on each end with turn judges and press onboard. The U.S. Coast Guard will assist the sponsor and local authorities in providing a safety patrol during this event. In order to provide for the safety of life and property, the Coast Guard will restrict vessel movement and establish spectator areas prior to and during the races. Vessels desiring to transit the area will be given the opportunity to do so several times during each day in between race heats as directed by the Coast Guard Patrol Commander.

Marine safety, Navigation (water).

Temporary Regulation

In consideration of the foregoing, Part 100 of Title 33, Code of Federal Regulations is amended as follows:

PART 100—[AMENDED]

1. The authority citation for Part 100 continues to read as follows:

Authority: 33 U.S.C. 1233; 49 CFR 1.46 and 33 CFR 100.35.

2. Section 100.307(b) is revised to read as follows for the period July 12 through July 13, 1986. Because this is a temporary rule, this revision will not appear in the Code of Federal Regulations:

§ 100.307 National Sweepstakes Regatta, Redbank, N.J.

* * * * *

(b) *Effective period:* This regulation will be effective from 6:00 a.m. to 6:00 p.m. on both July 12 and 13, 1986.

* * * * *

Dated: April 2, 1986.

P. A. Yost,

Vice Admiral, U.S. Coast Guard Commander, Third Coast Guard District.

33 CFR Part 157

[CGD 85-048 a]

Pollution; Tank Vessels Carrying Oil in Bulk; Coast Guard Plan Review; Change of Address for Submission of Plans for Review

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: These rules change the address for submitting vessel plans for Coast Guard review. The plan review duties previously performed by the Merchant Marine Technical Branches of the Third Coast Guard District in New York, New York, the Eighth Coast Guard District in New Orleans, Louisiana, and the Twelfth Coast Guard District in Alameda, California are being assumed by the Marine Safety Center located in Washington, DC.

EFFECTIVE DATE: June 1, 1986.

FOR FURTHER INFORMATION CONTACT: LCDR Charles E. Bills, Marine Technical and Hazardous Materials Division, (G-MTH-2/12), Room 1216, U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593; (202) 426-2160.

SUPPLEMENTARY INFORMATION: The U.S. Coast Guard has recently completed an evaluation of its Merchant Marine Technical Branch field organization, taking into account many factors, including personnel considerations, system efficiency, and Fiscal Year 1986 staff reductions within the Commercial Vessel Safety Program. As a result, the Merchant Marine Technical Branches of the Third, Eighth, and Twelfth Coast Guard Districts are being consolidated to improve overall plan review efficiency, quality, and consistency, and to provide a centralized site for performing oversight of Coast Guard plan review functions delegated to third parties. Consolidation will result in the establishment of a Marine Safety Center as a Headquarters unit located in the Washington, DC metropolitan area.

The Washington, DC area was chosen based on many factors, including: locating the Marine Safety Center in a favorable technical labor market; recognition that the need for regionally based Merchant Marine Technical Branches has dramatically decreased since (1) overseas commercial vessel construction activity has increased and (2) third parties, having been delegated plan review functions by the Coast Guard, are themselves regionally based; recognition of the area as an expanding naval architect/marine engineer center; and the area's excellent access to international and domestic transportation.

Accordingly, the plan review previously conducted by the Third, Eighth, and Twelfth Coast Guard Districts' Merchant Marine Technical Branches will be performed by the Marine Safety Center, effective June 1, 1986.

Shipyards, designers, and other businesses and persons who are directly affected by this action have been informed of the consolidation by letter from either the Commander, Third Coast Guard District (mmt), Commander, Eighth Coast Guard District (mmt), or Commander, Twelfth Coast Guard District (mmt), as appropriate. Notice of the consolidation was also published in the **Federal Register** of June 20, 1985 at p. 25644 (50 FR 25644).

The purpose of these rules is to provide the revised plan submittal procedure and to include the mailing address of the Marine Safety Center.

These rules have been evaluated under Executive Order 12291 and DOT Order 2100.5 and have been determined to be non-major and non-significant. These rules reflect a change in agency organization and procedure with minimal economic impact upon the public. Notice of proposed rulemaking and opportunity for public comment are not required by 5 U.S.C. 553, and these rules may be effective less than 30 days after their publication date. Since minimal economic impact is expected, a full economic evaluation has not been conducted.

In accordance with section 605(b) of the Regulatory Flexibility Act (90 Stat. 1164), it is certified that these regulations will not have a significant economic impact on a substantial number of small entities for the reasons stated above.

Drafting Information

The principal persons involved in drafting this document are LCDR Charles E. Bills, Project Manager, Office of Merchant Marine Safety, and Mr. William R. Register, Project Attorney, Office of Chief Counsel.

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 291

Recreation Management; Occupancy and Use of Sites and Areas of Concentrated Public Use; Withdrawal of Final Rule

AGENCY: Forest Service, USDA.

ACTION: Withdrawal of final rule.

SUMMARY: On March 20, 1986, at 51 FR 10382, the Department of Agriculture published a final rule to recover Federal costs associated with administration of user reservation systems on some National Forest System recreation areas and sites. The rule was to become effective on April 25 and was to be accompanied by a notice of the interim directive that was to be issued to Forest Service employees providing instructions on implementing the rule. Inadvertently, this rule document was processed and signed without the accompanying notice of implementing procedures and without the benefit of Office of Management and Budget review as required by E.O. 12291. Accordingly, the Department is withdrawing the rule at this time. The Department intends to republish the final rule along with the related notice upon completion of the review process.

FOR FURTHER INFORMATION CONTACT: Marian P. Connolly, Regulatory Coordinator, Forest Service, USDA, (202) 235-1488.

Dated: April 17, 1986.

Peter C. Myers,

Assistant Secretary, Natural Resources and Environment.

Correction

In FR Doc. 86-7338 beginning on page 11664 of the issue of Friday, April 4, 1986, make the following corrections:

1. On page 11666, first column, § 101-38.001-19, in the next to the last line, the reference to "Standard No 283" should read "Standard No 292."

2. On page 11666, third column, § 101-38.101-3(b), on the last line, the reference to "class III" should read "class II."

3. On page 11667, first column, § 101-38.101-3(b)(3), in the table, under the "Fiscal year" column, the year "1997" should read "1987."

4. On page 11667, middle column, § 101-38.102(a), on the 14th line, correct the word "forecase" to read "forecast."

5. On page 11669, first column, § 101-38.104-2(a)(2), on the 7th line, correct the spelling of the 2nd work to read "these."

6. On page 11669, middle column, § 101-38.104-4(a), the first word should read "Requisitions". On the 6th line, correct the word "discription" to read "description."

7. On page 11669, middle column, § 101-38.104-4(c), on the 10th line, the second word should read "for".

8. On page 11669, last column, § 101-38.104-5, on the 2nd line, correct the word "mortor" to read "motor."

9. On page 11691, first column, § 101-38.104-8(a)d., at the end of the reference to "Chrysler Motors Corporation" the words "General Motors Corporation" should appear as a separate line before "Chevrolet Motor Divsion."

10. On page 11692, last column, § 101-38.202-4, the code of "Justice, Department of" should read "J" instead of "L."

11. On page 11698, first column, § 101-38.700, on the 5th line, a dash should precede the word "rented."

12. On page 11698, first column, § 101-38.701(b), on the 5th line, insert the article "a" between the words "of" and "Motor."

13. On page 11698, middle column, § 101-38.702, on the 2nd line, a dash should precede the word "leased."

Health Care Financing Administration

42 CFR Part 403

[BERC-240-F]

Medicare Program; Recognition of State Reimbursement Control Systems

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Final rule.

SUMMARY: This final rule implements statutory requirements to set forth the conditions and procedures under which HCFA approve Medicare payment for hospital services to be made in accordance with a State hospital reimbursement control system, rather

VOL 51 ISS 79 AP 24 1986 UMI

than in accordance with Medicare reimbursement principles.

EFFECTIVE DATE: These regulations are effective May 27, 1986. (See section V.C. of the preamble concerning information collection requirements.)

FOR FURTHER INFORMATION CONTACT: Charlene Brown, (301) 597–2886.

SUPPLEMENTARY INFORMATION:

I. Background

Section 1886(c) of the Social Security Act (the Act), as established by the Tax Equity and Fiscal Responsibility Act of 1982 (Pub. L. 97–248) and as since amended by section 601(c) of the Social Security Amendments of 1983 (Pub. L. 98–21) and section 2315(a) of the Deficit Reduction Act of 1984 (Pub. L. 98–369), generally authorizes Medicare reimbursement for inpatient hospital services in accordance with a State's hospital reimbursement control system, rather than in accordance with the Medicare reimbursement principles. Under section 1886(c) of the Act, reimbursement may be made under a State system if one of three alternative sets of requirements are met.

First, under section 1886(c) of the Act, as enacted by Pub. L. 97–248, HCFA has discretion to allow Medicare hospital reimbursement to be made in accordance with a State reimbursement control system ("the State system") if the chief executive officer of the State requests approval of the State system, and if the State system meets the specific minimum requirements summarized below.

1. The State system must apply to substantially all non-federal acute care hospitals in the State.

2. The State system must apply to at least 75 percent of all inpatient revenues or expenses for the State.

3. The State must provide assurances that payors, hospital employees and patients in the State will be treated equitably under its system.

4. The State must provide assurances that its system will not result in greater Medicare expenditures over 36-month periods.

Section 601(c) of Pub. L. 98–21 amended section 1886(c)(1) of the Act to allow continuation of HCFA's discretionary authority for approval, as provided under Pub. L. 97–248, but added two additional requirements for approval of a State system as follows.

5. The State system may not preclude health maintenance organizations (HMOs) or competitive medical plans (CMPs) (as defined in section 1876(b) of the Act) from negotiating directly with hospitals concerning payment for inpatient services.

6. The State system must prohibit charging individuals for services for which the individuals are entitled to have payment made under Part A of Medicare (Hospital Insurance), as provided in section 1866(a)(1)(G) of the Act; and also prohibit, in accordance with section 1862(a)(14) of the Act, payments under Part B of Medicare (Supplementary Medical Insurance) for nonphysician services provided to inpatients, unless waived by the Secretary (procedures for which are described in the regulations at 42 CFR 489.23).

Second, section 601(c) of Pub. L. 98–21 added section 1886(c)(5) to the Act to specify six additional requirements that, if met by a State system that also meets the minimum requirements one through six as presented above, makes HCFA's approval of a request by the State for Medicare reimbursement under its system mandatory. The additional requirements are that the State system must:

7. Be operated directly by the State or an entity designated by State law;

8. Use a payment methodology to be applied prospectively;

9. Provide for hospital reports, as required by the Secretary;

10. Provide satisfactory assurances that it will not result in admission practices that will reduce treatment to uninsured, low income, high cost, or emergency patients;

11. Not materially reduce payments without 60 days notice to the Secretary and to affected hospitals; and

12. Provide satisfactory assurances that, in developing its system, the State has consulted with local officials concerning the impact on public hospitals.

Third, special provisions apply to those States that currently have demonstration projects approved by HCFA under section 402 of the Social Security Amendments of 1967 (42 U.S.C. 1395b–1) or section 222(a) of the Social Security Amendments of 1972 (42 U.S.C. 1395b–1 (note)) for the operation of State reimbursement control systems. Under section 1886(c)(4) of the Act, as added by section 601(c) of Pub. L. 98–21 and subsequently amended by section 2315(a) of Pub. L. 98–369, HCFA approval of a State's application to continue the operation of a system upon expiration of the demonstration project is mandatory if, and for so long as, the system meets the minimum requirements described in items one through six presented above.

In addition to the specific minimum requirements discussed above, a general requirement that all hospitals eligible for payment under section 1886(c) of the Act must meet is contained in section 1866(a)(1)(F) of the Act. This latter section was added to the Act by section 602(f)(1) of Pub. L. 98–21. It requires hospitals, in order to be eligible for Medicare payment under section 1886(c) of the Act, to have and maintain agreements with Utilization and Quality Control Peer Review Organizations (PROs).

With respect to requirement number four above, section 1886(c)(6) of the Act provides that, if the Secretary determines that the assurances have not been met for any 36-month period, payments to hospitals shall be reduced under either the State system or the Medicare payment system in an amount equal to the excess over what Medicare would have paid for these services.

Under section 1886(c)(1) of the Act, a State's application for reimbursement under its system may not be denied on the basis that the system does not pay on a diagnosis related group (DRG) methodology or on the basis that the State system does not produce savings greater than what would have accrued under the Medicare payment system (either the cost reimbursement or the prospective payment system, whichever is applicable).

Section 1886(c)(1) of the Act also provides parameters regarding a State's discretion, under certain circumstances, to determine how to substantiate the assurance regarding whether the amount of payment that would otherwise have been made under Medicare will be exceeded. Under the statute, we have the discretion to determine that this comparison, of what Medicare would have paid absent the State system, may be made by maintaining payment amounts at no more than a specified percentage increase above the payment amounts in a base period. If we exercise this discretion, the State has the option of applying the comparison test on an aggregate payment basis or on the basis of the amount of payment per inpatient discharge or admission. Since we have decided not to exercise our discretionary authority regarding the acceptability of a State's assurance that payments under its system will not exceed what Medicare would otherwise have paid, absent the State system, by reference to percentage increases above a base level (except in the case of States with existing demonstration projects in effect as of April 20, 1983), we have not given States the option of determining the method of measurement to be used for purposes of this payment assurance.

Section 1886(c)(1) of the Act further provides that the State's rate of increase in payments need not be less than the national average rate of increase if the Secretary implements the comparison test by reference to the national average percentage increase in total payments. This provision is generally not applicable, because, except where required by statute for continuation of existing demonstration projects, we will not assess a State's assurance regarding the amount of payments by reference to the national average rate of increase. As stated in the proposed regulations, we will measure a State's expenditure assurance by a comparison of actual payments under the system with what would have been paid under the Medicare system.

HCFA may, under certain conditions, permit an adjustment to take into account previous reductions in Medicare reimbursement amounts that were the result of the effectiveness of a State system prior to the State's application for Medicare participation. Specifically, section 1886(c)(2) of the Act authorizes the Secretary to permit an adjustment if, as a result of the State's already existing reimbursement control system, the State's aggregate rate of increase in hospitals' total operating costs has been less than the national aggregate rate of increase in hospitals' total operating costs.

Under section 1886(c)(4) of the Act, HCFA will judge the effectiveness of a State system that is operational under the authority of an existing Medicare demonstration project on the basis of its rate of increase or inflation in inpatient hospital payments for individuals under Medicare, as compared to the national rate of increase or inflation for such payments. The State will retain the option to have the test applied on the basis of the aggregate payment or payments per inpatient admission or discharge during its hospitals' three consecutive cost reporting periods beginning on or after October 1, 1983. After expiration of these cost reporting periods, however, this test will no longer apply. In this case, the State system will be treated in the same manner as other systems approved under these regulations.

To summarize, under section 1886(c) of the Act, HCFA has discretionary authority to approve Medicare reimbursement under a State system that meets each of the minimum requirements one through six specified above. This discretionary authority also applies if a State system meets the minimum requirements and any of the additional requirements seven through twelve. However, if a State system meets all of the requirements, HCFA approval is mandatory. Furthermore, if a State system was established and operated under an existing Medicare demonstration project in effect as of April 20, 1983, and meets the minimum requirements of items one through six above, HCFA approval is mandatory as long as those minimum requirements continue to be met.

Applications for approval of State systems should be sent to the following address:

Office of the Administrator, HCFA, 6325 Security Boulevard, Room 700, East High Rise Bldg., Baltimore, Maryland 21207.

II. Summary of the Proposed Rule

On May 13, 1985, we published a proposed rule (50 FR 20048) in which we proposed a new Subpart C in 42 CFR Part 403 to establish regulations governing State reimbursement control systems. The provisions of the proposed rule, the comments received and the changes we made in response to comments are discussed below.

In the proposed rule we provided that the chief executive officer of a State would be responsible for submitting an application for the approval of a State system for Medicare reimbursement and supplying the assurances and required necessary documentation. We stated that HCFA would have discretionary authority to approve a State's application if the State system meets the minimum requirements and assurances proposed in § 403.304. The State system is required to—

- Apply to substantially all non-Federal acute care hospitals. (These hospitals must have and maintain an agreement with a PRO.)
- Apply to the review of at least 75 percent of all revenues or expenses in the State for inpatient services and to 75 percent of the revenues or expenses for inpatient hospital services under Medicaid.
- Permit an HMO or CMP to negotiate the rate of payment for inpatient hospital services directly with a hospital.
- Limit hospital charges to Medicare beneficiaries to deductibles, coinsurance, and services for which the beneficiary would not be entitled to have payment made under Medicare Part A; and prohibit payment under Part B of Medicare for nonphysician services provided to hospital inpatients unless this prohibition is waived in accordance with regulations at § 489.23.
- Assure the equitable treatment of all entities that pay hospitals for inpatient hospital services, hospital employees, and hospital patients, as follows—

— Assure that all entities that pay hospitals for inpatient hospital services are treated in a uniform and substantially equal manner in that all payors have equal opportunity to participate under the system and to receive available benefits of the system.

— Assure that the risks and savings are shared equitably by all entities that participate under the system.

— Assure that the State system will not result in reduction of the services or of due process rights to which Medicare beneficiaries are otherwise entitled.

- Assure that the system will provide a means for providers to appeal errors in the calculation of payment rates.
- Assure that Medicare payments made under the system over 36-month periods will not be greater than those that would have otherwise been made applying the Medicare principles of reimbursement.

In § 403.304, we also provided that if a State had an existing Medicare demonstration project in effect on April 20, 1983, and requests approval of a system under section 1886(c)(4) of the Act, the effectiveness of the State's system may be judged on the basis of the State system's rate of increase or inflation in payments for inpatient hospital services, as compared to the national rate of increase or inflation in payment for such services, during the State's hospitals' three consecutive cost reporting periods beginning on or after October 1, 1983.

We further provided that if the assurances and supporting data pertaining to the cost-effectiveness provisions, as described above, are not fully satisfactory, the State would be allowed to provide an additional assurance in order to meet the requirement. The additional assurance would be that the State control expenditures by agreeing to do one of the following:

- The State would agree that Medicare payments under its system would be limited to the Medicare prospective payment rates. The State would be required to pay hospitals covered by its system any excess payment generated by the system.
- The State would agree to a predetermined percentage relationship between Medicare payments under the State's system and Medicare payments under the prospective payment system. This percentage relationship would be monitored by HCFA on a quarterly basis, and the monitoring results would be provided to the State. If the payments show an upward deviation from the agreed upon predetermined relationship, then Medicare payments to the State

VOL 51 ISS 79 AP 24 1986 UMI

would be automatically capped, with the State paying to hospitals under the system the excess over the prospective payment system expenditures. As an alternative to this second option, the State may provide through State legislation or binding regulations that, in accordance with its payment control assurance, reduced payments to hospitals will constitute full and final payment for services furnished to Medicare beneficiaries.

If a State system meets the minimum requirements of § 403.304, as described above, and meets the additional requirements and assurances specified in section 1886(c)(5) of the Act and in § 403.306, as described below, HCFA approval of the system would be mandatory. Section 403.306 requires that the State system—

- Be operated directly by the State or an entity designated by State law.
- Provide for a methodology (that sets forth exceptions and adjustments, if any, as well as any method for changes in the methodology) by which prospectively-determined payment rates are established.
- Provide for hospitals to make reports as required by HCFA.
- Provide that the State must notify HCFA and affected hospitals 60 days prior to enactment of reductions or increases in payments that might be generated from any material change in the system or the payment methodology. Approval would have to be granted by HCFA prior to the State's effective date for the change in payments.

In addition to the above requirements, § 403.306 also requires the State to provide satisfactory assurances to HCFA that—

- The operation of the system will not result in any change in hospital admissions practices that would result in—

— A significant reduction in the proportion of patients (receiving hospital services covered under the system) who have no third-party coverage and who are unable to pay for hospital services;

— A significant reduction in the proportion of individuals admitted to hospitals for inpatient hospital services for which payment is (or is likely to be) less than the anticipated charges for or costs of such services;

— The refusal to admit patients who would be expected to require unusually costly or prolonged treatment for reasons other than those related to the appropriateness of the care available at the hospital; or

— The refusal to provide emergency services to any person who is in need of emergency services if the hospital provides such services.

- The State consulted with local government officials, during the development of the system, concerning the impact of the system on public hospitals.

We provided in § 403.308 that approval by HCFA of a State's application for a State reimbursement control system would be mandatory if the system was in effect prior to April 20, 1983, under the authority of a demonstration waiver (authorized under section 402(a) of the Social Security Amendments of 1967 (42 U.S.C. 1395b–1) or section 222(a) of the Social Security Amendments of 1972 (42 U.S.C. 1395b–1 (note)) and the system meets the applicable minimum requirements and assurances described in § 403.304 discussed above. It is important to note that although the statutory provisions of section 1886(c)(4) of the Act pertaining to provisions for States with existing demonstration projects do not specifically provide requirements for provider appeal systems or cost reporting, each of the existing statewide demonstration projects include these requirements and would be applicable under a waiver granted in accordance with section 1866(c)(4) of the Act.

If HCFA determines that the State system has not met or will not meet the assurances required by § 403.304, as previously discussed, with respect to any 36-month period, § 403.310 allows HCFA to reduce Medicare payments to individual hospitals being reimbursed under the State's system or, if applicable, under the Medicare payment system, in an amount equal to the amount by which the Medicare payments under the system exceed the amount of Medicare payments that these hospitals would have received absent the State system. In determining the amount of the reductions, we will apply the provisions of § 405.376 which set forth Medicare procedures regarding assessment of interest charges on overpayments to providers.

Specific recoupment procedures are described in § 403.310. This section provides that the amount of overpayment would be recouped on a proportionate basis from each of those hospitals that received payments under the State system that exceeded the payments they would have received under the Medicare system. The hospital's proportionate share would be determined by a comparison of the hospital's total overpayment to the total amount of excess payments under the State system over the aggregate payments that the Medicare system would have paid. Recoupment may be accomplished by a hospital's direct payment to the Medicare program or by offsets against future payments to the hospital. If the expenditures test is applied by a rate-of-increase factor, the amount of excess payment will be determined by comparison of the State system's rate-of-increase to the national rate-of-increase in order to determine the amount of excess payments to be recouped from each individual hospital.

As an alternative to the recoupment procedures described above, but subject to HCFA's acceptance, the State may provide by legislation or binding regulations for a process and procedures whereby excess payments will be recouped by the Medicare program.

In § 403.314, which deals with the evaluation of State systems by HCFA, we provide that HCFA will notify a State of its determination concerning approval of a State's application for a State system within 60 days of receipt of the application. If HCFA denies a State's application, the State may submit an amended application. HCFA will notify the State of its determination regarding an amended application within 60 days of its receipt. Any State may file an amended application but only those States that believe they meet *all* the requirements of §§ 403.304 and 403.306 for mandatory approval of their system (or in the case of a State system operating under the authority of a demonstration project that was in effect on April 20, 1983, the applicable requirements of §§ 403.304 and 403.308) may request a reconsideration of a denied application under § 403.316. As provided in § 403.316, HCFA has 60 days to notify a State of the results of the reconsidered application.

If HCFA approves a State system, a written agreement will be executed between HCFA and the chief executive officer of the State. Section § 403.318 describes the minimum provisions that must be contained in this agreement.

Section 1886(c)(1)(C) of the Act requires an assurance that payments under the State's system will not exceed the amount of payment that would have been made under the Medicare reimbursement principles over 36-month periods. To substantiate this assurance that Medicare program expenditures will not exceed what Medicare would have paid over 36-month periods, §403.320 requires the State to provide detailed and quantitative estimates, data, and reports to demonstrate the projected costs or savings for each hospital. The estimates and data are also necessary for the following reasons: (1) To provide a uniform basis to review a State's assurance irrespective of the design of the State's system; (2) to protect the Medicare program from excessive expenditures by allowing HCFA to analyze whether it is reasonable to accept the State's assurance that its system will, as represented, not result in expenditures above the statutory requirements; and (3) to assist HCFA in determining if payments to hospitals under the State system or, if applicable, under the Medicare payment system should be reduced in an amount equal to the excess over what Medicare would have paid during the period the State system was in effect. HCFA would monitor expenditures on a quarterly basis during the period the State system is in effect for purposes of comparison with amounts that would have been paid using the Medicare payment system to determine if excess payments have been made. The projections and supporting data would be especially critical if a State system were to fail to meet the expenditure requirements during a particular year. For example, if a State system were to result in the projection of sizeable expenditures above the limit in the first year of operation, we could reasonably conclude, unless there were quantitative supportive information to the contrary, that it is not likely that the system would result in payments that would equal the Medicare expenditure over the 36-month period.

Specifically, § 403.320 requires the State to submit for *each hospital* participating under the State system projections for the first 12-month period covered by the assurance, in both the aggregate and on a per discharge basis, of Medicare inpatient expenditures under Medicare principles of reimbursement and parallel projections of Medicare inpatient expenditures under the State's system, and the resulting cost or savings to the Medicare program. The State would also be required to submit separate *statewide* projections for each year of the 36-month period, in both the aggregate and on an average weighted discharge basis, of inpatient expenditures under the State system and under the Medicare principles of reimbursement. These projections would have to include a detailed description of the methodology and assumptions used to derive the expenditure amounts under both systems. In instances where the assumptions are different under the sets of projections, the State would have to provide a detailed explanation of the reasons for the differences. At a minimum, the following separate data would be included in the projections for the Medicare principles and for the State system.

- The State system base year and the Medicare allowable and reimbursable costs (that is, costs that represent a full accounting period and that have been fully reported and reviewed or audited, as appropriate) for each hospital that were used to develop the projections, including the amount of estimated pass-through costs (for example, capital).
- The categories of costs that are included in the State system and that are reimbursed differently under the State system than under the Medicare system.
- The number of Medicare and total base-year discharges and admissions for each hospital.
- The rate of change factor, and method of application of this factor, used to project the base-year costs over the 36-month period to which the assurance would apply.
- Any allowance for anticipated growth in the amount of services from the base year. If applicable, the allowance would have to be depicted in separate estimates for population increases or increases in rates of admissions, or both.
- Any adjustments to the projections that HCFA permits the State to take into account due to previous documented reductions in the Medicare payment amounts that are the result to the effectiveness of the State system prior to Medicare participation.
- States with Medicare demonstration projects in effect on April 20, 1983 that apply for approval under a rate-of-increase effectiveness test would also be required to submit data projecting the parallel rates-of-increase during the requisite rate-of-increase period.
- Appropriate recognition and projection of the time value of trust fund expenditures (that is, the interest the Medicare trust fund earned or would have earned) for the period the State system expenditures were either less than or exceeded the Medicare system payments.

The estimates and projections of Medicare payments as required for the assurance must take into account all of the Medicare reimbursement principles in effect at the time. This would include the HCFA market basket (a measure that is used to reflect changes in the prices of goods and services that hospitals use in producing general inpatient services, which is explained in detail in the September 1, 1983 **Federal Register** (48 FR 39764)), the rate-of-increase ceiling limits on inpatient hospital costs specified in section 1886(b) of the Act, and the Medicare prospective payment system.

With regard to a State system under a HCFA demonstration project that was in effect on April 20, 1983, HCFA is required under section 1886(c)(4) of the Act to judge the effectiveness of the system on the basis of its rate-of-increase or inflation in inpatient hospital payments for individuals under Medicare as compared to the national rate-of-increase or inflation for such payments. A State with an existing Medicare demonstration project retains the option to have the test applied on the basis of the aggregate payment or payments per inpatient admission or discharge during its hospitals' three consecutive cost reporting periods beginning on or after October 1, 1983. After the expiration of these cost reporting periods, the above test would no longer apply, and instead we would apply a test similar to that used for a new State system. States with existing demonstration projects that apply for approval of a State system covering a 36-month period that spans only part of the three consecutive cost reporting periods beginning on or after October 1, 1983 (that is, the period subject to the rate-of-increase test) must submit assurances and data relating to two different expenditure requirements. The data submitted by the State for the period subject to the rate-of-increase test must include the rate-of-increase projection for that particular period of time. For any subsequent period of time, the State must assure that payments under its system will not exceed what Medicare payments would have been absent the State system.

As further provided in § 403.320 and prior to the approval of a State system, HCFA will review the assurances and data submitted by the State. HCFA will compare the State's projections of payment amounts to HCFA data in order to determine if the State's assurance is reasonable and fully supportable. If HCFA data indicate that the State's system would result in payment amounts that would be more than that which would have been paid under the Medicare principles, the State's assurances would not be acceptable.

Section 403.320 additionally provides that States may not attain Medicare savings through shifting of costs to other payors, including the Medicaid program. HCFA would monitor this aspect in conjunction with the monitoring of expenditures under the State system. It would be inappropriate to increase Medicaid costs in order to achieve Medicare savings, since this would be

VOL 51 ISS 79 AP 24 1986 UMI

inconsistent with the intent of the existing Medicaid upper limit requirement in regulations at § 447.253, and the legislative intent of sections 1902(a)(13)(A) and 1902(a)(30) of the Act. The upper limit requirement contained in § 447.253 is based on section 1902(a)(30) of the Act and the intent of Congress in enacting section 2173 of Pub. L. 97-35 (amending section 1902(a)(13) of the Act), which was to continue the requirement that the amount paid under Medicaid cannot, in the aggregate, exceed the amount determined to be reasonable under Medicare. (See the Conference Report on Pub. L. 97-35, H.R. Rep. No. 97-208, 97th Cong., 1st Sess., 962 (1981).) The Medicaid State plan requirements (including the upper limit requirement) where not affected by either section 101 of Pub. L. 97-248 or section 601 of Pub. L. 98-21, both of which amended section 1886(c) of the Act to specify additional requirements for State systems. Therefore, § 403.320 specifies that a State system must not produce aggregate expenditures for the Medicaid program in excess of what those expenditures would have been using the Medicare payment principles as they apply to the State system.

In § 403.320, we state that HCFA will monitor on a quarterly basis expenditures under a State system as compared to what Medicare expenditures would have been if the State's system had not been in effect. If HCFA determines at any time that payments made under the State's system exceed the State projections as established by the satisfactory assurances required under § 403.304 and, if appropriate, the predetermined percentage relationship of payments described in § 403.304, HCFA may do the following:

- Conclude that payments under the State's system over a 36-month period will exceed what Medicare would have paid;
- Terminate the waiver; and
- Recoup overpayments to the affected hospitals in accordance with the procedures described in § 403.310 discussed above.

In the proposed rule, we provided that a State's system need not be limited to inpatient services. At the discretion of HCFA, a State that applies for approval of a State system for inpatient services can also seek approval to have its system cover outpatient services. For those State systems that wish to include payment for Medicare outpatient services, we require the submission of a *separate* application and asurances for those services, and estimates and data in further support of the State's assurances. The estimates and data that the State would be required to submit include, but are not limited to—

- Projections for the first 12-month period covered by the assurance for each hospital, in both the aggregate and on an average cost and payment per service basis, of Medicare outpatient expenditures without the State's system being in effect (that is, using the Medicare principles);
- Appropriate recognition and projection of the time value of trust fund expenditures (that is, the interest the Medicare trust fund earned or would have earned) for the period the State system expenditures were either less than or exceeded the Medicare system payments.
- Comparable projections of Medicare outpatient expenditures under the State's system; and
- The resulting cost of savings to the Medicare program.

In addition, the State would be required to submit separate statewide projections of the aggregate outpatient expenditures for each system for each year of the 36-month period. The State would be required to submit the methodology and assumptions used to derive the expenditure amounts under both systems. The minimum requirements regarding the assurance and supportive data would be consistent with those listed for the inpatient hospital projections as described above. The cost-effectiveness test for expenditures for outpatient services would have to be met independently of the cost-effectiveness test for expenditures for inpatient service. For ease of use and greater clarity, we have moved these requirements from § 403.320(c), as proposed, to a new § 403.321.

If HCFA finds that a State system does not continue to meet the requirements of section 1886(c) of the Act or the requirements of Subpart C of part 403 of the regulations, HCFA may terminate an approved agreement for a State system by following the procedures described in § 403.322. That section provides that HCFA will give a State reasonable notice of a proposed termination of an agreement and of the reasons for the termination at least 90 days before the effective date of the termination. All terminations will be effective on the last day of a calendar quarter. The State will have the opportunity to present evidence to refute HCFA's proposed termination of the State system. Upon final review and determination on the State's evidence, HCFA will issue a final notice of termination. A State may voluntarily terminate its agreement for a State system by notifying HCFA of its intent to terminate at least 90 days in advance of the last day of the calendar quarter in which the State intends to terminate the agreement.

III. Responses to Comments

We received comments on the proposed rule from 13 commenters including four States, two HMOs, two private insurance companies, and five other commenters. These comments and our responses to them are discussed below.

A. Section 403.304 Minimum Requirements for State Systems—Discretionary Approval

1. Requirements for State systems

a. *System must apply to 75 percent of revenues or expenses:*

Comment: Some commenters requested further clarification of which hospitals are included and excluded for the purpose of determining compliance with this requirement. One commenter suggested that the regulations should clarify that the 75 percent revenue requirement applies to the revenues of the hospitals included in the State system and does not apply to the revenues of hospitals excluded from the State system. Another commenter expressed concern that States with a high concentration of HMOs and CMPs would be unfairly disadvantaged if the 75 percent requirement is based on all inpatient revenues or expenses in the State.

Response: Section 1886(c)(1)(A) of the Act clearly states that the State system must apply to the review of at least 75 percent of *all* revenues or expenses in the State for inpatient hospital services and to provide otherwise would be in conflict with that requirement.

Comment: One commenter expressed concern that our intent to require the State system to apply to *all* non-Federal acute care hospitals is in conflict with section 1886(c)(1)(A) of the Act, which provides that the State system will apply to substantially all non-Federal acute care hospitals in the State. This commenter suggested that a State system should only be required to apply to 75 percent of the inpatient revenues or expenses in the State or to substantially all of the non-Federal acute care hospitals.

Response: Section 1886(c)(1)(A) of the Act specifically requires the State system to apply to the review of at least 75 percent of all revenues or expenses in the State for inpatient hospital services. In addition, section 1886(c)(1)(A) of the Act further requires that the State system apply "to substantialy all non-Federal acute care hospitals (*as defined by the Secretary*) in the State". Therefore, as provided in section 1886(c)(1)(A) of the Act the State system must meet both of these requirements. In most cases, States would have to include all non-Federal acute care hospitals in the State system in order to meet these requirements.

b. *HMOs and CMPs must be allowed to negotiate payment rates:*

Comments: Some commenters suggested that the regulations should distinguish between the requirement that HMOs and CMPs be allowed to negotiate payment rates, and the equitable treatment assurance, which requires that equitable opportunity be afforded all third-party payors of inpatient hospital services for the availability of discounts. These commenters suggested that the regulations need to make it clear that the specific HMO provisions override the equitable treatment assurance since the discounts afforded HMOs are not required to be available to all third-party payors. Another commenter suggested that the ability to negotiate payment rates should be extended to any payor that can present incentives similar to HMOs and CMPs.

Response: In enacting section 1886(c)(1)(D) of the Act, Congress specified only HMOs and CMPs (as defined in section 1876(b) of the Act) be allowed to negotiate payment rates with hospitals and did not extend that right to other payors in the system. We have revised § 403.304(c)(2)(ii) to clarify that the discounts that may be afforded to HMOs and CMPs as the result of their statutory right to negotiate payment rates independent of a State system do not have to be made available to other payors.

c. *Provider appeals:*

Comment: One commenter objected to our leaving to State discretion the mechanism for appeals and the determination of the type of appeals to be permitted. The commenter also objected to our not permitting providers to file administrative appeals that could lead to retroactive revisions of prospectively-determined rates. The commenter believes that HCFA should neither explicitly limit, nor permit a State to limit, the appeals mechanism for State systems or the subject matter of appeals beyond ensuring that State payments resulting from an appeal will not result in Medicare expenditures greater than those that would otherwise have been paid under the national Medicare payment system. This commenter recommended that retroactive adjustments to hospital rates should be allowed.

Response: As stated in the preamble of the proposed rule (50 FR 20056), since the Medicare Provider Reimbursement Review Board (PRRB) is not intended to be knowledgeable regarding various States' procedures for ratesetting, it would not be an efficient or appropriate use of resources to involve the PRRB in appeals of State actions. Because of this we are requiring that a State system provide for an appeals process that must be fully described in the State's application for approval of a State system and that the process be approved by HCFA. While the regulations allow States to determine the mechanism for appeals, we have indicated that providers must be given the opportunity to present evidence and receive redress if their payment is inaccurate as a result of errors arising from incomplete or inaccurate data.

As to the commenter's suggestion regarding retroactive payment adjustments, we believe that the allowance of retroactive payment adjustments would affect compliance with two of the State system requirements. Section 1886(c)(5)(B)(ii) of the Act requires that a State system must provide for payment of hospitals covered under the system under a methodology by which rates or amounts to be paid for hospital services during a specified period are established under the system prior to the defined rate period. Therefore, retroactive payment adjustments to prospectively-determined payment rates on the part of a State would place approval of the State system at risk because it would be questionable whether the State is using prospectively-determined payment rates. The other compliance problem is the 36-month expenditure test. By requiring that the appeal process allow only for adjustments to future rates, the State system can provide adequate assurances that the 36-month expenditure test will be met with increased accuracy. For these reasons, we believe no changes to the appeal provisions are warranted.

2. Satisfactory Assurances

a. *Equitable treatment:*

Comment: We received comments on the assurances regarding the equitable treatment of all hospital patients and employees and the equitable treatment of all entities that pay hospitals for inpatient hospital services. One commenter stated that the regulations appear to make the assurance concerning equitable treatment of hospital patients and employees a lesser priority than the assurance concerning equitable treatment of payors because the latter assurance details specific conditions. A second commenter expressed the belief that the proposed rule failed to provide enough guidance as to the meaning of the equitable treatment of hospital patients and employees. A third commenter suggested that we define how risks and savings inherent in the system are to be shared equitably by all hospitals under the system.

Response: The specificity of required conditions does not indicate a determination on our part concerning the relative importance of the assurances. We intend that the regulations be specific to the extent possible in order to provide guidance to the States. For example, § 403.304(b), as proposed, provides specific requirements regarding the treatment of patients in that hospitals cannot charge a beneficiary more than what the beneficiary's liability would have been under the national Medicare system. At the same time it is our belief that, because each State system is developed independently, the imposition of more specific criteria would place unnecessary limitations on the type of system a State could devise. For that same reason, we have not defined how risks and savings are to be shared equitably.

Comment: One commenter suggested that the regulations should be clarified to state that the availability of discounts as required by § 403.304(c)(2)(ii) regarding equitable treatment of all payors in the system does not mean that the same discount is given to each payor but the criteria by which payor discounts are determined should be consistently applied to all payors.

Response: We agree with this commenter's suggestion and have clarified § 403.304(c)(2)(ii) to state that the criteria that determine discounts should be equitably and uniformly applied to all payors.

b. *36-Month expenditure test:*

Comment: Several comments were received regarding the Secretary's selection of the actual payment test and the elimination of the option of the State to use the rate-of-increase computation in providing this assurance.

Response: Section 1886(c) of the Act clearly gives the Secretary the discretion to determine the conditions under which the 36-month expenditure assurance would be accepted and, specifically, the discretion to accept a State's assurance. We believe that an actual expenditure assurance is the most accurate comparison of a State system's payments to what payments would have been under the national Medicare system absent the State system. Therefore, we have decided not to

VOL 51 ISS 79 AP 24 1986 UMI

exercise the discretion to permit State's the option of using a rate-of-increase projection to satisfy the 36-month expenditure assurance.

Comment: One commenter expressed concern that the use of the actual payment test will stifle State innovation in creating State systems, which the commenter believes is contrary to congressional intent in enacting section 1886(c) of the Act.

Response: While it is true that section 1886(c) of the Act generally affords flexibility to States and encourages innovation in the creation of State systems, section 1886(c)(1)(C) of the Act clearly and specifically requires an assurance that Medicare expenditures under a State system will be limited to what Medicare would otherwise pay. Thus, we strongly believe that the use of an actual payment test is consistent with the intent of Congress.

Comment: Some commenters questioned the beginning date of the rate-of-increase expenditure test for States with an existing Medicare demonstration project in effect on October 1, 1983. These commenters suggested that, since the proposed rule was published later than originally expected by Congress, the October 1, 1983 date should be changed to October 1, 1984.

Response: We do not believe that we have the authority to change the October 1, 1983 date. Section 1886(c)(4) of the Act clearly specifies that the rate-of-increase expenditure test is applicable during the three cost reporting periods beginning on or after October 1, 1983. Since this part of section 1886(c) of the Act was part of the legislation that established the prospective payment system, it is our belief that Congress chose this date to coincide with the effective date of the prospective payment system and to allow States with existing demonstration projects a transition period to bring their system in line with the 36-month actual expenditure requirement of section 1886(c) of the Act.

3. Additional cost effectiveness assurances

Comment: One commenter suggested that the additional assurance for cost-effectiveness in § 403.304 should be revised to cap in the aggregate an amount that equals the State's projections rather than requiring that payments be capped in the aggregate to what Medicare would have paid absent a State system.

Response: We believe this commenter may have misunderstood the purpose of the additional cost-effectiveness assurance provided in § 403.304(d) of the proposed rule. We reiterate that the additional cost effectiveness assurances are only required if a State's initial assurance and supporting data do not satisfy HCFA that the system will meet the 36-month expenditure test.

The additional cost effectiveness assurance allows the State two options to satisfy the concern that expenditures under the State system not exceed Medicare expenditures absent the State system. The State can either cap monthly expenditures to what Medicare would have paid absent the State system, or limit payments made under the system based on a predetermined percentage relationship determined by comparing the State projections and what Medicare would have paid the State absent the State system. We provided this additional cost-effectiveness assurance in order to help States to provide the assurance regarding the 36-month expenditure test. We do not believe any revisions to § 403.304(d) are necessary.

Comment: Several commenters were concerned about the requirement that any additional funds necessary to pay hospital for Medicare services required by a State's system must be paid to the intermediaries by the State. These commenters believe that this part of the additional cost-effectiveness assurance allows a State the option to pass legislation requiring hospitals to accept "the amount Medicare would have paid absent the State system" as full payment. These commenters further believe that hospitals would not receive funds in excess of what Medicare would have paid absent the system in months when State expenditures exceed Medicare payment amounts and would receive less than Medicare payment amounts in months where expenditures under the State system were less than national Medicare payments.

Response: The provisions of § 403.304(d) will only apply to States that are required to provide an additional assurance that their State systems meet the cost effectiveness test. If a State chooses the § 403.304(d)(2) procedure and payments deviate upward from the predetermined relationship, then the State system would have paid more than would otherwise have been paid by Medicare. The State, therefore, has the option of capping payments at the Medicare prospective payment system rate and paying the excess to the hospitals, or requiring by legislation or legally binding regulations, that the hospitals accept the reduced payment as payment in full. These procedures would not apply a in State system that does not deviate from the predetermined relationship and therefore met the cost effectiveness test.

B. Section 403.306 Additional Requirements for Mandatory Approval

Comment: A number of commenters questioned HCFA's authority in requiring States to obtain HCFA's approval of system changes that have the effect of materially changing payments to hospitals in light of the fact that under section 1886(c)(5)(D) of the Act, the State need only notify HCFA of these changes. Several commenters maintained that this requirement is not needed because the regulations contain restrictions regarding payments under the State system and the equitable treatment of payors. In addition, some commenters questioned the need for HCFA approval in order for a State to reduce payments under the system in order to comply with the 36-month expenditure test.

Response: Section 1871 of the Act authorizes the Secretary to institute regulations necessary for the efficient administration of the Medicare program. We believe that this authority is a sufficient legal basis on which to establish the additional requirement that States obtain HCFA's approval of system changes that materially increase or decrease payments. As we stated in the preamble of the proposed rule (50 FR 20056), we believe that, for purposes of accountability and adherence to the basis on which a State system is initially approved, any material changes in the system that alter expected results should be subject to approval prior to implementation. Therefore, in order to ensure that any changes a State proposes to make in its system will allow the system to continue to provide for the equitable treatment of payors, patients, employees, and hospitals and to ensure continual compliance with the 36-month expenditures test, HCFA approval of all material system changes is required.

Another reason for our requiring approval of all material system changes is that, in order for a State to operate a system authorized in accordance with section 1886(c) the Act, the system must be approved by HCFA. Since HCFA must approve the system before it can go into effect, we firmly believe that any material change to the system as approved by HCFA would mean that the approved system is no longer in effect. Therefore, we have imposed the requirement that any material change to the system be approved by HCFA prior to its implementation.

C. Section 403.310 Reductions in Payments

1. *Time value of excess payments*

Comment: Several commenters suggested that the recognition of the time value of excess payments in the determination of the amount of excess payments is contrary to the statute. These commenters noted that section 1886(c)(6) of the Act authorizes the Secretary to reduce payments under the system in an amount equal to the amount by which State system payments exceeded the amount that would have otherwise been paid by Medicare absent the State system. These commenters believe that HCFA has no statutory authority for recouping the time value of money. Another commenter indicated that, if this provision is implemented, the saved time value of excess payments would have to be included to the State's advantage if the State saves Trust Fund money.

Response: It is our interpretation that the statute does give HCFA the authority to recoup the time value of money. Section 1886(c) of the Act requires that a State system's Medicare payments cannot exceed the amount that Medicare would otherwise have paid. Thus, in preparing the proposed rule we included in § 403.310 (Reductions in payments) and § 403.320 (Review and monitoring of State systems) an appropriate recognition of the time value of money. We have revised our rules to clarify that the time value of money is a factor that will be considered in our evaluation and analysis of the State's projections regarding the cost-effectiveness of the State's system and whether the State's application should be approved in determining the difference between the State system payments and what Medicare would have otherwise paid in accordance with section 1886(c)(6) of the Act, the time value of money will not be a factor. However, in the event there is an overpayment and recoupment of funds is required, interest charges will be assessed when appropriate in accordance with Medicare regulations in 405.376. We have revised § 403.310 accordingly.

2. *Recoupment procedures*

Comment: Some commenters expressed concern regarding the methods that hospitals would be required to use in order to return excess payments to Medicare. These commenters believe there is a conflict between section 1886(c)(6) of the Act and the recoupment procedures described in the regulations. The commenters note that Section 1886(c)(6) of the Act allows us to reduce payments in an amount equal to the excess payments, while our proposed regulations indicate that recoupment may be made by a hospital's direct payment to Medicare or by offsets to future payments made to the hospital. These commenters recommended that this inconsistency should be corrected so that hospitals under a State system would not be required to make lump sum payments to Medicare.

Response: The recoupment procedures described in the proposed rule give States and hospitals the option of repaying excess payments in a lump sum or through future rate adjustments. As a practical matter, there may be instances in which the overpayment may be too small to be recouped through future rate reductions, and we therefore believe that lump sum payments should be an option for a hospital to exercise in repaying excess payments. Since States adopted recoupment procedures must be reviewed and approved by HCFA, these procedures would have to meet a test of reasonableness.

Comment: One commenter questioned whether the reduction in payments that we may impose would require a reduction of payments to all hospitals included in the State system or would require that certain hospitals be singled out to bear the reduction.

Response: In keeping with congressional intent to allow States flexibility in designing and operating State systems, § 403.310 gives a State the option of either accepting the recoupment procedure described in that section or providing, through legislation or legally binding regulations, procedures for the recoupment of excess payments. The Federal procedure described in the proposed rule specifies that overpayments will be recouped on a proportionate basis from each of those hospitals that received payments in excess of what Medicare would have paid absent the State system. However, a State imposed procedure may require a completely different recoupment process and perhaps may even require all hospitals operating under the State system to make recoupment payments on some basis determined by the State.

Comment: One commenter suggested that we specify in the regulations a time frame for Medicare's recovery of overpayments.

Response: It is our belief that, due to the differences in the design of State systems and the flexibility afforded States, a specific time frame for the recovery of overpayments would not be appropriate at this time. However, as a general rule, recoupment of overpayments should be completed within three years or less, as provided in regulations at § 401.607(c).

D. Section 403.316 Reconsiderations of Denied Applications

Comment: One commenter remarked that HCFA's proposal to limit reconsideration of denied State system applications to those instances in which the State believes that its system meets all the requirements in §§ 403.304 and 403.306 seems unnecessarily restrictive.

Response: Only those State systems that meet all the requirements of §§ 403.304 and 403.306 or, in the case of a State system approved under a demonstration project in effect prior to April 20, 1983, the requirements of §§ 403.304 and 403.306, are required to be approved. Approval of State systems that meet the minimum requirements described in § 403.304, but only some of the additional requirements described in § 403.306, is discretionary. Because of this, we do not believe that reconsideration of denied applications that did not meet all of the requirements of §§ 403.304 and 403.306, or, if applicable, § 403.306 is appropriate. States meeting all the minimum requirements described in § 403.304 but only some of the requirements described in § 403.306 are entitled to submit an amendment application, but those States are not entitled to mandatory reconsideration.

E. Section 403.320 HCFA Review and Monitoring

1. Required information

Comment: Several commenters questioned the need for States to provide the extensive data required for use in determining what Medicare expenditures would have been absent the State system and whether HCFA data would be available to the States. Some commenters questioned the relevance of hospital-specific data in that cost-effectiveness is measured based on total Medicare payments. One commenter questioned the appropriateness of requiring States to conform to future Medicare changes and requested a clearer definition of the amount of time a State has to comply with future Medicare changes.

Response: We do not believe the data requirements of this section exceed the data necessary for a State and HCFA to determine whether a State system will be able to meet the 36-month expenditure test. Prior to the submission of its application for approval of a State system, the State must estimate and

VOL 51 ISS 79 AP 24 1986 UMI

analyze the expenditures expected under the State system and compare the State expenditures to what the State estimates Medicare would have paid absent the State system. Since the cost-effectiveness test is based on aggregate expenditures, a State must use hospital-specific data to determine the aggregate amount. Hospital-specific data is also needed in order that HCFA may properly evaluate a State's application for a State system. Therefore, we do not believe these data requirements impose an unnecessary burden on States, particularly since HCFA will provide to States any requested data that is available in order to assist States in developing the required projections, regarding Medicare expenditures under the national Medicare program.

Determining the effect of future Medicare changes on a State system is the responsibility of the State. The State is required to assure that its system's Medicare expenditures over 36-month periods will not exceed that which Medicare would have paid absent the system, and, in order for a State to retain approval of its system under section 1886(c) of the Act, the State must determine whether changes in the State system will affect the State's ability to continue to satisfy its assurance regarding the 36-month expenditure test. If changes to the Medicare system affect a State's ability to satisfy the 36-month expenditure test, the State must react accordingly.

Comment: One commenter stated that HCFA should share in the risks of State system experimentation and recommended that we eliminate the quarterly monitoring requirement because, in the opinion of the commenter, that requirement is not consistent with the risks that are inherent in experimentation with alternative payment systems.

Response: It should be understood that State systems approved under section 1886(c) of the Act are not considered Medicare program experiments, and thus it is not appropriate, in our view, that the Medicare program share in the risks of implementing State systems. Section 1886(c) of the Act clearly specifies that State systems must comply with the 36-month cost-effectiveness test. We believe that quarterly monitoring is the most effective means to monitor the progress and expenditures of the State system in satisfying the 36-month expenditure test.

Comment: Several commenters requested a clarification of the adjustment that HCFA proposes to allow a State so as to account for previous reductions in the Medicare payment amounts that resulted from the effectiveness of the State's system even though Medicare was not a part of the system. One commenter maintained that proving cost savings due to the system's effectiveness would be difficult and that HCFA has not guaranteed that a State system would be approved once proof of cost savings is provided. Another commenter recommended that the regulations should allow consideration for those prior savings that a State can establish were due to the effectiveness of the system operated as a demonstration project in which Medicare participated. One other commenter suggested that we allow any State to take into account an adjustment related to previous cost savings if the State had a hospital reimbursement control system in effect (not only States with prior demonstration projects) that resulted in a lesser aggregate rate of increase in inpatient operating costs than the national average.

Response: In the preamble of the proposed rule (50 FR 20053), we expressed concern as to how a State entity would establish quantitatively the "prior savings" amount. Moreover, we expressed concern as to how the savings realized by Medicare in some prior period would be substantiated and invite specific comments on the operation of this provision. We acknowledge that proving cost savings due to a system's effectiveness will be difficult for States. However, we included this provision in the regulations to allow those States that did indeed operate a State system in which Medicare was not a participant, but which did result in substantiated savings to the Medicare program, the opportunity to request credit for these savings. We have not guaranteed that a State system would be granted credit for prior cost savings once proof is provided since the allowance of this adjustment is discretionary as indicated in section 1886(c)(2) of the Act. The legislative history of section 1886(c)(2) of the Act indicates that the Secretary may allow this optional adjustment relating to previous savings resulting from a State system only if the State had a system in effect in which Medicare was not a participant and only if the system resulted in Medicare paying hospitals less for services furnished to Medicare beneficiaries due to the overall effectiveness of the system. (See H.R. Conf. Rep. 97–760, 97th Cong., 2nd Sess., 422 (1982)). A more liberal interpretation of this requirement would not be consistent with congressional intent. While we may choose to take into account adjustments relating to previous savings under the system if a State can substantiate the savings, this adjustment will be available to a limited number of States since only a few States had State systems in effect.

Comment: One commenter expressed concern regarding the requirement in § 403.320(b)(5) that, on a case-by-case basis, HCFA may require additional data and documentation as needed to complete its review and monitoring of the system. This commenter suggested that the meaning of "case" should be clearly specified to ensure that patient and provider confidentiality rights are not violated.

Response: We believe that this section of the regulations, when read in its entirety, clearly refers to a State system as a whole in discussing the additional data and documentation needed on a case-by-case basis and, in this context, cannot be read as permitting the abridgement of patient and provider rights.

2. Outpatient services

Comment: Several commenters questioned our authority to require separate applications for approval of inpatient and outpatient systems. The commenters expressed the belief that the applications should not be separated since the objective of an inpatient prospective payment system is to reduce unnecessary utilization for those services that can be more efficiently performed in an outpatient setting. One commenter questioned the requirement that an outpatient waiver must meet all the requirements of §§ 403.304 and 403.306 in order to be approved. This commenter maintained that several of the requirements of §§ 403.304 and 403.306 (for example, admission assurance and prospectively-determined payment rates) do not even apply to outpatient services. Another commenter stated that while submission of an application for approval of an outpatient system should remain optional, HCFA should consider and approve applications for inpatient and outpatient systems submitted by a State in tandem because the interaction of the two systems may be crucial to meet projected savings levels while improving or maintaining beneficiary access to care.

Response: We believe that section 1871 of the Act gives us the authority to consider a waiver for outpatient services in conjunction with section 1886(c) of the Act. We also believe it appropriate to require separate applications. The separation of inpatient and outpatient waiver applications is proper given the legislative history and overall purpose of section 1886 of the Act.

We conclude that section 1886 of the Act, which is entitled "Payment to Hospitals for Inpatient Hospital Services", was intended to relate only to inpatient services. In addition the provisions of section 1886(c) of the Act and its legislative history demonstrate, in our view, that Congress meant to require the continuation of State demonstration projects only to the extent that they relate to inpatient care. While separate applications are required, we agree that they should be reviewed in tandem. Nonetheless, each system must separately meet the 36-month expenditure (cost-effectiveness) test.

Offsetting excess outpatient costs against projected inpatient savings or vice versa would be a tenuous proposition, in our view, because such an offset would merely be based on projections. Given the uncertainty of projections, it would be imprudent to approve a State system that is designed to generate excess costs in one sector that are hoped to be offset by savings in another sector. There is a much greater assurance that the overall outcome of no excess costs will be achieved if neither the outpatient nor inpatient portion of a system is designed to result in excess costs. Therefore, we believe that from the point of view of prudent management of the Medicare trust funds, the requirement for separate cost-effectiveness tests for inpatient and outpatient reimbursement control systems is clearly the better approach, particularly so because an outpatient system is always optional and approval is discretionary.

We also note that the proposed regulations did not require an outpatient system application to meet all the criteria required of an inpatient system application. The application for an outpatient system must meet the requirements of § 403.304 (b) and (c) and § 403.306 (b)(1) and (b)(2)(ii) as these requirements apply to outpatient services and reimbursement.

3. Medicaid Upper Limit

Comment: One commenter requested a clearer definition of the Medicare principles with which Medicaid payments are to be compared. Another commenter questioned our authority to limit Medicaid payments under State systems.

Response: Section 1886(c) of the Act allows HCFA to waive Medicare reimbursement priniciples. This section does not provide authority for the waiver of Medicaid reimbursement regulations. Consequently, States that obtain approval of a system under section 1886(c) of the Act must comply with the Medicaid regulations contained in 42 CFR Part 447 Subpart C. Section 447.253(b)(2) requires States to give HCFA an assurance that payments for Medicaid services are not expected to exceed in the aggregate the amount that the State reasonably estimates would be paid under Medicare principles. Therefore, we believe that the reference to the Medicaid upper limit in § 403.320 of these regulations is proper and we intend it to signify that, despite the requirement that Medicaid reimbursement for hospital services be determined under a State system, the Medicaid State plan requirements are not waived. As a practical matter, since the State system principles themselves become the Medicare principles, the State's assurance regarding the Medicaid upper limit should be relatively straightforward.

4. Medicare Expenditure Monitoring

Comment: Some commenters were confused regarding the difference between the actual expenditure monitoring once the application is approved and the 36-month projections that a State is required to submit with the application. One commenter interpreted that the quarterly monitoring would be done in isolation each quarter and would not take into account the entire 36-month experience. This commenter stated that changes in hospital and beneficiary behavior should be accounted for in the quarterly monitoring. Another commenter expressed belief that the quarterly amounts should take into account shifts from inpatient services due to the use of less costly outpatient services.

Response: Section 403.320 states that if at anytime HCFA determines that the payments made under the State system have, as of that date, exceeded the State's projections, HCFA will conclude that payments under the State system over a 36-month period will exceed what Medicare would have paid absent the system. If HCFA reaches this conclusion, it will then terminate the waiver and recoup overpayments. This position clearly demonstrates HCFA's intent to review the quarterly monitoring in conjunction with the State's projections submitted with the State's application, and not in isolation. Since the monitoring will be accomplished using a bill-by-bill comparison, hospital and beneficiary behavior changes and shifts from inpatient services due to the use of less costly outpatient services do not need to be accounted for separately because they would be accounted for in the bill-by-bill comparison and cumulative analysis of bills.

IV. Impact Analysis

A. Executive Order 12291

Executive Order 12291 requires us to prepare and make available to the public a regulatory impact analysis for any regulations likely to have an annual effect on the economy of $100 million or more, cause a major increase in costs or prices, or meet other threshold criteria specified in section 1(b) of the Order. We have determined that these final regulations do not meet the criteria for a "major rule" under section 1(b). Therefore, a regulatory impact analysis is not required.

We expect that State systems for Medicare reimbursement, particularly in conjunction with the implementation of the prospective payment system for Medicare inpatient hospital services under Pub. L. 98–21, will have a significant economic effect. However, the extent of this impact will depend on the choices made by States concerning whether to utilize a State system; whether to bring any such system under the Medicare program in accordance with these final regulations; and on the behavioral changes of providers in responding to whatever systems are developed by States.

The types of economic effects that can be expected are discussed in some detail in the impact analysis for the regulations establishing the Medicare prospective payment system (48 FR 39804–39807, 39852, September 1, 1983, and 49 FR 301, January 3, 1984). One of the effects expected of this final rule, however, is to increase the number of hospitals that do not participate in the national Medicare hospital prospective payment system, because they will be subject to State systems.

Because the law and these final regulations are designed to permit the establishment of systems using incentives and controls that would restrain increases in the cost of hospital care, and because the statute requires that the amount of Medicare payments, over 36-month periods, made under a State system not exceed the amount of payments that would otherwise have been made applying the Medicare reimbursement principles, we expect that State systems may produce some Medicare program savings. To the extent that State systems result in State Medicaid savings, we also expect concomitant savings in Federal financial participation payments. In addition, State controls may result in reductions in expenditures for other payors, such as

VOL 51 ISS 79 AP 24 1986 UMI

non-governmental insurers and private parties. The effects could be very wide-ranging, extending to diverse factors such as insurance premium levels, copayment obligations, bad debt levels, and hospital bond ratings.

Because of the number of economic factors involved, the range and extent of potential effects, and the contingency of those effects on future and unpredictable actions on the parts of States, providers, insurers, and consumers, the effects on savings or costs are inestimable. Moreover, the effects are primarily the result of statutory changes made by section 101 of Pub. L. 97-248, section 601 of Pub. L. 98-21, and section 2315(a) of Pub. L. 98-369. The administrative discretion exercised through these final regulations is minor compared to the impact of the statute and decisions made by States that will affect their hospitals. Based on our experience, we do not believe that, in the near term, these final rules will result in an annual economic impact of $100 million, or otherwise meet the threshold criteria for a "major rule". Therefore, a regulatory impact analysis is not required.

B. Regulatory Flexibility Act

Consistent with the Regulatory Flexibility Act, we prepare and make available to the public an initial regulatory flexibility analysis unless the Secretary certifies that these regulations will not have a significant impact on a substantial number of small entities. The purpose of the analysis would be to explain the expected impact of these final regulations and to analyze alternatives that might reduce negative effects of regulations on small entities. (A small entity is a small business, a nonprofit enterprise, or a government jurisdiction with a population of less than 50,000.)

Nearly all hospitals are small entities under the Regulatory Flexibility Act. In any State implementing a system under these final regulations, a substantial number of hospitals (non-Federal, acute care hospitals) would be affected. Many of those hospitals may be significantly affected. However, the impact of State systems must be considered in view of the implementation of the prospective payment system for Medicare inpatient hospital services under Pub. L. 98-21. The Medicare prospective payment system and State systems have mutually exclusive impacts, in that they are explicitly established as alternatives and will not both affect any particular hospital at the same time. The effects of State systems are inestimable before the characteristics of such systems are known in detail, so the effects on hospitals cannot be analyzed at this time. Furthermore, any effects would be primarily the result of the implementation of the statutory requirements of Pub. L. 97-248, Pub. L. 98-21, and Pub. L. 98-369, as noted earlier, and not the result of these final regulations. Therefore, we have determined and the Secretary certifies, under 5 U.S.C. 605(b), as enacted by the Regulatory Flexibility Act of 1980 (Pub. L. 96-354), that these final regulations will not have a significant impact on a substantial number of small entities.

C. Reporting and Recordkeeping Requirements

Sections 403.304, 403.306, 403.312, 403.316, 403.318, 403.320 and 403.322 of this final rule contain information collection requirements that are subject to the Office of Management and Budget review under the authority of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501-3511). A notice will be published in the **Federal Register** when approval is obtained. An individual or organization wishing to submit comments on the information collection requirements should direct them to the Desk Officer for HCFA at the following address: Office of Information and Regulatory Affairs, OMB New Executive Office Building (Room 3208), Washington, DC 20503. Attention: Fay Iudicello.

List of Subjects in 42 CFR Part 403

Health insurance, Intergovernmental relations, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 403 is amended as set forth below:

PART 403—SPECIAL PROGRAMS AND PROJECTS

A new Subpart C consisting of §§ 403.300 through 403.322, is added to read as follows:

Subpart C—Recognition of State Reimbursement Control Systems

Sec.

403.300 Basis and purpose.
403.302 Definitions.
403.304 Minimum requirements for State systems—Discretionary approval.
403.306 Additional requirements for State systems—Mandatory approval.
403.308 State systems under demonstration projects—Mandatory approval.
403.310 Reductions in payments.
403.312 Submittal of application.
403.314 Evaluation of State systems.
403.316 Reconsideration of certain denied applications.
403.318 Approval of State systems.
403.320 HCFA review and monitoring of State systems.
403.321 State systems for hospital outpatient services.
403.322 Termination of agreements for Medicare recognition of State systems.

Authority: Secs. 1102, 1862(a)(14), 1866(a)(1)(F), 1871 and 1886(c) of the Social Security Act (42 U.S.C. 1302, 1395y(a)(14), 1395cc(a)(1)(F), 1395hh and 1395ww(c)).

Subpart C—Recognition of State Reimbursement Control Systems

§ 403.300 Basis and purpose.

(a) *Basis.* This subpart implements section 1886(c) of the Act, which authorizes payment for Medicare inpatient hospital services in accordance with a State's reimbursement control system rather than under the Medicare reimbursement principles as described in HCFA's regulations and instructions.

(b) *Purpose.* Contained in this subpart are—

(1) The basic requirements that a State reimbursement control system must meet in order to be approved by HCFA;

(2) A description of HCFA's review and evaluation procedures; and

(3) The conditions that apply if the system is approved.

§ 403.302 Definitions.

For purposes of this subpart—

"Chief executive officer of a State" means the Governor of the State or the Governor's designee.

"Existing demonstration project" refers to demonstration projects approved by HCFA under the authority of section 402(a) of the Social Security Amendments of 1967 (42 U.S.C. 1395b-1) or section 222(a) of the Social Security Amendments of 1972 (42 U.S.C. 1395b-1 (note)) and in effect on April 20, 1983 (the date of the enactment of Pub. L. 98-21 (Social Security Amendments of 1983)).

"Federal hospital" means a hospital that is administered by, or that is under exclusive contract with, the Department of Defense, the Veterans' Administration, or the Indian Health Service.

"State system" or "system" refers to a State reimbursement control system that is approved by HCFA under the authority of section 1886(c) of the Act and that satisfies the requirements described in this subpart.

§ 403.304 Minimum requirements for State systems—Discretionary approval.

(a) *Discretionary approval by HCFA.* HCFA may approve Medicare payments under a State system, if HCFA determines that the system meets the requirements in paragraphs (b) and (c) of this section and, if applicable paragraph (d) of this section.

(b) *Requirements for State system.* (1) An application for approval of the system must be submitted to HCFA by the Chief Executive Officer of the State.

(2) The State system must apply to substantially all non-Federal acute care hospitals in the State.

(3) All hospitals covered by the system must have and maintain a utilization and quality control review agreement with a Peer Review Organization, as required under section 1866(a)(1)(F) of the Act and § 466.78(a) of this chapter.

(4) Federal hospitals must be excluded from the State system.

(5) Nonacute care or specialty hospital (such as rehabilitation, psychiatric, or children's hospitals) may, at the option of the State, be excluded from the State system.

(6) The State system must apply to at least 75 percent of all revenues or expenses—

(i) For inpatient hospital services in the State; and

(ii) For inpatient hospital services under the State's Medicaid plan.

(7) Under the system, HMOs and competitive medical plans (CMPs), as defined by section 1876(b) of the Act and Part 417 of this chapter, must be allowed to negotiate payment rates with hospitals.

(8) The system must limit hospital charges for Medicare beneficiaries to deductibles, coinsurance or non-covered services.

(9) Unless a waiver is granted by HCFA under § 489.23 of this chapter, the system must prohibit payment, as required under section 1862(a)(14) of the Act and § 405.310(m) of this chapter, for nonphysician services provided to hospital inpatients under Part B of Medicare.

(10) The system must require hospitals to submit Medicare cost reports or approved reports in lieu of Medicare cost reports as required.

(11) The system must require—

(i) Preparation, collection, or retention by the State of reports (such as financial, administrative, or statistical reports) that may be necessary, as determined by HCFA, to review and monitor the State's assurances; and

(ii) Submission of the reports to HCFA upon request.

(12) The system must provide hospitals an opportunity to appeal errors that they believe have been made in the determination of their payment rates. The system, if it is prospective may not permit providers to file administrative appeals that would result in a retroactive revision of prospectively determined payment rates.

(c) *Satisfactory assurances.* The State must provide to HCFA satisfactory assurance as to the following:

(1) The system provides for equitable treatment of hospital patients and hospital employees.

(2) The system provides for equitable treatment of all entities that pay hospitals for inpatient hospital services, including Federal and State programs. Under the requirement, the following conditions must be met:

(i) Both the Medicare and Medicaid programs must participate under the system.

(ii) The State must assure equitable and uniform treatment under the system of third-party payors of inpatient hospital services in terms of opportunity. Equitable opportunity must include, but need not be limited to, participation in the system and availability of discounts. Criteria under which discounts are made available must be equitably and uniformly applied to all payors, except for discounts negotiated by HMOs and CMPs. Discounts available to HMOs and CMPs as result of their statutory right to negotiate payment rates independently of a State system, as described in paragraph (b)(7) of this section, need not be available to other payors.

(iii) The State must assure that all third-party payors that participate under the system share in the system's risks and benefits.

(3) The amount of Medicare payments made under the system over 36-month periods may not exceed the amount of Medicare payment that would otherwise have been made under the Medicare principles of reimbursement for Medicare items and services had the State system not been in effect. States must submit the assurance and supporting data as required by § 403.320 to document that the payment limit is not exceeded. States that have an existing Medicare demonstration project in effect on April 20, 1983, and that have requested approval of a State system under section 1886(c)(4) of the Act, may elect to have the effectiveness of the State system under this paragraph judged on the basis of the State system's rate of increase or inflation in Medicare inpatient hospital payments as compared to the national rate of increase or inflation for such payments during the three cost reporting periods of the hospitals in the State beginning on or after October 1, 1983.

(d) *Additional cost-effectiveness assurance.* If the assurances and supporting data required under paragraph (c)(3) of this section are insufficient to provide assurance satisfactory to HCFA regarding the cost-effectiveness of a State system, the State may additionally submit one of the following assurances in order to meet the cost-effectiveness test:

(1) *State responsibility for excess payments.* The State must agree that each month Medicare intermediaries will disburse to the State's hospital Federal funds that in the aggregate equal no more than would have been disbursed in the absence of the State system. Any additional funds necessary to pay hospitals for Medicare services required by the State system will be paid to the intermediaries by the State. These additional amounts will be refunded to the State by the intermediaries to the extent that, in subsequent months, the State system requires a smaller aggregate payment for Medicare services than would have been paid in the absence of the State system.

(2) *Limitations on payments.*

(i) The State must agree that if its projections exceed what Medicare would pay in any particular period, the State and HCFA will establish and agreed upon payment schedule that will limit payments under the State system based on a predetermined percentage relationship between projected State payments and what payments would have been under Medicare.

(ii) If deviation from the predetermined relationship described in paragraph (d)(2)(i) of this section occurs, the State must further agree that—

(A) Medicare payments would be capped automatically at payment levels based on the rates used for the Medicare prospective payment system and the State would be required to pay the difference to individual hospitals in its system; or

(B) The State may provide by legislation or legally binding regulations that any reduced payments to hospitals under the system that result from this cost-effectiveness assurance will constitute full and final payment for hospital services furnished to Medicare beneficiaries for the period covered by these reduced payments.

§ 403.306 Additional requirements for State systems—Mandatory approval.

(a) *General policy.*—(1) *Mandatory approval.* HFCA will approve an application for Medicare reimbursement under a State system if the system meets all of the requirements of § 403.304 and of paragraph (b) of this section.

(2) *Exception.* HCFA may approve an application if the State system meets all of the requirements of § 403.304 but only

VOL 51 ISS 79 AP 24 1986 UMI

some of the requirements of paragraph (b) of this section.

(b) *Additional requirements.*—(1) *Operation of system.* The system must—

(i) Be operated directly by the State or by entity designated under State law;

(ii) Provide for payments to hospitals using a methodology under which—

(A) Prospectively determined payment rates are established; and

(B) Exceptions, adjustments, and methods for changes in methodology are set forth;

(iii) Provide that a change by the State in the system that has the effect of materially changing payments to hospitals can take effect only upon 60 days notice to HCFA and to the hospitals likely to be materially affected by the change and upon HCFA's approval of the change.

(2) *Satisfactory assurances.*—(i) *Admissions practice.* The State must assure that the operation of the system will not result in any change in hospital admission practices that result in—

(A) A significant reduction in the proportion of patients receiving hospital services covered under the system who have no third-party coverage and who are unable to pay for hospital services;

(B) A significant reduction in the proportion of individuals admitted to hospitals for inpatient hospital services for which payment is less, or is likely to be less, than the anticipated charges for or cost of the services;

(C) A refusal to admit patients who would be expected to require unusually costly or prolonged treatment for reasons other than those related to the appropriateness of the care available at the hospital; or

(D) A refusal to provide emergency services to any person who is in need of emergency services, if the hospital provides the services.

(ii) *Consultation with local government officials.* The State must provide documentation that it has consulted with local government officials concerning the impact of the system on publicly owned or operated hospitals.

§ 403.308 State systems under demonstration projects—Mandatory approval.

HCFA will approve an application from a State for a State system if—

(a) The system was in effect prior to April 20, 1983 under an existing demonstration project; and

(b) The minimum requirements and assurances for approval of a State system are met under § 403.304 (b)(1)–(10) and § 403.304(c), and, if appropriate § 403.304(d).

§ 403.310 Reduction in payments.

(a) *General rule.* If HCFA determines that the satisfactory assurances required of a State under § 403.304(c) and, if applicable, § 403.304(d) have not been met, or will not be met, with respect to any 36-month period, HCFA will reduce Medicare payments to individual hospitals being reimbursed under the State's system or, if applicable, under the Medicare payment system, in an amount equal to the amount by which the Medicare payments under the system exceed the amount of Medicare payments to such hospitals that otherwise would have been made not using the State system. The amount of the recoupment will include, when appropriate, interest charges computed in accordance with § 405.376 of this chapter.

(b) *Recoupment procedures.* The amount of the overpayment will be recouped on a proportionate basis from each of those hospitals that received payments under the State system that exceeded the payments they would have received under the Medicare payment system. Each hospital's share of the aggregate excess payment will be determined on the basis of a comparison of the hospital's proportionate share of the aggregate payment received under the State system that is in excess of what the aggregate payment would have been under the Medicare payment system. Recoupments may be accomplished by a hospital's direct payment to the Medicare program or by offsets to future payments made to the hospital.

(c) *Alternative recoupment procedures.* As an alternative to the recoupment procedures described in paragraph (b) of this section and subject to HCFA's acceptance, the State may provide, by legislation or legally binding regulations, procedures for the recoupment of the amount of payments that exceed the amount of payments that otherwise would have been paid by Medicare if the State system had not been in effect.

(d) *Rule for existing Medicare demonstration projects.* In cases of existing Medicare demonstration projects where the expenditure test is to be applied by a rate of increase factor, the amount of the excess payment will be determined, for the three hospital cost reporting periods beginning before October 1, 1986, by a comparison of the State system's rate of increase to the national rate of increase. Recoupment of excessive payments will be assessed and recouped as described in this section.

§ 403.312 Submittal of application.

The Chief Executive Officer of the State is responsible for—

(a) Submittal of the application to HCFA for approval; and

(b) Supplying the assurances and necessary documentation as required under §§ 403.304–403.306.

§ 403.314 Evaluation of State systems.

HCFA will evaluate all State applications for approval of State systems and notify the State of its determination within 60 days.

§ 403.316 Reconsideration of certain denied applications.

(a) *Request for reconsideration.* If HCFA denies an application for a State system, the State may request that HCFA reconsider the denial if the State believes that its system meets all of the requirements for mandatory approval under §§ 403.304 and 403.306 or, in the case of a State with a system operating under an existing demonstration project, the applicable requirements of §§ 403.304 and 403.306.

(b) *Time limit.* (1) The State must submit its request for reconsideration within 60 days after the date of HCFA's notice that the application was denied.

(2) HCFA will notify the State of the results of its reconsideration within 60 days after it receives the request for reconsideration.

§ 403.318 Approval of State systems.

(a) *Approval agreement.* If HCFA approves a State system, a written agreement will be executed between HCFA and the Chief Executive Officer of the State. The agreement must incorporate any terms of the State's application for approval of the system as agreed to by the parties and, as a minimum, must contain provisions that require the following:

(1) The system is operated directly by the State or an entity designated by State law.

(2) For purposes of the Medicare program, the State's system applies only to Medicare payments for inpatient, and if applicable, outpatient hospital services.

(3) The system conforms to applicable Medicare law and regulations other than those relating to the amount of reimbursement for inpatient hospital services, or for inpatient and outpatient services, whichever the State system covers. Applicable regulations include, for example, those describing Medicare benefits and entitlement requirements for program beneficiaries, as explained in Parts 406 and 409 of this chapter; the requirements at Part 405, Subpart J of this chapter specifying conditions of participation for hospitals; the requirements at Part 405, Subparts A, C, and S of this chapter on Medicare program administration; and all applicable fraud and abuse regulations contained in titles 42 and 45 of the CFR.

(4) The State must obtain HCFA's approval of the State's reporting forms and of provider cost reporting forms or other forms that have not been approved by HCFA but that are necessary for the collection of required information.

(b) *Effective date.* An approved State system may not be effective earlier than the date of the approval agreement, which may not be retroactive.

§ 403.320 HCFA review and monitoring of State systems.

(a) *General rule.* The State must submit an assurance and detailed and quantitative studies of provider cost and financial data and projections to support the effectiveness of its system, as required by paragraphs (b) and (c) of this section.

(b) *Required information.* (1) Under § 403.304(c)(3) an assurance is required that the system will not result in greater payments over a 36-month period than would have otherwise been made under Medicare not using such system. If a State that has an existing demonstration project in effect on April 20, 1983 elects under § 403.304(c)(3) to have the effectiveness of its system judged on the basis of a rate of increase factor, the State must submit an assurance that its rate of increase or inflation in inpatient hospital payments does not exceed, for that portion of the 36-month period that is subject to this test, the national rate of increase or inflation in Medicare inpatient hospital payments. The election of the rate of increase test applies only to the three cost reporting periods beginning on or after October 1, 1983. At the end of these cost reporting periods, the State must assure, beginning with the first month after the expiration of the third cost reporting period beginning after October 1, 1983, that payments under its system will not exceed over the remainder of the 36-month period what Medicare payments would have been.

(2) Estimates and data are required to support the State's assurance, required under § 403.304(c)(3), that expenditures under the State system will not exceed what Medicare would have paid over a 36-month period. The estimates and projections of what Medicare would have otherwise paid must take into account all the Medicare reimbursement principles in effect at the time and, for any period in which payments either exceed or are less than Medicare levels, the values of interest the Medicare Trust Fund earned, or would have earned, on these amounts. Upon application for approval, the State must submit projections for each hospital for the first 12-month period covered by the assurance, in both the aggregate and on a per discharge basis, of Medicare inpatient expenditures under Medicare principles of reimbursement and parallel projections of Medicare inpatient expenditures under the State's system and the resulting cost or savings to Medicare. The State must also submit separate statewide projections for each year of the 36-month period, in both the aggregate and on a weighted average discharge basis, of inpatient expenditures under the State system and under the Medicare principles of reimbursement.

(3) The projection submitted under paragraph (b)(2) of this section must include a detailed description of the methodology and assumptions used to derive the expenditure amounts under both systems. In instances where the assumptions are different under the projections cited in paragraph (b)(2) of this section, the State must provide a detailed explanation of the reasons for the differences. At a minimum, the following separate data and assumptions are to be included in the projections for the Medicare principles and for the State's system.

(i) The State system base year and the Medicare allowable and reimbursable cost of each hospital that the State used to develop the projections, including the amount of estimated pass through costs.

(ii) The categories of costs that are included in the State system and are reimbursed differently under the State system than under the Medicare system.

(iii) The number of Medicare and total base year discharges and admissions for each hospital.

(iv) The rate of change factor (and the method of application of this factor) used to project the base year costs over the 36-month period to which the assurance would apply.

(v) Any allowance for anticipated growth in the amount of services from the base year (if applicable, the allowance must be presented in separate estimates for population increases or for increases in rates of admissions or both).

(vi) Any adjustment in which the State is permitted by HCFA to take into account previous reductions in the Medicare payment amounts that were the result of the effectiveness of the State's system even though Medicare was not a part of that system.

(vii) Appropriate recognition and projection of the time value of trust fund expenditures for the period the State system expenditures were either less than or exceeded the Medicare system payments.

(viii) States applying under a rate of increase effectiveness test under § 403.304(c)(3) must also submit data projecting the parallel rates of increase during the requisite period.

(4) The projections must include both the aggregate payments and the payments per discharge for the individual hospitals and for the State as a whole.

(5) On a case-by-case basis, HCFA may require additional data and documentation as needed to complete its review and monitoring.

(6) For existing Medicare demonstration projects in effect on April 20, 1983, the assurance and data as required by paragraphs (a) and (b) of this section, if appropriate, may be based on aggregate payments or payments per inpatient admission or discharge. HCFA will judge the effectiveness of these systems on the basis of the rate of increase or inflation in Medicare inpatient hospital payments compared to the national rate of increase or inflation for such payments during the State's hospitals' three cost reporting periods beginning on or after October 1, 1983. The data submitted by the State for the period subject to the rate of increase test must include the rate of increase projection for that particular period of time. For the subsequent period of time, the State must assure that payments under its system will not exceed what Medicare payments would have been, as described in § 403.304(c)(3).

(7) If the amount of Medicare payments under the State system exceeds what would have been paid under the Medicare reimbursement principles in any given year, the State must also submit quantitative evidence that the system will result in expenditures that do not exceed what Medicare expenditures would have been over the 36 month period beginning with the first month that the State system is operating. For a State that has an existing demonstration project in effect on April 20, 1983, and that elects under § 403.304(c)(3) to have a rate of increase test apply, if the State's rate of increase or inflation exceeds the national rate of increase or inflation in a given year, the State must submit quantitative evidence that, over 36 months, its payments will not exceed the national rate of increase or inflation. Furthermore, if payments under the State's system must be compared to actual Medicare expenditures, at the end of the third cost

VOL 51 ISS 79 AP 24 1986 UMI

reporting period, as described in paragraph (b)(1) of this section, and payments under the State's system exceed what Medicare would have paid in a given year, the State must submit quantitative evidence that, over 36 months, payments under its system will not exceed what Medicare would have paid.

(c) *Review of assurances regarding expenditures.* HCFA will review the State's assurances and data submitted under this section, as a prerequisite to the approval of the State's system. HCFA will compare the State's projections of payment amounts to HCFA data in order to determine if the State's assurance is reasonable and fully supportable. If the HCFA data indicate that the State's system would result in payment amounts that would be more then that which would have been paid under the Medicare principles, the State's assurances would not be acceptable. For States applying in accordance with § 403.308, if HCFA data indicate that the State's system would result in a rate of increase or inflation that would be more than the national rate of increase or inflation, the State's assurances would not be acceptable.

(d) *Medicaid upper limit.* In accordance with § 447.253 of this chapter, the State system may not result in aggregate payments for Medicaid inpatient hospital services that would exceed the amount that would have otherwise have been paid under the Medicare principles as applied through the State system.

(e) *Monitoring of Medicare expenditures.* HCFA will monitor on a quarterly basis expenditures under the State's system as compared to what Medicare expenditures would have been if the system had not been in effect. If HCFA determines at any time that the payments made under the State's system exceed the States' projections, as established by the satisfactory assurances required under § 403.304(c) and, if appropriate, the predetermined percentage relationship of the payments as required under § 403.304(d). HCFA will—

(1) Conclude that payments under the State system over a 36-month period will exceed what Medicare would have paid:

(2) Terminate the waiver; and

(3) Recoup overpayments to the affected hospitals in accordance with the procedures described in § 403.310.

§ 403.321 State systems for hospital outpatient services.

HCFA may approve a State's application for approval of an outpatient system if the following conditions are met:

(1) The State's inpatient system is approved.

(2) The State's outpatient application meets the requirements and assurances for an inpatient system described in § 403.304 (b) and (c), and § 403.306 (b)(1) and (b)(2)(ii).

(3) The State submits a separate application that provides separate assurances and estimates and data in further support of its assurance submitted under paragraph (b)(1) of § 403.320, as follows:

(i) Upon application for approval, the State must submit estimates and data that include, but are not limited to, projections for the first 12-month period covered by the assurance for each hospital, in both the aggregate and on an average cost per service and payment basis, of Medicare outpatient expenditures under Medicare principles of reimbursement; parallel projections of Medicare outpatient expenditures under the State system; and the resulting cost or savings to Medicare independent of the State system for hospital inpatient services.

(ii) The State must submit separate statewide projections for each year of the 36-month period of the aggregate outpatient expenditures for each system. The projections submitted under this paragraph must—

(A) Comply with the requirements of paragraphs (b) (3) and (5) of § 403.320 regarding a detailed description of the methodology used to derive the expenditure amounts:

(B) include the data and assumptions set forth in paragraphs (b)(3) (i), (ii), (iii), (iv), and (v) of § 403.320; and

(C) Include any assumption the State has adopted for establishing the number of Medicare and total base year outpatient services for each hospital.

(iii) The State must provide a detailed explanation of the reasons for any difference between the data or assumptions used for the separate projections.

§ 403.322 Termination of agreements for Medicare recognition of State systems.

(a) *Termination of agreements.* (1) HCFA may terminate any approved agreement if it finds, after the procedures described in this paragraph are followed that the State system does not satisfactorily meet the requirements of section 1886(c) of the Act or the regulations in this subpart. A termination must be effective on the last day of a calendar quarter.

(2) HCFA will give the State reasonable notice of the proposed termination of an agreement and of the reasons for the termination at least 90 days before the effective date of the termination.

(3) HCFA will give the State the opportunity to present evidence to refute the finding.

(4) HCFA will issue a final notice of termination upon a final review and determination on the State's evidence.

(b) *Termination by State.* A State may voluntarily terminate a State system by giving HCFA notice of its intent to terminate. A termination must be effective on the last day of a calendar quarter. The State must notify HCFA of its intent to terminate at least 90 days before the effective date of the termination.

Boating Safety; Commercial Hybrid PFD Carriage Requirements

AGENCY: Coast Guard, DOT.

ACTION: Final rules; Correction.

SUMMARY: In the Federal Register of February 4, 1986, the Coast Guard published final rules establishing hybrid personal flotation device (PFD) carriage requirements. This document corrects editorial errors in those final rules.

FOR FURTHER INFORMATION CONTACT: Mr. Samuel Wehr, Office of Merchant Marine Safety, (202) 426-1444.

SUPPLEMENTARY INFORMATION: The final rules of February 4, 1986, were published beginning at p. 4349 of the Federal Register (51 FR 4349). The correction follows below.

Correction

In FR Doc. 86-2285 beginning on page 4349 in the issue of Tuesday, February 4, 1986, make the following corrections:

1. On page 4350, in the first column under the heading REGULATIONS strike "In consideration of the foregoing, the Coast Guard proposes to amend Title 46 of the Code of Federal Regulations as follows:" and insert the following:

In consideration of the foregoing, Title 46 of the Code of Federal Regulations is amended as follows:

§ 35.03-25 [Corrected]

2. On page 4350, second column, in § 35.03-25(a) strike "PDF's" and insert "PFD's".

3. On page 4350, second column, in § 35.03-25(a)(1) strike "time" and insert "them".

Coast Guard Plan Review; Change of Address for Submission of Plans

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: These rules change the address for submitting vessel plans for Coast Guard review. The plan review duties previously performed by the Merchant Marine Technical Branches of the Third Coast Guard District in New York, New York, the Eighth Coast Guard District in New Orleans, Louisiana, and the Twelfth Coast Guard District in Alameda, California are being assumed by the Marine Safety Center located in Washington, DC.

EFFECTIVE DATE: June 1, 1986.

FOR FURTHER INFORMATION CONTACT: LCDR Charles E. Bills, Marine Technical and Hazardous Materials Division, (G-MTH-2/12), Room 1216, U.S. Coast Guard Headquarters, 2100 Second St., SW., Washington, DC 20593; (202) 426-2160.

SUPPLEMENTARY INFORMATION: The U.S. Coast Guard has recently completed an evaluation of its Merchant Marine Technical Branch field organization, taking into account many factors, including personnel considerations, system efficiency, and Fiscal Year 1986 staff reductions within the Commercial Vessel Safety Program. As a result, the Merchant Marine Technical Branches of the Third, Eighth, and Twelfth Coast Guard Districts are being consolidated to improve overall plan review efficiency, quality, and consistency, and to provide a centralized site for performing oversight of Coast Guard plan review functions delegated to third parties. Consolidation will result in the establishment of a Marine Safety Center as a Headquarters unit located in the Washington DC metropolitan area.

The Washington, DC area was chosen based on many factors, including: Locating the Marine Safety Center in a favorable technical labor market; recognition that the need for regionally based Merchant Marine Technical Branches has dramatically decreased since (1) overseas commercial vessel construction activity has increased and (2) third parties, having been delegated plan review functions by the Coast Guard, are themselves regionally based; recognition of the area as an expanding naval architect-marine engineer center; and the area's excellent access to international and domestic transportation.

Accordingly, the plan review previously conducted by the Third, Eighth, and Twelfth Coast Guard Districts' Merchant Marine Technical Branches will be performed by the Marine Safety Center, effective June 1, 1986.

Shipyards, designers, and other businesses and persons who are directly affected by this action have been informed of the consolidation by letter from either the Commander, Third Coast Guard District (mmt), Commander, Eighth Coast Guard District (mmt), or Commander, Twelfth Coast Guard District (mmt), as appropriate. Notice of the consolidation was also published in the Federal Register of June 20, 1985 at p 25644 (50 FR 25644).

The purpose of these rules is to provide the revised plan submittal procedure and to include the mailing address of the Marine Safety Center.

These rules have been evaluated under Executive Order 12291 and DOT Order 2100.5 and have been determined to be non-major and non-significant. These rules reflect a change in agency organization and procedure with minimal economic impact upon the public. Notice of proposed rulemaking and opportunity for public comment are not required by 5 U.S.C. 553, and these rules may be effective less than 30 days after their publication date. Since minimal economic impact is expected, a full economic evaluation has not been conducted.

In accordance with Section 605(b) of the Regulatory Flexibility Act (30 Stat. 1164), it is certified that these regulations will not have a significant economic impact on a substantial number of small entities for the reasons stated above.

Drafting Information

The principal persons involved in drafting this document are LCDR Charles E. Bills, Project Manager, Office of Merchant Marine Safety, and Mr. William R. Register, Project Attorney, Office of Chief Counsel.

PART 50—GENERAL PROVISIONS

1. The authority citation for Part 50 is revised to read as follows and all other authority citations are removed:

Authority: 46 U.S.C. 3306, 3703; 46 App. U.S.C. 86; 43 U.S.C. 1333(d)(1), 1347(c), 1348(c), 1356(a)(2); 49 CFR 1.46.

2. In § 50.20-5, by revising paragraph (d) to read as follows:

§ 50.20-5 Procedures for submittal of plans.

* * * * *

(d) Plans, except those for boilers and nuclear vessels, may be submitted to Commanding Officer, U.S. Coast Guard Marine Safety Center, 2100 Second St., SW., Washington, DC 20593.

* * * * *

PART 71—INSPECTION AND CERTIFICATION

3. The authority citation for Part 71 is revised to read as follows and all other authority citations are removed:

Authority: 46 U.S.C. 3306; 33 U.S.C. 1321(j)(1); 49 CFR 1.46.

4. In § 71.65-15, by revising paragraph (a)(3) to read as follows:

§ 71.65-15 Procedure for submittal of plans.

(a) * * *

(3) The plans may be submitted directly to Commanding Officer, U.S. Coast Guard Marine Safety Center, 2100 Second St., SW., Washington, DC 20593.

* * * * *

PART 91—INSPECTION AND CERTIFICATION

5. The authority citation for Part 91 is revised to read as follows and all other authority citations are removed:

Authority: 46 U.S.C. 3306; 33 U.S.C. 1321(j)(1); 49 CFR 1.46.

6. In § 91.55-15, by revising paragraph (a)(3) to read as follows:

VOL 51 ISS 79 AP 24 1986 UMI

§ 91.55–15 Procedure for submittal of plans.

(a) * * *

(3) The plans may be submitted directly to Commanding Officer, U.S. Coast Guard Marine Safety Center, 2100 Second St., SW., Washington, DC 20593.

* * * * *

PART 107—INSPECTION AND CERTIFICATION

7. The authority citation for Part 107 is revised to read as follows and all other authority citations are removed:

Authority: 46 U.S.C. 3306; 46 App. U.S.C. 86; 43 U.S.C. 1333(d)(1), 1347(c), 1348(c), 1356(a)(2); Sec. 107.06 also issued under 44 U.S.C. 3507; 49 CFR 1.45; Sec. 107.258 also issued under 46 U.S.C. 3316; 49 CFR 1.46(b), (n)(6), (z).

8. In § 107.317, by revising paragraph (b) to read as follows:

§ 107.317 Addressee for submittal of plans, specifications, and calculations.

* * * * *

(b) Commanding Officer, U.S. Coast Guard Marine Safety Center, 2100 Second Street SW., Washington, DC 20593.

* * * * *

PART 110—GENERAL PROVISIONS

9. The authority citation for part 110 is revised to read as follows and all other authority citations are removed:

Authority: 46 U.S.C. 3306, 3703, 4104; 49 CFR 1.46.

10. In § 110.25–3, by deleting and reserving paragraph (b), and revising paragraph (a)(1) to read as follows:

§ 110.25–3 Procedure for submitting plans.

(a) * * *

(1) Commanding Officer, U.S. Coast Guard Marine Safety Center, 2100 Second Street SW., Washington, DC 20593.

* * * * *

PART 170—STABILITY REQUIREMENTS FOR ALL INSPECTED VESSELS

11. The authority citation for Part 170 is revised to read as follows:

Authority: 46 U.S.C. 3306; 46 App. U.S.C. 86, 88a; 43 U.S.C. 1333(d), 1356(a); 50 U.S.C. 198; 49 CFR 1.46.

12. In § 170.100, by revising paragraph (b) to read as follows:

§ 170.100 Addressee for submittal of plans and calculations.

* * * * *

(b) Commanding Officer, U.S. Coast Guard Marine Safety Center, 2100 Second Street SW., Washington, DC 20593.

* * * * *

PART 189—INSPECTION AND CERTIFICATION

13. The authority citation for Part 189 is revised to read as follows and all other authority citations are removed:

Authority: 46 U.S.C. 3306; 33 U.S.C. 1321(j)(1); 49 CFR 1.46.

14. In § 189.55–15, by revising paragraph (a)(3) to read as follows:

§ 189.55–15 Procedure for submittal of plans.

(a) * * *

(3) The plans may be submitted directly to Commanding Officer, U.S. Coast Guard Marine Safety Center, 2100 Second Street SW., Washington, DC 20593.

* * * * *

Preemption of State Entry Regulation in the Public Land Mobile Service

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: The Federal Communications Commission has preempted state regulation that prohibits or impedes the entry of common carriers providing conventional paging or two-way mobile services. Under this policy, states may not maintain certification requirements such as "need" showings or other requirements that impair the ability of a Commission licensee to expeditiously construct and operate federally-authorized facilities. The states may, however, maintain regulation of new entrants that does not impede or prohibit entry while serving legitimate state interests in such areas as rates, zoning, health and safety, notice requirements and consumer protection. The Commission also concluded that mobile services common carriers are "non-dominant" for purposes of Title II regulation and need not file tariffs for their interstate services.

EFFECTIVE DATE: July 1, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Lawrence R. Krevor, (202) 632–6917.

This is a summary of the Commission's report and order, CC docket 85–89, adopted March 13, 1986, and released March 31, 1986.

The complete text of Commission decisions are available for inspection and copying during normal business hours in the FCC dockets branch (room 230), 1919 M Street, Northwest, Washington, D.C. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857–3800, 2100 M Street, Northwest, Suite 140, Washington, D.C. 20037.

Summary of Report and Order

1. On March 28, 1985, the Commission adopted a Notice of Proposed Rulemaking proposing to preempt state entry regulation that has the effect of prohibiting or impeding the entry of common carriers providing conventional paging services or two-way mobile services in the Public Land Mobile Service. The Commission also proposed to forbear from all federal rate regulation of such carriers and to require forborne carriers to cancel any tariffs on file with the Commission within sixty days of the issuance of a Report and Order in this proceeding.

2. Over 50 comments and reply comments were filed. The comments provided evidence of many instances in which restrictive state entry practices have frustrated the ability of Commission licensees to construct federally-authorized facilities and provide intrastate services, as well as to develop wide-area interstate communications systems. The commenters opposing preemption generally argued that destructive competition would result from preemption and that state entry regulation is more responsive to local market needs. The Commission concluded that the opposition commenters failed to justify the high economic costs to the consumer of restrictive entry, including higher rates, lower service quality and options and less innovation. The record establishes that restrictive entry practices contravene the Commission's decisions as to the beneficial use of valuable spectrum resources in the public interest, thereby warranting preemption of such regulation.

3. The Commission carefully considered the legal arguments of the opposition commenters and concluded that it may legitimately preempt state entry regulation, even over intrastate common carrier mobile services, when such regulation conflicts with its Title III licensing authority and responsibility. It noted further that as technological advances promote the rapid expansion of networks offering interstate as well as intrastate services, it makes little sense to maintain distinctions between purely local or intrastate services and interstate services for entry regulation purposes.

4. As to the scope of preemption, the Commission stated that the states may not maintain any law, regulation or policy that has the effect of derogating the primacy of federal licensing for the Public Land Mobile Service. Restrictive entry statutes and rules, the use of regulatory processes by existing carriers to forestall competitive entry, and unwarranted, lengthy administrative delays in the certification process are preempted. This includes any determination of need for a new entrant's services, and most regulation of financial qualifications, fitness, character or the technical or economic feasibility of the new services. The Commission held, however, that the states may provide for non-discriminatory-pre- and post-entry regulation of new entrants where such regulation serves legitimate state concerns and does not prohibit or impede competitive entry. For example, a state might require a carrier that presells its services to post a bond or establish an escrow account to protect its subscribers. Similarly, post-entry regulation of carrier practices and services, as well as state regulation of intrastate rates, health and safety matters, zoning issues, consumer protection and notification requirements are not inconsistent with the federal licensing and spectrum allocation responsibilities and are not preempted so long as they are not implemented in such a way as to discriminate against new entrants.

5. The Commission also concluded that a short transition period before preemption takes effect would serve the public interest by reducing the likelihood of service disruptions as restrictive entry schemes, service obligations and rate structures are revised to conform to the preemption guidelines. Accordingly, the preemption of state entry regulation and other policies adopted in the Report and Order will be effective July 1, 1986. In response to the comments, the Commission also stated that its decision to preempt is not intended to modify the existing status of radio common carriers as exchange co-carriers in the Public Land Mobile Service and does not reflect a different role for them for either interconnection status or access charge applicability purposes.

6. The Commission also made final its tentative decision to forbear from federal tariff regulation of carriers in the Public Land Mobile Service. In providing interstate mobile services, these carriers possess insufficient market power to charge unlawful rates or unjustly discriminate and therefore constitute "non-dominant" carriers for federal tariff regulation purposes. In view of this finding, Public Land Mobile Service licensees will not be subject to the Part 62 Interlocking Directorates application process. The Commission did not finalize its proposal to require forborne mobile services carriers to cancel any tariffs on file with the Commission due to the decision of the U.S. Court of Appeals for the District of Columbia Circuit in *MCI Telecommunications Corporation v. FCC*, 765 F.2d 1186 (1985). In that case, the Court concluded that the Commission could not prohibit common carriers from filing tariffs.

7. *Final Regulatory Flexibility Analysis.* Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 605(b) it is certified that the final rule will not have a significant economic impact on a substantial number of small entities. The rule will reduce the legal and administrative costs currently incurred by small businesses and radio common carriers seeking state certification and will encourage entry of small businesses into this industry. In addition, the decision to forbear from interstate tariff regulation of carriers in the Public Land Mobile Service will eliminate an existing regulatory burden and enable these carriers to respond more directly to marketplace forces.

8. *Paperwork Reduction Act.* The final rule contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or recordkeeping, labeling, disclosure or record retention requirements. It will not increase burden hours imposed on the public. The Commission's decision to forbear from federal tariff regulation will eliminate a current filing requirement for carriers in the Public Land Mobile Service. In addition, these carriers will not be subject to the Part 62 Interlocking Directorates application process.

Ordering Clauses

9. Accordingly, It Is Ordered, that Part 22 of the Rules are Amended as specified below. These amendments and other policies adopted in this order will become effective on July 1, 1986.

10. It Is Further Ordered, that the Motion to Supplement Comments filed by Allied Radiotelephone Utilities of California is Granted.

Federal Register
Vol. 51, No. 79
Thursday, April 24, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

21 CFR Part 1308

Schedules of Controlled Substances; Proposed Placement of 3-Methylfentanyl into Schedule I

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice of proposed rulemaking is issued by the Administrator of the Drug Enforcement Administration (DEA) to place the narcotic substance, 3-methylfentanyl into Schedule I of the Controlled Substances Act (CSA) (21 U.S.C. 801 et seq.). This proposed action by the DEA Administrator is based on data gathered and reviewed by DEA and independently evaluated by the Acting Assistant Secretary for Health, Department of Health and Human Services. If finalized, this proposed action would impose the regulatory control mechanisms and criminal sanctions of Schedule I on the manufacture, distribution and possession of 3-methylfentanyl.

DATE: Comments must be submitted on or before May 27, 1986.

ADDRESS: Comments and objections should be submitted in quintuplicate to the Administrator, Drug Enforcement Administration, 1405 I Street NW., Washington, DC 20537, Attention: DEA Federal Register Representative.

FOR FURTHER INFORMATION CONTACT: Howard McClain, Jr. Chief, Drug Control Section, Drug Enforcement Administration, Washington, DC 20537, Telephone: (202) 633–1366.

SUPPLEMENTARY INFORMATION:

List of Subjects in 21 CFR Part 1308

Administrative practice and procedure, Drug traffic control, Narcotics, Prescription drugs.

On March 25, 1985, the Administrator of the Drug Enforcement Administration issued a final rule in the **Federal Register** temporarily placing 3-methylfentanyl into Schedule I of the Controlled Substances Act pursuant to the emergency scheduling provisions of 21 U.S.C. 811(h). This action which became effective on April 25, 1985 was based on a finding by the Administrator that the emergency scheduling of 3-methylfentanyl was necessary to avoid an imminent hazard to the public safety. Section 201(h)(2) of the GSA (21 U.S.C. 811(h)(2)) provides that the emergency scheduling of a substance expires at the end of 1 year from the effective date of the order. However, if a rulemaking proceeding to schedule the substance has been initiated pursuant to section 201(a)(1) of the GSA (21 U.S.C. 811(a)(1)), the temporary scheduling may be extended for up to 6 months. Under this provision, the tempoary scheduling of 3-methylfentanyl which would expire on April 25, 1986, may be extended until October 25, 1986. This extension is being ordered by the Administrator of DEA in a separate action.

Since the temporary scheduing of 3-methylfentanyl, DEA has continued to gather information regarding the abuse and abuse potential of 3-methylfentanyl and the clandestine manufacture, distribution and trafficking of this substance. By letter dated February 24, 1986, the DEA Administrator submitted the data which DEA had gathered regarding 3-methylfentanyl to the Acting Assistant Secretary for Health, Department of Health and Human Services. In accordance with the provisions of 21 U.S.C. 811(b), the DEA Administrator also requested a scientific and medical evaluation of the relevant information and a scheduling recommendation for 3-methylfentanyl from the Acting Assistant Secretary for Health. On April 7, 1986, the DEA Administrator received a reply from the Acting Assistant Secretary for Health recommending that 3-methylfentanyl be placed into Schedule I of the Controlled Substance Act. A portion of the letter is set forth below:

> Pursuant to the requirements of the Controlled Substances Act, 21 U.S.C. 801 et seq., the Food and Drug Administration (FDA) has conducted a scientific and medical evaluation of the drug 3-methylfentanyl. FDA has performed the eight factor evaluation required by 21 U.S.C. 811 and recommends that 3-methylfentanyl be placed in Schedule I of the Controlled Substances Act. I concur with FDA's recommendation to place 3-methylfentanyl in Schedule I. You will find enclosed a document that supports this recommendation and provides the required eight factor evaluation.

Briefly, the information gathered and reviewed by DEA and the scientific and medical evaluation by the Acting Assistant Secretary for Health shows that 3-methylfentanyl: (1) Is a very potent analog of fentanyl, a Schedule II narcotic substance, (2) produces the narcotic effects of a typical morphine-like compound including physical dependence after chronic administation, (3) is not approved for marketing by the Food and Drug Administration or commercially available in the United States, (4) is manufactured in clandestine laboratories, (5) has been identified by forensic laboratories in submissions of drug evidence from the East and West Coasts, (6) has been responsible for a least a portion of the narcotic overdose deaths attributed to fentanyl-like substances, and (7) continues to pose a threat to the public health and safety.

Based on the information gathered and reviewed by DEA and relying on the scientific and medical evaluation and scheduling recommendation of the Assistant Secretary for Health in accordance with 21 U.S.C. 811(c), the Administrator of the Drug Enforcement Administration, pursuant to the provisions of 21 U.S.C. 811(a), finds that:

1. Based on information now available, 3-methylfentanyl has a hig h potential for abuse;

2. 3-Methylfentanyl has no currently accepted medical use in treatment in the United States; and

3. There is a lack of accepted safety for use of 3-methylfentanyl under medical supervision.

The Administrator further finds that 3-methylfentanyl is an opiate as defined in 21 U.S.C. 802(18) since it has an addiction-forming and addiction-sustaining liability similar to that of morphine. Consequently, 3-methylfentanyl is a narcotic since the definition of a narcotic, as stated in 21 U.S.C. 802(17)(A) includes: "Opium, opiates, derivatives of opium and opiates."

Under the authority vested in the Attorney General by section 201(a) of the CSA (21 U.S.C. 811(a)), and delegated to the Administrator of DEA by Department of Justice Regulations (28 CFR 0.100), the Administrator hereby

VOL 51 ISS 79 AP 24 1986 UMI

proposes that 21 CFR 1308 be amended as follows:

PART 1308—[AMENDED]

1. The authority citation for 21 CFR Part 1308 continues to read as follows:

Authority: 21 U.S.C. 811, 812, 871(b).

2. Paragraph (b) of § 1308.11 is revised by adding a new subparagraph (b)(31) and redesignating the existing subparagraphs (b)(31) through (b)(46) as (b)(32) through (b)(47):

§ 1308.11 Schedule I.

* * * * *

(b) * * *

(31) 3-Methylfentanyl (N-(3-methyl-1-(2-phenethyl)-4-piperidyl)-N-phenylpropanamide)—9813.

* * * * *

Interested persons are invited to submit their comments, objections or requests for hearing in writing with regard to this proposal. Requests for a hearing should state with particularity the issues concerning which the person desires to be heard. All correspondence regarding this matter should be submitted in quintuplicate to the Administrator, Drug Enforcement Administration, 1405 I Street NW., Washington, DC 20537, Attention: DEA Federal Register Representative.

In the event that comments, objections or requests for a hearing raise one or more issues which the Administrator finds warrant a hearing, the Administrator shall order a public hearing by notice in the Federal Register, summarizing the issues to be heard and setting the time for the hearing which will not be less than 30 days after the date of the notice.

Pursuant to Title 5, United States Code, section 605(b), the Administrator certifies that the proposed placement of 3-methylfentanyl into Schedule I of the Controlled Substances Act will have no impact upon small businesses or other entities whose interests must be considered under the Regulatory Flexibility Act (Pub. L. 96–354). The substance, 3-methylfentanyl, proposed for control in this notice, has no legitimate use or manufacturer in the United States. In accordance with the provisions of Title 21, United States Code, section 811(a), this proposal to place 3-methylfentanyl into Schedule I, is a formal rulemaking "on the record after opportunity for a hearing." Such proceedings are conducted pursuant to the provisions of 5 U.S.C. 556 and 557, and as such, have been exempted from the consultation requirements of Executive Order 12291 (46 FR 13193).

Dated: April 21, 1986.

John C. Lawn,

Administrator, Drug Enforcement Administration.

[FR Doc. 86-9128 Filed 4-23-86; 8:45 am]

BILLING CODE 4410-09-M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Part 250

Oil and Gas and Sulphur Operations in the Outer Continental Shelf

AGENCY: Minerals Management Service, Interior.

ACTION: Proposed rule.

SUMMARY: The proposed rule would establish procedures to obtain testimony from witnesses or persons who have knowledge of serious accidents, fires, blowouts, or spills that occurred during oil, gas, or sulphur operations in the Outer Continental Shelf (OCS).

The testimony is needed by accident investigative panels to determine the cause or probable cause of an accident under investigation. These procedures would facilitate meetings of the investigative panels.

DATE: Comments must be hand-delivered or postmarked no later than May 27, 1986.

ADDRESS: Written Comments must be mailed or hand-delivered to the Department of the Interior; Minerals Management Service; 12203 Sunrise Valley Drive, Mail Stop 646; Reston, Virginia 22091; Attention: David A. Schuenke.

FOR FURTHER INFORMATION CONTACT: David A. Schuenke, telephone: (703) 648–7816, (FTS) 959–7816.

SUPPLEMENTARY INFORMATION: Section 22(d) of the Outer Continental Shelf Lands Act (OCSLA) provides that the Secretary of the Interior, or the Secretary of the Department in which the U.S. Coast Guard (USCG) is operating, shall make an investigation and public report on major fires, oil spills, deaths, and serious injuries occurring as a result of operations conducted pursuant to the OCSLA.

For any given spill or accident, the decision as to whether the Minerals Management Service (MMS) or the USCG will be the lead Agency in the investigation is determined by the provisions of a Memorandum of Understanding (MOU) between the U.S. Geological Survey and the USCG published in the Federal Register on January 8, 1981 (46 FR 2199). The MMS is party to the MOU after it succeeded to the authority of the U.S. Geological Survey's Conservation Division concerning activity in the OCS by direction of Secretarial Order 3071 dated January 19, 1982.

When MMS is the lead Agency in the investigation of a major accident, an investigative panel may be appointed by the Regional Director in whose Region the accident occurred. The panel may convene a meeting to take testimony from persons who have witnessed or are knowledgeable of the accident under investigation. Since such meetings affect persons other than MMS personnel, MMS has concluded that rules pertaining to the conduct of such meetings should be proposed.

The purpose of the meetings is to provide the investigative panel a forum by which to obtain information to aid in determining the cause or probable cause of the accident under investigation. Such meetings are not intended to be adversarial proceedings, and the proposed rule would preclude cross-examination of the persons giving testimony or interference with the meeting's progress.

Inasmuch as it is recognized that the meeting transcripts may be subject to other proceedings of an adversarial nature and further that the investigative panel's report on the accident may document lapses in compliance with regulations and Order, provisions are included to allow the presence of legal counsel during the questioning of witnesses.

Provisions pertaining to location, testimony under oath, verbatim transcripts, subpoena power, and travel expenses are also included.

Executive Order 12291

The purpose of this proposal is to provide procedures for accident investigative panels. These procedures would not increase prices for consumers nor would they result in major cost increases for individual industries, Federal, State, or local government agencies, or geographic regions. Based on this assessment, the Department of the Interior (DOI) has determined that this document does not constitute a major rule under Executive Order 12291; therefore, a Regulatory Impact Analysis is not required.

Regulatory Flexibility Act

The DOI has also determined that since this rule is procedural in nature, it would not have a significant economic effect on a substantial number of small entities.

Paperwork Reduction Act

This proposed rule does not contain information collection requirements which require approval by the Office of Management and Budget under 44 U.S.C. 3501 et seq.

Author

The principal author of this document is G.R. Daniels, Offshore Rules and Operations Division, MMS.

List of Subjects in 30 CFR Part 250

Continental shelf, Environmental impact statements, Environmental protection, Government contracts, Investigations, Oil and gas exploration, Penalties, Pipelines, Public lands/mineral resources, Reporting and recordkeeping requirements.

Dated: March 6, 1986.

William D. Bettenberg,

Director, Minerals Management Service.

For the reasons set forth above, 30 CFR Part 250 is proposed to be amended as follows:

PART 250—[AMENDED]

1. The authority citation for Part 250 continues to read as follows:

Authority: Outer Continental Shelf Lands Act, 43 U.S.C. 1331 et seq; as amended, 92 Stat. 629; National Environmental Policy Act of 1969, 42 U.S.C. 4321 et seq. (1970); Coastal Zone Management Act of 1972, as amended, 16 U.S.C. 1451 et seq.

2. In § 250.45, a new paragraph (c) is added as follows:

§ 250.45 Accidents, Fires, and malfunctions.

* * * * *

(c) Unless otherwise specifically ordered by the Director, all formally designated investigation meetings conducted under the authority of sections 22(d) (1) and (2) of the Act shall be fact-finding proceedings with no formal issues and no adverse parties. Such meetings shall not be subject to the provisions of the Administrative Prodecure Act (Pub. L. 89–554, 80 Stat. 384 (5 U.S.C. 554)). Such meetings shall satisfy the following requirements:

(1) The meeting shall be conducted in the appropriate MMS regional or district office or at some other convenient location determined by the panel chairperson.

(2) All members of the panel shall be present at such meetings if possible. A simple majority shall constitute a quorum. The chairperson may designate a member(s) of the panel to conduct meetings without all members present if the chairperson finds it to be appropriate.

(3) Appropriate oaths shall be administered by the chairperson or his/her designee to all persons giving testimony.

(4) A verbatim transcript shall be made of any formal meeting.

(5) Each person giving testimony shall be allowed to have legal and/or other representative(s) present to advise or counsel when giving testimony to the panel.

(6) Only the following persons shall be admitted to the questioning of any person giving testimony:

(i) The panel members, the panel's legal advisor, and any experts the panel deems necessary,

(ii) The person giving testimony and such person's legal or other representative(s), and

(iii) The testimony transcriber.

(7) The chairperson of the panel may, if necessary, issue a subpoena to any witness or person who has knowledge of the accident pursuant to section 22(f) of the Act. A witness or a person who has knowledge of the accident may be required to attend a meeting at a place not more than 100 miles from the palce where the subpoena is served.

(8) Any witness or person who has knowledge of the accident subpoenaed to attend a formal meeting under this subsection shall be paid the same fees and mileage paid for similar services in the U.S. District Courts. The MMS shall pay fees and mileage for those persons the MMS has called if the persons so request.

(9) When witness(es) or person(s) who have knowledge of the accident cannot attend a formal meeting due to injury or cannot be required to attend such meeting, the panel may move the meeting site to a location more convenient to the witness(es) or person(s), or the panel may accept a written statement in lieu of oral testimony.

[FR Doc. 86-9172 Filed 4-23-86; 8:45 am]

BILLING CODE 4310-MR-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 115

[CGD 81-057]

General Bridge Permit Program Regulations

AGENCY: Coast Guard, DOT.

ACTION: Supplementary notice of proposed rulemaking.

SUMMARY: This proposed rule would establish a General Bridge Permit and the procedure for receiving authorization to proceed with the construction or modification of bridges under the Permit. The present Individual Bridge Permit program has proven to be unduly burdensome on owners and builders of certain bridges which have an insignificant impact on navigation and the quality of the human environment. The General Bridge Permit program would eliminate the unnecessary burdens, while maintaining an adequate level of review of navigational and environmental concerns by the Coast Guard.

DATE: Comments must be received on or before June 23, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Jerome D. Schwartz, (202) 755–7620.

SUPPLEMENTARY INFORMATION: On September 23, 1982, the Coast Guard published a notice of proposed rulemaking in the Federal Register for these regulations (47 FR 41988). Interested persons were requested to submit comments and 30 letters were received, primarily from governmental bodies. As a result of the comments, extensive changes were made in organization and approach and a new proposal has been prepared. Interested persons are invited to participate in this new proposed rulemaking by submitting written comments, data, or arguments. Each comment should include the name and address of the person submitting the comment, reference the docket number (CGD 81–057) and the specific section of the proposal to which each comment applies, and give the reasons for the comments. Persons desiring acknowledgment that their comments have been received should enclose a stamped, addressed postcard or envelope.

All comments received before the expiration of the comment period will be considered before final action is taken on this proposal. No public hearing is planned, but one may be held if written requests for a hearing are received and it is determined that the opportunity to make oral presentations will aid the rulemaking process.

Drafting Information

The principal persons involved in drafting these proposed rules are Mr. Jerome D. Schwartz, Project Manager, Office of Navigation, and Mr. Stephen H. Barber, Project Counsel, Office of Chief Counsel.

Background

In general, construction or modification of bridges across the navigable waters of the United States

VOL 51 ISS 79 AP 24 1986 UMI

must be approved by the Coast Guard. At present, the Coast Guard has a system for reviewing applications for such work on a case-by-case basis known as the Individual Bridge Permit (IBP) program. Regulations establishing this program are found in 33 CFR 115.50 through 115.70.

In recent years, the Coast Guard has identified a category of bridge projects that, under the IBP program, required more paperwork by the applicant and more review time by the Coast Guard than was justified. This category consists of bridge projects which, by their nature, have virtually no adverse impact on navigation or the environment. To address this category, the Coast Guard is proposing, by means of this rulemaking, an alternate permitting system to be known as the General Bridge Permit (GBP) program.

Under the GBP program, the bridge owner need only submit, and the Coast Guard review, certain specified evidence to determine whether the project is, in fact, eligible under the GBP. If, upon review of the material submitted, the Coast Guard finds that the project is eligible under the GBP, the Coast Guard issues a Letter of Authorization to Proceed. In effect, § 115.83(a) would constitute the GBP itself; but bridge owners would have to receive an authorization letter before proceeding under the Permit with their projects. This proposed program, as revised in response to the comments recieved, is discussed further in the following sections.

Discussion of General Comments

One position was clearly shared by all persons responding to the prior notice of proposed rulemaking. All workable changes that would eliminate unnecessary paperwork and processing time for bridge applications, yet still provide for adequate Coast Guard navigational and environmental review, would be supported by all concerned. The primary problems the respondents had were concerns that the regulations as proposed would not, in fact, simplify and expedite the process and, alternatively, that the Coast Guard would be eliminating altogether its case-by-case review of these projects.

In response to these problem areas, this proposed rule reorganizes the approach and formatting used, while retaining the basic substance of the originally proposed rule. A number of changes were also made to clarify the proposal because of the obvious confusion existing.

(1) The prior proposed rule provided a procedure for developing separate GBPs Because this approach might lead to inconsistencies among the Districts, this proposed rule would establish a nationwide GBP, rather than prescribe the mechanism for several to be developed. Proposed § 115.83(a) would now constitute the Permit and § 115.86 would set out the criteria which bridge projects must meet to be eligible under the Permit. As originally proposed, however, the bridge owner would still have to receive authorization to proceed from the Coast Guard before beginning a project under the GBP.

(2) On the question of review by the Coast Guard, changes were made to make it clear that a bridge owner cannot proceed with a project merely because it meets the criteria in proposed § 115.86 for eligibility under the GBP. First, the party would have to submit a request to the Coast Guard containing the specific information on the project called for in proposed §115.91. This material would provide the Coast Guard with information relative to the particular project and form the basis of its navigational and environmental review. Authorization to proceed would be issued only on a case-by-case basis for projects determined by the Coast Guard to be eligible under the GBP program.

(3) In addressing the question of whether the GBP program would actually simplify and facilitate the process, one needs to keep in mind the nature of eligible projects. Proposed §§ 115.86(c) and (d) would limit eligible projects to those that provide for the safe passage of all vessels customarily using the waterway. If the project would obstruct this navigation in any way, the project would not be eligible under the GBP program.

Other factors to be considered by the Coast Guard are listed in proposed §§ 115.86(e) through (l). These factors relate to environmental and other matters, such as impact on public parks, historic and archaeological sites, wild and scenic rivers, coastal barrier islands, wetlands, floodplains, flood control projects, and wildlife habitats. Except for certain variances from these criteria for projects which are under the jurisdiction of a Federal lead agency (§ 115.86(m) and (n)), all eligible projects must not adversely impact these areas and, in some cases, must not even be located within or near these areas.

The bottom line for eligibility is that the projects have virtually no adverse effect on any area of concern within the purview of the Coast Guard. For this reason, eligible projects would not need the extensive navigational study and separate enviornmental documentation needed to explain and assess adverse or controversial impacts. Therefore, the GBP program would eliminate the additional paperwork which would be necessary if the project was processed under the Coast Guard's Individual Bridge Permit program (33 CFR 115.50 through 115.70).

Discussion of Specific Comments and Changes

Several changes are made in the revised proposal that are of a ministerial nature. Part 115 is retitled and divided into subparts to assist the user. Proposed § 115.01, Purpose and applicability, would be amended to align it with the Coast Guard Authorization Act of 1982 (Pub. L. 97-322), which removed many minor waterways from the Coast Guard bridge permit program. Proposed § 115.50, Application for Individual Bridge Permits, would be amended to indicate the Coast Guard's need to consider the probable impact on the human environment before taking final action on an IBP application under the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*). These changes, appearing in items 1 through 7 of the regulatory text, would have no new effect on the proposed GBP provisions.

1. *Proposed § 115.80*—This section is new and simply explains the purpose and applicability of proposed Subpart C, General Bridge Permit.

2. *Proposed § 115.83*—(a) This section would establish the GBP itself.

(b) A number of comments suggested that only specific bridge actions, and not geographic areas, should be considered under a GBP. These suggestions are adopted to avoid inconsistencies from Coast Guard District to District and from geographic area to area by instituting the single nationwide GBP.

(c) Two comments suggested that all GBP's be issued by the District Commanders, rather than the Commandant, in order to reduce paperwork within the Coast Guard. Proposed § 115.95 would assign the responsibility for issuing authorizations to proceed to the District Commanders and reserve in the Commandant the authority to review appeals.

3. *Proposed § 115.86*—This section would eliminate the distinction between standard and special criteria in the prior notice and speak only in terms of "criteria" for eligibility under the GBP.

(b) Several comments suggested that the Coast Guard limit its concerns to protecting the needs of navigation and leave matters relating to the environment, recreation, and historic sites to other Federal agencies. The Coast Guard, however, is required to consider these additional matters under other laws, such as NEPA and the Department of Transportation Act (49 U.S.C. 303). Proposed paragraphs (m) and (n) of § 115.86 are added to provide for consideration of input from other Federal agencies.

(c) One comment requested that Corps of Engineers' approval under section 404 of the Clean Water Act be given before the Coast Guard acts under the GBP. This recommendation was not adopted because Coast Guard approval is not contingent upon Corps approval. As the comment stated, however, Coast Guard authorization to proceed under the GBP would not relieve the bridge owner of the responsibility to obtain whatever approval is required by other Federal, State, or local agencies before proceeding with the project (33 CFR 114.10).

(d) One comment suggested that the eligibility criteria address potential flood hazards associated with coastal storms and storm surges. This matter would be accounted for in the floodplain criterion in proposed paragraph § 115.86(i).

(e) Two comments asked that the proposed wetland provision be aligned with the wording in DOT Order 5660.1A to allow discretion in dealing with individual cases involving wetlands. Proposed § 115.86(f) has been revised accordingly.

(f) Several comments suggested that the originally proposed wetlands provision was inconsistent with FHWA's wetland evaluation procedures. Recognizing that other Federal agencies may use differing procedures to achieve required environmental reviews, new § 115.86(m) would provide for Coast Guard acceptance of determinations of categorical exclusion from certain NEPA requirements made by designated lead agencies, when these determinations are consistent with Coast Guard policy.

(g) One comment objected to opening up the eligibility criteria to include "any other limitation deemed appropriate by the Commandant". Because of the broad scope of this provision, the comment suggested that such projects could be handled under the IBP program. This provision has been deleted from the revised proposal.

(h) One comment suggested that the words "will not have a significant environmental impact" in the originally proposed provision on fill in nontidal wetlands be rephrased in terms of "minimal impact" to be consistent with the rest of the regulations. Proposed § 115.86(f)(2)(iv) is revised accordingly.

(i) Fourteen comments suggested that the required half-mile separation between eligible projects and historic sites (proposed § 115.86(g)) is arbitrary, unduly restrictive, and outside the scope of the referenced law. Under 36 CFR 800.4(a), the Coast Guard must consider the effect on historic places lying, not just within the bridge project area, but "within the area of the undertaking's potential environmental impact and that may be affected by the undertaking". Coast Guard bridge permit records indicate that historic places located at least one-half mile away from bridge projects are not affected environmentally by those projects. As a result, the Coast Guard's Bridge Administration Manual uses a buffer zone of one-half mile in defining the area of impact (COMDTINST M16590.5). Reducing or eliminating this zone would create uncertainty over whether or not there is or may be an impact. Therefore, proposed § 115.86(g) retains the one-half mile provision for the GBP Program. Projects not meeting this requirement may still be considerd for an IBP.

(j) Comments similar to those discussed in the provision paragraph were received on the one-half mile provision relating to parks and historic sites. On reconsideration, this provision has been deleted from proposed § 115.86(l) because that paragraph relates to projects within, rather than near, parks or historic sites.

(k) One comment expressed concern that the regulations recognize the fact that river bluffs and other high ground, especially in coastal zones, were favored settlement areas for Indians and other historic peoples. Proposed § 115.86(g), (j), and (l) would address these areas and concerns.

(l) One comment pointed out that section 4(f) of the DOT Act addresses more than just park lands. Proposed § 115.86(l) would correct this provision and reference the now codified statute (49 U.S.C. 303).

(m) One comment stated that eligible projects should not cause any encroachment on the base floodplain. Proposed § 115.86(i) uses "must not cause a significant encroachment" to align the provision with the standard in DOT Order 5650.2.

(n) Five comments asked that "significant encroachment within the base floodplain" be explained. Proposed § 115.86(i) has been amended accordingly.

(o) Several comments suggested that the originally proposed provision on flood heights be deleted because it was already covered. This comment has been adopted. Floodplains would be covered in proposed § 115.86(i).

(p) Several comments asked to know the source of and need for criteria concerning wetlands. The provisions in proposed § 115.86(f) were selected to maintain consistency with the U.S. Army Corps of Engineers general permit program.

(q) One comment noted that the proper technical term is "coastal barrier" rather than "barrier island". To make the term more understandable to the public, this proposal uses "coastal barrier island" in § 115.86(j).

(r) One comment suggested that eligible projects should not affect the critical habitat of endangered wildlife, as well as the wildlife itself. Proposed § 115.86(k) would indicate that a project must not be located within a critical habitat.

(s) Two comments stated that the originally proposed criteria for parks was unduly burdensome on projects funded by the Federal Highway Administration, an agency under the same Department as the Coast Guard (DOT). Proposed § 115.86(n) has been added to specifically address other DOT agencies.

(t) One comment suggested that the GBP contain a requirement to control the location of bridges across tidal waters. Coast Guard bridge approval is contingent upon receipt of State water quality and coastal zone management consistency certifications. A State may continue to control bridge construction in its waters by those regulatory programs. Therefore, the recommended criterion is not included in the proposed GBP regulation. This is consistent with the processing of IBPs.

(u) One comment stated that the originally proposed criteria did not consider certain potential public health impacts. Health concerns are considered by the States under the required water quality and coastal zone management consistency certifications. Also, for projects for which there is a designated Federal lead agency, these potential impacts are extensively reviewed by those agencies.

(v) One comment noted that it would be difficult and unnecessary to establish specific minimum bridge clearances. This provision has been deleted and proposed §§ 115.86 (b), (c), (d), and (e) have been added to address the aspect of clearances providing for the reasonable needs of navigation.

(w) One comment stated that the criteria omitted consideration of national natural landmarks and archaeological sites. Proposed §§ 115.86 (g), (h), (i), (j), and (l) would address these concerns.

(x) One State commented that the specific special criteria listed in the original proposal would make the GBP program less useable. Two comments asked that the meaning of this criteria

VOL 51 ISS 79 AP 24 1986 UMI

be clarified. One comment recommended that the criteria include a provision to exclude sensitive or locally controversial projects. These provisions have been deleted. Proposed §§ 115.86 would exclude sensitive or controversial projects and clearly define the characteristics of a bridge project eligible under this program.

4. *Proposed § 115.89*—This section states that before starting an eligible bridge project, the bridge owner must request and receive authorization to proceed from the Coast Guard.

5. *Proposed § 115.91*—(a) This section describes the information that the bridge owner must submit to the District Commander in support of the request for authorization to proceed.

(b) Several comments suggested that the original proposal required either too much or too little information in a request for authorization to proceed. One comment stated that the information unnecessarily duplicated information requested by the U.S. Army Corps of Engineers for a Section 404 permit. One comment suggested that the States alone should decide whether their projects are eligible. The Coast Guard needs the information requested in proposed § 115.91 to properly review and evaluate the proposed project under the bridge statutes and several environmental control laws. Additionally, this information assists the Coast Guard in monitoring the permit program and bridge construction to maintain minimal cumulative impacts.

(c) Two comments stated that water quality and coastal zone management review by the States should be a prerequisite to Coast Guard action. These concerns are addressed in proposed §§ 115.91 (g) and (h) as elements of a request for authorization to proceed.

6. *Proposed § 115.95*—(a) This section describes how the District Commander would process an authorization to proceed request.

(b) One comment suggested that periodic reevaluation of a GBP was inappropriate. This provision is no longer necessary under the single, nationwide GBP and has been deleted. However, the letter of authorization to proceed would contain time limits for beginning and completing the bridge project.

(c) One comment requested that the Coast Guard be limited to a maximum of 60 days to process a request. A time limitation could jeopardize the adequacy of the review. The review contemplated by this proposal should permit the District Bridge Administration Staff to process authorization to proceed requests within 30 days unless multiple requests are received nearly simultaneously.

(d) One comment suggested that the District Commanders be allowed to impose special conditions on a case-by-case basis. The GBP, as revised in this proposal, is not intended for this purpose. Project deviating from those clearly eligible under the GBP should be handled under the Individual Bridge Permit program.

(e) One comment recommended that bridge owners who are denied authorization to proceed should be given an opportunity to correct deficiencies to meet the GBP regulations before going to the Individual Bridge Permit application process. Though early coordination with the Coast Guard would normally identify these situations, proposed § 115.93(b) specifically addressed this concern.

(f) One comment stated that, in practice, two submissions would be necessary for each project—a request for authorization to proceed under the GBP and an application for an Individual Bridge Permit (IBP). Thus, if the request is denied, the IBP process would be able to proceed immediately. Proposed § 115.95(b) specifically addresses this problem by providing Coast Guard assistance in avoiding unnecessary duplication of documentation. The proposed request format has been designed to allow conversion to an IBP application by submitting the environmental documentation evidenced in the request for authorization to proceed.

7. *Proposed § 115.99*—(a) This section concerns revocation of an authorization to proceed.

(b) One comment suggested that more guidance would be required. This section, however, must be read in conjunction with the general requirements in 33 CFR Part 114, in particular § 114.40 (Violations of law), § 114.45 (Applications, extensions of time), and § 114.50 (Right of appeal).

E.O. 12291 and DOT Regulatory Policies and Procedures

This proposed rule is considered to be non-major under Executive Order 12291 and nonsignificant under the DOT regulatory policies and procedures (44 FR 11034; February 26, 1979). The economic impact of this proposal has been found to be so minimal that a full regulatory evaluation is unnecessary.

This rulemaking is intended to reduce the amount of paperwork for the requesting party, reduce the amount of material needed to be reviewed by the Coast Guard, and to reduce the time required to prepare and process a request. All of these factors would result in lower costs both the requesting party and the Coast Guard.

In 1985, 40 of the 121 bridge permit applications received by the Coast Guard would have been eligible under the GBP program. These numbers are expected to increase in coming years due to increased construction and increased Federally-funded rehabilitation of existing bridges. In 1986, the anticipated numbers are 50 out of 140 and, in 1987, 60 out of 160 applications. Under the existing IBP procedures, each of these projects requires about 40 hours to prepare an application and 400 hours for the Coast Guard to process the application. The average total time from receipt of an application to issuance or denial of the permit is 50 days per project. The total times for all of these projects is 2,000 hours for applicants, 16,000 hours for the Coast Guard, and 2,000 days processing time. Converting these times to monetary costs, each of these projects costs the Coast Guard $10,000 in personnel time at $25.00 per hour. There are basically no costs incurred to compile information for the applications because the bridge builders already must compile this material for planning, designing, and engineering their projects. Applicants also incur costs due to the effects of inflation while they await receipt of an IBP. Because the cost of delay would vary greatly depending upon the projected cost of the project, type of project, timing of submission of the application, projected cost of project, and changing material and labor costs, these delay costs are not meaningfully quantifiable.

By handling eligible projects under the new GBP program, the following reductions are anticipated: Request preparation time should drop to about eight hours per project, an 80% decrease. Coast Guard processing time and costs are anticipated to be reduced 90%. The average time needed to process a request for an authorization to proceed is anticipated to be under 30 days. The savings for all 40 eligible projects in 1985 would have totaled 1,280 in preparation hours, 14,400 in Coast Guard personnel hours, $360,000 in Coast Guard costs, and 800 days of delay.

In conclusion, the GBP procedure would produce at least some savings in time and monetary cost for every eligible project. However, the overall cost of operating the Coast Guard's bridge permitting programs is expected to remain the same or increase due to the predicted increase in the total number of permit applications and requests.

Regulatory Flexibility Act

As discussed above, the economic impact of this proposed rule would be minimal and would be a reduction from that required under the existing IBP program. Therefore, the Coast Guard certifies that the rule will not have a significant economic impact on a substantial number of small entities.

Paperwork Reduction Act

This proposed rulemaking contains information collection requirements in § 115.91. It will be submitted to the Office of Management and Budget (OMB) for approval under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*). Persons desiring to comment on these information collection requirements should submit their comments to: Office of Regulatory Policy, Office of Management and Budget, 726 Jackson Place NW., Washington, D.C. 20503, Attn: Desk Officer, U.S. Coast Guard. Persons submitting comments to OMB are also requested to submit a copy of their comments to the Coast Guard as indicated under "ADDRESSES".

These proposed regulations would result in a reduction in the overall paperwork burden on persons requesting to construct or modify eligible bridges.

Environmental Assessment

The Coast Guard has considered the environmental impact of the proposed regulations and concluded that preparation of an environmental impact statement is not necessary. These regulations would provide a less burdensome procedure for processing permits for certain bridges which presently fall under the IBP program. The environmental impact of a bridge authorized under the GBP program would be no different had that bridge been permitted under the existing IBP process.

These regulations are basically procedural and would have no effect on the environment in themselves. A separate environmental assessment on the GBP is on file in the rulemaking docket and is available for inspection or copying at the Office of the Marine Safety Council, Room 2201, Coast Guard Headquarters, 2100 Second Street SW., Washington, D.C. 20593, (202) 426–1477.

List of Subjects in 33 CFR Part 115

Bridges, Reporting and recordkeeping requirements.

In consideration of the foregoing, Part 115 of Title 33 of the Code of Federal Regulations is proposed to be amended as follows:

PART 115—[AMENDED]

1. By revising the heading of Part 115 to read "BRIDGE PERMITS".

2. The authority citation for Part 115 is revised to read as follows and all other authority citations are removed:

Authority: 33 U.S.C. 401, 491, 525, 533; 14 U.S.C. 633; 49 CFR 1.46 (c) and (q).

Subpart A—[Added]

3. By adding a new subpart heading before § 115.01 to read "Subpart A—General Requirements".

4. By revising § 115.01 to read as follows:

§ 115.01 Purpose and applicability.

(a) This part establishes application and processing procedures for permits to construct or modify bridges across the navigable waters of the United States, except for waters not subject to the ebb and flow of the tide which are not used and are not susceptible to use in their natural condition or by reasonable improvement as a means to transport interstate or foreign commerce.

(b) The District Commander designates those waters within the District Commander's jurisdiction that are considered to meet the exception in paragraph (a) of this section. A permit under this part is not required for construction or modification of bridges across waters so designated. A list of waters so designated is available from the District Commander for the area in which the waters are located.

Subpart B—[Added]

5. By adding a new subpart heading after § 115.40 to read "Subpart B—Individual Bridge Permits".

6. By adding a new § 115.48 to read as follows:

§ 115.48 Purpose and applicability.

This subpart establishes application and processing procedures for Individual Bridge Permits. Authorization to construct or modify bridges which fall under the General Bridge Permit may be requested under the procedures in Subpart C of this part.

7. By revising paragraph (b) and removing and reserving paragraph (c) of § 115.50 as follows:

§ 115.50 Application for bridge permits.

* * * * *

(b) *Prior authority necessary.* A bridge cannot be constructed until the location and plans have been approved by the Coast Guard and after full consideration of the probably impact of the proposed action on the quality of the human environment.

(c) [Reserved]

* * * * *

8. By adding a new Subpart C to read as follows:

Subpart C—General Bridge Permit

Sec.

115.80 Purpose and applicability.
115.83 General bridge permit.
115.86 Criteria for eligibility under the permit.
115.89 Authorization to proceed required.
115.91 Request for authorization.
115.95 Proceeding requests.
115.98 Revocation of authorization.

Subpart C—General Bridge Permit

§ 115.80 Purpose and applicability.

This subpart establishes a General Bridge Permit (GBP) applicable to certain bridge projects and prescribes the procedures for obtaining authorization to proceed under the Permit.

§ 115.83 General Bridge Permit.

(a) This provision constitutes a General Bridge Permit for projects involving the construction or modification of bridges which meet fully the criteria in § 115.86. These projects do not require an Individual Bridge Permit under Subpart B of this part but do require authorization under § 115.95 before proceeding with the project.

(b) For matters within the purview of the Coast Guard, projects under the GBP are deemed to have an insignificant impact on navigation and the quality of the human environment and, therefore, do not need the extensive navigational and environmental documentation or the case-by-case Coast Guard public hearings associated with the Individual Bridge Permit program.

§ 115.86 Criteria for eligibility under the permit.

(a) Projects under the GBP must meet all of the criteria in this section.

(b) The project must not involve work on or replacement of a movable bridge.

(c) The project must provide for the passage of all navigation customarily using the waterway.

(d) The project must not obstruct that portion of the waterway customarily navigation by the deepest draft vessels using the waterway.

(e) The project must not interfere with any existing Federal navigation or flood control project.

(f) The bridge project must not be located across wetlands, unless the District Commander determines that there is no practicable alternative.

VOL 51 ISS 79 AP 24 1986 UMI

location which avoids the wetlands. As used in this section, "wetlands" means lowlands covered with shallow and sometimes temporary or intermittent waters, including but not limited to swamps, marshes, bogs, sloughs, potholes, wet meadows, river overflows, shallow lakes or ponds with emergent vegetation, and estuarine areas, but not including areas covered with water for such a short time that there is no effect on moist-soil vegetation and not including the permanent waters of streams, reservoirs, and deep lakes. If the District Commander determines that there is no practicable alternative location, the project must comply with the following:

(1) If the wetlands are tidal, the project must not involve dredging or the placement of fill material in the waterbody or wetlands.

(2) If the wetlands are non-tidal—

(i) The bridge structure must accommodate the 100 year flood;

(ii) The project must not involve the placement of more than 200 cubic yards of fill below the ordinary or mean high water line;

(iii) The project must not involve the placement of fill beyond 100 feet on either side of the ordinary or mean high water line; and

(iv) The District Commander must determine that the fill, if any, will have a minimal impact on wetland values under Executive Order 11990.

(g) The project must not be located within one half mile of any property listed, or eligible or proposed to be listed, in the National Register of Historic Places (36 CFR Part 800).

(h) The project must not be located in or across, or affect, any Federally-listed established or prospective component of the National Wild and Scenic River System under 16 U.S.C. 1274 and 1276.

(i) The project must not cause a significant encroachment within the base floodplain, that is, an encroachment resulting in a considerable probability of loss of human life, likely future damage that could be substantial in cost or extent (including interruption of service on or loss of a vital transportation facility), or a notable adverse impact on natural and beneficial floodplain values (DOT Order 5650.2).

(j) The project must not be located on or provide access to a coastal barrier island under 16 U.S.C. 3501, *et seq.*

(k) The project must not be located within a critical habitat of a Federally-listed endangered or threatened species of fish or wildlife under 16 U.S.C. 1531, *et seq.*

(l) The project must not be located wholly or partially within a park, historic site, refuge, or other area of natural beauty under 49 U.S.C. 303, unless the bridge will be used solely for purposes for which the area was established and will not promote further development within the area.

(m) Projects may vary from the requirements of paragraphs (f), (g), (h), (i), (j), and (k) of this section and still be eligible under the GBP, if all of the following provisions apply:

(1) A Federal agency has been designated as lead agency on the project for purposes of the National Environmental Policy Act (NEPA; 42 U.S.C. 4321, *et seq.*).

(2) The lead agency has determined that, even with the variances, the project is categorically excluded from the NEPA requirements for the preparation of an Environmental Impact Statement, Environmental Assessment, or Finding of No Significant Impact.

(3) The District Commander processing the request agrees that the categorical exclusion determination by the lead agency is consistent with Coast Guard policy.

(n) If the Federal lead agency referred to in paragraph (m) of this section is an agency under the United States Department of Transportation, projects which vary from the requirements of paragraph (1) of this section are also eligible under the GBP, if the provisions of paragraphs (m) (1), (2), and (3) of this section apply.

§ 115.89 Authorization to proceed required.

Before beginning a project under the GBP, the bridge owner must request and receive authorization to proceed from the Coast Guard under this subpart

§ 115.91 Requests for authorization.

Each request for authorization to proceed must be in writing using any simple format, be submitted to the District Commander, and include the following information documents:

(a) The name and address of the bridge owner.

(b) A statement by the owner certifying that the project meets all of the criteria in § 115.88 for eligibility under the GBP.

(c) A brief description of the project and its purpose.

(d) A copy of the plans of the project in or folded to letter size and in good reproducible quality.

(e) A map of the vicinity of the project in or folded to letter size, in good reproducible quality, and showing the following:

(1) The title and date in the lower right hand corner.

(2) A graphic scale and north arrow.

(3) The course of the waterway and the entire work site of the project.

(4) The location of, or direction and distance to, the nearest town or other reference point.

(5) All bridges within one half mile of the project.

(f) A copy of a notice published in a local newspaper of general circulation which—

(1) Briefly describes the project.

(2) Identifies the project's location.

(3) Gives the name and address of the project's owner and of the District Commander.

(4) Requests that comments be sent to both of the parties listed in paragraph (f)(3) of this section within 10 days of the notice; and

(5) Indicates that it is the owner's intent to request Coast Guard authorization to proceed.

(g) A copy of the certification or waiver under 33 U.S.C. 1341 issued by the appropriate water pollution control agency concerning the project.

(h) If the project is located in a state's coastal zone as defined in the Federally-approved coastal zone management plan, a copy of the consistency certification by the bridge owner and concurrence by the state under 16 U.S.C. 1456 indicating that the project complies with the state's Federally-approved coastal zone management program.

(i) If a Federal lead agency has been designated for the project, a reference to the finding or determination justifying each variance under § 115.86 (m) and (n).

Note.—The District Commander provides a sample request and public notice which may be used as a guide.

§ 115.95 Processing requests.

(a) Upon receipt of a request, the District Commander considers the information and documents submitted and the comments received to determine whether the project meets the criteria for eligibility under § 115.88 and the request meets the requirements of § 115.91.

(b) If, upon initial review, it appears that the project is not eligible under the GBP, the District Commander informs the applicant of the reasons and advises that, if the deficiencies are not corrected, the applicant should apply under the Individual Bridge Permit (IBP) procedure in Subpart B of this part. The District Commander identifies any additional documentation required to make the IBP application complete, avoiding unnecessary duplication.

(c) If the request is approved, the District Commander issues a letter of authorization to proceed to the bridge owner.

(d) If the request is denied, the bridge owner may apply under Subpart B of this part for an IBP or may appeal the denial under § 114.50 of this chapter.

§ 115.98 Revocation of authorization.

Authorization to proceed may be revoked by the District Commander if that person determines that the requirements of this subpart were not met or the bridge structure or other work constitute an unreasonable obstruction to navigation or to operations of the United States in the interest of navigation or flood control.

Dated: April 18, 1986.

T.J. Wojnar,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 86-133; RM-5215]

TV Broadcast Station in Crystal River, FL

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: Action taken herein proposed to assign UHF television Channel 39 to Crystal River, Florida, as that community's first local television channel, in response to a petition filed by William F. Parrish.

DATES: Comments must be filed on or before June 9, 1986, and reply comments on or before June 24, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73:

Television broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended. 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

In the Matter of Amendment of § 73.606(b), Table of Assignments, Television Broadcast Stations. (Crystal River, Florida): [MM Docket No. 86-133; RM-5215]

Adopted: April 7, 1986.
Released: April 17, 1986.

By the Chief, Policy and Rules Division.

1. The Commission herein considers a petition for rule making filed by William F. Parrish ("petitioner") requesting the assignment of UHF television Channel 39 to Crystal River, Florida, as that community's first local television service. Petitioner stated his intention to apply for the channel.[1]

2. Crystal River (population 2,778),[2] in Citrus County (population 54,703), is located on the west coast of Florida, approximately 120 kilometers (75 miles) northwest of Orlando. Channel 39 can be assigned to Crystal River in compliance with the minimum distance separation requirements of § 73.610 of the Commission's rules.

PART 73—[AMENDED]

3. In view of the fact that there has been a demonstrated need and interest for a first television assignment to Crystal River, Florida, the Commission believes it is appropriate to seek comments on the proposal to amend the Television Table of Assignments

[1] In an earlier proceeding (MM Docket 84-758, RM-4733) the Commission issued the *Notice of Proposed Rule Making* 49 FR 32410, published August 14, 1985, proposing the assignment of Channel 39 to Crystal River, Florida, at the request of the petitioner. That rule making was dismissed to *Report and Order*, adopted March 11, 1985, for lack of continuing interest in the channel.

[2] Population figures were taken from the 1980 U.S. Census.

§ 73.606(b) of the rules) with respect to the following community:

City	Channel No.	
	Present	Proposed
Crystal River, FL		39+

4. The Commission's authority to institute rule making proceedings, showings required, cut-out procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be assigned.

5. Interested parties may file comments on or before June 9, 1986, and reply comments on or before June 24, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: William F. Parrish, Route 2, Box 1360, Fruitland Park, Florida 32731.

The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the TV Table of Assignments, § 73.606(b) of the Commission's rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's rules*, 46 FR 11549, published February 9, 1981.

For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all ex parte contacts are prohibited in Commission proceedings, such as this one, which involve channel assignments. An ex parte contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an ex parte presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an ex parte presentation and shall not be considered in the proceeding.

VOL 51 ISS 79 AP 24 1986 UMI

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(e)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's rules, It Is Proposed To Amend the TV Table of Assignments, § 73.606(b) of the Commission's rules and regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission's rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, DC.

[FR Doc. 86-9136 Filed 4-23-86; 8:45 am]

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 86-134; RM-5144]

FM Broadcast Station in DeKalb, IL

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes to allot Channel 283A to DeKalb, Illinois, as its second FM channel, in response to a petition filed by Peggy Jo Martis.

DATES: Comments must be filed on or before June 9, 1986, and reply comments on or before June 24, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Montrose H. Tyree, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 308, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 308, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

In the matter of Amendment of § 73.202(b), Table of Allotments, FM Broadcast Stations. (DeKalb, Illinois) [MM Docket No. 86-134; RM-5144]

Proposed Rule Making

Adopted: April 7, 1986.
Released: April 17, 1986.

By the Chief, Policy and Rules Division:

1. Before the Commission is a petition for rule making filed by Peggy Jo Martis ("petitioner") which seeks the allotment of Channel 283A to DeKalb, Illinois, as its second FM channel. Petitioner stated her intention to apply for the channel.

2. We believe that the petitioner's proposal warrants consideration. The transmitter site must be restricted to 11.7 kilometers (7.3 miles) northeast of the city to avoid short spacing to Station WLOO(FM) Channel 283A, Chicago, Illinois, and to the vacant allotment of Channel 283A to Henry, Illinois (Docket 84-231). Since the site restriction is further than we can generally predict for city grade coverage, in comments to the *Notice* petitioner should submit a showing that the required city grade coverage 70 (dBu) can be provided to DeKalb at such a distance.

PART 73—[AMENDED]

3. In view of the foregoing, the Commission seeks comments on the proposal to amend the FM Table of Allotments, § 73.202(b) of the Rules, with regard to the community listed below:

City	Channel No.	
	Present	Proposed
DeKalb, IL	220	220,283A

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein. NOTE: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

5. Interested parties may file comments on or before June 9, 1986, and reply comments on or before June 24, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Peggy Jo Martis, Post Office Box 3665, Peoria, Illinois 61614.

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to

amend the FM Table of Allotments, § 73.202(b) of the Commission's Rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's rules*, 46 FR 11548, published February 9, 1981.

7. For further information concerning this proceeding, contact Montrose H. Tyree, Mass Media Bureau, (202) 634-6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all ex parte contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An ex parte contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an ex parte presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an ex parte presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(e)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's rules, It is Proposed To Amend the TV Table of Assignments, § 73.606(b) of the Commission's rules and regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to assign a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, DC.

47 CFR Part 73

[MM Docket No. 86-135; RM-5210]

FM Broadcast Station in Greenwood, MS

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This action proposes the allotment of FM Channel 282A to Greenwood, Mississippi, in response to a petition filed by Ruben C. Hughes. This allotment could provide for a third commercial FM broadcast service for the community.

DATES: Comments must be filed on or before June 9, 1986, and reply comments on or before June 24, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Kathleen Scheuerle, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION:

List of Subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 308, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

In the Matter of Amendment of §73.202(b), Table of Allotments, FM Broadcast Stations. (Greenwood, Mississippi) [MM Docket No. 86-135; RM-5210]

Adopted: April 7, 1986.
Released: April 17, 1986.

By the Chief, Policy and Rules Division:

1. Before the Commission for consideration is a petition for rule making filed by Ruben C. Hughes ("petitioner") seeking the allotment of FM Channel 282A to Greenwood, Mississippi, as the community's third commercial broadcast service. Petitioner indicated he would apply for the channel.

2. We believe petitioner's proposal warrants consideration. Channel 282A can be allocated to Greenwood, Mississippi, in compliance with the minimum distance separation requirements of the Commission's rules.

PART 73—[AMENDED]

3. In view of the fact that the proposal allocation could provide a third commercial broadcast service to Greenwood, Mississippi, the

VOL 51 ISS 79 AP 24 1986 UMI

Commission believes it is appropriate to propose amending the FM Table of Allotments, §73.202(b) of the Commission's rules, with respect to the following community:

City	Channel No.	
	Present	Proposed
Greenwood, MS	256, 270A	256, 270A, and 282A.

4. The Commission's authority to institute rule making proceedings, showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note: A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

5. Interested parties may file comments on or before June 9, 1986, and reply comments on or before June 24, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Eugene F. Mullin, Lawrence Roberts, Mullin, Rhyne, Emmons & Topel, P.C., 1000 Connecticut Avenue, Suite 500, Washington, DC 20036, (counsel for the petitioner).

6. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's rules*, 46 FR 11549, published February 9, 1981.

7. For further information concerning this proceeding, contact Kathleen Scheuerle, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all ex parte contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An ex parte contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an ex parte presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an ex parte presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(c)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§0.61, 0.204(b) and 0.283 of the Commission's Rules, It Is Proposed To Amend the FM Table of Allotments, Section 73.202(b) of the Commission's Rules and Regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. *Comments and Reply Comments; Service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street NW., Washington, DC

47 CFR Part 73

[MM Docket No. 86-136; RM-5209]

FM Broadcast Station in Huntingdon, PA

AGENCY: Federal Communications Commission.

ACTION: Proposed Rule.

SUMMARY: Action taken herein proposes the substitution of Channel 278A for Channel 292A at Huntingdon, Pennsylvania, at the request of Huntingdon Broadcasters, Inc. The substitution of channels could permit expanded FM radio service to the Huntingdon area.

DATE: Comments must be filed on or before June 9, 1986, and reply comments on or before June 24, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION:

List of subjects in 47 CFR Part 73

Radio broadcasting.

The authority citation for Part 73 continues to read:

Authority: Secs. 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply secs. 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

In the matter of amendment of section 73.202(b), Table of Allotments, FM Broadcast Stations (Huntingdon, Pennsylvania) [MM Docket No. 86-136 RM-5209].

Adopted: April 7, 1986.

Released: April 17, 1986.

By the Chief, Policy and Rules Division:

1. The Commission has before it for consideration the petition for rule making submitted on behalf of Huntingdon Broadcasting, Inc. ("petitioner") requesting the substitution of FM Channel 230A for Channel 292A at Huntingdon, Pennsylvania.[1] Petitioner also requests that its license for Station WRLR be modified to specify operation on the new channel.

2. Petitioner claims that Station WRLR, at its present transmitter site, experiences substantial shadowing within its coverage area due to the mountainous terrain in and around Huntingdon. Petitioner states that the substitution of channel would permit it to relocate the station's transmitter to a mountain top site where it would be able to increase its facitities to the maximum for Class A operations and would enable Station WRLR to provide service to an additional 71,000 persons.

3. Channel 278A can be allocated to Huntingdon in compliance with the Commission's minimum distance separation and other technical requirements if the transmitter site is restricted to an area at least 1.9 kilometers (1.2 miles) north to avoid short-spacing to unoccupied and unapplied for Channel 279A at McConnellsburg, Pennsylvania. The site restoration will permit use of the channel at petitioner's preferred site. Additionally, the Canadian government must concur in this allocation since Huntingdon is located within 320 kilometers (199 miles) of the U.S.-Canada border.

4. In view of the above, we believe the public interest would be served by proposing the channel substitution as it could provide FM service to a larger area around Huntingdon. We also propose to modify the license of Station WRLR to specify operation on Channel 278A in lieu of Channel 292A. The procedures outlined in § 1.420(g) of the Commission's rules do not apply to this proceeding since no upgrade in channel classification is proposed. See *Modification of FM and TV Station Licenses*, 98 F.C.C. 2d 916 (1984).

PART 73—[AMENDED]

5. Accordingly, we propose to amend the FM Table of Allotments, § 73.202(b) of the Commission's rules, for the community listed below, to read as follows:

City	Channel No.	
	Present	Proposed
Huntingdon, PA	292A	278A

6. It is ordered, That the Secretary shall send, By Certified Mail, Return Receipt Requested, a copy of this Notice of Proposed Rule Making to Juniata College, licensee of Station WKVR–FM, Huntingdon, PA 16652.

7. The Commission's authority to institute rule making proceedings showings required, cut-off procedures, and filing requirements are contained in the attached Appendix and are incorporated by reference herein.

Note.—A showing of continuing interest is required by paragraph 2 of the Appendix before a channel will be allotted.

8. Interested parties may file comments on or before June 9, 1986, and reply comments on or before June 24, 1986, and are advised to read the Appendix for the proper procedures. Additionally, a copy of such comments should be served on the petitioners, or their counsel or consultant, as follows: Francis E. Fletcher, Jr. Esq., Lynn M. Clancy, Esq., Gardner, Carton & Douglas, 1675 Eye Street NW., Suite 1050, Washington, DC 20006–5472 (Its Attorneys).

9. The Commission has determined that the relevant provisions of the Regulatory Flexibility Act of 1980 do not apply to rule making proceedings to amend the FM Table of Allotments, § 73.202(b) of the Commission's rules. See, *Certification that sections 603 and 604 of the Regulatory Flexibility Act Do Not Apply to Rule Making to Amend §§ 73.202(b), 73.504 and 73.606(b) of the Commission's rules*, 46 FR 11549, published February 9, 1981.

10. For further information concerning this proceeding, contact Leslie K. Shapiro, Mass Media Bureau, (202) 634–6530. However, members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. An *ex parte* contact is a message (spoken or written) concerning the merits of a pending rule making, other than comments officially filed at the Commission, or oral presentation required by the Commission. Any comment which has not been served on the petitioner constitutes an *ex parte* presentation and shall not be considered in the proceeding. Any reply comment which has not been served on the person(s) who filed the comment, to which the reply is directed, constitutes an *ex parte* presentation and shall not be considered in the proceeding.

Federal Communications Commission.

Charles Schott,

Chief, Policy and Rules Division, Mass Media Bureau.

Appendix

1. Pursuant to authority found in sections 4(i), 5(c)(1), 303(g) and (r), and 307(b) of the Communications Act of 1934, as amended, and §§ 0.61, 0.204(b) and 0.283 of the Commission's rules, It is Proposed To Amend the FM Table of Allotments, § 73.202(b) of the Commission's rules and regulations, as set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached.

2. *Showings Required.* Comments are invited on the proposal(s) discussed in the *Notice of Proposed Rule Making* to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed allotment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is allotted and, if authorized, to build a station promptly. Failure to file may lead to denial of the request.

[1] The petition, as filed, requested Channel 230A. However, that channel conflicts with the pending request to substitute Channel 230B1 for Channel 228A at nearby Clearfield, Pennsylvania (RM–5169). Our staff engineering study indicates that Channel 278A can be allocated to Huntingdon in compliance with the Commission's minimum distance separation requirements and utilized at petitioner's preferred site. Therefore, to resolve the conflict with the Clearfield proposal, we shall propose Channel 278A for consideration herein. We note that the channel is currently utilized by Station WKVR–FM, licensed to Juniata College. However, Station WKVR–FM is a Class D secondary station and thus must vacate the channel should its use be sought for a full service facility.

VOL 51 ISS 79 AP 24 1986 UMI

3. *Cut-off Procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of the Commission's rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this *Notice*, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If they are filed later than that, they will not be considered in connection with the decision in this docket.

(c) The filing of a counterproposal may lead the Commission to allot a different channel than was requested for any of the communities involved.

4. **Comments and Reply Comments; Service.** Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the *Notice of Proposed Rule Making* to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply commented shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission's rules.)

5. *Number of Copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public Inspection of Filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, DC

[FR Doc. 86-9133 Filed 4-23-86; 8:45 am]
BILLING CODE 6712-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for Lupinus Aridorum (Scrub Lupine)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: The Service proposes to determine a plant in the pea family, *Lupinus aridorum* (scrub lupine), to be an endangered species pursuant to the Endangered Species Act of 1973 (Act), as amended. This plant has been found at only 15 sites in Orange and Polk Counties, Florida; fewer than 350 individual plants are known to exist. All sites are on privately owned property and are highly desirable for residential and commercial development. The species currently receives no Federal or State protection. Populations have already suffered losses from home building, road construction, off-road vehicle use, and/or land clearing for pastures and other purposes. This rule proposes the Federal protection and the recovery provisions afforded by the Act for *Lupinus Aridorum*. Comments are solicited.

DATES: Comments from all interested parties must be received by June 23, 1986. Public hearing requests must be received by June 9, 1986.

ADDRESSES: Comments and materials concerning this proposal should be sent to the Jacksonville Endangered Species Field Station, U.S. Fish and Wildlife Service, 2747 Art Museum Drive, Jacksonville, Florida 32207. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. David J. Wesley, Endangered Species Field Supervisor, at the above address (904/791-2580, or FTS 946-2580).

SUPPLEMENTARY INFORMATION:

Background

Lupinus aridorum, a member of the pea family (Fabaceae), was first collected by Meislahn in 1900 in Orange County, Florida. It was not collected again until McFarlin found it in Polk County in 1928 and 1937. Renewed efforts by Beckner in the early 1970's, and again in the early 1980's by Beckner and Wunderlin, greatly expanded knowledge of the distribution of the species in both Orange and Polk Counties. Beckner recognized and named the species as distinct in 1982. Prior to that, the plants were variously misidentified by workers as *Lupinus diffusus* and *Lupinus westianus*. Since the plant was described as a full species by Beckner, there have been no alternative taxonomic treatments.

Lupinus aridorum is a biennial or short-lived perennial growing from a soft woody base; the stems are up to one meter (3 feet) tall. Its leaves are obovate-elliptic in shape, 4–7 centimeters (1.5–2.8 inches) long, and 2–4 centimeters (0.8–1.5 inches) wide. The ends of the leaves are rounded, with sharp pointed tips and the bases are rounded; the upper and lower surfaces are covered with silvery hairs. The petioles are 2–4.5 centimeters (0.8–1.8 inches) long; the stipules are very small. The inflorescences are racemose with stalks 4–13 centimeters (1.5–5.2 inches) long, and the flowering portion 4–15 centimeters (1.5–5.8 inches) long. The petals are pale flesh-pink except for the standard, which has a black center surrounded by a maroon-red area. The standard is about 1.5 centimeters (0.5 inch) long, the wing petals about 1.4 centimeters (0.5 inch) long, and the keel petals slightly shorter. The fruit is 2–2.5 centimeters (0.8–1 inch) long, woody, and elliptic in shape, tapering to a sharp apex.

Lupinus aridorum is distinctive in the field, being the only upright pink-flowered lupine in Florida. It is further distinguished from the only other pink-flowered lupine, the prostrate *Lupinus villosus*, by the lack of long, shaggy hairs on stems and leaves, and vestigial (rather than large and conspicuous) stipules. It is most closely related to *Lupinus westianus* of the Florida Panhandle, but differs in flower color, *Lupinus westianus* having blue flowers.

Lupinus aridorum is endemic to central Florida. It is known from Orange County, between the city of Orlando and Walt Disney World, and from Polk County, between Winter Haven and Auburndale. This plant is a sand-pine scrub species that grows primarily in well drained sandy soils of the Lakewood or St. Lucie series. The sands are white or occasionally yellow where the turkey oak woods have invaded the sand pine scrub. The tree layer may be a mixture of *Pinus clausa* (sand pine), *Pinus elliotii* (slash pine), and *Quercus laevis* (turkey oak) (Wunderlin 1982). The scrub layer is usually sparse, possibly as a result of disturbance at many of the sites where the lupine occurs. The most frequent shrubs include *Ceratiola ericoides* (rosemary), *Quercus geminata* (scrub live oak),

Lyonia ferruginea (rusty lyonia), *Palafoxia feayi*, *Ximenia americana* (tallowwood), and scattered *Sabal palmetto* (cabbage palm). The herbaceous layer is dominated by *Aristida stricta* (wiregrass) intermixed with *Pityopsis graminifolia*, *Helianthemum nashii*, *Rhynchospora megalocarpa*, *Bonamia grandiflora*, *Polygonella myriophylla*, and *Opuntia humifusa* (prickly-pear cactus). In the open areas, *Selaginella arenicola* (sand spikemoss) is often common. All currently known populations of *Lupinus aridorum* are on privately owned land. They are in danger of extirpation because they occur in two of the most rapidly growing areas of Florida and the land on which they occur has high potential for development.

On December 15, 1980, the Service published in the **Federal Register** (45 FR 82480) its Review of Plant Taxa for listing as Endangered or Threatened. On November 28, 1983 (48 FR 53640), the Service published a supplement to this review. *Lupinus aridorum*, which had not been named when the 1980 review was published, was listed in the 1983 supplement as a category–2 species (those candidate species for which the Service needs additional information before proceeding with a proposal). The 1985 updated version of the review (September 27, 1985; 50 FR 39526) included *Lupinus aridorum*, as a category–1 species (those candidate species for which the Service possesses information indicating listing is appropriate).

For procedural reasons, plant taxa in the 1980 review, 1983 supplement, and 1985 review are treated as being under petition. Section 4(b)(3)(B) of the Endangered Species Act, as amended in 1982, requires the Service to make findings on pending petitions within 12 months of their receipt. On October 12, 1984, and again on October 11, 1985, the Service made its 12-month finding that listing of *Lupinus aridorum* was warranted, and that although pending proposals had precluded its proposal, expeditous progress was being made to add other species to the list. Biological data, supplied by Wunderlin in 1984, now fully a proposed rule listing *Lupinus aridorum* as endangered. The present proposed rule constitutes the next 12-month finding requirement of Section 4(b)(3)(B) of the Act for this species.

Summary of Factors Affecting the Species

Section 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal Lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in Section 4(a)(1). These factors and their application to *Lupinus aridorum* McFarlin *ex* Beckner (scrub lupine) are as follows:

A. *The present or threatened destruction, modification, or curtailment of its habitat or range. Lupinus aridorum* is known from only 15 sites (Wunderlin 1984). Ten of these are in Orange County between the city of Orlando and Walt Disney World. Orlando has been, and continues to be, one of the most rapidly growing cities in Florida. The sites on which the scrub lupine are growing are prime property for development. Five sites for the scrub lupine are in Polk County, near the towns of Winter Haven and Auburndale. These are also rapidly expanding communities whose growth threatens the continued existence of the scrub lupine.

Altogether, about 339 plants of *Lupinus aridorum* are known to exist, most of which occur in habitats that have already been highly modified, or are threatened by housing developments, road construction and maintenance, conversion to pastureland, pedestrian, horse, and off-road vehicular traffic. All of the presently known habitat is privately owned, and subject to development or modification by the landowners at any time.

B. *Overutilization for commercial, recreational, scientific, or educational purposes.* Although the scrub lupine has not been in commercial trade, it is a large and attractive plant when in bloom and has the potential to be used as a decorative landscape addition. The attractive nature of the scrub lupine and its potential for landscaping use is emphasized by the fact that at one site, where a single large plant (seven feet in daimeter) was growing, the landowner actually divided a fence he was building in order to avoid destroying it (Wunderlin 1984). The scrub lupine is only sparodically collected for scientific purposes.

C. *Disease or predation.* Not applicable.

D. *The inadequacy of existing regulatory mechanisms.* There are currently no State or Federal laws that offer complete protection for this species. *Lupinus aridorum* is covered currently by the Preservation of Native Flora of Florida Act (Section 581.185–187 Florida Statutes). This statute includes prohibition concerning taking, transport, and the sale of listed plants, but provides no habitat protection. The Endangered Species Act would offer needed recovery planning for the species.

E. *Other natural or manmade factors affecting its continued existence.* The scrub lupine is restricted in distribution and occurs in relatively small numbers (largest site has fewer than 100 plants). Such rarity increases species' vulnerability to disturbance and natural disasters.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this species in determining to propose this rule. Based on this evaluation, the preferred action is to list *Lupinus aridorum* as endangered. It occurs in two disjunct population centers (Orlando area and Winter Haven area) and is known from 15 sites. Human population pressures in both the Orlando and Winter Haven areas are increasing annually. Currently all 15 known populations, are on private lands and their continued existence is not secure. Critical habitat is not proposed for the scrub lupine for reasons discussed in the "Critical Habitat" section below.

Critical Habitat

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary designate any habitat of a species which is considered to be critical habitat at the time the species is determined to be endangered or threatened. The Service finds that designation of critical habitat threatened. The Service finds that designation of critical habitat is not prudent for *Lupinus aridorum* at this time. This species is a large plant which bears attractive pink flowers. There are indications that it might be a desirable species for landscaping purposes. In addition, it occurs very near to areas of high human concentration where it could readily be found and vandalized. The identification of the precise sites where populations occur, through publication of critical habitat descriptions and maps in the **Federal Register**, might increase the threats to the species. It would be difficult to safeguard it from curiosity seekers or vandals. In addition, critical habitat benefits apply only when Federal activities and/or Federal lands are involved. The scrub lupine occurs only on privately owned lands where no Federal involvements are known at present. Therefore, there would be no benefits to this species by the designation of critical habitat. Because

VOL 51 ISS 79 AP 24 1986 UMI

of these factors, the Service finds that a designation of critical habitat for *Lupinus aridorum* is not prudent.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Endangered Species Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. Such actions are initiated by the Service following listing. The protection required of Federal agencies and the prohibitions against taking are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402, and are now under revision (see proposal at 48 FR 29990; June 29, 1983). Section 7(a)(4) requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) requires Federal agencies to insure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service. Since all presently known sites for *Lupinus aridorum* are on privately owned land, there will be no effect from the above requirement unless a private activity requires some Federal action, such as funding or issuance of permits.

The Act and its implementing regulations found at 50 CFR 17.61, 17.62, and 17.63 set forth a series of general trade prohibitions and exceptions that apply to all endangered plants. All trade prohibitions of section 9(a)(2) of the Act, implemented by 50 CFR 17.61, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, sell, or offer for sale listed species in interstate or foreign commerce, or to remove such species from Federal lands and reduce them to possession. Certain exceptions can apply to agents of the Service and State conservation agencies. The Act and 50 CFR 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving endangered species under certain circumstances. With respect to *Lupinus aridorum*, it is anticipated that few trade permits would ever be sought or issued since the species is not known to be in cultivation and is scarce in the wild. Requests for copies of the regulations on plants and inquiries regarding them may be addressed to the Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, DC 20240 (703/235–1903).

Public Comments Solicited

The Service intends that any final action resulting from this proposal will be as accurate and as effective as possible. Therefore, any comments or suggestions from the public, other concerned governmental agencies, the scientific community, industry, or any other interested party concerning any aspect of these proposed rules are hereby solicited. Comments particularly are sought concerning:

(1) Biological, commercial trade, or other relevant data concerning any threat (or lack thereof) to this species;

(2) the location of any additional populations of this species and the reasons why any habitat should or should not be determined to be critical habitat as provided by Section 4 of the Act;

(3) additional information concerning the range and distribution of this species; and

(4) current or planned activities in the subject area and their possible impacts on this species.

Final promulgation of the regulation on *Lupinus aridorum* will take into consideration the comments and any additional information received by the Service, and such communications may lead to adoption of a final regulation that differs from this proposal.

The Endangered Species Act provides for a public hearing on this proposal, if requested. Requests must be filed within 45 days of the date of the proposal. Such requests must be made in writing and addressed to the Field Supervisor, Endangered Species Field Station, 2747 Art Museum Drive, Jacksonville, Florida 32207.

National Environmental Policy Act

The Fish and Wildlife Service has determined that an Environmental Assessment, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section 4(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the Federal Register on October 25, 1983 (48 FR 49244).

Proposed Regulation Promulgation

PART 17—[AMENDED]

Accordingly, it is hereby proposed to amend Part 17, Subchapter B of Chapter I, Title 50 of the code of Federal Regulations, as set forth below:

1. The authority citation for Part 17 continues to read as follows:

Authority: Pub. L. 93–205, 87 Stat. 884; Pub. L. 94–359, 90 Stat. 911; Pub. L. 95–632, 92 Stat. 3751; Pub. L. 96–159, 93 Stat. 1225; Pub. L. 97–304, 96 Stat. 1411 (16 U.S.C. 1531 *et seq.*).

2. It is proposed to amend § 17.12(h) by adding the following, in alphabetical order under Fabaceae, to the List of Endangered and Threatened Plants:

§ 17.12 Endangered and threatened plants.

ADVISORY COUNCIL ON HISTORIC PRESERVATION

Programmatic Memorandum of Agreement Regarding the Management of Historic Properties on Lands Affected by the Issuance of Federal Right-of-way by the California State Office, Bureau of Land Management for the San Joaquin Pipeline Project, California

AGENCY: Advisory Council on Historic Preservation.

ACTION: Notice.

SUMMARY: The Advisory Council on Historic Preservation proposes to execute a Programmatic Memorandum of Agreement pursuant to § 800.8 of the Council's regulations, "Protection of Historic and Cultural Properties" (36 CFR Part 800), with the California State Office, Bureau of Land Management, and the California State Historic Preservation Officer providing for the management of historic properties found on lands affected by the issuance of a Federal right-of-way for the San Joaquin Pipeline Project by the California State Office, Bureau of Land Management. The proposed Programmatic Memorandum of Agreement will establish mechanisms by which historic properties will be identified, evaluated and protected in order to meet the requirements of section 106 of the National Historic Preservation Act (16 U.S.C. 470f).

DATE: Comments Due: May 27, 1986.

FOR FURTHER INFORMATION CONTACT: Additional information regarding this Programmatic Memorandum of Agreement is available from the Executive Director, Advisory Council on Historic Preservation, Western Division of Project Review, 730 Simms Street, Room 450, Golden, Colorado 80401, telephone (303) 236–2682.

Dated: April 17, 1986.

John M. Fowler,

Acting Executive Director.

BILLING CODE 4310–10–M

DEPARTMENT OF AGRICULTURE

Office of Grants and Program Systems

National Agricultural Research and Extension Users Advisory Board; Meeting

According to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92–463, 86 Stat. 770–776), the Office of Grants and Program Systems announces the following meeting:

Name: National Agricultural Research and Extension Users Advisory Board.

Date: May 9, 1986.

Time: 8:00 a.m.—12:00 Noon, May 9, 1986.

Place: Picadilly Inn-Airport (8:00–12:00 Noon), 5115 E. McKinley, Fresno, California 93727.

Type of meeting: Open to the public. Persons may participate in the meeting and site visits as time and space permit.

Comments: The public may file written comments before or after the meeting with the contact person below.

Purpose: The Board will be meeting to discuss a variety of issues that characterize the unique nature of California agriculture including the diversity of Fresno County agriculture, soil salinity and drainage problems, dairy issues, and the harvesting and production problems pertaining to perishable commodities. In preparation for this meeting, the Board will make site visits at these locations:

California Agriculture Technology Institute (7:30–12:00 Noon, 5/7/86), Fresno State University, Fresno, California

Broadview Water District (2:00–3:30 p.m., 5/7/86, Mendota, California

Maddox Dairy (8:00–10:00 a.m., 5/8/86), Burrel, California

George Brothers Packing House (10:30–12:00 Noon), 5/8/86, Soltana, California

Kearney Experiment Station (2:15–5:00 p.m., 5/8/86) Parlier, California.

Contact person for agenda and more information: Marshall Tarkington, Executive Secretary, National Agricultural Research and Extension Users Advisory Board; Room 316–A, Administration Building, U.S. Department of Agriculture, Washington, D.C. 20250; telephone [202] 447–3684.

Done in Washington, DC, this 21st day of April 1986.

Clare I. Harris,

Acting Administrator, Office of Grants and Program Systems.

BILLING CODE 3410–GT–M

Soil Conservation Service

Oil Springs School Flood Prevention RC&D Measure, Kentucky

AGENCY: Soil Conservation Service, USDA.

ACTION: Notice of a Finding of No Significant Impact.

SUMMARY: Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); The Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Oil Springs School Flood prevention RC&D Measure, Johnson County, Kentucky.

FOR FURTHER INFORMATION CONTACT: Randall W. Giessler, State Conservationist, Soil Conservation Service, 333 Waller Avenue, Lexington, KY 40540, telephone: 606–233–2740.

SUPPLEMENTARY INFORMATION: The environmental assessment of this Federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Randall W. Giessler, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for reducing flooding of the Oil Springs School, gymnasium, shop building, driveway, parking lot, and a portion of the school yard. The planned works of improvement include: Cleaning out and enlarging 250 feet of an existing diversion ditch, sealing the foundation and walls of the buildings with a water tight sealing system, raising the air vents for crawl spaces under the buildings, placing flood barriers at all entrances, and installing sump pumps.

The Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State and local agencies, and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Randall W. Giessler.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the Federal Register.

(This activity is listed in the Catalog of Federal Domestic Assistance under No. 10.901—Resource Conservation and Development—and is subject to the provisions of Executive Order 12372 which requires intergovernmental consultation with State and local officials.)

Dated: April 18, 1986.

Randall W. Giessler,

State Conservationist.

Postponement of Final Antidumping Duty Determination: Erasable Programmable Read Only Memories (EPROM's) From Japan

AGENCY: International Trade Administration, Commerce.

ACTION: Notice.

SUMMARY: This notice informs the public that we have received requests from all of the respondents in this investigation to postpone the final determination, as permitted in section 735(a)(2)(A) of the Tariff Act of 1930, as amended (the Act) (19 U.S.C. 1673d(a)(2)(A)). Based on these requests, we are postponing our final determination as to whether sales of EPROMs from Japan have occured at less than fair value until not later than July 30, 1986. We are also postponing our public hearing from April 25, 1986 until May 27, 1986.

EFFECTIVE DATE: April 24, 1986.

FOR FURTHER INFORMATION CONTACT: David Mueller, William Kane, or Raymond Busen, Office of Investigations, Import Administration, International Trade Administraion, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–2923, 377–1766, or 377–3464.

SUPPLEMENTARY INFORMATION: On October 28, 1985, we published a notice in the Federal Register (50 FR 43603) that we were initiating, under section 732(c) of the Act, (19 U.S.C. 1673a(c)), an antidumping duty investigation to determine whether EPROMs from Japan were being, or were likely to be, sold at less than fair value. On November 14, 1985, the International Trade Commission determined that there is a reasonable indication that imports of EPROMs are materially injuring a U.S. industry. On March 17, 1986, we published a preliminary determination of sales at less than fair value with respect to this merchandise (51 FR 9067). The notice stated that if the investigation proceeded normally, we would make our final determination by May 27, 1986.

Pursuant to section 735(a)(2)(A) of the Act, all of the respondents in this investigation requested an extension of the final determination date. The respondents are qualified to make such a request because they account for a significant proportion of exports of the merchandise to the United States. If exporters who account for a significant proportion of exports of the merchandise under investigation properly request an extension after an affirmative preliminary determination, we are required, absent compelling reasons to the contrary, to grant the requests. Accordingly, we are granting the requests and postponing our final determination until not later than July 30, 1986.

Public Comment

In accordance with section 353.47 of our regulations (19 CFR 353.47), if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 1 p.m. on May 27, 1986, at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistance Secretary, Import Administration, Room B–099, at the above address within 10 days of this notice's publication. Requests should contain (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs in at least 10 copies must be submitted to the Deputy Assistant Secretary by May 20, 1986. Oral presentations will be limited to issues raised in the briefs. All written views should be filed in accordance with 19 CFR 353.46, within 30 days of publication of this notice, at the above address in at least 10 copies.

This notice is published pursuant to section 735(d) of the Act.

The United States International Trade Commission is being advised of this postponement, in accordance with section 735(d) of the Act.

Gilbert B. Kaplan,

Deputy Assistance Secretary for Import Administration.

April 17, 1986.

BILLING CODE 3510–DS–M

[C–538–509]

Extension of the Deadline for Final Countervailing Duty Determination and Rescheduling of the Public Hearing; Porcelain-On-Steel Cooking Ware From Taiwan

AGENCY: Import Administration, Commerce.

ACTION: Notice.

SUMMARY: Based upon the request of petitioners, the Porcelain-On-Steel Committee of the Cookware Manufacturers Association and the General Housewares Corporation, the Department of Commerce is extending the deadline for its final determination in the countervailing duty investigation of porcelain-on-steel cooking ware from Taiwan to correspond to the date of the final determination in the antidumping investigation of the same product pursuant to section 705(a)(1) of the Tariff Act of 1930, as amended by section 606 of the Trade and Tariff Act of 1984 (Pub. L. 98–573). In addition, the Department of Commerce is rescheduling the public hearing.

EFFECTIVE DATE: April 24, 1986.

FOR FURTHER INFORMATION CONTACT: Laurel LaCivita or Mary Martin, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street

VOL 51 ISS 79 AP 24 1986 UMI

and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 377–0189 or 377–2830.

SUPPLEMENTARY INFORMATION:

Case Histories

On December 4, 1985, we received antidumping and countervailing duty petitions filed by the Porcelain-On-Steel Committee of the Cookware Manufacturers Association and the General Housewares Corporation on porcelain-on-steel cooking ware from Taiwan.

In compliance with the filing requirements of section 353.36 of our regulations (19 CFR 353.36), the antidumping petition alleged that imports of porcelain-on-steel cooking ware from Taiwan are being, or are likely to be, sold in the United States at less than fair value within the meaning of section 731 of the Tariff Act of 1930, as amended (the Act), and that these imports materially injure, or threaten material injury to, a U.S. industry.

In compliance with the filing requirements of section 355.26 of our regulations (19 CFR 355.26), the countervailing duty petition alleged that manufacturers, producers, or exporters in Taiwan of porcelain-on-steel cooking ware directly or indirectly receive benefits which constitute subsidies within the meaning of section 701 of the act, and that these imports materially injure, or threaten material injury to, a U.S. industry.

We found that the petitions contained sufficient grounds on which to initiate antidumping and countervailing duty investigations, and on December 24, 1985, we initiated such investigations (50 FR 53353 and 50 FR 53354). On February 27, 1986, we issued a negative preliminary determination in the countervailing duty investigation (51 FR 7932). The preliminary determination in the antidumping investigation will be made on or before May 13, 1986.

On March 10, 1986, petitioners filed a request for extension of the deadline date for the final determination in the countervailing duty investigation to correspond with the date of the final determination in the antidumping investigation.

Section 705(a)(1) of the Tariff Act of 1930, as amended by section 606 of the Trade and Tariff Act of 1984, provides that when a countervailing duty investigation is "initiated simultaneously with an (antidumping) investigation . . . which involves imports of the same class or kind of merchandise from the same or other countries, the administering authority, if requested by the petitioner, shall extend the date of the final determination (in the countervailing duty investigation) to the date of the final determination" in the antidumping investigation (19 U.S.C. 1671(a)(1)). Pursuant to this provision, the Department is granting an extension of the deadline for the final determination in the countervailing duty investigation of porcelain-on-steel cooking ware from Taiwan to July 28, 1986, the current deadline for the final determination in the antidumping investigation.

In addition, due to the extension of the final determination in the countervailing duty investigation, the Department of Commerce is rescheduling the date of the public hearing, originally set for April 3, 1986. This hearing, which was requested by the petitioners, will now be held at 10:00 a.m. on May 15, 1986, at the U.S. Department of Commerce, Room 1851, 14th Street and Constitution Ave., NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room B–099, at the above address within 10 days of the publication of this notice.

Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, at least 10 copies of pre-hearing briefs must be submitted to the Deputy Assistant Secretary by May 8, 1986. Oral Presentations will be limited to issues raised in the briefs.

In accordance with 19 CFR 355.33(d) and 19 CFR 355.34, written views will be considered if received within 10 days after the hearing transcript is available.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

April 16, 1986.

BILLING CODE 3510–DS–M

[C–580–602]

Preliminary Negative Countervailing Duty Determination; Certain Stainless Steel Cooking Ware From the Republic of Korea

AGENCY: Import Administration, Commerce.

ACTION: Notice.

SUMMARY: We preliminarily determine that no benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in the Republic of Korea (Korea) of certain stainless steel cooking ware. The estimated net subsidy is 0.232 percent *ad valorem*. This rate is *de minimis*, and therefore our preliminary countervailing duty determination is negative. We have notified the United States International Trade Commission (ITC) of our determination.

If this investigation proceeds normally, we will make our final determination by June 30, 1986.

EFFECTIVE DATE: April 24, 1986.

FOR FURTHER INFORMATION CONTACT: Rick Herring, David Levine, or Gary Taverman, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–0187, 377–8498, or 377–0161.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based upon the questionnaire responses, we preliminarily determine that the following programs are countervailable:

- Short-Term Export Financing under the Export Financing Regulations and Foreign Trade Financing Regulations;
- Tax Incentives for Exporters under Articles of the "Act Concerning the Regulation of Tax Reduction and Exemption"; and
- Unlimited Deduction of Overseas Entertainment Expenses under Article 18–2 of the Corporation Tax Law.

We preliminarily determine the estimated net subsidy to be 0.232 percent *ad valorem*. Although we have determined these programs to be countervailable, the respondents received *de minimis* benefits during the review period, calendar year 1985. Therefore, we preliminarily determine that no benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Korea of certain stainless steel cooking ware.

Case History

On January 21, 1986, we received a petition filed in proper form by the Fair Trade Committee of the Cookware Manufacturers Association on behalf of the U.S. industry which manufactures certain stainless steel cooking ware. In compliance with the filing requirements of section 355.26 of the Commerce Regulations (19 CFR 355.26), the petition alleged that manufacturers, producers, or exporters in Korea of certain stainless steel cooking ware receive, directly or indirectly, subsidies within the meaning of section 701 of the Act, and that these imports materially injure, or threaten material injury to, a U.S. industry.

We found that the petition contained sufficient grounds upon which to initiate a countervailing duty investigation, and on February 10, 1986, we initiated an investigation (51 FR 6019). We stated that we expected to issue a preliminary determination by April 16, 1986.

Since Korea is a "country under the Agreement" within the meaning of section 701(b) of the Act, an injury determination is required for this investigation. Therefore, we notified the ITC of our initiation. On March 4, 1986, the ITC determined that there is a reasonable indication that imports of certain stainless steel cooking ware from Korea materially injure, or threaten material injury to, a U.S. industry (51 FR 9541).

We presented questionnaires concerning the petitioner's allegations to the government of Korea at its embassy in Washington, DC on February 20, 1986. We received the responses to our questionnaires on March 26, 1986. There are seven Korean producers of the subject merchandise which accounted for over 75 percent of the exports to the United States during the period of review. They are Kyung Dong Industrial Company, Ltd., Namil Metal Company, Ltd., Il Shin Company, Ltd., Hai Dong Stainless Ind. Co., Woo Sung Company, Ltd., Dae Sung Industrial Company, Ltd., and Bum Koo Corporation. For the producers identified above, these trading companies account for substantially all of their trading company sales of the subject merchandise to the United States during the review period: Sammi Corporation, Daewoo Corporation, Korea Trading International Company, Samsung Company, Ltd., Haitali International, Inc., Sunkyong Company, Ltd., Daewonsa Corporation, Hyundai Corporation, G.I. Corporation, Ssang Yong Corporation, and Dong Chang Company.

Scope of Investigation

The products covered by this investigation are all non-electric cooking ware of stainless steel which may have one or more layers of aluminum, copper, or carbon steel for more even heat distribution. These products are provided for in item number 653.94 of the *Tariff Schedules of the United States* (*TSUS*). The products covered by this investigation are skillets, fry pans, omelette pans, sauce pans, double boilers, stock pots, sauce pots, dutch ovens, casseroles, steamers, and other stainless steel vessels, all for cooking on stove top burners, except tea kettles. Excluded from the scope of investigation are stainless steel oven ware and stainless steel kitchen ware, which also are included under the 653.94 *TSUS* classification.

Analysis of Programs

Throughout this notice we refer to certain general principles applied to the facts of the current investigation. These general principles are described in the "Subsidies Appendix" attached to the notice of "Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina: Final Affirmative Countervailing Duty Determination and Order," which was published in the Federal Register on April 28, 1984 (49 FR 18006).

Consistent with our practice in preliminary determinations, where a response to an allegation denies the existence of a program, receipt of benefits, or eligibility of a company or industry under a program, and the Department has no persuasive evidence showing that the response is incorrect, we accept the response for purposes of the preliminary determination. All such responses are subject to verification. If the response cannot be supported at verification, and the program is otherwise countervailable, the program will be considered a subsidy in the final determination.

For purposes of this preliminary determination, the period for which we are measuring subsidies (the review period) is calendar year 1985. Based upon our analysis of the petition and the responses to our questionnaires, we preliminarily determine the following:

I. Programs Preliminarily Determined To Be Countervailable

We preliminarily determine that the following programs provide countervailable benefits to manufacturers, producers, or exporters in Korea of certain stainless steel cooking ware:

A. Short-Term Export Financing

Petitioner alleges that producers and exporters in Korea of certain stainless steel cooking ware receive preferential short-term export financing under the Export Financing Regulations.

The Export Financing Regulations were promulgated on February 25, 1982. On October 17, 1985, these regulations were terminated with the creation of the Foreign Trade Financing Regulations. These latter regulations provide the guidelines for short-term financing. Export financing takes the form of loans on bills related to export sales transactions. Eligibility is based upon presentation of export documents or upon past export performance. Export loans based on past performance may not exceed 90 days, while loans based on specific export documents may not exceed 180 days and are limited to the terms of the applicable letter of credit. During our review period, the rate of interest charged on short-term export financing remained constant at ten percent, which was the ceiling established by the governor of the Bank of Korea.

Because only exporters are eligible for these loans, we determine that they are countervailable to the extent that they are provided at preferential rates. As specified in the Subsidies Appendix, we used the most appropriate national average commercial method of short-term financing as the benchmark rate for short-term loans.

During 1985, the interest rate on domestic short-term loans was allowed to vary from 10 to 11.5 percent. During our verification of *Offshore Platform Jackets and Piles from Korea*, we were told by the Bank of Korea, the Korea Development Bank, and two commercial banks that, although the interest rate is allowed to vary from 10 to 11.5 percent, commercial banks will usually charge the ceiling rate of 11.5 percent on all their lending. Therefore, we preliminarily determine that the average interest rate for short-term domestic financing is 11.5 percent. Comparing that benchmark interest rate to the interest rate charged on short-term export loans, we preliminarily determine that the export loans are provided on preferential terms, and thus constitute an export subsidy.

To determine the benefit provided under this program, we based our calculations on total export loans because the companies were unable to segregate specific loans to the products under investigation. We calculated the total amount of interest the companies would have paid at 11.5 percent on their short-term export loans and subtracted from that amount the actual amount of interest the companies paid at ten percent on their short-term export loans. We then allocated the difference over total export sales to calculate an estimated subsidy in the amount of 0.224 percent *ad valorem*.

B. Tax Incentives for Exporters

Petitioner alleges that manufacturers and exporters of the subject merchandise receive tax benefits under Articles 22, 23, and 24 of the "Act Concerning the Regulation of Tax Reduction and Exemption" which provide for the deduction from taxable

VOL 51 ISS 79 AP 24 1986 UMI

income of a number of different reserves covering export losses, overseas market development, and price fluctuation losses.

Under Article 22, a corporation may establish a reserve amounting to one percent of foreign exchange earnings, or 50 percent of net income in the applicable period, whichever is smaller. If certain export losses occur, they are offset from the reserve fund. If there are no offsets for export losses, the reserve is returned to the income account and taxed, after a one-year grace period, over a three-year period.

Under Article 23 governing overseas market development, a corporation may establish a reserve fund amounting to one percent of its foreign exchange earnings in the export business for the respective business year. Expenses incurred in developing overseas markets are offset from the reserve fund. Like the export loss reserve fund, if there are no offsets for expenses, the reserve is returned to the income account and taxed, after a one-year grace period, over a three-year period.

A price fluctuation reserve fund may be established under Article 24. A corporation may establish reserves equivalent to five percent of the book value of the products and works in progress which will be exported by the close of the business year. This reserve may be used to offset losses incurred from the fluctuation of prices for export goods by returning an amount equivalent to the losses to the income account. If not so utilized, the reserve is returned to the income account the following business year.

The balance in all three reserve funds is not subject to corporate tax, although all moneys in the reserve funds are eventually reported as income and subject to corporate tax either when they offset export losses or when the one-year grace period expires.

We preliminarily determine that these export reserve programs confer benefits which constitute export subsidies because they provide a deferral, contingent upon exports, of direct taxes. Because these export reserve funds constitute a deferral of tax liabilities, we treat the tax savings on these funds as short-term interest-free loans. Accordingly, we have quantified the benefits from the reserve funds by calculating the amount of tax savings and applying a rate of interest which the firm would have had to pay for a short-term loan (11.5 percent). Using this benchmark, we calculated an estimated subsidy of 0.005 percent *ad valorem*.

C. Unlimited Deduction of Overseas Entertainment Expenses

Petitioner alleges that producers and exporters of the subject merchandise receive tax benefits in the form of entertainment expense deductions.

Under Article 18–2 of the Corporation Tax Act and supporting legislation, entertainment expenses for domestic clients and foreign clients ("overseas entertainment expenses") are eligible to be deducted from taxable income. The amount which can be deducted for domestic entertainment expenses is subject to a ceiling according to an established formula and depending on the amount of any overseas entertainment expenses claimed. There is no cap on overseas entertainment expenses. Because entertainment expense deductions are unlimited only for overseas clients, we preliminarily determine that this program confers benefits which constitute export subsidies, to the extent that the overseas expenses claimed are greater than those which would have been allowed using the domestic cap formula.

To calculate the benefit from this program for the review period, we took the amount of overseas entertainment expenses claimed in the companies' tax returns filed in 1985 exceeding the domestic cap. For those companies which did not provide their domestic cap amount, we took the amount of overseas entertainment expenses claimed exceeding the amount of domestic entertainment expenses claimed. We then divided that amount by the total value of exports in 1985, and calculated an estimated subsidy of 0.003 percent *ad valorem*.

II. Programs Preliminarily Determined Not To Be Used

We preliminarily determine that manufacturers, producers, or exporters in Korea of certain stainless steel cooking ware did not use the following programs:

A. Tariff Reductions on Plant and Equipment

Petitioner alleges that certain Korean manufacturers receive special tariff reductions on imported plant and equipment. Article 28 of the Customs Law allows for reductions of import duties for certain industries on particular items designated by the Ministry of Finance. According to the responses of the government of Korea and the Korean companies, producers of the subject merchandise are not eligible for tariff reductions because Article 28 specifies that only machinery used in the production of machines and machine parts, and machinery used in the manufacture of electronic goods are eligible for this program.

B. Free Export Zone Program

Petitioner alleges that firms located in free export zones receive certain tax incentives such as exemptions on corporate, residence, defense, and property taxes. According to the responses of the government of Korea and the Korean companies, no stainless steel cooking ware producers or trading companies selling cooking ware are located in the free export zones.

C. Export Credit Financing from the Export-Import Bank of Korea

Petitioner alleges that producers and exporters of certain stainless steel cooking ware may receive below market financing for pre-export projects and export transactions. Petitioner further alleges that the National Investment Fund (NIF) finances exports on a deferred payment basis. According to the response of the government of Korea, financing from the Export-Import Bank of Korea (KXMB) is only provided for large capital goods, and no such financing is provided for exports of consumer goods such as cooking ware. The only source of NIF deferred payment export loans is through the export credit financing program of the KXMB, and cooking ware exports are not eligible for such financing.

D. Export Guarantees from the KXMB

Petitioner alleges that producers of the subject merchandise receive advance payment export guarantees and performance export guarantees from the KXMB. According to the response of the government of Korea, the KXMB only provides such guarantees for exports of large capital goods and projects, and no guarantees are offered for sales of consumer goods such as stainless steel cooking ware.

E. Accelerated Depreciation

Petitioner alleges that producers of the subject merchandise receive accelerated depreciation benefits. Article 25 of the "Act Concerning the Regulation of Tax Reduction and Exemption" permits a firm earning more than 50 percent of its total proceeds in a business year from foreign exchange to increase its normal depreciation by 30 percent. If the corporation has received less than 50 percent of its total proceeds from foreign exchange, it can still claim some accelerated depreciation, determined by a formula based on the firm's foreign exchange earnings and total business earnings. According to the responses, none of the firms investigated used accelerated depreciation under this program during the review period.

Verification

In accordance with sections 776(a) of the Act, we will verify data used in making our final determination.

ITC Notification

In accordance with section 703(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all non-privileged and non-confidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration.

If our final determination is affirmative, the ITC will determine whether these imports materially injure, or threaten material injury to a U.S. industry within 75 days after the Department makes its final determination.

Public Comment

In accordance with § 355.35 of the Commerce Regulation, if requested, we will hold a public hearing to afford interested parties an opportunity to comment on this preliminary determination at 10:00 a.m. on June 4, 1986 at the U.S. Department of Commerce, Room 3708, 14th Street and Constitution Avenue NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room B099, at the above address within 10 days after publication of this notice. Requests should contain: (1) The party's name, address and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, prehearing briefs with at least 10 copies of the confidential version and seven copies of the non-confidential version must be submitted to the Deputy Assistant Secretary by May 1986. Oral presentations will be limited to issues raised in the briefs. In accordance with 19 CFR 355.33(d) and 19 CFR 355.34, written views will be considered if received not less than 30 days before the final determination or, if a hearing is held, within 10 days after the hearing transcript is available.

This notice is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)).

Gilbert B. Kaplan,
Deputy Assistant Secretary for Import Administration

April 16, 1986.

[C–583–604]

Preliminary Negative Countervailing Duty Determination; Certain Stainless Steel Cooking Ware from Taiwan

AGENCY: Import Administration, Commerce.

ACTION: Notice.

SUMMARY: We preliminarily determine that no benefits which constitute subsidies within the meaning of the countervailing duty law are being provided to manufacturers, producers, or exporters in Taiwan of certain stainless steel cooking ware. The estimated net subsidy is 0.005 percent *ad valorem*. This rate is *de minimis*, and therefore our preliminary countervailing duty determination is negative. We have notified the United States International Trade Commission (ITC) of our determination.

If this investigation proceeds normally, we will make our final determination by June 30, 1986.

EFFECTIVE DATE: April 24, 1986.

FOR FURTHER INFORMATION CONTACT: Jack Davies or Barbara Tillman, Office of Investigations, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 377–1785 or 377–2438.

SUPPLEMENTARY INFORMATION:

Preliminary Determination

Based upon the questionnaire responses, we preliminarily determine that the Export Loss Reserves program is countervailable. We preliminarily determine the estimated net subsidy to be 0.005 percent *ad valorem*. Although we have determined this program to be countervailable, the respondents received *de minimis* benefits during the review period, calendar year 1985. Therefore, we preliminarily determine that no benefits which constitute subsidies within the meaning of section 701 of the Tariff Act of 1930, as amended (the Act), are being provided to manufacturers, producers, or exporters in Taiwan of certain stainless steel cooking ware.

Case History

On January 21, 1986, we received a petition filed in proper form by the Fair Trade Committee of the Cookware Manufacturers Association on behalf of the U.S. industry which manufactures certain stainless steel cooking ware. In compliance with the filing requirements of § 355.26 of the Commerce Regulations (19 CFR 355.26), the petition alleged that manufacturers, producers, or exporters in Taiwan of certain stainless steel cooking ware receive, directly or indirectly, subsidies within the meaning of section 701 of the Act, and that these imports materially injure, or threaten material injury to, a U.S. industry.

We found that the petition contained sufficient grounds upon which to initiate a countervailing duty investigation, and on February 10, 1986, we initiated the investigation (51 FR 6020). We stated that we expected to issue a preliminary determination by April 16, 1986.

Since Taiwan is entitled to an injury determination under section 701(b) of the Act, the ITC is required to determine whether imports of the subject merchandise from Taiwan materially injure, or threaten material injury to, a U.S. industry. Therefore, we notified the ITC of our initiation. On March 4, 1986, the ITC determined that there is a reasonable indication that imports of certain stainless steel cooking ware from Taiwan materially injure a U.S. industry (51 FR 9541).

We presented questionnaires concerning the petitioner's allegations to the American Institute in Taiwan in Washington, DC on February 20, 1986. We received responses to the questionnaires on March 13, 19, and 31, 1986. There are five producers of the subject merchandise in Taiwan which accounted for substantially all of the exports to the United States during the review period: Golden Lion Metal Industry Co., Ltd.; Song Far Co., Ltd.; Lyi Mean Industry Co., Ltd.; Crown Manufacturing Co., Ltd.; and First Stainless Steel Industry Co., Ltd. In addition, there are seven trading companies which exported 77 percent of the subject merchandise exported by these five producers to the United States during our review period. These trading companies are D&J Industrial Co., Ltd.; Jack-Tom Industrial Co., Ltd.; Transmark International Corp.; Fairview International Corp.; Collins Co., Ltd.; Atico Corp.; and Pan-Orient Industrial Corporation.

Scope of Investigation

The products covered by this investigation are all non-electric cooking

VOL 51 ISS 79 AP 24 1986 UMI

ware of stainless steel which may have one or more layers of aluminum, copper, or carbon steel for more even heat distribution. These products are provided for in item number 653.94 of the *Tariff Schedules of the United States* (TSUS). The products covered by this investigation are skillets, fry pans, omelette pans, sauce pans, double boilers, stock pots, sauce pots, dutch ovens, casseroles, steamers, and other stainless steel vessels, all for cooking on stove top burners, except tea kettles. Excluded from the scope of investigation are stainless steel oven ware and stainless steel kitchen ware, which are also included under the 653.94 TSUS classification.

Analysis of Programs

Throughout this notice, we refer to certain general principles applied to the facts of the current investigation. These principles are described in the "Subsidies Appendix" attached to the notice of "Cold-Rolled Carbon Steel Flat-Rolled Products from Argentina; Final Affirmative Countervailing Duty Determination and Countervailing Duty Order," which was published in the April 26, 1984, issue of the Federal Register (49 FR 18006).

Consistent with our practice in preliminary determinations, where a reponse to an allegation denies the existence of a program, receipt of benefits, or eligibility of a company or industry under a program, and the Department has no persuasive evidence showing that the response is incorrect, we accept the response for purposes of the preliminary determination. All such responses are subject to verification. If the response cannot be supported at verification, and the program is otherwise countervailable, the program will be considered a subsidy in the final determination.

For purposes of this preliminary determination, the period for which we are measuring subsidies (the review period) is calendar year 1985. Based upon our analysis of the petition and the responses to our questionnaires, we preliminarily determine the following:

I. Program Preliminarily Determined to be Countervailable

We preliminarily determine that the following program provides countervailable benefits to manufacturers, producers, or exporters in Taiwan of certain stainless steel cooking ware:

Export Loss Reserves

Article 31 of the Statute for Encouragement of Investment (SEI) permits exporters to establish an export loss reserve of up to one percent of the previous year's export exchange settlement to be used exclusively for compensating export losses. Companies treat the export loss reserve as a business expense and deduct it from taxable income in one year, then balance the account and carry the reserve funds forward as taxable income for the next year. Song Far Industry Co., Ltd., a producer of certain stainless steel cooking ware, reported that it used this program during the review period.

Because export loss reserves are contingent on export sales, we preliminarily determine that it confers a benefit which constitutes an export subsidy. To calculate the benefit, we treated the tax savings from the export loss reserve as a one-year interest-free loan. We compared the interest-free rate with the maximum short-term lending rate set by the Central Bank, multiplied the difference by the amount of the tax savings, then allocated the benefit over the value of Song Far's 1985 exports of all products. The estimated net subsidy is 0.005 percent *ad valorem*.

II. Programs Preliminarily Determined Not to be Used

We preliminarily determine that manufacturers, producers, or exporters in Taiwan of certain stainless steel cooking ware do not use the following programs:

A. Preferential Export Financing

The Export Loan Discount Regulations of the Central Bank of China permit registered exporters to apply for low-cost export loans upon presentation of a letter of credit. Authorized commercial banks provide export loans at normal commercial rates, then apply for interest rate reductions from the Central Bank. If the Central Bank approves the reduction, commercial banks correspondingly reduce the lending rate to the exporters. The responses stated that none of the companies under investigation obtained export financing under this program during the review period.

B. Preferential Income Tax Ceiling–22 Percent

Article 15 of the SEI permits capital-intensive and/or technology-intensive enterprises engaged in the basic metal production industry, heavy machinery industry, or petrochemical industry to use a marginal tax rate of 22 percent instead of the 35 percent rate required by Taiwan's income tax law. The responses stated that none of the companies under investigation claimed the 22 percent income tax rate during the review period.

C. Accelerated Depreciation and Tax Holiday

Article 6 of the SEI allows newly established "productive enterprises" either to use accelerated depreciation on fixed assets, machinery, and equipment or to select a five-year holiday on corporate income taxes. In addition, expanding firms may participate in a four-year tax holiday on increased profits from expansion or a rapid depreciation of newly purchased buildings or equipment. The responses stated that none of the companies under investigation applied for or received benefits under Article 6 of the SEI during the review period.

D. Duty Exemptions and Deferrals on Imported Equipment

Article 21 of the SEI allows productive enterprises to pay import duties and dues on selected capital equipment in a series of installments beginning one year from the date of importation. In addition, qualified enterprises are exempt from import duties on selected machinery and equipment used for the establishment or expansion of an approved project or for research and development. The responses stated that none of the companies under investigation used duty exemptions or deferrals on imported equipment during the review period.

E. Preferential Long-Term Loans

Article 84 of the SEI permits the Executive Yuan to establish and administer a special development fund to promote investments of interest to national economic development. The response stated that none of the companies under investigation obtained Article 84 loans or other assistance under Article 84 during the review period.

Verification

In accordance with section 776(a) of the Act, we will verify the data used in making our final determination.

ITC notification

In accordance with section 703(f) of the Act, we will notify the ITC of our determination. In addition, we are making available to the ITC all non-privileged and non-confidential information relating to this investigation. We will allow the ITC access to all privileged and confidential information in our files, provided the ITC confirms that it will not disclose such information, either publicly or under an administrative protective order, without the written consent of the Deputy Assistant Secretary for Import Administration.

If our final determination is affirmative, the ITC will determine whether these imports materially injure, or threaten material injury to, a U.S. industry within 75 days after the Department makes its final affirmative determination.

Public comment

In accordance with section 355.35 of the Commerce Regulations, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on this preliminary determination at 10:00 a.m. on May 29, 1986, at the U.S. Department of Commerce, Room 1414, 14th Street and Constitution Avenue, NW., Washington, DC 20230. Individuals who wish to participate in the hearing must submit a request to the Deputy Assistant Secretary for Import Administration, Room B–099, at the above address within 10 days of the publication of this notice. Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; (3) the reason for attending; and (4) a list of the issues to be discussed. In addition, pre-hearing briefs with at least 10 copies of the confidential version and seven copies of the non-confidential version must be submitted to the Deputy Assistant Secretary by May 23, 1986. Oral presentations will be limited to issues raised in the briefs.

In accordance with 19 CFR 355.33(d) and 19 CFR 355.34, written views will be considered if received not less than 30 days before the final determination or, if a hearing is held, within 10 days after the hearing transcript is available.

This notice is published pursuant to section 703(f) of the Act (19 U.S.C. 1671b(f)).

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–M

International Trade Administration,

Short Supply Review on Certain Ungalvanized Steel Rope; Request for Comments

AGENCY: International Trade Administration/Import Administration, Commerce.

ACTION: Notice and request for comments.

SUMMARY: The Department of Commerce hereby announces its review of a request for a short supply determination under Article 8 of the U.S.-EC Arrangement on Certain Steel Products with respect to certain ungalvanized steel wire rope.

EFFECTIVE DATE: Comments must be submitted no later than ten days from publication of this notice.

ADDRESS: Send all comments to Nicholas C. Tolerico, Acting Director, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, 14th and Constitution Ave., NW., Washington, DC 20230, Room 3099.

FOR FURTHER INFORMATION CONTACT: Richard O. Weible, Office of Agreements Compliance, Import Administration, U.S. Department of Commerce, 14th and Constitution Ave., NW., Washington, DC 20230, Room 3099, (202) 377–0159.

SUPPLEMENTARY INFORMATION: Article 8 of the U.S.-EC Arrangement on Certain Steel Products provides that if the U.S. ". . . determines that because of abnormal supply or demand factors, the U.S. steel industry will be unable to meet demand in the USA for a particular product (including substantial objective evidence such as allocation, extended delivery periods, or other relevant factors), an additional tonnage shall be allowed for such product . . . ."

We have received a short supply request for certain ungalvanized, high strength steel wire rope that is used as hoist lines for certain tower cranes, with a nominal diameter ranging from 18 to 22 mm.

Any party interested in commenting on this request should send written comments as soon as possible, and no later than ten days from publication of this notice. Comments should focus on the economic factors involved in granting or denying this request.

Commerce will maintain this request and all comments in a public file. Anyone submitting business proprietary information should clearly identify that portion of their submission and also provide a non-proprietary submission which can be placed in the public file. The public file will be maintained in the Central Records Unit, Import Administration, U.S. Department of Commerce, Room B–099 at the above address.

Gilbert B. Kaplan,

Deputy Assistant Secretary for Import Administration.

April 21, 1986.

BILLING CODE 3510–DS–M

National Oceanic and Atmospheric Administration

Marine Mammals; Application for Permit; Dr. James R. Gilbert (P274B)

Notice is hereby given that an Applicant has applied in due form for a Permit to take marine mammals as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361–1407), and the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR Part 216).

1. Applicant:

a. Name Dr. James R. Gilbert, Associate Professor of Wildlife Resources.

b. Address 216 Nutting Hall, Orono, Maine 04469.

2. Type of Permit: Scientific Research.

3. Name and Number of Marine Mammals: Phoca vitulina concolor (Western North Atlantic Harbor Seal) 150.

4. Type of Take: Capture, Double Flipper Tag and Release.

5. Location of Activity: Mid-Coast Maine Bays, primarily Blue Hill, Jericho, and Penobscot Bays.

6. Period of Activity: 5 Years.

Concurrent with the publication of this notice in the Federal Register, the Secretary of Commerce is forwarding copies of this application to the Marine Mammal Commission and the Committee of Scientific Advisors.

Written data or views, or requests for a public hearing on this application should be submitted to the Assistant Administrator for Fisheries, National Marine Fisheries Service, U.S. Department of Commerce, Washington, DC 20235, within 30 days of the publication of this notice. Those individuals requesting a hearing should set forth the specific reasons why a hearing on this particular application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries.

All statements and opinions contained in this application are summaries of those of the Applicant and do not necessarily reflect the views of the National Marine Fisheries Service.

Documents submitted in connection with the above application are available for review in the following offices:

Assistant Administrator for Fisheries, National Marine Fisheries Service, 3300 Whitehaven Street, NW., Washington, DC;

Director, Northeast Region, National Marine Fisheries Service, 14 Elm Street, Federal Building, Gloucester, Massachusetts 01930.

BILLING CODE 3510-22-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjusting the Import Restraint Limit for Certain Wool Textile Products Produced or Manufactured in Yugoslavia

April 18, 1986.

The Chairman of the Committee for the Implementation of Textile Agreements (CITA), under the authority contained in E.O. 11651 of March 3, 1972, as amended, has issued the directive published below to the Commissioner of Customs to be effective on April 25, 1986. For further information contact Eve Anderson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212.

Background

On December 20, 1985 a notice was published in the **Federal Register** (50 FR 52833), which announced, among other things, the establishment, under the Bilateral Textile Agreement of October 26 and 27, 1978, as amended and extended, between the Governments of the United States and the Socialist Federal Republic of Yugoslavia, of a specific limit for men's boys' and wool and man-made fiber suits in Category 443/643, produced or manufactured in Yugoslavia and exported during the twelve-month period which began on January 1, 1986 and extends through December 31, 1986. Under the terms of the bilateral agreement the sublimit for Category 443 is being reduced by 497 dozen, from 8,365 dozen to 7,868 dozen, to account for carryforward used in the previous year.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983, (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

April 18, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner: This directive amends, but does not cancel, the directive of December 20, 1985, which directed you to prohibit entry of certain wool and man-made fiber textile products, produced or manufactured in Yugoslavia.

Effective on April 25, 1986, the directive of December 20, 1985 is hereby amended to include the following adjusted sublimit for wool textile products in Category 443:

Category	Adjusted restraint limit [1]
443/643...	21,349 dozen of which not more than 7,868 dozen shall be in Category 443.

[1] The limits have not been adjusted to reflect any imports exported after December 31, 1985.

The Committee for the Implementaton of Textile Agreements has determined that this acton falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553 (a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-DR-M

Requesting Public Comment on Bilateral Textile Consultations With the Government of India on Category 641

April 18, 1986.

On March 31, 1986, the Government of the United States requested consultations with the Government of India with respect to Category 641 (women's, girls' and infants' woven blouses of man-made fibers). This request was made on the basis of the bilateral agreement of December 21, 1982, as amended, between the Governments of the United States and India relating to trade in cotton, wool and man-made fiber textiles and textile products. The agreement provides for consultations when the orderly development of trade between the two countries may be impeded by imports due to market distuption, or the threat thereof.

The purpose of this notice is to advise that, pending agreement on a mutually satisfactory solution concerning this category, the Government of the United Sates has decided to control imports during the ninety-day consultation period which began on March 31, 1986 and extends through June 28, 1986 at a level of 187,411 dozen. If no solution is agreed upon in consultations between the two governments, CITA, pursuant to the agreement, may establish a prorated specific limit of 485,876 dozen for Category 641 for the entry and withdrawal from warehouse for consumption of textile products, produced or manufactured in India and exported during the period beginning on June 29, 1986 and extending through December 31, 1986.

In the letter published below, the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to prohibit imports of man-made fiber textile products in Category 641, produced or manufactured in India and exported during the ninety-day period which began on March 31, 1986 and extends through June 28, 1986 in excess of the established limit. In the event the limit established for the ninety-day period is exceeded, such excess amounts, if allowed to enter, may be charged to the level established during the subsequent restraint period.

A summary market statement for this category follows this notice.

Anyone wishing to comment or provide data or information regarding the treatment of Category 641 under the agreement with India, or on any other aspect thereof, or to comment on domestic production or availability of textile products included in the category, is invited to submit such comments or information in ten copies to Mr. Ronald I. Levin, Acting Chairman, Committee for the Implementation of Textile Agreements, International Trade Administration, U.S. Department of Commerce, Washington, DC 20230. Because the exact timing of the consultations is not yet certain, comments should be submitted promptly. Comments or information submitted in response to this notice will be available for public inspection in the Office of Textiles and Apparel, Room 3100, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC, and may be obtained upon written request.

Further comment may be invited regarding particular comments or information received from the public which the Committee for the Implementation of Textile Agreements considers appropriate for further consideration.

The solicitation of comments regarding any aspect of the agreement or the implementation thereof is not a waiver in any respect of the exemption contained in 5 U.S.C. 553(a)(1) relating to matters which constitute "a foreign affairs function of the United States."

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

India—Market Statement

Category 641—Women's, Girls' and Infants' Non-knit Blouses

March 1986.

Summary and Conclusions

U.S. imports of Category 641 from India were 574,000 dozens during the year ending January 1986, an 83 percent increase over the year ending January 1985 level. India is the seventh largest supplier of Category 641 and the largest uncontrolled supplier, accounting for 6 percent of the total imports in that category. In 1984, imports of Category 641 from India grew 37 percent from 220,000 dozen in 1983 to 301,000 dozen in 1984.

The sharp and substantial increase of low-valued imports of Category 641 from India is disrupting the U.S. market from women's, girls' and infants' non-knit blouses.

U.S. Production and Market Share

U.S. production of Category 641 declined 10 percent in 1984 from 20.9 million dozen in 1983 to 18.7 million dozen. U.S. production in 1984 was flat compared to 1982. Nevertheless, U.S. producers' share of the market declined from 78.1 percent in 1982 to 73.5 percent in 1984.

U.S. Imports and Import Penetration

Between 1982 and 1984 imports of Category 641 grew from 5.2 million dozen to 6.8 million dozen a 29 percent increase. Imports continued to grow in 1985, rising 39 percent to 9.4 million dozen. The ratio of imports to domestic production has grown steadily, from 28.1 percent in 1982 to 36.1 percent in 1984.

Duty-Paid Value and U.S. Producers' Price

Approximately 83 percent of India's 1985 imports of Category 641 entered under TSUSA No. 384.9110 (previously 383.9010)—women's man-made fiber blouses and shirts, yarn-dyed not knit or ornamented and TSUSA No. 384.9115 (previously 383.9015)—women's other man-made fiber blouses and shirts, not knit or ornamented. These garments enter the U.S. at landed, duty-paid values below the U.S. producers' price for comparable garments.

April 18, 1986.

Committee for the Implementation of Textile Agreements

Commissioner of Customs,
Department of the Treasury, Washington, D.C. 20229.

Dear Mr. Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), and the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977 and December 22, 1981; pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of December 21, 1982, as amended, between the Governments of the United States and India; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended, you are directed to prohibit, effective on April 25, 1986, entry into the United States for consumption and withdrawal from warehouse for consumption of man-made fiber textile products in Category 641, produced or manufactured in India and exported during the ninety-day period which began on March 31, 1986 and extends through June 28, 1986, in excess of the 187,411 dozen.[1]

Textile products in Category 641 which have been exported to the United States on and after January 1, 1986 shall remain subject to the group limit for Categories 330-359, 431-459, and 630-659 established for the period beginning on January 1, 1986 and extending through December 31, 1986.

Textile products in Category 641 which have been exported to the United States prior to March 31, 1986 shall not be subject to the ninety-day limit established in this directive.

Textile products in Category 641 which have been released from the custody of the U.S. Customs Service under the provisions of 19 U.S.C. 1448(b) or 1484(a)(1)(A) prior to the effective date of this directive shall not be denied entry under this directive.

A description of the textile categories in terms of T.S.U.S.A. numbers was published in the **Federal Register** on December 13, 1982 (47 FR 55709), as amended on April 7, 1983 (48 FR 15175), May 3, 1983 (48 FR 19924), December 14, 1983 (48 FR 55607), December 30, 1983 (48 FR 57584), April 4, 1984 (49 FR 13397), June 28, 1984 (49 FR 26822), July 16, 1984 (49 FR 28754), November 9, 1984 (49 FR 44782), and in Statistical Headnote 5, Schedule 3 of the Tariff Schedules of the United States Annotated (1986).

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Ronald I. Levin,

Acting Chairman, Committee for the Implementation of Textile Agreements.

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Science Board Task Force on Atmospheric Obscuration; Meeting

The Defense Science Board Task Force on Atmospheric Obscuration will meet in open session on 27 June 1986 at: Kaman Tempo, 2560 Huntington Avenue, Suite 500, Alexandria, VA 22303, (Mr. D. Alderson (703) 960-4774).

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense for Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

At the meeting on 27 June 1986, the Task Force will conduct a review of recent relevant scientific work and develop a framework within which the Task Force will meet its responsibility to provide expert advice to the Under Secretary of Defense for Research and Engineering in this subject area.

Persons interested in attending should contact Colonel Terry Hawkins, Task Force Executive Secretary, Telephone (202) 697-3060. Space will be awarded on a first come, first serve basis.

Patricia Means,

OSD Federal Register Liaison Officer, Department of Defense.

April 21, 1986.

Department of the Army

Board of Visitors, United States Military Academy; Open Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following meeting:

Name of Committee: Board of Visitors, United States Military Academy.

Date of Meeting: May 16, 1986.

Place of Meeting: Room SD G-50 Senate Dirksen Office Building, Washington, DC.

Time of Meeting: 9:00 a.m.

Proposed Agenda

Election of officers; selection of Executive Committee; scheduling of meetings for remainder of year; and identification of areas of interest for 1986.

All proceedings are open.

FOR FURTHER INFORMATION CONTACT: Colonel D.P. Tillar, Jr., United States Military Academy, West Point, New York 10996.

For the Board of Visitors.

D.P. Tillar, Jr.,

Colonel, General Staff Executive Secretary, USMA Board of Visitors.

VOL 51 ISS 79 AP 24 1986 UMI

DEPARTMENT OF EDUCATION

Application Notice for Continuation Awards Under the Centers for Independent Living Program for Fiscal Year 1986

AGENCY: Department of Education.

ACTION: Application Notice for Continuation Awards Under the Centers for Independent Living Program for Fiscal Year 1986.

Programmatic and Fiscal Information:

The purpose of this application notice is to inform potential applicants of fiscal and programmatic information and the closing date for transmittal of noncompeting continuation applications for Centers for Independent Living projects administered by the Department of Education under the Office of Special Education and Rehabilitative Services. Awards are made under this program to establish and operate Centers for Independent Living which provide a combination of services for severely handicapped persons so that they may live more independently in family and community, or secure and maintain employment, with the maximum degree of self-direction. Eligible applicants for continuation awards in Fiscal Year 1986 are grantees which received grant awards in Fiscal Year 1985. The authority for these awards is the Appropriations Act of 1986 (Pub. L. 99-178), which states that Fiscal Yer 1986 funds can only be used to assist grantees that received grant awards in Fiscal Year 1985. Grants will be awarded from 1986 funds to all 1985 grantees, unless the Commissioner of the Rehabilitation Services Administration determines that there was substantial failure to comply with the provision of the grantee's approved 1985 award.

The amount of funds appropriated under this grant program in Fiscal Year 1985 was $22,000,000, of which $20,124,000 was awarded to 86 existing grantees, and $1,876,000 was awarded to 39 new projects. Total funding available in Fiscal Year 1986 for htis program is $22,011,000. Sufficient funds will be available to award noncompeting continuation awards in Fiscal Year 1986 to all grantees who received Centers for Independent Living grant awards in Fiscal Year 1985.

Closing Date for Transmittal of Applications

Applications for noncompeting continuation awards must be mailed or hand delivered on or before May 27, 1986.

Applications sent by mail must be addressed to the U.S. Department of Education, Application Control Center, Attention: (CFDA No. 84.132), 400 Maryland Avenue, SW., Washington, DC 20202.

Applications that are hand-delivered must be taken to the U.S. Department of Education, Application Control Center, Room 3633, Regional Office Building #3, 7th and D Streets, SW., Washington, DC.

The Application Control Center will accept hand-delivered applications between 8:00 a.m. and 4:30 p.m. (Washington, DC, time) daily, except Saturdays, Sundays, and Federal holidays.

Applicable Regulations

Regulations applicable to this program include the following:

(a) The regulations governing the Centers for Independent Living program in 34 CFR Part 366; and

(b) The Education Department General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, 78 and 79.

Intergovernmental Review

This program is subject to the requirements of Executive Order 12372 and the regulations in 34 CFR Part 79. The objective of Executive Order 12372 is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordiantion and review of proposed Federal financial assistance.

Immediately upon receipt of this notice, applicants that are governmental entities, including local educational agencies, must contact the appropriate State single point of contact to find out about, and to comply with, the State's process under the Executive Order. Applicants proposing to perform activities in more than one State should contact, immediately upon receipt of this notice, the single point of contact for each State and follow the procedures established in those States under the Executive Order. A list containing the single point of contact for each State is included in the application package for this program.

In States that have not established a process or chosen this program for review, State, areawide, regional, and local entities may submit comments directly to the Department.

All comments from State single points of contact and all comments from State, areawide, regional, and local entities must be mailed or hand delivered by June 26, 1986, to the following address:

The Secretary, U.S. Department of Education, Room 4161, (CFDA No. 84.132), 400 Maryland Avenue, SW., Washington, DC 20202.

Please note that the above address is not the same address as the one to which the applicant submits its completed application. *Do not send applications to the above address.*

Application Forms

Application forms and program information packages will be mailed to each eligible applicant.

Further Information

For further information contact Judith Miller Tynes, Office of Developmental Programs, Rehabilitation Services Administration, U.S. Department of Education, 400 Maryland Avenue, SW., Room 3326 Mary E. Switzer Building, MS 2304, Washington, DC 20202. Telephone: (202) 732-1346.

Program Authority

BILLING CODE 4000-01-M

Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of Proposed Information Collection Requests.

SUMMARY: The Director, Information Resources Management Service invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1980.

DATE: Interested persons are invited to submit comments on or before May 27, 1986.

ADDRESSES: Written comments should be addressed to the Office of Regulatory Affairs, Attention: Desk Officer, Department of Education, Office of Management and Budget, 726 Jackson Place, NW, Room 3208, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Margaret B. Webster, Department of Education, 400 Maryland Avenue, SW., Room 4074, Switzer Building, Washington DC 20202.

FOR FURTHER INFORMATION CONTACT: Margaret B. Webster, (202) 426-7304.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with an agency's ability to perform its statutory obligations.

The Director, Information Resources Management Service publishes this notice containing proposed information collection requests prior to the submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Agency form number (if any); (4) Frequency of the collection; (5) The affected public; (6) Reporting burden; and/or (7) Recordkeeping burden; and (8) Abstract. OMB invites public comment at the address specified above. Copies of the requests are available from Margaret Webster at the address specified above.

Dated: April 21, 1986.

George P.Sotos,

Director, Information Resources Management Service.

BILLING CODE 4000-01-M

National Center for Research in Vocational Education Advisory Committee; Meeting

AGENCY: National Center for Research in Vocational Education Advisory Committee.

ACTION: Notice of hearing.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming meeting of the National Center for Research in Vocational Education Advisory Committee. This notice also describes the functions of the Committee. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public of their opportunity to attend.

DATE: May 19, 1986.

ADDRESS: The National Center for Research in Vocational Education, Ohio State University, 1960 Kenny Road, Columbus, Ohio 43210.

FOR FURTHER INFORMATION CONTACT: Dr. Howard F. Hjelm, Director, Office of Vocational and Adult Education, Division of Innovation and Development, 300 7th Street, SW., Rm. 519, Reporters Building, Washington, DC 20202-5516, (202) 732-2350.

SUPPLEMENTAL INFORMATION: The National Center for Research in Vocational Education Advisory Committee is established under section 404 of the Carl D. Perkins Vocational Education Act of 1984 (Pub. L. 98-524). The Committee is established to advise the Secretary and the National Center's Director with respect to policy issues in the administration of the National Center and in the selection and conduct of major research and demonstration projects and activities of the National Center. Meetings held at the request of the Secretary are conducted in accordance with the Federal Advisory Committee Act (FACA).

The meeting of the Committee is governed by FACA and is open to the public on May 19, 1986 from 1:00 p.m. to 4:00 p.m. The proposed agenda includes:

1:00-1:30
Report and discussion of the Federal budget for vocational and adult education

1:30-2:30
Review of the Advisory Committee's Report on the National Center for

VOL 51 ISS 79 AP 24 1986 UMI

Research in Vocational Education
2:30–3:00
Report on the status of the National Assessment of Vocational Education Programs
3:00–3:30
Discussion of national priorities for vocational education
3:30–4:00
Other items.

This meeting will be held in conjunction with a regular meeting of the Committee to advise the Center Director.

Records are kept of all Committee proceedings and are available for public inspection in the Program Improvement Systems Branch, 300 7th Street, S.W., Rm. 519, Reporters Building, Washington, DC 20202–5516, (202) 732–2367.

Dated: April 18, 1986.

John K. Wu,

Acting Assistant Secretary for Vocational and Adult Education.

[FR Doc 86-8171 Filed 4-23-86; 8:45 am]

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Conduct of Employees; Waiver of Participation Prohibitions

Section 606(a) of the Department of Energy Organization Act (Pub. L. 95–91, hereinafter referred to as the "Act") prohibits a "supervisory employee" (defined in section 601(a) of the Act) of the Department, for one year after terminating employment with an "energy concern" (defined in section 601(b) of the Act), from knowingly participating in any Department proceeding in which his former employer is substantially, directly, or materially involved, other than a rulemaking proceeding having a substantial effect on numerous energy concerns.

Further, section 606(b) of the Act prohibits a supervisory employee, for one year after commencing service in the Department, from knowingly participating in any Department proceeding for which he had direct responsibility, or in which he participated personally and substantially, within the previous five years while in the employment of an energy concern.

The term "Department proceeding" is defined in § 1010.103(h) of the Department's Conduct of Employees regulations (title 10, Code of Federal Regulations) as any judicial proceeding, Department hearing, application, rulemaking, order, license, contract, grant, award, fund transfer, claim, controversy, charge, accusation, or arrest in which the Department is directly involved.

Section 606(c) of the Act authorizes the Secretary of Energy to waive the participation prohibitions of subsections (a) and (b) of section 606 when he finds that application of the prohibitions would be contrary to the national interest.

Dr. Albert D. Rossin is under consideration for nomination by the President for the position of Assistant Secretary for Nuclear Energy, Department of Energy, a supervisory employee position. The Assistant Secretary for Nuclear Energy is responsible for the management, administration, and program direction of the Department's research and development programs associated with fission energy. The Department has an agreement with the Electric Power Research Institute for cooperation in the planning and development of research and demonstration projects in this field. Dr. Rossin is currently employed by the Electric Power Research Institute, which is an energy concern.

Dr. Rossin possesses a unique combination of knowledge of nuclear energy and experience in management of complex technological programs in this field. It is my expectation that he will bring to the Department of Energy the unique combination of expertise and experience required to manage the Department's nuclear energy program. Dr. Rossin will sever all official relationships with, and divest himself of all financial interests in, the Electric Power Research Institute prior to assuming the position of Assistant Secretary for Nuclear Energy.

I have considered the benefits to be derived by the United States from having Dr. Rossin available to participate fully, as the Assistant Secretary for Nuclear Energy, in matters involving the Electric Power Research Institute. I am satisfied that it is in the national interest to grant him this waiver of the participation prohibitions of section 606 of the Act with respect to proceedings relating to the Department's nuclear energy program that involve the Institute.

Dated: April 17, 1986.

John S. Herrington,

Secretary of Energy.

BILLING CODE 6450-01-M

Physics of Plasma Confinement of Reversed Field Pinch

AGENCY: Department of Energy (DOE), Office of Fusion Energy.

ACTION: Notice of solicitation DE–SC01–86ER53229, solicitation for cooperative agreement proposals (SCAP) for research and development of the physics of plasma confinement of the reversed field pinch.

SUMMARY: The Department of Energy intends to negotiate a cooperate agreement on a basis of competitive selection to perform Research and Development in the subject area of the Physics of Plasma Confinement by magnetic means in Configurations of the Reversed Field Pinch (RFP) type or its variants. Participation in the research will be on a joint basis with the Los Alamos National Laboratory, and a cost shared participation is required. Innovative research proposals from applicants are sought to define, fabricate, and jointly operate an experimental assembly of the reversed field pinch type. The assembly will be mounted, serviced, and operated as part of a Confinement Physics Research Facility (CPRF) located at and operated by the Los Alamos National Laboratory.

The recipient is expected to participate in the management of the overall CPRF, and to participate in the experimental research phase of the program. The program shall consist of a four-year fabrication and two-year operations phase.

The cost of the CPRF capable of producing a four million ampere plasma current is estimated to be $82,140,000 of which $52,140,000 is the cost of the host facility and $10,000,000 the cost of the RFP device. In addition, it is anticipated that the cost of the operations phase will total $20 million over two years. The recipient cost share shall consist of a significant fraction of the overall cost over the 6 years of the program.

Procurement Request Number: DE–SC01–86ER53229

For copies of the Solicitation, a written request must be sent to: U.S. Department of Energy, P.O. Box 2500, Attn: Document Control Specialist, MA–452.1, Washington, DC 20013.

FOR FURTHER INFORMATION CONTACT: Joyce Gray, Ph. (202) 252–1024 or Glen R. Taranto, Ph. (202) 252–1062, U.S. Department of Energy, Office of Procurement Operations, MA–452.1, 1000 Independence Avenue SW., Washington, DC 20585.

Dated: April 18, 1986.

David G. Newman,

Director, Office of Procurement Operations.

[FR Doc. 86-8244 Filed 4-23-86; 8:45 am]

BILLING CODE 6450-01-M

National Petroleum Council; Historical Factors Task Group; Meeting

Notice is hereby given that the Historical Factors Task Group will meet in April 1986. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Historical Factors Task Group is responsible for the identification and analysis of events, governmental policies, and actions (federal, state, and local), and the reactions of the oil and gas industries to such events, policies and actions (i.e., the "factors") that affect the supply of and demand for oil and gas in the U.S. since the end of World War II.

The Historical Factors Task Group will hold its first meeting on Tuesday, April 29, 1986, starting at 9:30 a.m., in the Conference Room of the National Petroleum Council, 1625 K Street NW., Washington, DC.

The tentative agenda for the Historical Factors Task Group meeting following:

1. Opening remarks by the Chairman and Government Cochairman.
2. Discuss the scope of the overall study.
3. Discuss the study assignment of the Task Group.
4. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Historical Factors Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Historical Factors Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Ms. Pat Dickinson, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353–2430, prior to the meeting and reasonable provision will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on April 17, 1986.

Donald L. Bauer,

Acting Assistant Secretary for Fossil Energy.

[FR Doc. 86-8247 Filed 4-23-86; 8:45 am]

BILLING CODE 6450-01-M

National Petroleum Council; Future Supply/Demand Factors Task Group; Meeting

Notice is hereby given that the Future Supply/Demand Factors Task Group will meet in May 1986. The National Petroleum Council was established to provide advice, information, and recommendations to the Secretary of Energy on matters relating to oil and natural gas or the oil and natural gas industries. The Future Supply/Demand Factors Task Group's activities will be to identify the major factors that will affect the U.S.'s future supply and demand of oil and gas and to evaluate the influence such factors could have on the vulnerability of the U.S. to future energy crises.

The Future Supply/Demand Factors Task Group will hold its first meeting on Tuesday, May 6, 1986, starting at 9:00 a.m., in Room 1429 of the Gulf Tower, 1301 McKinney Street, Houston, Texas.

The tentative agenda for the Future Supply/Demand Factors Task Group meeting follows:

1. Opening remarks by the Chairman and Government Cochairman.
2. Discuss the scope of the overall study.
3. Discuss the study assignment of the Task Group.
4. Discuss any other matters pertinent to the overall assignment from the Secretary of Energy.

The meeting is open to the public. The Chairman of the Future Supply/Demand Factors Task Group is empowered to conduct the meeting in a fashion that will, in his judgment, facilitate the orderly conduct of business. Any member of the public who wishes to file a written statement with the Future/Demand Factors Task Group will be permitted to do so, either before or after the meeting. Members of the public who wish to make oral statements should inform Ms. Pat Dickinson, Office of Oil, Gas, Shale and Coal Liquids, Fossil Energy, 301/353–2430, prior to the meeting and reasonable provison will be made for their appearance on the agenda.

Summary minutes of the meeting will be available for public review at the Freedom of Information Public Reading Room, Room 1E–190, DOE Forrestal Building, 1000 Independence Avenue SW., Washington, DC, between the hours of 9:00 a.m. and 4:00 p.m., Monday through Friday, except Federal holidays.

Issued at Washington, DC, on April 17, 1986.

Donald L. Bauer,

Acting Assistant Secretary for Fossil Energy.

BILLING CODE 6450-01-M

Economic Regulatory Administration

[ERA Docket No. 86–20–NG]

Natural Gas Imports; PROGAS U.S.A., Inc.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Correction.

The **Federal Register** notice of the application in this docket published on April 3, 1986, inadvertently left out several of the proposed delivery points. The proposed delivery points are: Huntingdon, British Columbia; Monchy, Saskatchewan; Emerson, Manitoba; Kingsgate, British Columbia; and Niagara Falls, Ontario.

Issued in Washington, DC, April 18, 1986.

Robert L. Davies,

Director, Office of Fuels Programs, Economic Regulatory Administration.

[FR Doc. 86-8245 Filed 4-23-86; 8:45 am]

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. ER83–297–004]

Arkansas Power & Light Co.; Order Accepting Rates for Filing, Subject to Refund, Noting Intervention, and Establishing Hearing Procedures

Issued: April 16, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt, and C.M. Naeve.

On March 4, 1986, Arkansas Power & Light Company (AP&L) submitted for filing informational schedules detailing charges under its formula rates for requirements and transmission service to the Cities of Campbell and Thayer, Missouri (Cities) on and after March 1, 1986. The rate formula provides for an annual update on March 1st of each year, based upon AP&L's actual costs during the preceding year, and reflecting a return on common equity set at the rate approved by the Arkansas Public

VOL 51 ISS 79 AP 24 1986 UMI

Service Commission in AP&L's last general retail rate case.

AP&L's filing is submitted pursuant to the terms of a settlement agreement approved by the Commission in Docket No. ER83-297-000 on October 4, 1983.[1] That agreement, which incorporates by reference certain provisions of an earlier settlement agreement approved in *Arkansas Power & Light Co.*, Docket Nos. ER82-768-000, et al., states that AP&L shall annually provide the Commission and its customers with informational schedules, containing cost of service data and supporting work papers, showing the operation of the formula rates and the charges thereunder. Within 60 days of AP&L's submission, AP&L's customers may request a hearing, pursuant to section 205 of the Federal Power Act, concerning the cost calculations reflected in the informational schedules (including the stated rate of return). In the event that a hearing is instituted, any increase in charges is to be collected subject to refund, pending a determination as to the justness and reasonableness of the informational schedules.

Notice of AP&L's filing was published in the **Federal Register**,[2] with comments due on or before March 21, 1986. The Cities filed a timely motion to intervene, alleging in general terms that the proposed rate of return is excessive, given current financial conditions, and that other issues may be pursued at hearing. They request that the new charges be suspended for one day, and that the matter be set for hearing.

On April 7, 1986, AP&L filed an answer, opposing the initiation of hearing procedures. AP&L acknowledges that the Cities may challenge whether the cost of common equity applied by the company under the formula rate is in fact the cost of common equity as determined by the Arkansas Commission in AP&L's last general retail rate filing; however, AP&L contends that the Cities may not otherwise contest the use of that common equity figure, since to do so would represent a challenge to the formula itself. AP&L further argues that the Cities' attempt to amend only one component of the formula rate, but not the others, is contrary to Commission policy.

Discussion

Under Rule 214(c)(1) of the Commission's Rules of Practice and Procedure (18 CFR 385.214(c)(1)), the timely, unopposed motion to intervene serves to make the Cities parties to this proceeding.

We agree with AP&L that, with respect to return on common equity, the Cities appear to be challenging the formula itself rather than the data contained in the informational schedules.[3] However, our reading of the parties' earlier settlement indicates a clear distinction in the anticipated treatment of such issues. Article 9 of the settlement concerns challenges to the composition of AP&L's annual informational filings under section 205 of the Federal Power Act for the narrow purpose of reviewing the cost calculations under the stated formula rate. Article 10, in contrast, provides a mechanism under which the Commission staff might question the continued use of various components of the formula itself at three year intervals under section 205 of the Act.[4]

Under these distinct provisions, the Cities clearly negotiated away certain rights, in particular the right to challenge elements of the rate formula under section 205 at the time of annual informational filings. As noted, the Arkansas Commission's allowed equity return is an express component of AP&L's formula rate. Thus, we construe the present claim as precisely the type of issue that the settlement eliminates from annual consideration under a section 205 refund mechanism. Nonetheless, we are not prepared to conclude that the settlement must totally foreclose examination of the formula rate of return component, a cost element which the Commission seldom allows to operate automatically in any event. We shall permit the Cities or the trial staff to question this aspect of the rate formula, if they see fit, under section 206 prospective change procedures.[5]

While we are concerned about the lack of specificity in their motion to intervene, the Cities have alluded to other potential challenges to the information in AP&L's filing. Because the parties' settlement agreement does not require further particularization of customer objections, but instead appears to contemplate a rather broad opportunity for a hearing on the application of the formula rate, we shall convent a hearing to consider such issues and, in the interim, we shall accept AP&L's submittal for filing, to be effective as of March 1, 1986, subject to refund. We shall also order a prompt prehearing conference at which time the Cities should be prepared to specify their other challenges to AP&L's submittal.

The Commission orders

(A) AP&L's submittal is hereby accepted for filing, subject to refund, effective March 1, 1986.

(B) Pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by section 402(a) of the Department of Energy Organization Act and by the Federal Power Act, particularly sections 205 and 206 thereof, and pursuant to the Commission's Rules of Practice and Procedure and the regulations under the Federal Power Act (18 CFR Chapter I), a public hearing shall be held as discussed in the body of this order.

(C) A presiding administrative law judge, to be designated by the Chief Administrative Law Judge, shall convene a conference in this proceeding to be held while approximately fifteen (15) days from the date of this order in a hearing room of the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426. At such conference, the Cities should be prepared to set forth a more particularized specification of their objections to AP&L's submittal. The presiding judge is authorized to establish procedural dates, including the submission of a case-in-chief by AP&L, and to rule on all motions (except motions to dismiss) as provided in the Commission's Rules of Practice and Procedure.

(D) Subdocket 004 of Docket No. ER83-297 is hereby terminated. The evidentiary hearing ordered herein is assigned Docket No. ER83-297-005.

(E) The Secretary shall promptly publish this order in the **Federal Register**.

[1] 25 FERC ¶ 61,070.

[2] 51 FR 9876 (1986).

[3] The Cities do not suggest that AP&L has failed to properly reflect the State commission determination in its calculations, but rather that the return is nonetheless unjust and unreasonable.

[4] The settlement provisions and pertinent portions of the rate formula are attached to this order for the reader's convenience. It bears noting that when the Commission originally accepted the settlement for filing, it made clear that nothing in the agreement, including Article 10, should be regarded as precluding the Commission from questioning the continuing reasonableness of the formula at any time under section 206. See 25 FERC at 61,249. (See appendices I and II.)

[5] In the event that we misread the Cities' abbreviated pleading and they intend, in fact, to question whether the return figure used by AP&L actually comports with the Arkansas Commission's allowance, this question may, consistent with the above discussion, be properly pursued under section 205.

By the Commission.

Kenneth F. Plumb,

Secretary.

Appendix I—Arkansas Power and Light Co.; Settlement Provisions

* * * * *

8. The parties agree that calculation of charges pursuant to the Power Coordination, Interchange and Transmission Service Agreements, as amended in paragraphs 5, 6 and 7 above, shall be effective for services commencing March 1, 1982.

9. AP&L agrees to provide the Commission and the customers with informational schedules, containing cost of service data and supporting work papers, which show the operation of the formulary rates and the resulting charges for each year during which the tendered agreements are in effect. The informational schedules will be submitted to the Commission and the customers on or about March 1 of the year immediately following the year from which the data are derived, and the resulting charges will take effect as of March 1 of the year in which the informational schedules are submitted. If the Commission Staff or the customers, after review of such informational schedules, should determine that a hearing is needed to investigate the cost determinations contained therein, such a hearing may be requested by an appropriate written filing with the Commission within 60 days of the submittal of the informational schedules by AP&L (rather than 30 days, as specified in the March 10, 1981 Settlement Agreement). The parties agree that such a hearing, if instituted by the Commission, will be for the sole purpose of reviewing, pursuant to Section 205 of the Federal Power Act, the data contained in the informational schedules that form the input components of the formulary rates contained in Attachment B. Such review, if necessary, would include the figures for rate of return on equity and A&G expense. It is contemplated that in the event the Commission Staff or the customers request such a hearing, the Commission may issue an order no later than 30 days after such request establishing procedures under Section 205 of the Federal Power Act for a hearing. It is further agreed by the parties that any increases in charges resulting from the operation of the formulary rates will be subject to refund for the year during which they are effective pending the outcome of such a hearing to determine the justness and reasonableness of such informational schedules, or until it is determined that no such hearing will be instituted, whichever period is shorter. There will be no suspension of such charges if a hearing is ordered.

10. The parties agree that the Staff of the Commission will have the right to request an investigation of the formulary rates contained in the tendered agreements only in 1984 and every third calendar year thereafter. If the Staff of the Commission should determine that a hearing is needed to investigate the formulary rate or any component thereof, such a hearing may be requested by an appropriate filing with the Commission during the time period March 1 to May 31 of that year. The parties agree that such a hearing, if instituted by the Commission, will be for the purpose of reviewing, pursuant to Section 205 of the Federal Power Act, the justness and reasonableness of the formulary rates contained in the tendered agreements. It is contemplated that in the event the Staff of the Commission requests such a hearing, the Commission may issue an order establishing procedures for such a hearing under Section 205 of the Federal Power Act on or before July 1 of that year. It is further agreed by the parties that, in the event the Commission orders such a hearing, any increase in charges resulting from the operation of the formulary rates in the calendar year 1984 and every third year thereafter, in the event the Commission orders such a hearing in any of those years, will be subject to refund pending the outcome of such a hearing to determine the justness and reasonableness of the formulary rates. If the Staff of the Commission determines that an investigation of the formulary rates is not necessary and does not request a hearing on the justness and reasonableness of the formulary rates during the time period March 1 to May 31, the formulary rates as contained in Attachment B will operate in accordance with their terms, subject however, to the right to review the informational schedules, as described in paragraph 8 of this Settlement Agreement.

11. The Power Coordination, Interchange and Transmission Service Agreements filed in Docket No. ER80-373, as modified by the March 10, 1981 Settlement Agreement, shall remain * * *

Appendix II. Rate Formula

Arkansas Power & Light Company, Common Parameter Calculation

Cost of capital

$$CC = D*DR + \frac{PF*PR + CE*CR}{TX}$$

where:

CC = Before tax cost of capital
D = Embedded cost of long-term debt
DR = Debt capitalization ratio
PF = Embedded cost of preferred stock dividends
PR = Preferred stock capitalization ratio
CE = Cost of common equity as determined by Arkansas Public Service Commission in AP&L's last general retail rate filing in which a final order has been issued
CR = Common equity capitalization ratio
TX = Composite after tax rate
TX = (1—S) (1—F)

where.

S = State income tax rate
F = Federal income tax rate

Other Tax Rate

$$OTR = \frac{CSFXP + RPTXP + FICA\ (1 - CSLR)}{PLT}$$

where:

OTR = Other tax rate
CSFXP = Annualized December capital stock franchise tax expense
RPTXP = Annualized December real and personal property tax expense
FICA = Annualized December FICA tax expense
CSLR = Ratio of customer services/customer accounts payroll to total payroll charged to O&M expense

BILLING CODE 6717-01-M

[Docket No. ID-1831-004]

Peter J. DeMaria; Application

April 21, 1986.

Take notice that on April 14, 1986 Peter J. DeMaria tendered for filing application for authorization to hold the following positions, pursuant to section 305(b) of the Federal Power Act:

Position	Name of Corporation	Classification
Treasurer and director.	AEP Generating Co	Electric Utility.
Treasurer	Appalachian Power Co.	Do.
Do	Cardinal Operating Co.	Do.

VOL 51 ISS 79 AP 24 1986 UMI

Position	Name of Corporation	Classification
Treasurer and director.	Columbus and Southern Ohio Electric Co.	Do.
Treasurer	Indiana and Michigan Electric Co.	Do.
Do	Wisconsin Valley Electric Co.	Do.
Treasurer and director.	Kentucky Power Co	Do.
Do	Kingsport Power Co	Do.
Do	Michigan Power Co	Do.
Do	Ohio Power Co	Do.
Treasurer	Wheeling Electric Co.	Do.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 or 211 of the Commission's Rules of Practice and Procedure (118 CFR 385.214, 385.211). All such motions or protests should be filed on or before May 1, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[FR Doc. 86-9233 Filed 4-23-86; 8:45 am]
BILLING CODE 6717-01-M

[Docket Nos. ER85-515-000 et al.]

Electric Rate and Corporate Regulation Filings; Florida Power and Light Co. et al.

Take notice that the following filings have been made with the Commission:

1. Florida Power and Light Company

[Docket No. ER85-515-000]

April 21, 1986.

Take notice that on April 10, 1986, Florida Power and Light Company (FPL) tendered for filing a letter advising the Commission that FPL did not make refunds pursuant to the Commission's February 28, 1986 letter approving a stipulation and agreement among FPL and Seminole Electric Cooperative, Inc. and Florida Cities, except for the negotiated dollar payment of $25,000 sent to Seminole by letter of March 12, 1986. Under the Settlement Agreement, FPL's filed rates were effective from May 1, 1985 through December 31, 1985. Effective January 1, 1986, any collections were at Settlement Rates provided by the Stipulation and Agreement, as permitted by the Commission's order of January 31, 1986, granting the joint motion of FPL, Seminole and Florida Cities to permit interim collection of Settlement rates. Any additional refunds were to be paid only if FPL collected amounts in excess of the Settlement Rate after the January 1, 1986 effective date of such rates provided by the Stipulation and Agreement. Accordingly, FPL said no further refunds are due.

Comment date: May 1, 1986, in accordance with Standard Paragraph H at the end of this notice.

2. Catalyst Old River Hydroelectric Limited Partnership

[Docket No. ER86-408-000]

April 21, 1986.

Take notice that on April 14, 1986, Catalyst Old River Hydroelectric Limited Partnership (Old River Hydro) tendered for filing notice that it has entered into contract with Louisiana Power and Light Company (LL&P) for the sale of energy to LL&P. The Town of Vidalia a co-licensee in the Old River Project (Project No. 2854) has consented to the contract.

In addition, Old River Hydro has entered into a contract with the town of Vidalia for the Sale of the remaining energy from the project to the town. Both contracts were tendered for filing in this Docket Number.

Comment date: May 1, 1986, in accordance with Standard Paragraph E at the end of this notice.

3. Gulf States Utilities Company

[Docket No. ER86-36-000]

April 21, 1986.

Take notice that on April 14, 1986, Gulf States Utilities Company filed an application seeking an order under Section 204(a) of the Federal Power Act authorizing the Applicant to issue up to 6,000,000 Additional Shares of New Common Stock, without par value, pursuant to its Automatic Dividend Reinvestment and Stock Purchase Plan, and for exemption from competitive bidding requirements.

Comment date: May 13, 1986, in accordance with Standard Paragraph E at the end of this notice.

4. Kansas City Power & Light Company

[Docket No. ES86-34-000]

April 18, 1986.

Take notice that on April 14, 1986, Kansas City Power & Light Company filed an application with the Federal Energy Regulatory Commission seeking authority, pursuant to section 204 of the Federal Power Act, to issue not more than $300 million of Short-Term Debt and Commercial Paper on or before June 30, 1988, which would mature no later than June 30, 1989.

Comment date: May 14, 1986, in accordance with Standard Paragraph E at the end of this notice.

5. Northern States Power Company

[Docket No. ER86-413-000]

April 21, 1986.

Take notice that Northern States Power Company (NSP), on April 16, 1986, tendered for filing Supplement No. 5 to the Transmission Service Agreement Between Northern States Power Company and East River Electric Power Cooperative (Supplement).

The Supplement reduces the obligation of the customer to compensate NSP for transmission line losses. The Supplement provides that NSP shall only be furnished power and energy equal to 4.5 percent of the deliveries from alternate suppliers instead of the 7 percent provided for in the existing agreement.

The filing of this Supplement by NSP is a result of the settlement reached between the parties in the FERC Docket No. EL86-14.

NSP requests a waiver of the 60 Day Notice Requirement and an effective date of May 20, 1986, for this Supplement.

Comment date: May 5, 1986, in accordance with Standard Paragraph E at the end of this notice.

6. San Diego Gas and Electric Company

[Docket No. ER86-49-000]

April 21, 1986.

Take notice that on April 15, 1986 San Diego Gas and Electric Company (SDG&E) tendered for filing information intended to supplement its December 17, 1986 filing in Docket No. ER86-49-000. Today's filing includes revised cost information regarding SDG&E's firm power purchases which is necessary in order to make economy energy power transactions under Section A.8.2 of the Interconnection Agreement Public Service Company of New Mexico and SDG&E, which agreement was filed in Docket No. ER86-49-000.

Comment date: May 1, 1986, in accordance with Standard Paragraph E at the end of this notice.

7. The Washington Water Power Company

[Docket No. ER86-389-000]

April 21, 1986.

Take notice that The Washington Water Power Company of Spokane, Washington, on April 15, 1986, tendered for filing a Transmission Wheeling Tariff, Schedule 62. This tariff is related to transmission wheeling service for borderline customer loads provided only to the Bonneville Power Administration under a currently existing General Transfer Agreement. The tariff reflects a change in the method used to calculate the charges for this service. The proposed change would increase revenues from transmission wheeling services provided to the Bonneville Power Administration by approximately $990,000 based on the 12-month period ending December 31, 1985.

The proposed tariff is submitted for the purpose of compensating The Washington Water Power Company for increases in its cost of capital, labor, materials, supplies and taxes.

A copy of the filing has been served upon the Bonneville Power Administration.

Comment date: May 1, 1986, in accordance with Standard Paragraph E at the end of this document.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

H. Any person desiring to be heard or to protest this filing should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, on or before the comment date. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,
Secretary.

[FR Doc. 86-9237 Filed 4-23-86; 8:45 am]
BILLING CODE 6717-01-M

[Docket No. SA86-16-000]

The Kansas Power & Light Co.; Petition for Exemption and Interim Relief

Issued April 21, 1986.

On April 2, 1986, The Kansas Power and Light Company (KPL) filed a petition, pursuant to section 206(d) of the Natural Gas Policy Act of 1978 (NGPA) [1] and section 282.206(b) of the Federal Energy Regulatory Commission's regulations,[2] for exemption from the Commission's incremental pricing regulations under Title II of the NGPA.[3] KPL requests interim and permanent exemption from the imposition of incremental pricing surcharges on rates for its gas sales to 19 nonexempt industrial customers.[4] KPL presently sells or could sell gas to these customers for use as boiler fuel in their respective industrial facilities located in the States of Kansas and Missouri.

In support of its petition, KPL states that the incremental pricing surcharge levied on the industrial customers will cause their gas costs to rise above the price of alternative fuels and that without exemption relief there is a great likelihood these customers will (1) switch to alternative fuels such as fuel oil, propane, or intrastate gas, (2) relocate production lines to other areas where available fuels are not subject to incremental pricing, or (3) cease or significantly reduce operations. KPL states that these customers have the capability to burn alternative fuels and that a loss of sales to such customers will force its high priority customers to bear a larger portion of its fixed costs.

The procedures applicable to the conduct of this proceeding are set forth in Subpart K of the Commission's Rules of Practice and Procedure.[5] Any person desiring to participate in this proceeding must file with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, a motion to intervene in accordance with Subpart K within 15 days after publication of this notice in the Federal Register.

Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[Docket No. CI86-295-000]

Tenneco Oil Co.; Application for Permanent Abandonment Authorization and Cancellation of Producer Rate Schedules

April 21, 1986.

Take notice that on March 28, 1986, Tenneco Oil Company (Applicant or Tenneco Oil), P.O. Box 2511, Houston, Texas 77001, filed an application pursuant to 7(b) of the Natural Gas Act and 18 CFR 2.77 and 157.30 of the Commission's Regulations thereunder for authorization to abandon permanently the obligations established under certificates of public convenience and necessity issued in Docket Nos. G-18765 and CI63-1513, and to cancel the related rate schedules. Both dockets cover sales to Valero Interstate Transmission Company (Vitco).

Tenneco Oil is the producer and seller of natural gas. In Docket No. G-18765, Tenneco Oil received a certificate of public convenience and necessity authorizing sales under a contract dated May 8, 1959, on file as Tenneco Oil FERC Gas Rate Schedule No. 137. It received a certificate of public convenience and necessity in Docket No. CI63-1513 governing sales of natural gas pursuant to a sales contract dated May 8, 1963, on file as Tenneco Oil FERC Gas Rate Schedule No. 166. Tenneco Oil states that its gas sales contracts with Vitco in both dockets have expired.

All gas sold under Rate Schedule No. 137 is produced in the North Monte Christo Field, Hidalgo County, Texas. The gas previously qualified for a price under NGPA 104 for minimum rate gas, currently $0.318 per Mcf. Tenneco Oil states that its interest in the well sought to be abandoned represents a total deliverability of approximately 250 Mcf per day.

All gas sold under Rate Schedule No. 166 is produced in the McAllen Ranch Field, Hidalgo County, Texas. The gas qualifies for prices under NGPA 104 for post-1974 gas ($2.553 per MMBtu in March 1986), as well as for 1973-1974 biennium, replacement recompletion, and flowing gas rates. Tenneco Oil states that its interest in the wells sought to be abandoned represents a total deliverability of 3,400 Mcf per day.

[2] 18 CFR 282.206(b) (1985).
[3] 15 U.S.C. 3341-3348 (1982).
[4] The following ten existing nonexempt customers are listed in the application: General Motors Corp. (Leeds), Ford Motor Co., Bendix Corp., Marion Laboraties, Cessna Aircraft Co., Atlas Powder Co., IRECO, AT&T Technologies, Cook Paint & Varnish Co., and Olin/Winchester. Three others, Peoples Natural Gas Co., Getty Oil Co., and Northern Gas Products, Inc., discontinued purchase when they became subject to incremental pricing. In addition, KPL sells gas to six customers listed in the application presently covered by interim exemptions previously granted by the Commission. These are: Proctor & Gamble, Colgate Palmolive, General Motors (Fairfax), Owens Coming, Thompson Hayward, and Armco, Inc. KPL seeks permanent exemptions with respect to all these customers.
[5] 18 CFR 385.1101-385-1117 (1985).

VOL 51 ISS 79 AP 24 1986 UMI

Applicant states that the abandonment is premised on the Commission's order issued August 2, 1985, granting a limited-term abandonment of these sales pursuant to a settlement in Transcontinental Gas Pipe Line Corp., *et al*, Docket Noc. CP84-183-000, *et al*. The limited-term abandonment granted therein expired January 28, 1986. Under the terms of the settlement approved by the Commission in those consolidated proceedings, producers were permitted to apply for permanent abandonment if Vitco could not secure alternative markets for the gas by January 28, 1986.

Teaneco Oil seeks abandonment of these supplies so that it can continue selling gas elsewhere after January 28, 1986. Applicant requests expedited consideration of its application pursuant to Docket No. RM85-1-000 and §2.77 of the Commission's Regulations, due to substantially reduced takes by Vitco without payment.

The circumstances presented in the application meet the criteria for consideration on an expedited basis, pursuant to §2.77 of the Commission's Regulations as promulgated by Order Noc. 436 and 436-A, issued October 9 and December 12, 1985, respectively, in Docket No. RM85-1-000, all as more fully described in the application which is on file with the Commission and open to public inspection.

Any person desiring to be heard or to make any protest with reference to said application should on or before 15 days after the date of publication of this notice in the Federl Register, file with the Federal Energy Regulatory Commission, Washington, DC 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in the proceeding herein must file a petition to intervene in accordance with the Commission's Rules.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or to be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-9234 Filed 4-23-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket Nos. CP86-425-000 et al.]

United Gas Pipe Line Co. et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commission:

1. United Gas Pipe Line Company

[Docket No. CP86-425-000]

April 21, 1986.

Take notice that on April 9, 1986, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77251-1478, filed in Docket No. CP 86-425-000 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas for Tennessee Gas Pipeline Company, a division of Tenneco Inc. (Tennessee), under a gas transportation agreement, dated March 21, 1986, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is stated that the agreement provides for Tennessee to cause the delivery of up to the maximum daily quantity (MDQ) of 8,000 Mcf of natural gas per day to United at an existing 12-inch sub-sea tap on United's South Marsh Island 155 lateral located in South Marsh Island Block 156, offshore Louisiana. United proposes to redeliver equivalent quantities of gas to Tennessee at an existing interconnection between facilities of United and Sea Robin Pipeline Company located in the South Marsh Block 127, offshore Lousiana.

United states that for each Mcf of gas redelivered by United, United would charge Tennessee the effective cost of service rate which for Tennessee is 23.6 cents per Mcf.

Comment date: May 14, 1986, in accordance with Standard Paragraph F at the end of this notice.

[Docket No. CP86-424-000]

April 18, 1986.

Take notice that on April 9, 1986, Crown Zellerbach Corporation (Crown Zellerbach) and Gaylord Container Limited (Gaylord), One Bush Street, San Francisco, California 94104, jointly filed in Docket No. CP86-424-000 an application pursuant to sections 7(b) and 7(c) of the Natural Gas Act for authorization permitting and approving Crown Zellerbach to abandon its entire interestate transmission facility and for a certificate of public convenience and necessity authorizing Gaylord to acquire and operate such facility, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

It is explained that Crown Zellerbach is an integrated forest products company that manufactures and distributes a broad range of paper and wood products. As part of its operations, Crown Zellerbach states that it owns and operates a paper mill in Bogalusa, Washington Parish, Louisiana, that uses natural gas for plant protection and paper processing. It is explained that the gas is purchased in the southwestern counties of Mississippi and then transported to Crown Zellerbach's Bogalusa mill in Louisiana by means of a 92.3-mile pipeline that is owned and operated by Crown Zellerbach solely for its own use in the mill. By reason of this interstate transportation function, the Commission by order issued October 1, 1973, in Docket No. CP73-322 determined that Crown Zellerbach was a natural-gas company within the meaning of the Natural Gas Act even though Crown Zellerbach neither transports gas for others or sells gas for resale.

Crown Zellerbach now propposes to abandon the operation of the subject pipeline by transferring these properties [1] as part of a stock transaction encompassing all of Crown Zellerbach's assets to Gaylord. Applicants state that following acquisition of Crown Zellerbach's assets, Gaylord proposes to continue to operate the subject pipeline and all related facilities to serve the Bogalusa paper mill.

Comment date: May 12, 1986, in accordance with Standard Paragraph F at the end of this notice.

3. Northern Natural Gas Company Division of InterNorth, Inc.

[Docket No. CP83-131-004]

April 21, 1986.

Take notice that on April 16, 1986, Northern Natural Gas Company, Division of InterNorth, Inc. (Northern), 2223 Dodge Street, Omaha, Nebraska 68102, filed in Docket No. CP83-131-004 an amendment to its petition to amend filed pursuant to Section 7(c) of the Natural Gas Act in Docket No. CP83-131-003 that is presently pending before the Commission to request authority to operate in interstate commerce 2.0 miles of 16-inch pipeline and 3.25 miles of 24-inch pipeline located in the Matagorda Island Area, offshore Texas (MAT), all as more fully set forth in the amendment which is on file with the Commission and open to public inspection.

Northern states that it constructed 2.0 miles of 16-inch pipeline to the MAT 623 "A" platform during 1984 and 3.25 miles of 24-inch pipeline to the MAT 622 "C" platform from its existing pipeline in MAT 624 during 1985. It is indicated that the facilities were constructed to attach gas supplies in MAT 622 and 623 which Northern intended to transport for Amoco Gas Company (Amoco). Northern explains that it filed in Docket No. CP83-131-003 to provide such firm transportation service for Amoco under section 7(c).

It is stated that the actual construction cost of the MAT 623 "A" and MAT 622 "C" pipeline facilities was $2,970,800 and $5,123,700, respectively. It is further stated that transportation service was initiated from the MAT 623 "A" platform, pursuant to Subpart B of Part 284 of the Commission's Regulations on November 16, 1984, as reported in Docket No. ST85-286-000 and that transportation service from MAT 623 "A" continues today as a "grandfathered" transportation arrangement under the provisions of Order No. 436. Northern states that transportation from MAT 622 "C" has not commenced.

In Docket No. CP83-131-003, Northern indicated that the 16-inch and 24-inch laterals were to be constructed and operated pursuant to Northern's Order No. 234 blanket certificate. Since the two laterals do not appear to qualify as either "eligible facilities" or "gas supply facilities" as defined in § 157.202 of the Regulations and Northern is therefore not authorized to construct and operate the facilities under its blanket certificate, Northern proposes in the subject amendment to operate the two laterals which have already been constructed.

Comment date: May 14, 1986, in accordance with the first subparagraph of Standard Paragraph F at the end of this notice.

4. Williston Basin Interstate Pipeline System

[Docket Nos. CP86-430-000, CP86-431-000, RP86-10-005, RP86-10-000]

April 18, 1986.

Take notice that on April 4, 1986, Williston Basin Interstate Pipeline Company (Williston Basin), Suite 200, 304 East Rosser Avenue, Bismarck, North Dakota 58501, filed in Docket No. CP86-430-000 an application pursuant to Section 7 of the Natural Gas Act for permission and approval to abandon partially service to Colorado Interstate Gas Company (CIG), i.e., to abandon sales service performed under Rate Schedule X-5, and to amend the terms of the storage service performed under Rate Schedule X-5. Also, on April 4, 1986, Williston Basin filed in Docket No. CP86-431-000 an application pursuant to Section 7(b) of the Natural Gas Act for permission and approval to abandon service to MIGC, Inc. (MIGC), performed under Rate Schedule X-6. Further, Williston Basin filed on March 31, 1986, in Docket No. RP86-10-005 pursuant to § 154.94 of the Commission's Regulations, a notice of cancellation of its Rate Schedule X-6. Finally, Williston Basin filed in Docket No. RP86-10-000 on April 4, 1986, an offer of partial settlement pursuant to Rule 602 of the Commission's Rules of Practice and Procedure. These proposals are more fully set forth in the applications, notice of cancellation, and offer of settlement which are on file with the Commission and open to public inspection.

Williston Basin seeks authorization in Docket No. CP86-430-000 to abandon partially service under Rate Schedule X-5, wherein Williston Basin's current storage service for CIG would be abandoned. In a letter submitted as part of the filing, CIG states that the natural gas available for sale under the contract would remain unmarketable. It is explained that the storage service under Rate Schedule X-5 would continue, but be amended such that the remaining CIG gas stored in Williston Basin's Elk Basin Storage Field (approximately 6.3 Bcf) would be drawn down over a six-year period. For the stored gas, CIG would pay Williston Basin a monthly storage rate of 0.44 cents per Mcf, effective May 2, 1986, subject to refund, for the maximum inventory of gas held in storage for CIG during the billing month. Williston Basin has submitted a *pro forma* Rate Schedule X-5 reflecting the proposed changes.

Williston Basin seeks authorization in Docket No. CP86-431-000 to abandon sales service to MIGC under Rate Schedule X-6. MIGC has indicated in a letter to CIG contained in the filing that it has no intention of taking any gas under Rate Schedule X-6 and that it would agree to contract cancellation and abandonment of service.

In Docket No. RP86-10-005, Williston Basin has filed a notice of cancellation of Rate Schedule X-6, consisting of a one page, *pro forma* tariff sheet. Williston Basin states that this notice of cancellation would only be effective if the abandonment authority it seeks in Docket No. CP86-431-000 is approved.

Williston Basin has filed an offer of partial settlement which would give effect in Williston Basin's current Section 4 rate case, Docket No. RP86-10-000, to the partial abandonment of service to CIG, the revised storage service for CIG, and the abandonment of service to MIGC. Williston Basin has filed *pro forma* tariff sheets to reflect its proposed offer of partial settlement. This offer of partial settlement is entirely dependent upon the outcome of Williston Basin's filings in Dcoket Nos. CP86-430-000 and CP86-431-000.

Comment date: May 14, 1986, in accordance with Standard Paragraph F at the end of this notice.

Standard Paragraphs

F. Any person desiring to be heard or make any protest with reference to said filing should on or before the comment date file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, a motion to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a motion to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to jurisdiction conferred upon the Federal Energy Regulatory Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this filing if no motion to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a motion for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for the applicant to appear or be represented at the hearing.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-9235 Filed 4-23-86; 8:45 am]

BILLING CODE 6717-01-M

[1] The application did not state a particular price for the pipeline.

VOL 51 ISS 79 AP 24 1986 UMI

[Docket No. RM85-1-185]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (Carbonaire Co., Inc.); Order Denying Rehearing

Issued April 22, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

On February 6, 1986, Carbonaire Co., Inc. filed a request for rehearing of the Commission's January 7, 1986 order denying Carbonaire's request for clarification [1] of Order No. 436.[2] The Commission's January 7, 1986 order found that Carbonaire could not receive gas from Transcontinental Gas Pipe Line Corporation (Transco) via its Renovo receipt point pursuant to a verbal understanding, under the transitional provisions of Order No. 436. Carbonaire and Transco had a verbal understanding that the Renovo receipt point would be used should curtailment on Transco's main line preclude deliveries via receipt points specified in the written contract.

In its request for rehearing, Carbonaire states that it expended over $550,000 in connection with a major overhaul and refurbishing program at its plant in the expectation of a continuous supply of competitively-priced natural gas secured through written agreements and oral understandings with Transco which pre-dated October 9, 1985.

To qualify for continuation under the transitional provisions of Order No. 436, a transaction had to be authorized and commenced prior to October 9, 1985. We have consistently interpreted these provisions to preclude changes in the terms of the transaction as it existed on October 9. *Hudson Gas Systems, Inc.*, 33 FERC ¶61,142 (1985). Since the Renovo receipt point was not in use on October 9, its use does not qualify under the transitional provisions. The only remaining questions is whether a waiver of the rules would be justified.

In *CLARCO Gas Company, Inc.*,[3] we restated the standard enunciated in the *Judel Glassware* order.[4] The *CLARCO* order clarified the following:

> If gas hasn't flowed by October 9, 1985, the Commission will grant a waiver from the restrictions in the transitional provisions to the extent necessary to allow the transportation to commence if the parties executed a written gas transportation agreement prior to October 9, 1985, and expended significant funds or constructed significant facilities *in reliance on that agreement*, after the agreement was executed and prior to October 9, 1985. . . . Oral agreements will not meet the standard if, on or before October 9, 1985, gas was not actually transported pursuant to that agreement. The existence of a written transportation agreement prior to October 9, 1985 will not by itself satisfy the standard.
>
> If the construction or expenditure of funds occurred prior to execution of the written transportation agreement, then by definition such construction or expenditure was not incurred in reliance on that agreement.

Carbonaire does not meet this standard. The Renovo receipt point was not specified in a written transportation agreement on or before October 9, 1985, and the gas was not transported via the Renovo receipt point on or before that date pursuant to the oral agreement. Accordingly, Carbonaire's request for rehearing is denied.

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-9238 Filed 4-23-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RM85-1-000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (Energy Marketing Exchange, Inc.); Order Denying Reconsideration

Issued: April 22, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

On January 28, 1986, Energy Marketing Exchange, Inc. (EME) filed a petition for reconsideration of the Commission's order issued November 22, 1985 denying EME's request for clarification and waiver of regulations.[1] In that instance, consistent with our decision in the *Midwest Solvents* order denying a request for clarification,[2] we concluded that gas for high-priority end uses which was not transported under Order No. 319, although eligible thereunder, could not be transported under the transitional rules of § 284.223(g)(1) established in Order No. 436.[3] Because we reversed the outcome of *Midwest Solvents* on rehearing,[4] EME now seeks reversal of our order denying its request for clarification.

The outcome of *Midwest Solvents* does not resolve the only issue in this case, however, because agreements with the transporting pipelines had a termination date of October 31, 1985.[5] Nevertheless, EME contends that the transportation arrangements should be authorized until June 30, 1986 for Raritan, and for a five-year term for the other end users involved, based on our order granting Transcontinental Gas Pipeline Corporation's first clarification request (*Transco I*).[6] The facts presented by EME, however, are different from those in *Transco I*.

In the latter case, Transco had a large number of transportation contracts that extended for the full two-year term allowed for self-implementing transportation under our former rules implementing section 311 of the NGPA. Transco asserted that because of the large number of employees involved in drafting the numerous agreements, a small fraction of the contracts contained language that provided that the contracts would terminate on October 31, 1985 "unless extended by mutual agreement of the parties." According to Transco, the October 31 date was referenced only because the parties anticipated substantial changes in our regulations on that date. Transco averred that the parties actually intended for the agreements to remain in effect for the maximum two year term—as demonstrated by the language in the vast majority of its contracts.

The facts in the present case are different. In the first place, the language in the transportation contracts does not appear to be the result of a drafting error. Indeed, EME has not submitted copies of the transportation contracts or even quoted the relevant language from them. Instead, EME quotes a term from the gas *sales* contracts that provides for automatic renewals for successive one year periods, unless terminated by one of the parties. According to EME, this provision demonstrates that the parties to the *transportation* contracts intended them to remain in effect for the maximum five-year term for high-priority transportation.

We are unconvinced. The transporters in question are not parties to the sales contracts. Thus, we fail to see what significance the sales contracts could have with reference to the intent of the transporters. Moreover, EME has not maintained (as did Transco) that portions of a small percentage of the transportation contracts were the result of a mistake, as evidenced by the more correct language in the vast majority of other contracts between the same parties. To the contrary, it appears that the language limiting the transportation contracts to October 31, 1985 was intentional, since it was included in contracts with all of the transporters in question.[7]

We note that one transporter, Transco, submitted an affidavit, dated March 14, 1986, stating that "it was not the desire of either party to discontinue transporting natural gas on that date." Rather, according to Transco, the "termination date" of October 31, 1985 was included in its contract in response to the combined effect of the court's decision in *Maryland People's Counsel v. FERC*, 761 F.2d 780 (1985) and the Commission's Order No. 234-C, extending the transportation authority for low-priority end uses through October 31, 1985. Transco states that "[b]ut for these judicial and regulatory decisions . . . [it] *would have been* ready, willing and able to provide the . . . transportation service for a term coextensive with the respective terms of the underlying gas sales agreements between EME and said end-use customers not to exceed five (5) years . . . ." (Emphasis added.) The Transco affidavit quite carefully avoids stating that Transco's *intention* in signing the contract was to commit itself to providing transportation for a five-year term. Indeed, our interpretation of the affidavit is that Transco would have been willing to enter a five-year contract, perhaps wishes that it had, but, unfortunately, did not.

Inasmuch as the transportation contracts here expired by their own terms on October 31, 1985, there is nothing remaining to qualify for transition treatment under § 284.223(g)(1).[8] Accordingly, EME's request for reconsideration is denied.

By the Commission.

Kenneth F. Plumb,

Secretary.

[FR Doc. 86-9239 Filed 4-23-86; 8:45 am]

BILLING CODE 6717-01-M

[Docket No. RM85-1-000 (Parts A-D) and Docket No. CP86-387-000]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (Superior Offshore Pipeline Co.; Order Issuing Temporary Certificate and Denying Request for Waiver

Issued: April 21, 1986.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C. M. Naeve.

On March 17, 1986, Superior Offshore Pipeline Company (SOPCO) filed an emergency request for a temporary waiver of section 284.105(a) of the regulations adopted in Order No. 436.[1] SOPCO seeks the waiver to permit the transportation of gas on behalf of Texas Eastern Transmission Corporation (Texas Eastern) until such time as SOPCO is issued a blanket certificate pursuant to section 284.221 of the Commission's regulations adopted in Order No. 436. On March 17, 1986, SOPCO also filed an application for a blanket certificate pursuant to that section; that application is currently pending in Docket No. CP86-387-000.

We are denying SOPCO's request for waiver. However, we are construing the request for waiver as a request for a temporary certificate, which we are granting on the basis of SOPCO's emergency situation.

SOPCO was issued a blanket certificate [2] pursuant to Order No. 60 on April 28, 1983, which authorized SOPCO to transport gas for other interstate pipelines, including Texas Eastern. SOPCO did not have authority under this certificate to continue transportation beyond April 28, 1985, because it did not file a timely extension report.[3] SOPCO, therefore, does not have the requisite authority to transport gas on behalf of Texas Eastern at the present time. Waiver of the restrictions in section 284.105(a) of the Commissions' Regulations would not operate to confer transportation authority pursuant to Order 60 where such authority has expired. Section 284.105(a) merely provides for transitional treatment of existing transportation arrangements. Here, the transportation arrangements have expired. Accordingly, SOPCO's request for waiver is denied.

Although SOPCO does not have authority to continue transporting gas on behalf of Texas Eastern, SOPCO has sought such authority by its request for waiver and by its pending application for a blanket certificate. As such, we will construe SOPCO's request for waiver as a request for a temporary certificate in that we believe this interpretation is consistent with SOPCO's intent.

In its request, SOPCO states that Pelto Oil Company, the producer of the gas, has infromed SOPCO that shutting in the relevant wells located in offshore Louisiana, even for a temporary period, may result in water encroachment, permanent damage to the wells and permanent loss of reserves. SOPCO states further that, because of the serious nature of the water encroachment problems, Texas Eastern has exempted Pelto's Betty Field production from curtailments. Based on these allegations, we find that an emergency exists within the meaning of the Natural Gas Act.

Therefore, by his order, we issue a temporary certificate of public convenience and necessity to SOPCO, pursuant to section 7 of the Natural Gas Act, to provide the transportation on behalf of Texas Eastern as described in SOPCO's request for waiver. This authorization is issued without prejudice to such ultimate disposition of the application as the record may require.

The temporary certificate issued herein and the rights granted thereunder are conditioned upon SOPCO's compliance with the conditions specified in *The Superior Oil Company and Superior Offshore Pipeline Company*, Docket No. CP83-91-000, 23 FERC ¶ 61,165 (1983), except that ordering paragraphs B, C, I, J, and M shall not apply.

The temporary certificate issued herein and the rights granted thereunder are further conditioned upon SOPCO's compliance with all applicable Commission Regulations under the Natural Gas Act and particularly the general terms and conditions set forth in

---

[1] 34 FERC ¶61,006, 51 FR 1430.

[2] 33 FERC ¶61,007, 50 FR 42408 (October 18, 1985).

[3] *CLARCO Gas Company, Inc.*, 34 FERC ¶61,366 (March 28, 1986).

[4] *Judel Glassware Co., Inc.*, 33 *FERC* ¶61,386 *(December 17, 1985).*

[2] 33 FERC ¶ 61,157 (1985).

[3] 33 FERC ¶ 61,007 (1985).

[4] 33 FERC ¶ 61,169 (1985).

[5] The order of November 27, 1985, is incorrect in stating that the transportation contracts had terms extending into 1986 or beyond. *See, e.g.*, EME Petition for Reconsideration at 6.

[6] Regulation of Natural Gas after Partial Wellhead Decontrol (Transcontinental Gas Pipeline Corporation), 33 FERC ¶ 61,169 (1985).

[7] On April 8, 1986 EME amended its request for reconsideration to delete all references to transportation arrangements with Texas Eastern Transmission Company and Columbia Gas Transmission Company. EME states that it has been advised that these pipelines will provide transportation in accordance with applicable provisions of Order No. 436. EME now seeks to clarify only the transportation status of Transco. The arrangements with Columbia and Texas Eastern remain relevant, however, to the extent that they shed light on the issue of intent raised by EME.

[8] As we held in *U.S. Steel*, even if the transportation qualified as Order No. 319 transportation (former § 284.209(a)(1)), the parties are still bound by the terms of their transportation contracts, including the termination dates. Regulation of Natural Gas Pipelines of the Partial Wellhead Decontrol (U.S. Steel), 34 FERC ¶ 61,199 (1986).

[1] 33 FERC ¶ 61,007, 50 FR 42408 (October 18, 1985).

[2] 23 FERC ¶ 61,105 (1983).

[3] Section 284.105(c) requires that extension reports be filed ninety days prior to expiration. SOPCO was, therefore, required to file an extension report on January 31, 1985 in order to continue transportation pursuant to the blanket certificate. On October 15, 1985, SOPCO filed an extension report which was not accepted by the Commission due to lateness. 34 FERC ¶ 61,100 (1986).

VOL 51 ISS 79 AP 24 1986 UMI

paragraphs (a) and (e) of § 157.20 of such Regulations and upon payment by SOPCO of the applicable filing fees specified in § 382.207 (a) and (b)[4] of the Commission's Regulations. The temporary certificate will be effective upon receipt of the filing fee.

We note that SOPCO's pleading indicates that gas may have been transported without authorization in violation of section 7(c) of the Natural Gas Act, 15 U.S.C. 717f(C). The authority granted by the temporary certificate issued herein, as conditioned, is purely prospective in nature, and does not preclude any further enforcement action by the Commission based on the transactions in question.

By the Commission.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. QF83-196-001 et al.]

Big Horn Energy Partners et al.; Small Power Production and Cogeneration Facilities; Qualifying Status; Certificate Applications, etc.

Comment date: Thirty days from publication in the Federal Register in accordance with Standard Paragraph E at the end of this notice.

Take notice that the following filings have been made with the Commission.

1. Big Horn Energy Partners

[Docket No. QF83-196-001]

April 16, 1986.

On April 9, 1986, Big Horn Energy Partners (Applicant), of 601 California Street, Suite 1303, San Francisco, California 94108, submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing. The facility was previously certified as a qualifying cogeneration facility on May 16, 1983 (QF83-196-000).

The 15.0 MW small power production facility is located in Big Horn County, Montana approximately 3/4 mile north of Hardin, Montana. Applicant states that the primary energy sources of the facility are wastes in the form of subbituminous refuse and petroleum coke.

[4] Final Rule, Fees Applicable to Natural Gas Pipelines, 50 FR 42502 (October 9, 1985), 32 FERC ¶ 61,080 (September 30, 1985).

2. Fluor Resource Recovery of Massachusetts, Inc.

[Docket No. QF86-667-000]

April 16, 1986.

On April 7, 1986, Fluor Resource Recovery of Massachusetts, Inc. (Applicant), of 3333 Michelson Drive, Irvine, California 92730, submitted for filing an application for certification of a facility as a qualifying small power production facility pursuant to § 292.207 of the Commission's regulations. No determination has been made that the submittal constitutes a complete filing.

The 9.0 MW small power production facility will be located adjacent to the Springfield Regional Waste Water Treatment Plant at Agawam, Massachusetts. The primary energy source will be biomass in the form of municipal solid waste.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RM85-1-000 (Parts A-D)]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (Algonquin Gas Transmission Company); Order Dismissing Petition for Clarification

Issued: April 18, 1986.

On March 7, 1986, Algonquin Gas Transmission Company requested clarification of Order No. 436 as it relates to correcting imbalances. Specifically Algonquin requests clarification whether, where an imbalance occurred in an upstream pipeline between the point of production and the ultimate point of delivery, such pipeline and all downstream pipelines in the transportation chain can act with immunity against the open access and contract reduction requirements in Order No. 436.

On February 18, 1986, we issued an order in Docket No. RM85-1-000 clarifying the treatment of imbalances. 51 FR 6604 (1986), 34 FERC ¶ 61,267 (1986). In that order, we extended the period for correcting imbalances. We also clarified the methods by which pipelines may correct imbalances from transportation transactions performed after October 31, 1985, pursuant to the transition provisions of Order No. 436 without being subject to the conditions of that order. Specifically, we stated:

> With respect to the procedures for correcting the imbalances, we have stated in the *Natural* order that "deliveries or other types of adjustments" made solely for the purpose of correcting deliveries made on or prior to October 31, 1985, will not subject the pipeline to §§ 284.8, 284.9, 284.10. We intend this language to provide the parties with flexibility in selecting the method for correcting the imbalances, provided that is their sole purpose. We view this authorization merely as a short-lived problem associated with the implementation of Order No. 436. The methods which Natural and United have described in their pleadings are permissible, as are other methods which the Commission has authorized in the past for correcting imbalances, provided they are used for the stated purpose. (34 FERC ¶ 61,207, at 61,353.)

Algonquin states that the above clarification only applies to situations where the imbalance occurred within a single pipeline. It requests clarification for those situations where the imbalance occurs in an upstream pipeline between the point of production and the point of delivery, and asks whether all downstream pipelines may transport the gas with immunity from Order No. 436.

As we stated in our February 18, 1986 order, we view the correction of imbalances as a short-term transitional problem. We expect pipelines to take appropriate measures to correct those imbalances, including necessary transportation, provided these measures are used only for that purpose. In this context, it would be counterproductive to exempt only one pipeline in a transportation chain from the Order No. 436 requirements. The February 18, 1986, order extending the time period for correcting imbalances applies to all pipelines in the transportation chain.

Since we have already addressed the issue raised by Algonquin in our February 18, 1986 clarification, we dismiss its petition.

By the Commission.

Kenneth F. Plumb,

Secretary.

FEDERAL EMERGENCY MANAGEMENT AGENCY

FEMA Advisory Board Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act, announcement is made of the following FEMA Advisory Board meeting:

Name: Federal Emergency Management Agency Advisory Board.

Date of Meeting: May 7, 1986.

Time: 9:00 a.m. to 4:00 p.m.

Place: Federal Emergency Management Agency, Emergency Information and Coordination Center, 500 C Street, SW, Washington, DC 20472.

Purpose: FEMA executives will provide reports on the agency's budget and personnel reductions. The status of a review of civil defense programs will be provided and discussed. Program development concepts for the protection of national infrastructure assets will be discussed. A working session on the future work agenda for the Board will be conducted. Discussions will include classified information. The Director has determined that the Board meeting should be closed to the public because discussions will invovle information that is specifically authorized to be kept "Secret" in the interest of national defense and is properly classified pursuant to the Executive Order.

Dated: April 18, 1986.

Bernard A. Maguire,

Associate Director, National Preparedness.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Alcohol, Drug Abuse, and Mental Health Administration

Meeting

AGENCY: Alcohol, Drug Abuse, and Mental Health Administration.

ACTION: Notice of Meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of the forthcoming meetings of the agency's initial review committees. These committees will be open for discussion of administrative announcements and program developments. The committees will be performing initial review of applications for Federal assistance. Therefore, portions of the meetings will be closed to the public as determined by the Acting Administrator, ADAMHA, in accordance with 5 U.S.C. 552(b)(6) and 5 U.S.C. App. 2 § 10(d). Notice of these meetings is required under the Federal Advisory Committee Act, Pub. L. 92-463.

Committee Name: National Advisory Council on Drug Abuse.

Date and Time: May 13-14: 9:00 a.m.

Place: National Institutes of Health, Building 31C, Conference Room 8, 9000 Rockville Pike, Bethesda, MD.

Status of Meeting: Open—May 13: 9:00 a.m.-12 noon; May 14: 9:00 a.m.-5:00 p.m. Closed—Otherwise.

Contact: Sheila H. Gardner, Room 10A-03, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301) 443-6460.

Purpose: The Council advises and makes recommendations to the Secretary, Department of Health and Human Services, the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, and the Director, National Institute on Drug Abuse, on the development of new initiatives and priorities and the efficient administration of drug abuse research, including prevention and treatment research, and research training. The Council also gives advice on policies and priorities for drug abuse grants and contracts, and reviews and makes final recommendations on grant applications.

Committee Name: National Advisory Mental Health Council.

Date and Time: May 19-21: 9:00 a.m.

Place: National Institutes of Health, Shannon Building, Building #1, Wilson Hall, 9000 Rockville Pike, Bethesda, MD 20892.

May 20-21: Parklawn Building, Conference Rooms G & H, 5600 Fishers Lane, Rockville, MD 20857.

Status of Meeting: Open—May 19: 9:00 a.m.-5:00 p.m. Closed—Otherwise.

Contact: Rachel Driver, Parklawn Building, Room 9-105, 5600 Fishers Lane, Rockville, MD (301) 443-1216.

Purpose: The Council advises the Secretary of Health and Human Services, the Administrator, Alcohol, Drug Abuse,and Mental Health Administration, and the Director, National Institute of Mental Health regarding policies and programs of the Department in the field of mental health. The Council reviews applications for grants-in-aid relating to research and training in the field of mental health and makes recommendations to the Secretary with respect to approval of applications for, and amounts of, these grants.

Name of Committee: National Advisory Council on Alcohol Abuse and Alcoholism.

Date and Time: May 29-30: 10:30 a.m.

Place: National Institutes of Health, Wilson Hall, Building #1, 9000 Rockville Pike, Bethesda, MD.

Status of Meeting: Open—May 29: 10:30 a.m.-5:00 p.m. Closed—Otherwise.

Contact: James Vaughan, Parklawn Building, Room 16C20, 5600 Fishers Lane, Rockville, MD 20857, (301) 443-4375.

Purpose: The Council advises the Secretary, Department of Health and Human Services regarding policy direction and program issues of national significance in the area of alcohol abuse and alcoholism. Reviews all grant applications submitted, evaluates these applications in terms of scientific merit and adherence to Department policies, and makes recommendations to the Secretary with respect to approval and amount of award.

Name of Committee: Psychopharmacological, Biological, and Physical Treatments Subcommittee of the Treatment Development and Assessment Research Review Committee

Date and Time: May 29-30: 1:30 p.m.

Place: Sonesta Beach Hotel, 350 Ocean Drive, Key Biscayne, Florida

Status of Meeting: Open—May 29: 1:30-2:30 p.m. Closed—Otherwise.

Contact: Pamela J. Mitchell, Parklawn Building, Room 9C14, 5600 Fishers Lane, Rockville, MD 20857, (301) 443-1367.

Purpose: The Subcommittee is charged with the initial review of applications for assistance from the National Institute of Mental Health for support of research and research training activities in the fields of treatment development and assessment with recommendations to the National Advisory Mental Health Council for final review.

Substantive information may be obtained from the contact persons listed above. Summaries of the meetings and rosters of committee members may be obtained as follows: NIAAA: Ms. Diana Widner, Committee Management Officer, Room 16C20, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443-4375. NIDA: Ms. Mary Kielkopf, Committee Management Officer, Room 10-22, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443-1644: NIMH: Ms. Helen Garrett, Committee Management Officer, Room 9-95, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443-4333.

The Alcohol, Drug Abuse, and Mental Health Advisory Board will focus on 3 programmatic areas. Subject matter experts will present an evaluation of effects of treatment and prevention efforts in alcohol, drug abuse, and mental health (ADM) disorders. Presentations will also focus on systems of financing and delivery of ADM services. The major topics will include optimizing the benefits of research in a more productive manner.

Name of Committee: Alcohol, Drug Abuse, and Mental Health Advisory Board.

Date and Time: May 19-20: 9:00 a.m.

Place: Holiday Inn Crowne Plaza, 1750 Rockville Pike, Rockville, MD.

Contact: Barbara Wagner, Room 12C26, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20852, (301) 443-4640.

Status of Meeting: Open.

Purpose: The Board assesses the national needs for alcoholism, alcohol abuse, drug abuse, and mental health treatment and prevention services and the extent to which those needs are being met by State, local, and private programs, and programs receiving funds under Title V and Part B of Title XIX of the Public Health Service Act. The Board provides advice and recommendations to the Secretary and to the Administrator, Alcohol, Drug Abuse, and Mental Health Administration respecting these activities to assist in guiding national strategies aimed at the amelioration of alcohol, drug abuse, and mental health problems.

Dated: April 17, 1986.

Brenda L. Williamson,
Acting Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

Centers for Disease Control

Immunization Practices Advisory Committee; Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), the Centers for Disease Control announces the following Committee meeting:

Name: Immunization Practices Advisory Committee.

Date: May 12-13, 1986.

Place: Conference Room 297, Centers for Disease Control, 1600 Clifton Road, NE., Atlanta, Georgia 30333.

Time: 8:30 a.m.

Type of Meeting: Open.

Contact Person: Jeffrey P. Koplan, M.D., Executive Secretary of Committee, Centers for Disease Control (1-2067), 1600 Clifton Road, NE., Atlanta, Georgia 30333.

Telephone: FTS: 236-3751.
Commercial: 404/329-3751.

Purpose: The Committee is charged with advising on the appropriate uses of immunizing agents.

Agenda: The Committee will review and discuss recommendations on hepatitis B and pertussis; discuss HTLV-III infection and live virus; hear updates on rabies vaccine, measles, *Haemophilus influenzae*, and varicella-zoster; and consider other matters of relevance among the Committee's objectives.

Agenda items are subject to change as priorities dictate.

Dated: April 18, 1986.

Elvin Hilyer,
Associate Director for Policy Coordination, Centers for Disease Control.

BILLING CODE 4160-18-M

Food and Drug Administration

[Docket No. 86E-0115]

Determination of Regulatory Review Period for Purposes of Patent Extension; Virazole

AGENCY: Food and Drug Administration.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) has determined the regulatory review period for Virazole and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Commissioner of Patents and Trademarks, Department of Commerce, for the extension of a patent which claims that human drug product.

ADDRESS: Written comments and petitions should be directed to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm,

VOL 51 ISS 79 AP 24 1986 UMI

4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Philip L. Chao, Office of Health Affairs (HFY-30), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301-443-1382.

SUPPLEMENTARY INFORMATION: The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98-417) generally provides that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under that act, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: a testing phase and an approval phase. For human drug products, the testing phase begins when the exemption to permit the clinical investigations of the drug becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human drug product and continues until FDA grants permission to market the drug product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Commissioner of Patents and Trademarks may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human drug product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA recently approved for marketing the human drug product, Virazole (ribavirin), which is indicated for the treatment of carefully selected hospital infants with severe lower respiratory tract infections due to respiratory syncytial virus (RSV). Subsequent to this approval, the Patent and Trademark Office received a patent term restoration application for Virazole from Viratek, Inc., and requested FDA's assistance in determining the patent's eligibility for patent term restoration. FDA, in a letter dated March 20, 1986, advised the Patent and Trademark Office that the human drug product had undergone a regulatory review period and that its active ingredient, ribavirin, represented the first permitted commercial marketing or use of that active ingredient. Shortly thereafter, the Patent and Trademark Office requested that FDA determine the product's regulatory review period.

FDA has determined that the applicable regulatory review period for Virazole is 2,153 days. Of this time, 955 days occurred during the testing phase of the regulatory review period, while 1,198 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act became effective:* February 10, 1980: The applicant claims that the notice of claimed investigational exemption (IND) was submitted on January 9, 1980. However, FDA did not receive the IND application until January 11, 1980. Therefore, under 21 CFR 312.1, the IND became effective on February 10, 1980.

2. *The date the application was initially submitted with respect to the human drug product under section 505(b) of the Federal Food, Drug, and Cosmetic Act:* September 21, 1982. FDA has verified the applicant's claim that the new drug application for the drug (NDA 18-859) was initially submitted on September 21, 1982.

3. *The date the application was approved:* December 31, 1985. FDA has verified that NDA 18-859 was approved on December 31, 1985.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the U.S. Patent and Trademark Office applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 730 days of patent extension.

Anyone with knowledge that any of the dates as published is incorrect may, on or before June 23, 1986, submit to the Dockets Management Branch (address above) written comments and ask for a redetermination. Furthermore, any interested person may petition FDA, on or before October 21, 1986, for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must contain sufficient facts to merit an FDA investigation. (See H. Rept. 857, Part 1, 98th Cong., 2d Sess., pp. 41-42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Comments and petitions should be submitted to the Dockets Management Branch (address above) in three copies (except that individuals may submit single copies) and identified with the docket number found in brackets in the heading of this document. Comments and petitions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Stuart L. Nightingale,
Associate Commissioner for Health Affairs.

[FR Doc. 86-9120 Filed 4-23-86; 8:45 am]
BILLING CODE 4160-01-M

Health Resources and Services Administration

Application Announcement for a Grant for the Planning and Development of Computer-Based Simulations for Medical Training in Arthroscopy

The Bureau of Health Professions, Health Resources and Services Administration, announces that applications for a Fiscal Year 1986 grant for the planning and development of computer-based simulations for medical training in arthroscopy are now being accepted under the authority of section 786(b)(1) of the Public Health Service Act, as amended by Pub. L. 99-129.

Eligible entities for a grant under this authority are health professions, allied health, and nursing schools and any other public or nonprofit private entities which have: (1) Expertise and experience in the application of computer simulation to arthroscopy for use in medical education; (2) existing non-Federal funds committed for developmental work in this area; and (3) formal arrangements with nationally recognized organizations in the field of arthroscopy designed to facilitate future application of developmental efforts in the education and certification of physicians in this specialty area.

To receive support, applicants must meet the requirements of 42 CFR Part 57, Subpart NN.

The Administration's budget request for Fiscal Year 1986 does not include funding for this program. However, should funds become available unexpectedly for this purpose, this contingency action will assure that a grant can be awarded in a timely fashion consistent with the needs of the programs as well as to provide for even distribution of funds throughout the fiscal year. This notice regarding applications does not reflect any change in this policy.

Application materials will be sent only upon request. Requests for application materials and questions regarding grants policy should be directed to: Grants Management Officer (D31), Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 8C-22, 5600 Fishers Lane, Rockville, Maryland 20857. Telephone: (301) 443-6880.

Should additional programmatic information be desired, please contact: Multidisciplinary Resources Development Branch, Division of Medicine, Bureau of Health Professions, Health Resources and Services Administration, Parklawn Building, Room 4C-25, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone: (301) 443-3626.

The deadline date for receipt of applications is May 30, 1986. Applications shall be considered as meeting the deadline if they are either:

(1) Received on or before the deadline date; or

(2) Postmarked on or before the deadline date, and received in time for submission to the independent review group.

A legibly dated receipt from a commercial carrier or U.S. Postal Service will be accepted in lieu of a postmark. Private metered postmarks shall not be acceptable as proof of timely mailing.

This program is not listed in the Catalog of Federal Domestic Assistance, therefore, no catalog number has been assigned. Applications submitted in response to this announcement are not subject to Intergovernmental Review under provisions of Executive Order 12373, Intergovernmental Review of Federal Programs, or 45 CFR Part 100.

Dated: April 16, 1986.

John H. Kelso,
Acting Administrator.

National Institutes of Health

National Cancer Institute, Board of Scientific Counselors, Division of Cancer Prevention and Control, Budget and Evaluation Subcommittee Meeting

Pursuant to Pub. L. 92-463, notice is hereby given of the meeting of the Budget and Evaluation Subcommittee of the Board of Scientific Counselors, Division of Cancer Prevention and Control, National Cancer Institute, National Institutes of Health, May 7, 1986 to be held in Conference Room 2, Building 31A, 9000 Rockville Pike, Bethesda, Maryland 20892. This meeting will be open to the public on May 7 from 7:30 p.m. to adjournment to review budgetary and evaluation issues related to programs and policies of the Division of Cancer Prevention and Control. Attendance by the public will be limited to space available.

Mrs. Winifred Lumsden, the Committee Management Officer, National Cancer Institute, Building 31, Room 10A06, National Institutes of Health, Bethesda, Maryland 20892 (Telephone: 301-496-5708) will provide summaries of the meeting and rosters of subcommittee members upon request.

Mr. J. Henry Montes, Executive Secretary, Board of Scientific Counselors, Division of Cancer Prevention and Control, National Cancer Institute, Blair Building, Room 1A07, National Institutes of Health, Bethesda, Maryland 20892 (Telephone: 301-427-8630) will furnish substantive program information.

Dated: April 17, 1986.

Betty J. Beveridge,
Committee Management Officer, NIH.

Office of Human Development Services

President's Committee on Mental Retardation; Meeting

Agency holding the meeting: President's Committee on Mental Retardation.

Time and date: May 13, 1986, Tuesday, Steering Committee 1:00-3:00 p.m. Subcommittees 3:00-6:00 p.m. May 14, 1986, full committee, 9:00 a.m.-5:00 p.m.

Place: Channel Inn, 650 Water Street, SW., Washington, DC 20024.

VOL 51 ISS 79 AP 24 1986 UMI

Status: Meetings are open to the public. An interpreter for the deaf will be available upon advance request. All locations are barrier free.

Matters to be considered: Reports by the Steering Committee of the President's Committee on Mental Retardation (PCMR) will be given. The PCMR plans to discuss critical issues concerning prevention, family and community services, full citizenship, public awareness and other issues relevant to the PCMR's goals.

The PCMR: (1) acts in an advisory capacity to the President and the Secretary of the Department of Health and Human Services on matters relating to programs and services for persons who are mentally retarded; and (2) is responsible for evaluating the adequacy of current practices in programs for the retarded, and reviewing legislative proposals that affect the mentally retarded.

Contact person for more information: Susan Gleeson, R.N., M.S.N., 330 Independence Ave., SW., Room 4061—North, Washington, DC 20201, (202) 245-7634.

Dated: April 18, 1986.

Susan Gleeson,

Executive Director, PCMR.

BILLING CODE 4130-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Endangered Species Convention; (CITES Export Tag Symbol

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of CITES Export Tag Symbol.

SUMMARY: The United States-CITES Export Tag Symbol depicted in Figure 1 is the official symbol of the United States-CITES export tag program for species listed on the Appendices to the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), as administered by the United States Fish and Wildlife Service, United States Department of the Interior.

Further, notice is given that, under section 701 of Title 18 of the United States Code, whoever manufactures or sells this symbol without express authorization of the United States Fish and Wildlife Service, or illegally possesses any export tag bearing this symbol or any colorable imitation therof, or by photographs, prints, or in any other manner makes or executes any engraving, photograph, print, or impression in the likeness of this symbol on a tag, badge, card, letterhead, or marker, or any other type of copy or any colorable imitation thereof, except as authorized under regulations, shall be fined not more than $250 for each offense or imprisoned not more than 6 months, or both.

DATE: This notice is effective April 24, 1986.

FOR FURTHER INFORMATION CONTACT: Mr. Richard K. Robinson, Acting Chief, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, 1000 North Glebe Road, Room 611 Arlington, Virginia 22201, telephone (703) 235-1937.

SUPPLEMENTARY INFORMATION: Under the terms of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES), Article IV, export of specimens of species listed in Appendix II may occur only if an export permit has been issued by the Service. Export permits may be issued only when (a) the U.S. Scientific Authority (SA) has advised that such exports will not be detrimental to the survival of that species and (b) the U.S. Management Authority (MA) is satisfied that the specimen was not obtained in contravention of laws for the protection of fauna and flora. The Service carries out both SA and MA responsibilities for the United States.

Evidence of legal taking for American alligator, Alaskan gray wolf, Alaskan brown or grizzly bear, bobcat, lynx, and river otter, is provided by Service-approved, State tagging systems. Each skin of a listed species must be clearly identified as to species, State or origin, and season of take by a permanently attached, serially numbered tag of a Service-approved type and attached under conditions established by the Service.

Notice is given that in order to prevent unauthorized use of the distinctive United States-CITES export tag symbol, and to ensure against its use for purposes other than properly signifying export legality of CITES-listed species from the United States in a comprehensive export program administered by the United States Fish and Wildlife Service, any unauthorized user will be subject to the provisions of 18 U.S.C. 701.

Dated: April 17, 1986.

P. Daniel Smith,

Assistant Secretary for Fish and Wildlife, and Parks.

Figure 1.

BILLING CODE 4310-55-M

Bureau of Land Management

Intent To Amend Land Use Plans and Prepare an EIS; Idaho

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of intent to prepare plan amendments and an Environmental Impact Statement and Invitation for public participation. The BLM proposes to amend seven Management Framework Plans (MFPs), two Resource Management Plans (RMPs), and conduct one planning analysis on an area for which no land use plan exists. The purpose of this planning activity is to evaluate the suitability of nine small (less than 5,000 acres) wilderness study areas (WSAs) for designation as wilderness.

On December 30, 1982, Secretary of Interior, James Watt, published a Secretarial Order deleting from wilderness study, all areas identified through section 603 of the Federal Land Policy and Management Act that contain less then 5,000 acres of public land. This Secretarial Order was vacated by a U.S. District Court Decision on April 16, 1985. The nine WSAs being addressed now were among those dropped and then reinstated by the Court decision. They are located in central and southern Idaho. The nine areas, the BLM identifying number, the acreage, location by county, name of plan being amended, and issues anticipated in each WSA are as follows:

1. *Box Creek*—ID-110-01A, 428 acres, Valley County, no existing plan, issues: (1) The effect of wilderness designation on hydroelectric development, (2) the effect of hydroelectric development on wilderness values, (3) the effect of timber harvest on visual resources and the water quality of Box Creek, (4) the effect on wilderness values of designation or nondesignation as wilderness, and (5) the effect of wilderness management for Box Creek WSA upon the wilderness values of the U.S. Forest Service's adjacent Lick Creek RARE II area.

2. *Lower Salmon Falls Creek*—ID-17-10, 3,500 acres, Twin Falls County, Jarbidge RMP and Twin Falls MFP, issues: (1) The effect on wilderness designation on hydroelectric development, (2) the effect of hydroelectric development on wilderness values, and (3) the effect on wilderness values of designation or nondesignation as wilderness.

3. *Henry's Lake*—ID-35-77, 350 acres, Fremont County, Medicine Lodge RMP, issues: (1) Effects on wilderness values of designation or nondesignation as wilderness, and (2) effects of wilderness designation on the potential for sale or exchange of 22 acres in the southern part of the WSA, and (3) the effects of wilderness management for Henry's Lake WSA upon the wilderness values of the U.S. Forest Service adjacent Lion's Head RARE II area.

4. *Worm Creek*—ID-37-77, 40. acres, Bear Lake County, Bear Lake MFP, issues: (1) Effects on wilderness values of designation or nondesignation as wilderness, (2) effects on timber harvest of designation as wilderness, (3) effects on oil and gas exploration and development of designation as wilderness, and (4) the effects of wilderness management for Worm Creek WSA upon the wilderness values of the U.S. Forest Service's adjacent Worm Creek RARE II area.

5. *Goldburg*—ID-45-1, 3,290 acres, Custer County, Ellis/Pahsimeroi MFP, issues: (1) Effects on wilderness values of designation or nondesignation as wilderness, (2) effects of wilderness designation on the potential for land exchange with the State of Idaho, and (3) effects of wilderness management for Goldburg WSA upon the wilderness values of the U.S. Forest Service's adjacent North Lemhi RARE II area.

6. *Boulder Creek*—ID-46-13, 1,930 acres, Custer County, Challis MFP, issues: (1) Effects on wilderness values of designation or nondesignation as wilderness, and (2) the effects of wilderness management for Boulder Creek WSA upon the wilderness values of the U.S. Forest Service's adjacent Boulder-White Clouds RARE II area.

7. *Borah Peak*—ID-47-4, 3,100 acres, Custer County, Mackay MFP, issues: (1) Effects on wilderness values of designation or nondesignation as wilderness, and (2) the effects of wilderness management for Borah Peak WSA upon the wilderness values of the U.S. Forest Service's adjacent Borah Peak RARE II area.

8. *Little Wood River*—ID-53-4, 4,385 acres, Blaine County, Sun Valley MFP, issues: (1) Effects on wilderness values of designation or nondesignation as wilderness, and (2) the effects of wilderness management for Little Wood River WSA upon the wilderness values of the U.S. Forest Service's adjacent Pioneer Mountains RARE II area.

9. *Black Butte*—ID-54-2, 4,002 acres, Lincoln and Blaine Counties, Bennett Hills MFP, issues: (1) Effects on wilderness values of designation or nondesignation as wilderness, (2) effects on wilderness values of slab lava mining.

Public Participation

The public is invited and encouraged to participate in the plan amendment and EIS preparation process. Now is the time to identify concerns or issues regarding specific WSAs. To insure their consideration in the planning process, these concerns should be submitted by May 30, 1986. The issues identified, including those listed here, will determine the alternatives considered. Alternatives identified to date include *all wilderness* and *no wilderness* (no action) for each WSA.

Planning criteria guide the development of the amendment and provide parameters for analysis and decisionmaking. The planning criteria to be used for these amendments are those published in the **Federal Register** on February 3, 1982, under the title *Wilderness Study Policy; Policies, Criteria, and Guidelines for Conducting Wilderness Studies on the Public Lands.* These criteria require the evaluation of wilderness values of each WSA and its manageability as wilderness. The wilderness recommendation from this planning effort, whether suitable for preservation as wilderness or nonsuitable, will be based upon these criteria. After the public scoping (issue identification) process, criteria will be developed for each resource element that represents an issue in the planning effort. The public will be given the opportunity to review these criteria about June 1986.

The next specific opportunity for public participation will be the review of the draft amendments and EIS. The draft EIS will be distributed for public review in early 1987. The review period will include a public hearing for the purpose of gathering testimony regarding the suitability or nonsuitability of the WSAs for preservation as wilderness.

FOR MORE INFORMATION OR TO IDENTIFY ISSUES CONTACT: Gary L. Wyke, Project Manager, Bureau of Land Management, 3380 Americana Terrace, Boise, Idaho 83706. Telephone 208-334-1952.

Dated: April 15, 1986.

Delmar D. Vail,

State Director, Idaho Bureau of Land Management.

BILLING CODE 4310-84-M

District Advisory Council; Open Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of meeting.

SUMMARY: In accordance with Pub. L. 94-579 (FLPMA), a District Advisory Council meeting will be held on the dates listed below.

DATES AND TIME: May 13, 1986, 9:00 a.m. and May 14, 1986, 8:00 a.m.

ADDRESS: Bureau of Land Management, 705 Hall Street, Susanville, CA 96130.

SUPPLEMENTARY INFORMATION: Agenda will include such topics as:

1. Update on High Rock Wilderness Technical Review Team and Ft. Sage Technical Review Team.
2. Update on Bizz Johnson Trail.
3. Slide presentation and discussion on riparian management.
4. Discussion on the management of wild horses.
5. The tour on May 13 will include wildfire ravaged Bass Hill, Turtle Mountain, and Dry Valley public lands. Fire rehabilitation efforts will be noted in these areas.
6. The tour on May 14 will feature Snowstorm, Ravendale, or Fredonyer prescribed burn areas. The two tours will allow participants to observe the differences between wildfires and fire rehabilitated areas.

The meeting is open to the public and time will be provided for public comment. Summary minutes of the meeting will be maintained in the District Office and will be available for public inspection and reproduction within 30 days following the meeting.

FOR FURTHER INFORMATION CONTACT: Louisa Beld, Public Affairs Officer, Bureau of Land Management, 705 Hall Street, Susanville, CA 96130, 916/257-5381.

Robert J. Sherve,

Acting District Manager.

[A-21055]

Federal Minerals Exchange, Cochise, La Paz, Pima, Pinal, Yavapai, and Yuma Counties, AZ

AGENCY: Bureau of Land Management (BLM), Interior.

ACTION: Notice of Realty Action—Exchange, Federal Minerals in Cochise, La Paz, Pima, Pinal, Yavapai, and Yuma Counties, Arizona.

SUMMARY: The following described Federal mineral estate has been determined to be suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716: All or part of the following subject sections are affected by this proposal.

Gila and Salt River Meridian, Arizona

T. 15 S., R. 9 E.,
Sec. 13, 14, 15, 25, 26, 27, 28, 29, 31, 33, 34, 35.
T. 16 S., R. 9 E.,
Sec. 1, 3, 4, 9, 12, 13, 23, 24, 25.
T. 15 S. R. 10 E.,
Sec. 15, 23, 24, 25, 26, 29, 35.
T. 16 S., R. 10 E.,
Sec. 6, 8, 9, 14, 17, 18, 19, 20, 21, 25, 26, 27, 28, 31.
T. 17 S., R. 10 E.,
Sec. 4, 6, 9.
T. 18 S., R. 10 E.,
Sec. 33, 34.
T. 19 S., R. 10 E.,
Sec. 3, 4.
T. 16 S., R. 11 E.,
Sec. 5, 6, 7, 8, 9, 17, 18, 19, 20, 21, 28, 29.
T. 8 S., R. 14 E.,
Sec. 12, 17, 18, 19, 20, 23, 26, 27, 28, 29, 30, 31, 33, 34, 35.
T. 9 S., R. 15 E.,
Sec. 4, 5, 6, 8, 13, 14, 15, 17, 18, 21, 22, 23, 24, 26, 27, 34, 35.

Comprising 49,159.02 acres, more or less.

In exchange for the federal mineral estate described above, the United States will acquire the following state-owned mineral estate located within the Kofa, Cibola and Cabeza Prieta National Wildlife Refuges. All interest acquired within the National Wildlife Refuges under this exchange will be administered by the U.S. Fish and Wildlife Service.

Gila & Salt River Meridian, Arizona

Kofa National Wildlife Refuge

Township 1 N., R., 15 W.,
Sec. 2, 16, 32, 36.
Township 2 N., R., 15 W.,
Sec. 2, 16, 32, 36.
Township 1 N., R., 16 W.,
Sec. 2, 16, 36, 36.
Township 2 N., R., 16 W.,
Sec. 2, 32, 36.
Township 4 S., R., 15 W.,
Sec. 2, 16, 32, 36.
Township 4 S., R., 16 W.,
Sec. 2, 16, 32, 36.

Cibola National Wildlife Refuge

Township 1 S., R. 23 W.,
Sec. 32.

Cabeza Prieta National Wildlife Refuge

Township 14 S., R. 7 W.,
Sec. 2, 16.

Additionally, the United States will acquire the following state-owned mineral estate located within the Organ Pipe Cactus National Monument and Fort Bowie National Historical Site. All interest acquired within the Organ Pipe Cactus National Monument and Fort Bowie National Historical Site under this exchange will be administered by the National Park Service.

Organ Pipe Cactus National Monument

Township 14 S., R. 5 W.,
Sec. 32, 36.
Township 14 S., R. 6 W.,
Sec. 32, 36.
Township 14 S., R. 7 W.,
Sec. 32.

Fort Bowie National Historical Site

Township 15 S., R. 26 E.,
Sec. 2.

The United States will also acquire the following described state-owned mineral estate located under lands held by the United States and administered by the Bureau of Land Management:

Township 11 N., R. 10 W.,
Sec. 32.
Township 12 N., R. 10 W.,
Sec. 32.
Township 6 N., R. 11 W.,
Sec. 3, 4, 6, 7, 8.
Township 7 N., R. 11 W.,
Sec. 10, 11, 12, 15, 19, 20, 21, 22, 27, 28, 29, 30, 31, 33.
Township 9 N., R. 11 W.,
Sec. 2, 16.
Township 10 N., R. 11 W.,
Sec. 2, 32, 36.
Township 11 N., R. 11 W.,
Sec. 32, 36.
Township 6 N., R. 12 W.,
Sec. 2, 10, 24.
Township 7 N., R. 12 W.,
Sec. 22, 23, 24, 25, 26, 27, 32, 34, 35.
Township 9 N., R. 12 W.,
Sec. 2, 16, 32, 36.
Township 10 N., R. 12 W.,
Sec. 16, 32, 36.
Township 10 N., R. 13 W.,
Sec. 16, 32, 36.
Township 10 N., R. 14 W.,
Sec. 16.

Comprising 49, 172.12 acres, more or less.

The purpose of this exchange is to unite State and Federal split estates, thereby eliminating surface management difficulties and providing for the consolidation of surface and mineral ownership.

Based on leasable and locatable mineral potential reports, it has been determined that the overall potential mineral value of the State and Federal mineral estates are approximately equal.

The above described mineral estates are not encumbered by mining claim locations. They are, however, encumbered by a number of oil and gas leases.

Mineral estates to be transferred from the United States to the State of Arizona will be subject to the following terms and conditions:

1. Oil and gas leases A–14516 and A–17748, and the right of the mineral lessee to occupy and use as much as the surface of the land as may be reasonably necessary for mineral leasing operations, in accordance with the Acts of February 25, 1920 and March 4, 1933 (30 U.S.C. 186, 128). The United States will continue to administer these leases until their expiration or cessation of operations, at which time the leasing function will transfer to the State of Arizona.

2. Subject to all valid existing rights and those applicaitons on record as of the date of that notice.

Minerals to be acquired by the United States from the State of Arizona will be subject to the following terms and conditions:

1. Oil and gas leases 13–87340 and 13–87343 with the right to explore for and remove such deposits. The State of Arizona will continue to administer these leases until their expiration or cessation of operations, at which time the leasing function will transfer to the United States.

Publication of this notice shall segregate the federal minerals, as described in this notice, from appropriation under the mining laws with the exception of the mineral leasing laws. This segregative effect shall terminate upon the issuance of a patent or two years from the date of this notice, or upon publication of a Notice of Termination.

Detailed information concerning the exchange, including the environmental assessment, the locatable mineral potential, and the leasable mineral potential reports, can be obtained from the Phoenix Resource Area Manager, 2015 West Deer Valley Road, Phoenix, Arizona 85027. For a period of forty-five (45) days, from the date of this notice, interested parties may submit comments to the Phoenix District Manager, 2015 West Deer Valley Road, Phoenix, Arizona 85027. Any adverse comments will be reviewed by the State Director, who may sustain, vacate, or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Dated: April 15, 1986.
Marlyn V. Jones,
District Manager.

BILLING CODE 4310–32–M

[I–14906 et al.]

Idaho; Proposed Continuation of Withdrawals

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Forest Service, Department of Agriculture proposes that 491.25 acres of withdrawals for the Dog Creek Recreation Area and the Boiling Springs, Crawford, Long Gulch, Third Fork, Idaho Ranger Station, High Valley, Garden Valley Ranger Station, Lick Creek, Elk Creek and Idaho City Administrative Sites, continue for an additional 20 years, which is the anticipated time the sites will continue to be used. These lands will remain closed to surface entry, and mining, but not mineral leasing.

DATE: Comments should be received within 90 days of the date of publication of this notice.

ADDRESS: Comments should be sent to: Idaho State Director, Bureau of Land Management, 3380 Americana Terrace, Boise, ID 83706.

FOR FURTHER INFORMATION CONTACT: Larry R. Lievsay, Idaho State Office, 208–334–1735.

The Forest Service proposes that the existing land withdrawals made by Secretarial Orders of December 13, 1906, December 23, 1907, October 23, 1906, September 26, 1908, December 15, 1908, November 11, 1925, January 11, 1908, and Public Land Orders Number 4257 of December 18, 1967 and Number 773, of December 19, 1951, be continued for a period of 20 years pursuant to Section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751; 43 U.S.C. 1714. The land is described as follows:

(I–14914)

T. 12 N., R. 5 E., B.M.,
Sec. 21, SE¼SE¼NE¼.
T. 14 N., R. 4 E., B.M.,
Sec. 21, SE¼SW¼.

(I–14909)

T. 3 N., R. 7 E., B.M.,
Sec. 21, SE¼NW¼NE¼.

Sec. 27, lot 1, SE¼NE¼SE¼, S½SW¼ SE¼;
Sec. 34, lot 1.

The area described above aggregates 491.25 acres in Valley, Boise, Elmore and Gem Counties.

The withdrawals are essential for protection of substantial capital improvements on the Administrative and Recreation Sites. The withdrawals closed the described lands to surface entry, and mining but not mineral leasing. No change in the segregative effect or use of the land is proposed by this action.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuations may present their views in writing to the Idaho State Director at the above address.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President and Congress, who will determine whether or not the withdrawals will be continued, and if so, for how long. The final determination of the withdrawals will be published in the Federal Register. The existing withdrawals will continue until such final determination is made.

Dated: April 18, 1986.
William E. Ireland,
Chief, Realty Operations Section.

Realty Action, Petroleum County, Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of conveyance and order providing for opening of public land in Petroleum County, Montana.

SUMMARY: This order will open lands reconveyed to the United States in an exchange under the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1701 et seq. (FLMPA), to the operation of the public land laws. It also informs the public and interested state and local governmental officials of the issuance of the conveyance document.

DATE: At 9 a.m. on June 16, 1986, the lands reconveyed to the United States shall be open to the operation of the public land laws, subject to valid existing rights, the provisions of existing withdrawals and the requirements of applicable law. The lands described in paragraph 1 below were segregated from settlement, sale, location and entry, including the mining laws, but not from exchange, by the Notice of Realty Action published in the Federal Register on September 5, 1985 (50 FR 36156). The segregation terminated on issuance of the deed on April 7, 1986.

ADDRESS: For further information contact: Edward H. Croteau, Chief, Lands Adjudication Section, BLM, Montana State Office, P.O. Box 36800, Billings, Montana 59107, Phone (406) 657–6082.

SUPPLEMENTARY INFORMATION:

1. Notice is hereby given that pursuant to Sec. 206 of FLPMA, the following described land, with a reservation to the

VOL 51 ISS 79 AP 24 1986 UMI

United States of all oil and gas deposits, was conveyed to the County of Petroleum, in the State of Montana:

Principal Meridian, Montana

T. 14 N., R. 26 E.,
Sec. 2, lots 1–4, S½N½.
T. 14 N., R. 27 E.,
Sec. 6, lots 1–10 of Block 13, Rimrock Addition to the town of Winnett.
Aggregating 326.584 acres.

2. In exchange for the above selected land, the United States acquired the following described land, with a reservation to the County of all oil and gas deposits, in Petroleum County, Montana:

Principal Meridian, Montana

T. 15 N., R. 26 E.,
Sec. 27, W½SW¼; Sec. 28, NE¼SE¼;
Sec. 34, NW¼NW¼.
T. 17 N., R. 28 E.,
Sec. 21, NE¼, N½NW¼SE¼.
Aggregating 340 acres.

3. The federal public land was valued at $30,500 and the nonfederal land was valued at $30,000. A $500 cash equalization was paid to the United States.

4. At 9 a.m. on June 16, 1986, the lands described in paragraph 2 above that were conveyed to the United States will open to the operation of the public land laws.

John A. Kwiatkowski,
Deputy State Director, Division of Lands and Renewable Resources.
April 16, 1986.

BILLING CODE 4310-DN-M

[NM-63095]

Exchange of Lands; New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, NM-63095—Exchange of Public Lands and Minerals with New Mexico State Lands and Minerals in Eddy County, New Mexico.

SUMMARY: The following described public lands have been determined to be suitable for disposal by exchange under authority: FLPMA Exchange, Section 206. These lands represent a pool of lands from which the State will be allowed to select parcels until equal values are achieved.

New Mexico Principal Meridian

T. 21 S., R. 31 E., Sec. 23, SE¼—160 acres; Sec. 24, SW¼—160 acres; Sec. 25, E½NW¼—80 acres; Sec. 26, All—640 acres; Sec. 27, E½—320 acres; Sec. 34, NE¼, N½SE¼, SE¼SE¼—280 acres; Sec. 35, All—640 acres; T. 22 S., R. 31 E., Sec. 1, Lots 3 & 4, S½NW¼—159.43 acres; Sec. 5, All—639.72 acres; comprising 3,079.15 acres in Eddy County, New Mexico.

In exchange for some of these lands, the United States will acquire the following described lands from the State of New Mexico:

New Mexico Principal Meridian

T. 22 S., R. 31 E., Sec. 18, All—640 acres; Sec. 32, All—640 acres; comprising 1,280 acres in Eddy County, New Mexico.

This exchange will include both surface and all mineral estates.

The purpose of this exchange is to acquire the State lands and minerals to accommodate the U.S. Department of Energy with their full implementation of the Waste Isolation Pilot Plant (WIPP) Project. The project's design is the safe disposal of low level nuclear waste.

Lands to be transferred from the United States will be subject to the following reservations, terms, and conditions:

1. A reservation thereon for ditches and canals to be constructed by the authority of the U.S. Act of August 30, 1890 (26 State 391, 43 U.S.C. 945).

2. The patent will be subject to the terms and conditions of valid existing rights-of-way. The rights-of-way will then be assigned to the New Mexico State Land Office for administration.

This exchange will be subject to the approval of the Carlsbad Resource Management Plan.

Existing Federal grazing lessees, on the affected lands, will be offered a State Land Office grazing lease (up to the legal maximum of five years) with the preferential right of renewal.

Existing range improvements, within the interior of the Federal lands, will be transferred to the State Land Office. The value of these improvements was included in the appraisal. Other range improvements, such as fences bordering the Federal lands, will remain under BLM authorization.

Existing Federal potash leases will be acquired by DOE.

Publication of this notice segregates the Federal lands from appropriation under any of the land entry laws, including the mining laws but not the mineral leasing laws, for a period of two years from the date of first publication.

For a period of 45 days, from the date of first publication, interested parties may submit comments to:

Bureau of Land Management, Carlsbad Resource Area, P.O. Box 1778, Carlsbad, NM 88220
Bureau of Land Management, Roswell District Office, P.O. Box 1397, Roswell, NM 88201.

Further information concerning the exchange, including the environmental assessment and land report, is available for review at the Carlsbad Resource Area Office, 101 E. Mermod, Carlsbad, NM.

Francis R. Cherry, Jr.
District Manager.
April 8, 1986.

BILLING CODE 4310-FB-M

[W-69046]

Wyoming; Realty Action Bureau Motion Lease and/or Sale of Public Lands for Recreation and Public Purposes

The following described public land near the community of Dubois, Fremont County, Wyoming have been examined and found suitable for classification for lease and/or sale under the Recreation and Public Purposes Act of June 14, 1926, as amended (43 U.S.C. 869 et seq.):

T.42N., R.107W., 6th Principal Meridian,
Sec. 27: W½W½NE¼, E½W½, W½W½SE¼.
(240 acres).

The subject land would be leased and/or sold to Dubois Gun Club, a non-profit association, which has applied to lease and/or purchase the land for a firearms shooting range complex which would be open for public use.

The land is physically suited for the proposed use and is not of national significance. Since this land is valuable for a local program, it is considered chiefly valuable for public purposes and therefore suitable for classification for lease and/or sale under the Recreation and Public Purposes Act. This action conforms with the Bureau of Land Management Dubois Management Framework Plan and the Draft Lander Resource Management Plan.

The lease would have a term of 20 years and will be renewable. Under the special pricing provision, the rental shall be $25.00 the first year. Rental thereafter will be subject to appraisal. The subject area may be purchased by the Dubois Gun Club after the shooting complex has been developed according to a BLM-approved plan of development and management. The grazing lease of Parker Land and Cattle Company would be cancelled on the subject area if the land is sold to the Dubois Gun Club. Upon publication of this notice in the Federal Register, the lands will be segregated from all forms of appropriation under the public land laws, including locations under the mining laws, except as to applications under mineral leasing laws and applications under the Recreation and Public Purposes act.

Detailed information concerning the lease and/or sale, including the environmental assessment/land report, is available for review at the Bureau of Land Management, Lander Resource Area Office, 125 Sunflower, Lander, Wyoming.

For a period of 45 days from the date of publication of this notice, interested parties may submit comments to the District Manager, Bureau of Land Management, 1300 Third Street, P.O. Box 670, Rawlins, Wyoming 82310. Any adverse comments will be evaluated by the State Director who may vacate or modify this realty action and issue a final determination. In the absence of any adverse comments, this classification will become effective 60 days from the date of publication of this notice.

Upon the effective date of classification, the lands will be open to the filing of an application under the Recreation and Public Purposes Act by any interested, qualified applicant. If, after 18 months following the effective date of classification, an application has not been filed, the segregative effect of the classification shall automatically expire and the lands classified shall return to their former status without further action by the Authorized Officer.

Richard Bastin,
District Manager.

BILLING CODE 4310-22-M

[W-69645]

Wyoming; Realty Action, Direct Sale of Public Land in Washakie County, WY

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action, direct sale of public land in Washakie County.

SUMMARY: The following lands have been exmined and identified as suitable for disposal under section 203 of the Federal Land Policy and Management Act of 1976 (90 STAT. 2750; 43 U.S.C. 1713).

PARCELS

Parcel	Legal Description	Acres	Approved value
Sixth Principal Meridian Wyoming			
No. 1	T. 47 N., R. 99 W., Tract 630, Lot 58.	0.46	$3000

The sale of the land parcel will resolve an unauthorized occupancy. The land is being offered at fair market value by direct sale to Herbert W. Ainsworth who owns the adjoining Lot 34 and the improvements placed on the sale parcel described as Lot 58. No other bids or bidders will be considered.

The land is not required for any federal purpose. Disposal would best serve the public interest. The disposal will be in conformance with the Grass Creek Management Framework Plan and is in conformance with the Washakie County Commissioners' recommendation.

All minerals, except oil, gas, and coal resources, will be offered for conveyance. The mineral interests being offered have no known value. An offer to purchase the parcel will also constitute application for conveyance of those mineral interests offered under the authority of Sections 209(b) of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1719(b). Purchaser will be required to submit a non-returnable filing fee of $50.00 to cover processing costs of conveying the mineral interests. Failure to do so will result in disqualification.

The patent issued as a result of the sale will be subject to all valid existing rights and reservations of record and will contain a reservation to the United States for a right-of-way for ditches and canals under the act of August 30, 1890, 26 STAT. 391; 43 U.S.C. 945 and for oil, gas, and coal resources together with the right to prospect for, mine, and remove the minerals. The patent will be issued subject to the following:

1. W–51974—Oil and Gas Lease.
2. W–022980—Buried Oil Pipeline Right-of-way.
3. Reservation for a 60 foot right-of-way on the east boundary of Lot 58 for access road and public utilities as provided by Classification Order No. 11 dated May 7, 1953.
4. Improvement requirements under the terms of sale of rural homesites on the small tracts (Wyoming Classification No. 11).

Publication of this notice in the Federal Register segregates the public lands from appropriation under the public land laws and mining laws. The segregative effect will end upon issuance of a patent.

Sale Procedures

1. The designated bidder will be required to submit payment of at least twenty percent of the fair market value by certified check, postal money order, bank draft, or cashier's check made payable to the Department of Interior, Bureau of Land Management at the Worland District Office on August 13, 1986.

2. The balance of the appraised fair market value will be due within 180 days payable in the same form at the same location. Failure to submit the remainder of the payment within 180 days of receipt of the decision notice accepting the bid deposit will result in cancellation of the sale offering and forfeiture of the deposit.

3. For a period of 45 days from the date of this notice in the Federal Register, interested parties may submit comments to the district Manager, Bureau of Land Management, P.O. Box 119, Worland, Wyoming 82401. Any adverse comments will be evaluated by the District Manager who may sustain, vacate or modify this realty action. In the absence of any objections, this realty action will become the final determination of the Department of the Interior.

Dated: April 11, 1986.
Chester E. Conard,
District Manager.
[FR Doc. 86-9227 Filed 4-23-86; 8:45 am]
BILLING CODE 4310-22-M

[N-42777]

Realty Action—Non-Competitive Sale; Public Lands in Washoe County, NV

The following described lands comprising 5 acres have been identified as suitable for disposal through sale under section 203 of the Federal Land Policy and Management Act of October 21, 1976, 43 U.S.C. 1713, at no less than fair market value:

Mt. Diablo Meridian

T. 18 N., R. 19 E.,
Sec. 30, N½NW¼NW¼NW¼.

The lands are hereby segregated from appropriation under the public land laws including the mining laws, but not from sale under the above-cited statute. The segregative effect will end upon issuance of the patent or 270 days from the date of the publication of the notice in the Federal Register, whichever occurs first. The lands are being offered to Bell Telephone Company of Nevada through non-competitive sale to protect their equity investment in improvements on the parcel.

The sale is consistent with the Bureau's planning system and with local government plans. The lands are not needed for support of any resource programs and are not suitable for management by another federal agency.

There are no known values for locatable, saleable and leasable minerals excepting geothermal steam and related resources. In accordance

VOL 51 ISS 79 AP 24 1986 UMI

with section 209(b)(1)(l) of Pub. L. 94–579, mineral interests, excepting geothermal steam and related resources, will be conveyed simultaneously with the surface estate upon submission of a non-refundable filing fee of $50.00.

The patent when issued will contain the following reservations to the United States:

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States, under the Act of August 30, 1890, 26 Stat. 391; U.S.C. 945.

2. Geothermal steam and related resources shall be reserved to the United States, together with the right to prospect for and remove those resources. This parcel is affected by geothermal lease N–12065, Yankee Petroleum and Western States Geothermal.

And will be subject to:

1. Those rights for State Route 431 which have been granted to Nevada Department of Transportation, its successors or assigns, by right-of-way CC–016097 (400').

2. Those rights for a powerline which have been granted to Sierra Pacific Power Company, its successors or assigns, by right-of-way Nev–06133 (40').

The lands will not be offered for sale for at least 60 days after the date of this notice. For a period of 45 days from the date of publication of this notice in the **Federal Register**, interested parties may submit comments to the District Manager, Carson City District Office, Bureau of Land Management, 1535 Hot Springs Road, Suite 300, Carson City, Nevada 89701. Any adverse comments will be evaluated and this notice upheld, modified or vacated.

Dated this 16th day of April 1986.

Thomas J. Owen,

District Manager.

Copies of this Notice are being sent to the following parties:

Certified

Mr. John B. Walker, State Office of Community Services, 1100 E. William St., Suite 109, Carson City, Nevada 89710
Nevada Department of Transportation, Right-of-Way Department, 1263 South Stewart Street, Carson City, Nevada 89712
Western States Geothermal Corp., 655 East 4500 South, Salt Lake City, Utah 84107
Yankee Petroleum, P.O. Box 1566, Tulsa, Oklahoma 74101
Washoe County Commissioners, P.O. Box 11130, Reno, Nevada 89504
Sierra Pacific Power Company, P.O. Box 10100, Reno, Nevada 89520

Non-Certified

BILLING CODE 4310–HC–M

Eagle Lake Resource Area Office; Designation of Pines Dunes Research Natural Area (RNA)

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of designation of Pines Dunes Research Natural Area (RNA).

SUMMARY: Pursuant to the authority in 43 CFR 8223, the following lands are designated as a Research Natural Area (RNA).

Mt. Diablo Meridian; Lassen County, California.

T. 35 N., R. 16 E.,
Sec. 25, S½S½.

These lands, designated the Pine Dunes RNA, total 160 acres of BLM administered lands.

This designation is being made to provide protection for a unique isolated stand of pine trees. The area will be preserved for research and education purposes and the continued existence of the trees and their habitat.

A more detailed description of the resource values and special management attention required to protect these values are included in the Cal-Neva Management Framework Plan (MFP) for the Eagle Lake Resource Area. This area and management criteria were developed through the planning process (43 CFR 1610) which included three stages of public participation.

DATES: The designation of the Pine Dunes Research Natural Area (RNA) is effective upon publication of this notice.

ADDRESSES: For further information regarding the Management Framework Plan and the Pine Dunes RNA contact: Mark T. Morse, Area Manager, Eagle Lake Resource Area, 2545 Riverside Drive, Susanville, CA 96130.

Dated: April 10, 1986.

Mark T. Morse,

Area Manager.

BILLING CODE 4310–40–M

Colorado; Filing of Plats of Survey

April 16, 1986.

The plat of survey of the following described land, will be officially filed in the Colorado State Office, Bureau of Land Management, Denver, Colorado, effective 10:00 A.M., April 16, 1986.

The plat representing the corrective survey of a portion of the subdivision of section 28, R. 37 S., R. 2 E., New Mexico Principal Meridian, Colorado, Group No. 774, was accepted April 2, 1986.

This survey was executed to meet certain administrative needs of the U.S. Forest Service.

All inquiries about this land should be sent to the Colorado State Office, Bureau of Land Management, 2020 Arapahoe Street, Denver, Colorado 80205.

Marlin G. Livermore II,

Acting Chief Cadastral Surveyor for Colorado.

BILLING CODE 4310–84–M

[Nev–064560]

Proposed Continuation of Withdrawal; Nevada

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Reclamation proposes that a 6,480-acre withdrawal for the Humboldt Project continue for an additional 50 years. The lands will remain closed to surface entry and mining but have been and will remain open to mineral leasing.

DATE: Comments should be received by July 23, 1986.

ADDRESS: Comments should be sent to: Chief, Branch of Lands and Minerals Operations, Bureau of Land Management, Nevada State Office, P.O. Box 12000, Reno, Nevada 89520.

FOR FURTHER INFORMATION CONTACT: Vienna Wolder, Nevada State Office, (702) 784–5481.

SUPPLEMENTARY INFORMATION: The Bureau of Reclamation proposes that the existing land withdrawal made by the Secretarial Order of March 16, 1934, be continued for a period of 50 years pursuant to section 204 of the Federal Land Policy and Management Act of 1976, 90 Stat. 2751, 43 U.S.C. 1714. The land is described as follows:

Mount Diablo Meridian, Nevada

T. 31 N., R. 32 E.,
Sec. 36, NE¼NE¼, E½SE¼.
T. 32 N., R. 32 E.,
Sec. 2, NE¼, NE¼NW¼, S½NW¼, S½;
Sec. 10, NE¼NE¼, SE¼NE¼, NE¼SE¼, S½SE¼;
Sec. 12, NE¼NE¼, SE¼NE¼, SE¼SW¼, SE¼;
Sec. 14, SE¼NE¼, NE¼SE¼, SE¼SE¼;
Sec. 22, NE¼, NE¼SE¼, SE¼SE¼;
Sec. 24, N½NE¼, N½NW¼, SW¼NW¼, W½SW¼;
Sec. 26, NE¼NE¼, NW¼NW¼, S½NW¼, SW¼SE¼, SW¼;
Sec. 36, NE¼, NE¼NW¼, SW¼NW¼, SW¼, SW¼SE¼.
T. 33 N., R. 32 E.,
Sec. 36, All.
T. 30 N., R. 33 E.,
Sec. 6, E½NE¼, W½NW¼, SW¼, E½SE¼;
Sec. 8, W½;
Sec. 18, NE¼NE¼, W½, SW¼SE¼.
T. 31 N., R. 33 E.,
Sec. 6, NW¼NE¼, W½NW¼, SW¼, SW¼SE¼;
Sec. 8, W½NE¼, SE¼NE¼, SE¼NE¼, E½NW¼, NE¼SE¼, W½SE¼;
Sec. 18, W½NE¼, E½NW¼, E½SW¼, W½SE¼;
Sec. 20, W½;
Sec. 30, W½, SE¼SE¼;
Sec. 32 N., W½NW¼, W½SW¼.
T. 32 N., R. 33 E.,
Sec. 4, NE¼NE¼;
Sec. 6, NE¼, SW¼, NW¼SE¼;
Sec. 18, W½NW¼, W½SW¼;
Sec. 30, SW¼NE¼, S½NW¼, SW¼, SE¼;
Sec. 32, NW¼NW¼.
T. 33 N., R. 33 E.,
Sec. 20, S½NW¼, S½NE¼, S½;
Sec. 28, S½SW¼, NW¼SE¼;
Sec. 28, E½NE¼, NE¼NW¼;
Sec. 30, W½NW¼, W½SW¼;
Sec. 32, W½;
Sec. 34, NW¼NE¼.

The area described contains 6,479.44 acres in Pershing County.

The purpose of the withdrawal is to protect the Humboldt Project's Rye Patch Reservoir and associated lands. The withdrawal segregates the land from operation of the public land laws generally, including the mining laws, but not the mineral laws. No change is proposed in the purpose or segregative effect of the withdrawal.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments in connection with the proposed withdrawal continuation may present their views in writing to the Chief, Branch of Lands and Minerals Operations, in the Nevada State Office.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the land and its resources. A report will also be prepared for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued and, if so, for how long. The final determination on the continuation of the withdrawal will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

Dated: April 16, 1986.

Marla B. Bohl,

Acting Deputy State Director, Operations.

Minerals Management Service

Development Operations Coordination Document; Sonat Exploration Co.

AGENCY: Minerals Management Service, Interior.

ACTION: Notice of the receipt of a proposed development operations coordination document (DOCD).

SUMMARY: Notice is hereby given that Sonat Exploration Company has submitted a DOCD describing the activities it proposes to conduct on Lease OCS–G 4084, Block 739, Mustang Island Area, offshore Texas. Proposed plans for the above area provide for the development and production of hydrocarbons with support activities to be conducted from an onshore base located at Harbor Island, Texas.

DATE: The subject DOCD was deemed submitted on April 11, 1986.

ADDRESSES: A copy of the subject DOCD is available for public review at the Office of the Regional Director, Gulf of Mexico OCS Region, Minerals Management Service, 3301 North Causeway Blvd., Room 147, Metairie, Louisiana (Office Hours: 9 a.m. to 3:30 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Ms. Angie Gobert; Minerals Management Service, Gulf of Mexico OCS Region, Rules and Production, Plans, Platform and Pipeline Section, Exploration/Development Plans Unit; Phone (504) 838–0876.

SUPPLEMENTARY INFORMATION: The purpose of this Notice is to inform the public pursuant to section 25 of the OCS Lands Act Amendments of 1978, that the Minerals Management Service is considering approval of the DOCD and that it is available for public review.

Revised rules governing practices and procedures under which the Minerals Management Service makes information contained in DOCDs available to affected States, executives of affected States, local governments, and other interested parties became effective December 13, 1979, (44 FR 53685). Those practices and procedures are set out in revised § 250.34 of Title 30 of the CFR.

Dated: April 16, 1986.

J. Rogers Pearcy,

Regional Director, Gulf of Mexico OCS Region.

BILLING CODE 4310–MR–M

Royalty Management Advisory Committee, Data Base Validation Working Panel; Meeting

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of meeting.

SUMMARY: The Minerals Management Service (MMS) Royalty Management Program, hereby gives notice that the Data Base Validation Working Panel, established by the Royalty Management Advisory Committee, will meet in Denver, Colorado, at the location and on the dates indicated below.

MMS has undertaken several projects to correct errors in the data base reference files including lease universe reconciliation, MMS and payor data base reconciliation, and distribution fund code reconciliation. The Data Base Validation Working Panel will submit recommendations to the Advisory Committee regarding improvement and/or addition to these efforts as well as methods for maintaining reference data.

DATES: The Data Base Validation Working Panel will meet at the Clarion Hotel, 3203 Quebec, Denver, Colorado, April 29–May 1, 1986.

The Panel will meet from 8 a.m. to 5 p.m. daily. If the meeting is completed in less than the three days scheduled, the Panel will adjourn upon such completion.

The public is invited to attend these meetings and make oral or written comments. A time will be set aside by the Panel chairperson during which the public will be invited to make oral comments. Written comments should be submitted by May 15, 1986, to the address listed below.

FOR FURTHER INFORMATION CONTACT: Vernon B. Ingraham, Minerals Management Service, Royalty Management Program, Office of External Affairs, Denver Federal Center, Building 85, P.O. Box 25165, Mail Stop

VOL 51 ISS 79 AP 24 1986 UMI

60, Denver, Colorado 80225, (telephone number (303) 231-3360, (FTS) 326-3360.

SUPPLEMENTARY INFORMATION: The Data Base Validation Working Panel is one of six working panels established by the Royalty Management Advisory Committee. The panels are composed of both Advisory Committee members and non-Committee members, and were established to provide the Advisory Committee with analyses of specific issues and proposed recommendations. Panel recommendations will be reviewed by the Advisory Committee, which will then decide what advice and recommendations to give to the Department of the Interior (DOI) and Minerals Management Service (MMS).

Although the panels may meet with DOI or MMS staff members to obtain information they require in conducting their analyses, advice and recommendations of the panels will be made to the Advisory Committee and not to the DOI or MMS.

Dated: April 18, 1986.

Wm. D. Bettenberg,

Director, Minerals Management Service.

BILLING CODE 4310-MR-M

Office of Surface Mining Reclamation and Enforcement

Availability of Annual Evaluation Reports on the Administration of State Regulatory and Abandoned Mine Lands Programs

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSMRE), Interior.

ACTION: Notice of availability

SUMMARY: OSMRE is announcing the availability of three annual evaluation reports on the administration of State regulatory and abandoned mine lands (AML) programs under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The three reports, covering the States of Colorado, New Mexico and Texas were prepared under the provisions of OSMRE's oversight policy and have been transmitted to Congress.

ADDRESS: See **"SUPPLEMENTARY INFORMATION"** for the addresses where copies of the reports may be obtained.

FOR FURTHER INFORMATION CONTACT: Arthur W. Abbs, Chief, Division of State Program Assistance, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Avenue, NW., Washington, DC 20240; Telephone: (202) 343-5351.

SUPPLEMENTARY INFORMATION: Copies of the reports are available, free of charge, at the respective OSMRE offices listed below:

Colorado and New Mexico: Albuquerque Field Office, Office of Surface Mining Reclamation and Enforcement, 219 Central Avenue, NW., Albuquerque, New Mexico 87102.

Texas: Tulsa Field Office, Office of Surface Mining Reclamation and Enforcement, 333 West 4th Street, Room 3432, Tulsa, Oklahoma 74103.

Background

Under section 503 of SMCRA, a State may elect to assume primary responsibility for regulating surface coal mining and reclamation operations within its borders by submitting a program to the Secretary of the Interior which demonstrates the State's capability to carry out the provisions of SMCRA. Once the Secretary approves the program, the State is granted primacy, and the Federal government assumes a monitoring and evaluation role. Monitoring of the State's administration and enforcement of its regulatory and AML programs is conducted throughout the year. The Field Office Directors compile and analyze the data gathered during the evaluation period and prepare annual evaluation reports for transmittal to Congress.

Evaluation reports for Illinois, Kentucky, Maryland, Mississippi, Montana and North Dakota) were completed and sent to Congress on November 5, 1985, and were made publicly available on November 14, 1985 (50 FR 47122). Evaluation reports for Alabama, Alaska, Ohio, and Wyoming were completed and sent to Congress on November 25, 1985, and were made publicly available on November 29, 1985 (50 FR 49138). Evaluation reports for Indiana, Iowa, Kansas, Louisiana, Missouri and Oklahoma were completed and sent to Congress on December 10, 1985, and were made publicly available on December 18, 1985 (50 FR 52012). Evaluation reports for Arkansas, Pennsylvania and Virginia were completed and sent to Congress on January 7, 1986, and were made publicly available on January 14, 1986 (51 FR 1566). Two additional evaluation reports for Utah and West Virginia were completed and sent to Congress on January 28, 1986, and were made publicly available on February 4, 1986 (51 FR 4440). Three evaluation reports for Colorado, New Mexico and Texas were completed and sent to Congress on April 16, 1986, and are now publicly available. These three reports complete the annual oversight reports for 1985.

Dated: April 18, 1986.

Lee Richeson,

Acting Assistant Director, Program Operations Office of Surface Mining Reclamation and Enforcement.

BILLING CODE 4310-05-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731-TA-300 (Final)]

Import Investigation of Dynamic Random Access Semiconductors (DRAM'S) of 256 Kilobits and Above From Japan

AGENCY: International Trade Commission.

ACTION: Revised schedule for the subject investigation.

EFFECTIVE DATE: April 18, 1986.

FOR FURTHER INFORMATION CONTACT: Ilene Hersher (202-523-4616), Office of Investigations, U.S. International Trade Commission, 701 E Street NW., Washington, DC 20436. Hearing-impaired individuals may obtain information on this matter by contacting the Commission's TDD terminal on 202-724-0002.

SUPPLEMENTARY INFORMATION: On March 14, 1986, the Commission instituted the subject investigation and established a schedule for its conduct (51 FR 11357, Apr. 2, 1986). Subsequently, the Department of Commerce extended the date for its final determination in the investigation from May 27, 1986, to August 1, 1986. The Commission therefore is revising its schedule in the investigation to conform with Commerce's new schedule

The Commission's new schedule for the investigation is as follows: Requests to appear at the hearing must be filed with the Secretary to the Commission not later than July 25, 1986; the prehearing conference will be held in room 117 of the U.S. International Trade Commission Building on July 29, 1986; the deadline for filing prehearing briefs is August 4, 1986; the hearing will be held in room 331 of the U.S. Internation Trade Commission Building on August 7, 1986; and the deadline for filing all other written submissions, including posthearing briefs, is August 18, 1986.

For further information concerning this investigation see the Commission's notice of investigation cited above and the Commission's Rules of Practice and Procedure, Part 207, Subparts A and C (19 CFR Part 207), and Part 201, Subparts A through E (19 CFR Part 201).

Authority

This investigation is being conducted under authority of the Tariff Act of 1930, title VII. This notice is published pursuant to section 207.20 of the Commission's rules (19 CFR 207.20).

Issued: April 21, 1986.

By order of the Commission.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

[No. MC-C-10963]

Motor Carriers; Armstrong World Industries, Inc.; Petition for Declaratory Order

AGENCY: Interstate Commerce Commission.

ACTION: Notice of final decision.

SUMMARY: By notice published at 50 FR 28296, July 11, 1985, we instituted this proceeding to determine whether certain motor carrier movements between points in Texas are interstate or intrastate in nature. The Commission has concluded that the transportation of carpet by Reeves Transportation Company of Georgia from Arlington, TX, to other Texas points, after a prior movement from Dalton, GA, is part of a continuous interstate movement, lawfully performed by Reeves under a storage-in-transit provision in an appropriate tariff.

FOR FURTHER INFORMATION CONTACT: Paul W. Schach (202) 275-7685 or Howell I. Sporn (202) 275-7691.

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to T.S. Infosystems, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423, or call 289-4357 (DC Metropolitan area) or toll-free (800) 424-5403.

This action will not significantly affect the quality of the human environment or the conservation of energy resources.

Decided: April 3, 1986.

Authority: 5 U.S.C. 554.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley.

James H. Bayne,

Secretary.

BILLING CODE 7035-01-M

DEPARTMENT OF JUSTICE

Lodging of Consent Decree Pursuant to the Clean Air Act; A.J. MacKay Co., et al.

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that on April 15, 1986 a proposed Consent Decree in *United States* v. *A.J. MacKay Company, et al.*, Civil Action No. 85-C-1193G was lodged with the United States District Court for the District of Utah. The proposed Consent Decree concerns violations of the National Emission Standard for Hazardous Air Pollutants ("NESHAPs") for asbestos. 40 CFR Part 61. The proposed Consent Decree requires defendants A.J. MacKay Company and Little America Hotels Corporation to comply with the provisions of the asbestos NESHAP and to pay a civil penalty of $20,000.00.

The Department of Justice will receive comments relating to the proposed Consent Decree for a period of thirty (30) days from the date of this publication. Comments should be addressed to the Assistant Attorney General of the Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *A.J. MacKay Company, et al.* D.J. Ref. 90-5-2-1-784.

The proposed Consent Decree may be examined at the office of the United States Attorney for the District of Utah, Room 466, U.S. Post Office and Courthouse, 350 South Main Street, Salt Lake City, Utah 84101 and at the Region VIII, Office of the Environmental Protection Agency, 999 Eighteenth Street, Suite 2900, Denver, Colorado 80202-2413. Copies of the Consent Decree may be examined at the Environmental Envorcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue NW., Washington, DC 20530. A copy of the proposed Consent Decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Devision of the Department of Justice.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

[FR Doc. 86-9162 Filed 4-23-86; 8:45 am]

BILLING CODE 4410-01-M

Lodging of Consent Decree, Pursuant to Clean Air Act; Michigan South Central Power Agency

In accordance with Department of Justice policy, 28 CFR 50.7, notice is hereby given that on April 2, 1986, a proposed consent decree in *United States* v. *Michigan South Central Power Agency* (W.D. Mich.) was lodged with the United States District Court for the Western District of Michigan. Under the terms of the proposed consent decree, the defendant pays a civil penalty of $7,500 and must comply with the Clean Air Act.

The Department of Justice will receive comments for a period of thirty (30) days from the date of this publication relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General, Land and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Michigan South Central Power Agency*, D.J. Ref. #90-5-2-1-752.

The proposed consent decree may be examined at the Office of the United States Attorney, 399 Federal Building, Grand Rapids, Michigan, 49503; at the Region V Office of the Environmental Protection Agency, 230 South Dearborn Street, Chicago, Illinois, 60604; and at the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice, Room 1515, Ninth Street and Pennsylvania Avenue NW., Washington, DC, 20530. A copy of the proposed consent decree may be obtained in person or by mail from the Environmental Enforcement Section, Land and Natural Resources Division of the Department of Justice. In requesting a copy of the proposed consent decree, refer to the case, proposed consent decree and D.J. Reference number.

F. Henry Habicht II,

Assistant Attorney General, Land and Natural Resources Division.

BILLING CODE 4410-01-M

Drug Enforcement Administration

Donald L. Plotnick, D.P.M.; Revocation of Registration

On February 13, 1986, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), directed an Order to Show Cause to Donald L. Plotnick, d/b/a Columbus Foot Clinic, 3354 E. Broad Street, Columbus, Ohio 43213. The order sought to revoke the DEA Certificate of Registration AP2840684 previously issued to Donald L. Plotnick. The statutory predicate for the Order to Show Cause was the revocation of Donald L. Plotnick's license to practice podiatric medicine in

VOL 51 ISS 79 AP 24 1986 UMI

the State of Ohio by the Ohio Medical Board. This action by the Ohio Board of Medicine terminated Donald L. Plotnick's authority to possess, dispense, prescribe, administer or otherwise handle controlled substances in the State of Ohio.

A registered mail receipt indicates that the Order to Show Cause was received at the Columbus Foot Clinic on February 26, 1986. There was no response to the Order to Show Cause within the allotted 30 days period. Therefore, the Administrator finds that Donald L. Plotnick waived his opportunity for a hearing on the issues raised by the Order to Show Cause and enters this final order on the record as it appears. 21 CFR 1301.54(d) and 1301.54(e).

The Administrator finds that the Ohio State Medical Board revoked the license to practice podiatric medicine of Donald L. Plotnick on November 17,1982. After several appeals were heard by various Ohio appellate courts, the revocation of Dr. Plotnick's podiatric license was upheld, with the Supreme Court of the State of Ohio refusing to hear the case. The action by the Ohio Medical Board was based upon Donald Plotnick's conviction, in the Court of Common Pleas, Franklin County, Ohio, of aggravated arson and extortion on April 29, 1982.

Following the exhaustion of Dr. Plotnick's appeals, he was requested by investigators of the Drug Enforcement Administration to surrender his DEA Certificate of Registration since he was no longer authorized to handle controlled substances by the State of Ohio. Dr. Plotnick refused to surrender his DEA registration. The Order to Show Cause followed.

The Administrator finds that Donald L. Plotnick is not authorized to handle controlled substances in the State of Ohio. The Administrator had consistently held that when a DEA registrant is not authorized to handle controlled substances under the laws of the state in which he practices, DEA is without lawful authority to maintain a registration. See *Avner Kauffman, M.D.*, Docket No. 85–8, 50 FR 34298 (1985), *Kenneth K. Birchard, M.D.*, 48 FR 33776 (1983), and *Thomas E. Weedon, D.O.*, Docket No. 81–4, 47 FR 1358 (1982).

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration AP2340684, issued to Donald L. Plotnick, be and is hereby revoked effective May 27, 1986. Any outstanding applications for registration submitted by Donald L. Plotnick are hereby denied.

Dated: April 18, 1986.

John C. Lawn,

Administrator.

[FR Doc. 86–9191 Filed 4–23–86; 8:45 am]

BILLING CODE 4410–09–M

[Docket No. 85–12]

Walker L. Whaley, M.D.; Revocation of Registration

On January 15, 1985, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued to Walker L. Whaley, M.D. (Respondent), of 820 Prudential Drive, Suite 306, Jacksonville, Florida 32207, an Order to Show Cause proposing to revoke DEA Certificate of Registration, AW6639881, issued to Respondent as a practitioner under 21 U.S.C. 823(f). The statutory predicate for the proposed action was that on July 10, 1984, in the United States District Court for the Middle District of Florida, Respondent was convicted of willfully and knowingly conspiring to manufacture cocaine, a Schedule II controlled substance, a felony offense under the Controlled Substances Act, 21 U.S.C. 841(a)(1) and 846. Repondent's counsel requested a hearing on the issues raised by the Order to Show Cause.

Following the prehearing procedures, the hearing in this matter was held in Washington, DC on November 20, 1985. Administrative Law Judge Francis L. Young presided. On February 19, 1986, Judge Young issued his opinion, recommended ruling, findings of fact, conclusions of law and decision. No exceptions to the Administrative Law Judge's opinion and proposed decision were filed by either party. On March 10, 1986, Judge Young transmitted the record of these proceedings to the Administrator. The Administrator has considered this record in its entirety and pursuant to 21 CFR 1316.67 hereby issues his final order in this matter, based upon findings of fact and conclusions of law as hereinafter set forth.

The Administrative Law Judge found that Respondent is a practicing physician in Jacksonville, Florida, specializing in the areas of obstetrics and gynecology. In 1982, through an undercover "storefront" operation, DEA determined that certain chemicals necessary for the manufacture of cocaine were being sold to Jonathan Whaley, brother of Dr. Walker L. Whaley, and also to an individual named "David Brown" at the same address as Jonathan Whaley. An investigation revealed that "David Brown" was actually Jonathan Whaley. Diane Brown, Jonathan Whaley's girlfriend, was also found to be involved in the conspiracy.

Surveillance by DEA and local Jacksonville authorities revealed that Jonathan Whaley, utilizing the above-mentioned chemicals purchased from the undercover "storefront," was in the process of making synthetic cocaine in a makeshift laboratory in the basement of Respondent's home in Jacksonville. Both Jonathan Whaley and Diane Brown were observed on numerous occasions in the laboratory, by either DEA agents or local authorities, and appeared to be perfoming activities necessary to manufacture synthetic cocaine. Respondent and his brother, Jonathan, were observed working together in the laboratory on several occasions. Ongoing contact with a DEA chemist in Miami confirmed that the activities indicated from the observations were steps used in the manufacture of cocaine. On one occasion, Diane Brown was seen going through the various motions indicating that she was snorting cocaine. Later discovered evidence revealed that Respondent had also personally obtained some of the chemicals to be used in the manufacture of cocaine.

A few days after the above observations were made, DEA Agents conducted a search of Respondent's basement laboratory, pursuant to an authorized search warrant. During the search, Jonathan Whaley was found in the laboratory. In addition, Agents also found laboratory equipment, textbooks, notebooks, articles from *High Times* magazine, and copies of various formulas used for the manufacture of synthetic cocaine. All of the chemicals necessary for two or three different routes of such manufacturing process for cocaine were also found in the basement during the search. Agents also found small vials containing cocaine residue in a dresser or nightstand in the bedroom where Respondent and another man were observed to be snorting cocaine during the earlier surveillance. Respondent was not present during the search, as he was attending a horse show in Atlanta, Georgia at that time.

Following the search of Respondent's home, a DEA Agent and local police officer went to the apartment shared by Jonathan Whaley and Diane Brown. At the apartment, Agents discovered more chemicals, glassware and formulas used in the manufacture of cocaine. Cocaine was subsequently found in several places within the apartment, including kitchen cabinets and the refrigerator. Cocaine residue was also found on many implements in the apartment.

Respondent, Jonathan Whaley and Diane Brown were each indicted on May 12, 1983 by a Federal grand jury. Three counts of a thirteen count indictment pertained to Respodent. Respondent's trial commenced on January 30, 1984. He was acquitted of two counts and a mistrial was declared as to the third count involving conspiracy, since the jury was unable to reach a verdict. Respondent was retried on the conspiracy count and on July 10, 1984, in the United States District Court for the Middle District of Florida, he was convicted of willfully and knowingly conspiring to manufacture cocaine, a Schedule II controlled substance, in violation of 21 U.S.C. 841(a)(1) and 846. Respondent appealed his conviction to the United States Court of Appeals for the Eleventh Circuit. On January 10, 1986, the Court of Appeals issued its opinion affirming the District Court decision.

The Administrative Law Judge also found that Respondent is held in the highest regard both as a practitioner in the medical community and as an individual in his community at large. He has earned a reputation for excellence in the procedure of tubal microsurgery for the restoration of fertility. Dozens of letters from colleagues, patients, community leaders and friends attest to his medical ability, as well as his personal, human qualities as a physician. The authors of many of the above testimonials asked the trial judge not to deprive the community of Respondent's services as a physician by sentencing him to a period of incarceration. Respondent's practice involves extensive surgery and other procedures for which the administration of controlled substances pursuant to an appropriate DEA registration is a necessity. He will be virtually prevented form performing surgery if he is unable to dispense or prescribe controlled substances. The Administrative Law Judge also noted that there are few phsicians in Northern Florida who possess Respondent's skill and expertise, particularly with respect to microsurgery. In addition, there is no evidence that Respondent misused or abused controlled substances in connection with his medical practice, nor is there any evidence that Respondent was involved in commercial trafficking of illicit substances.

The Administrative Law Judge found that the evidence against Respondent was clear in this case. Respodent helped his borther in his attempt to manufacture cocaine. Respondent provided the secluded location (his home), for setting up a laboratory, personally obtained some of the chemicals to be used for the manufacture of cocaine, and, in addition, was observed playing an active role in furthering the manufacturing process.

Based upon the activity described above, Respondent was convicted of conspiracy to violate 21 U.S.C. 841(a)(1) and 846. This conviction was upheld on appeal. The Administrative Law Judge found that the evidence reveals a man who, in spite of all of his skills and talents as a physician, was quite willing to participate activity in the production of cocaine for illegitimate purposes. The intended product of Respondent's activity was an extremely dangerous substance. Had it been sold or distributed, the cocaine would have had an enormous potential for injury to the public health of Respondent's community.

The Administrative Law Judge also observed that Respondent has shown a serious lack of awareness of the probable results of his actions. He demonstrated a callous disregard for the extensive damage cocaine has caused to our society. At the administrative hearing, Respondent confined his testimony only to the effect the loss of his DEA registration would have on his practice. He gave no indication whatsoever of an awareness of the danger his actions posed for the public health. Also, he did not give the slightest assurance of rectifying his conduct in the future. In fact, Respondent simply pointed out that his offense had no direct connection with his practice and handling of controlled substances on a professional level. The Administrative Law Judge concluded that one cannot have any reasonable degree of confidence that Respondent can be trusted, as a physician, with the responsibility of a DEA Certificate of Registration for controlled substances.

The Administrative Law Judge noted that this agency has conistently held that a felony conviction relating to controlled substances, even though unrelated to a registrant's professional practice, can warrant loss or denial of registration. See *Coleman Preston McCown, D.D.S.*, Docket No. 82–28, 49 FR 45818 (1984) (illegal distribution of cocaine); *Tilman J. Bentley, D.O.*, Docket No. 82–22, 49 FR 35049 (1984) (conspiracy to manufacture methaqualone); *Raymond H. Wood, D.D.S.*, Docket No. 82–32, 48 FR 48727 (1983) (conspiracy to import marijuana); and *Aaron Moss, D.D.S.*, Docket No. 80–2, 45 FR 72850 (1980) (smuggling cocaine into the United States).

The Administrative Law Judge concluded that there is a lawful basis for revoking Respondent's registration and recommended that the registration be revoked.

The Administrator has examined the entire record in this matter, and hereby adopts the recommended findings and conclusions of law of the Administrative Law Judge, in their entirety. Thus, having concluded that there is a lawful basis for revocation of Respondent's registration; and having further concluded that, under the facts and circumstances presented in this case, the registration should be revoked, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration AW6639881 issued to Walker L. Whaley, M.D., be and is hereby revoked.

This order is effective May 27, 1986.

Dated: April 18, 1986.

John C. Lawn,

Administrator.

Task Force on Economic Adjustment and Worker Dislocation; Meeting

Notice is hereby given that the Task Force on Economic Adjustment and Worker Dislocation will hold its third meeting at 10:00 a.m. on Wednesday, May 7, 1986, in Room C–5515—Seminar Room 6, 200 Constitution Avenue NW., Washington, DC 20210. The public is invited to attend.

The purpose of the meeting is to discuss and ratify subcommittee progress. A presentation will be made by the subcommittee studying the Nature and Magnitude of the Problem.

For further information contact: Mr. Gerald Holmes, U.S. Department of Labor, Room S–5014, Washington, D.C. 20210 (202) 523–7571.

Signed at Washington, DC., this Thursday of April 17, 1986.

Michael E. Baroody,

Assistant Secretary for Policy.

VOL 51 ISS 79 AP 24 1986 UMI

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[NOTICE 86-31]

NASA Advisory Council (NAC), Life Sciences Advisory Committee Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Life Sciences Advisory Committee (LSAC).

DATE: May 15, 1986, 9 a.m. to 5:30 p.m; and May 16, 1986, 8:30 a.m. to 4:30 p.m..

ADDRESS: National Aeronautics and Space Administration, FB 10-6, Room 226,-A, 600 Independence Avenue SW., Washington, D.C.

FOR FURTHER INFORMATION CONTACT: Dr. Ronald J. White, Code EB, National Aeronautics and Space Administration, Washington, DC 20546 (202/453-1530).

SUPPLEMENTARY INFORMATION: The Life Sciences advisory Committee provides advice and coordination of NASA Life Sciences research programs. They assist in long-range planning for Spacelab, Space Station, and Space Transportation System experiments, as well as ground-based biomedical research. The Committee, chaired by Dr. Robert E. Moser, is comprised of approximately 25 members.

This meeting will be closed to the public from 3:30 p.m. to 4:30 p.m. on May 16 for a discussion of candidates being considered for Committee membership. During this session, the qualifications of proposed new members will be candidly discussed and appraised. Since this session will be concerned throughout with matters listed in 5 U.S.C. 552(c)(6), it has been determined that this session should be closed to the public. The remainder of the meeting will be open to the public up to the seating capacity of the room (approximately 40 persons including committee members and other participants).

Type of Meeting

Open—except for a closed session as noted in the agenda below.

May 15, 1986
- 9 a.m., Opening Remarks and Approval of Minutes from Last Meeting.
- 9:45 a.m., Office of Space Science and Applications Status and Planning Process.
- 11:15 a.m., Considerations in Immunology/Neuroendocrinology.
- 1:15 p.m., Flight Program-Projected Activities.
- 2:15 p.m., Discussions of "White Papers" and Near-Term Strategies.
- 5:30 p.m., Adjourn.

BILLING CODE 7510-01-M

[Notice 86-30]

NASA Advisory Council (NAC), Space and Earth Science Advisory Committee (SESAC); Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, as amended, the National Aeronautics and Space Administration announces a forthcoming meeting of the NASA Advisory Council, Space and Earth Science Advisory Committee, Space Station Task Force.

DATE: May 13-14, 1986, 8:30 a.m. to 5 p.m. and May 15, 1986, 8:30 a.m. to 3 p.m..

ADDRESS: National Aeronautics and Space Administration, Goddard Space Flight Center, Building 26, Room 205, Greenbelt, MD 20771.

FOR FURTHER INFORMATION CONTACT: Mr. Richard S. Sade, Code E, NASA Headquarters, Washington, DC 20546 (202/453-1430).

SUPPLEMENTARY INFORMATION: The Space Station Task Force was established under the NAC Space and Earth Science Advisory Committee to counsel NASA on plans for and work in progress on the scientific utilization of the new capabilities which will be afforded by the Space Station, including the relationship of these plans to the existing space science program. This advice includes periodic updates of scientific requirements on Space Station hardware and operations and interaction with NASA during the definition phase of the Space Station program.

This meeting will be open to the public up to the seating capacity of the room (approximately 50 persons, including Committee members and other invited participants). Topics under discussion at this meeting will include Space Station program status, platform design and utilization, and science operations.

Type of Meeting

Open.

Agenda

May 13, 1986
- 8:30 a.m.—SESAC Space Station Task Force Update.
- 9:15 a.m.—Status of Space Station Program.
- 1 p.m.—Update on Goddard Space Flight Center User Working Group.
- 1:45 p.m.—Science and Applications Information System.
- 2:30 p.m.—University Consortium.
- 3:15 p.m.—Human Productivity Issues.
- 4 p.m.—Science Operations Scenarios.
- 5 p.m.—Adjourn.

May 14, 1986
- 8:30 a.m.—Science Planning and Science Management in Preparation for Space Station.
- 9:30 a.m.—Recommendation for International Science User Group.
- 10 a.m.—Team Meetings.
- 1 p.m.—Team Meetings.
- 3:30 p.m.—Plenary Session.
- 5 p.m.—Adjourn.

May 15, 1986
- 8:30 a.m.—Platform Design Concept.
- 10 a.m.—Plans of Platform Users.
- 1 p.m.—Plenary Session.
- 3 p.m.—Adjourn.

Dated: April 17, 1986.

Richard L. Daniels,

Advisory Committee Management Officer, National Aeronautics and Space Administration.

[FR Doc. 86-9113 Filed 4-23-86; 8:45 am]

BILLING CODE 7510-01-M

NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

Agency Information Collection Activities Under OMB Review

AGENCY: National Endowment for the Humanities.

ACTION: Notice.

SUMMARY: The National Endowment for the Humanities (NEH) has sent to the Office of Management and Budget (OMB) the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

DATE: Comments on this information collection must be submitted on or before May 27, 1986.

ADDRESSES: Send comments to Ms. Ingrid Foreman, Management Assistant, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, DC 20506 (202-786-0233) or Ms. Judy McIntosh, Office of Management and Budget, New Executive Office Building, 726 Jackson Place, NW., Room 3208, Washington, DC 20503 (202-395-6880).

FOR FURTHER INFORMATION CONTACT: Ms. Ingrid Foreman, National Endowment for the Humanities, Administrative Services Office, Room 202, 1100 Pennsylvania Avenue, NW., Washington, DC 20506 (202-786-0233) from whom copies of forms and supporting documents are available.

SUPPLEMENTARY INFORMATION: All of the entries are grouped into new forms, revisions, or extensions. Each entry is issued by NEH and contains the following information: (1) The title of the form; (2) the agency form number, if applicable; (3) how often the form must be filled out; (4) who will be required or asked to report; (5) what form will be used for; (6) an estimate of the number of responses; (7) an estimate of the total number of hours needed to fill out the form. None of these entries are subject to 44 U.S.C. 3504(h).

Category: Revisions

Title: Applications and Instruction Forms for the Projects Category.

Form Number: Not applicable.

Frequency of Collection: Annual.

Respondents: Humanities researchers and institutions.

Use: Application for funding.

Estimated Number of Respondents: 262.

Estimated Hours for Respondents to Provide Information: 52 per respondent.

Susan Metts,

Director of Administration.

BILLING CODE 7536-01-M

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Cellular Physiology; Closed Meeting

In accordance with the Federal Advisory Committee Act, as amended, Pub. L. 92-463, the National Science Foundation announces the following meeting.

Name: Advisory Panel for Cellular Physiology.

Date and time: Monday, Tuesday and Wednesday May 12, 13, and 14, 1986, from 9:00 a.m. until 5:00 p.m.

Place: Room 1242, National Science Foundation, 1800 G Street, NW., Washington, DC 20550.

Type of meeting: Closed.

Contact person: Maryanna P. Henkart, Program Director, Cellular Physiology, Room 332, Telephone: 202/357-7377.

Purpose of Advisory panel: To provide advice and recommendations concerning support for research in Cellular Physiology.

Agenda: To review and evaluate research proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

M.R. Winkler

Committee Management Officer.

April 21, 1986.

[FR Doc. 86-9216 Filed 4-23-86; 8:45 am]

BILLING CODE 7555-01-M

Advisory Panel for Memory and Cognitive Processes; Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Memory and Cognitive Processes.

Date and time: May 14, 15, 16, 1986; (9:00 a.m.-5:00 p.m.

Place: National Science Foundation, 1800 G Street, NW., Room 1242B, Washington, DC 20550.

Type of meeting: Part Open 5/15—9:00 a.m. to 12:00 p.m.; Closed 5/15—1:00 p.m. to 5:00 p.m.; Closed 5/14 & 5/16—9:00 a.m. to 5:00 p.m.

Contact person: Dr. Joseph L. Young, Program Director, Memory and Cognitive Processes Program, Room 320, National Science Foundation, Washington, D.C. 20550, (202)357-9698.

Summary of minutes: May be obtained from the Contact Person at the above stated address.

Purpose of meeting: To provide advice and recommendations concerning support for research in memory and cognitive processes.

Agenda: Open—General discussion of the current status and future plans of the Memory and Cognitive Processes Program. Closed—To review and evaluate research proposals as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information, financial data, such as salaries, and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

M. Rebecca Winkler,

Committee Management Officer.

April 21, 1986.

BILLING CODE 7555-01-M

Advisory Panel for Sociology; Closed Meeting

In accordance with the Federal Advisory Committee Act, Pub. L. 92-463, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Sociology.

Date and time: May 12-13, 1986: Monday, 9:00 am to 5:00 pm; Tuesday, 9:00 am to 5:00 pm.

Place: National Science Foundation, 1800 G Street, NW., Washington, DC, Room 523.

Type of meeting: Closed.

Contact person: Mark Abrahamson, Program Director for Sociology or Stanley Presser, Associate Program Director for Sociology, Room 316, National Science Foundation, Washington, D.C. 20550. Telephone: (202) 357-7802.

Purpose of advisory panel: To provide advice and recommendation concerning support for research in the Sociology Program.

Agenda: To review and evaluate research proposals and projects as part of the selection process for awards.

Reason for closing: The proposals being reviewed include information of a proprietary or confidential nature,

VOL 51 ISS 79 AP 24 1986 UMI

including technical information; financial data, such as salaries, and personal information concerning individuals associated with the proposals. These matters are within exemptions (4) and (6) of 5 U.S.C. 552b(c), Government in the Sunshine Act.

Authority to close meeting: This determination was made by the Committee Management Officer pursuant to provisions of section 10(d) of Pub. L. 92-463. The Committee Management Officer was delegated the authority to make such determinations by the Director, NSF, on July 6, 1979.

M. Rebecca Winkler,
Committee Management Officer.
April 21, 1986.

BILLING CODE 7555-01-M

NUCLEAR REGULATORY COMMISSION

[Docket No. 030-03825]

Finding of No Significant Impact; Amendment of Byproduct Material License No. 08-01393-02; U.S. Department of the Navy, Naval Research Laboratory, Washington, DC

The U.S. Nuclear Regulatory Commission (the Commission) is considering an amendment to Byproduct Material License No. 08-01393-02, issued to the Department of the Navy, to permit a hydrogen-3 transport and dispersion study over water. This study involves the release of a small quantity of hydrogen-3 gas directly to the environment and the collection of air samples downwind from the release. The study will be conducted at the Naval Research Laboratory's Chesapeake Bay Division site located on the western shore of the Chesapeake Bay, near Chesapeake Beach, Maryland.

The Commission's Division of Fuel Cycle and Material Safety has prepared an Environmental Assessment related to the amendment of Byproduct Material License No. 08-01393-02. On the basis of this assessment, the commission has concluded that the environmental impact created by the proposed licensing action would not be significant and does not warrant the preparation of an Environmental Impact Statement. Accordingly, it has been determined that a Finding of No Significant Impact is appropriate. The Environmental Assessment is available for public inspection and copying at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC. Copies of the Environmental Assessment may be obtained by writing to the Material Licensing Branch, Division of Fuel Cycle and Material Safety, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Dated at Silver Spring, Maryland, this 16th day of April 1986.

For the U.S. Nuclear Regulatory Commission.
Vandy L. Miller,
Chief, Material Licensing Branch, Division of Fuel Cycle and Material Safety, NMSS.
[FR Doc. 86-9213 Filed 4-23-86; 8:45 am]
BILLING CODE 7590-01-M

[Docket No. 50-397]

Washington Public Power Supply System; Environmental Assessment and Finding of No Significant Impact

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an exemption from the requirements of 10 CFR Part 50, Appendix J, Section III.D.3 to the Washington Public Power Supply System (WPPSS of the licensee), holder of Facility Operating License No. NPF-21 which authorizes operation of the WPPSS Nuclear Project No. 2 (WNP-2 of the facility). The facility is a boiling water reactor and is located in Benton County, Washington.

Environmental Assessment

Identification of Proposed Action

The exemption from 10 CFR Part 50, Appendix J, Section III.D.3 would allow the licensee to perform Type C testing of containment isolation valves at refueling outages or other convenient intervals but in no case at intervals greater than two years. Currently the regulations require the Type C tests to be performed during each reactor shutdown for refueling, provided the intervals are not greater than 2 years.

The Need for the Proposed Action

The exemption is needed to avoid the requirement for testing each Type C containment isolation valve during each refueling outage. The Supply System is required by weather conditions and the abudnance of hydroelectric power in the Pacific Northwest to refuel on an annual basis each spring. Thus, Section III.D.3 would require Type C testing on an annual basis. The exemption would permit affected valves to be tested at intervals other than each refueling provided that the testing intervals not exceed two years.

Environmental Aspects of the Proposed Action

There are no environmental impacts of the proposed action. The proposed exemption involves a change in the installation or use of the facility's components located within the restricted areas as defined in 10 CFR Part 20. The NRC staff has determined that the proposed exemption involves no significant increase in the amounts, and no significant change in the types, of any effluents that may be released offsite and that there is not significant increase in individual or cumulative occupational radiation exposure. In reality, it is expected that granting the exemption will result in a reduction in cumulative occupational exposure.

With regard to potential non-radiological impacts, the proposed exemption involves systems located entirely within the restricted area as defined in 10 CFR Part 20. It does not affect non-radiological plant effluents and, by allowing better management of hydroelectric resources, may have a positive environmental impact. Therefore, the Commission concludes there are no signficant adverse non-radiological environmental impacts associated with the proposed exemption.

Alternative to the Proposed Action

We have concluded there is no measurable adverse environmental impact associated with the proposed exemption. The principal alternative would be to deny the requested exemption. This alternative would not reduce the environmental impact of plant operation.

Alternative Use of Resources

This action does not involve the use of resources not previously considered in connection with the "Final Environmental Statement Related to the Operation of WPPSS Nuclear Project No. 2" dated December 1981.

Agencies and Persons Consulted

The NRC staff reviewed the licensee's request and did not consult other agencies or person.

Finding of No Significant Impact

The Commission has determined not to prepare an environmental impact statement for the proposed exemption.

Based on the foregoing environmental assessment, we conclude the proposed action will not have a significant effect on the quality of the human environment.

For further details with respect to this action, see the request for exemption dated January 31, 1986, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, DC., and at the Richland Public Library, Swift and Northgate, Richland, Washington 99352.

Dated at Bethesda, Maryland, this 18th day of April, 1986.

For the Nuclear Regulatory Commission.
Elinor G. Adensam,
Director, BWR Project Directorate No. 3, Division of BWR Licensing, Office of Nuclear Reactor Regulation.

OFFICE OF SCIENCE AND TECHNOLOGY POLICY

Committee on International Science, Engineering, and Technology; Notice of Establishment

AGENCY: Executive Office of the President, Office of Science and Technology Policy.

ACTION: Establishment of the Committee on International Science, Engenering, and Technology.

SUMMARY: This Federal Register Notice announces the establishment of the Committee on International Science, Engineering, and Technology of the Federal Coordinating Council for Science Engineering, and Technology.

FOR FURTHER INFORMATION CONTACT: Deborah L. Wince, Assistant Director, Office of Science and Technology Policy, Executive Office of the President, New Executive Office Building, Washington, D.C. 20506.

Jerry D. Jennings,
Executive Director, Office of Science and Technology Policy.

Table of Contents

I. Description of CISET
II. A. CISET Charter
B. Terms of Reference for Working Groups

I. Description and CISET

The science and technology policies of the federal departments and agencies have increasing significance to United States economic and research competitiveness and foreign policy and national security interests. A single organizational focus for the identification, coordination and evaluation of these policies, however, has been lacking. The Federal Coordinating Council for Science, Engineering, and Technology (FCCSET) appeared to be the suitable organizational location and structure under which to place these functions. The FCCSET is a senior level, statutory, interagency coordinating mechanism managed by the Office of Science and Technology Policy, Executive Office of the President with a mission to coordinate federal science activities among federal agencies. Committees are established under FCCSET to address particular science concerns. Accordingly, a FCCSET Committee on International Science, Engineering, and Technology (CISET) was formally established. This Notice briefly describes CISET and includes copies of its charter, and the Terms of Reference of its Working Groups.

CISET is chartered to serve as coordinator, clearinghouse and technical evaluator of federal scientific research programs in the international arena to further the domestic research effort, promote foreign policy goals, and protect national security interests. In this regard, CISET will act to strengthen and complement the science and technology activities of the agencies.

Specifically, CISET will:

(a) Coordinate research planning and implementation of international scientific activities among agencies and provide technical oversight and evaluation of major programs;

(b) Advise on the formulation of broad national priorities and policies for international scientific cooperation in both the bilateral and multilateral fora;

(c) Identify emerging scientific issues with international implications and recommend policy options to formulate national strategies;

(d) Identify opportunities for new international scientific initiatives in order to strengthen domestic R&D efforts, complement U.S. foreign policy, and enhance national security.

CISET is chaired by the Associate Director of OSTP. There is an Executive Committee made up of the chairman and representatives from the Department of State and the National Science Foundation. It will prepare a long-term agenda, recommend committee working groups to address policy issues and problem areas, advise CISET on significant policy implications of federal science and technology programs, and review completed CISET committee reports and policy recommendations.

Other members of CISET are sub-Cabinet officers or senior agency officials responsible for scientific and technological research programs and international policy issues.

Initial members include:

The Department of Agriculture
Under Secretary for International Affairs and Commodity Programs
Assistant Secretary for Science and Education
The Department of Commerce
Administrator, NOAA
Director, National Bureau of Standards
Deputy Under Secretary for International Trade and Administration
Assistant Secretary for Productivity, Technology and Innovation
The Department of Defense
Deputy Under Secretary of International Programs and Technology
Deputy Secretary for Research and Advanced Technology
The Department of Energy
Director, Energy Research
Assistant Secretary for International Affairs
The Department of Health and Human Services
Director, National Institutes of Health
Assistant Secretary for Health
The Department of Housing and Urban Development
Assistant Secretary for Policy Development & Research
The Department of Labor
Deputy Under Secretary for International Affairs
The Department of State
Assistant Secretary, OES
The Department of Transportation
Assistant Secretary for Policy and International Affairs
Agency for International Development
Associate Administrator for Science and Technology
Central Intelligence Agency
Director, Office of Scientific and Weapons Research
National Intelligence Office for Science and Technology
Environmental Protection Agency
Deputy Administrator
National Aeronautics and Space Administration
Deputy Administrator
National Science Foundation
Deputy Director
United States Information Agency
Associate Director for Programs
Executive Office of the President
National Security Council
Deputy Director for International Economic Affairs
Office of Management and Budget
Deputy Associate Director for Special Studies Division
Office of Science and Technology Policy
Associate Director

CISET or its subcommittees may conduct special studies and analyses with members or nonmembers who hold special expertise. Committee members will provide such staff and other assistance as is necessary for the conduct of CISET activities. The Executive Secretary of CISET is an Assistant Director, Office of Science and Technology Policy.

VOL 51 ISS 79 AP 24 1986 UMI

Four subcommittees, working groups, have been established. They are their respective chairmen are as follows:
International Science, Engineering, and Technology Education
Infrastructure and Facilities
Chair: National Science Foundation
Science, Engineering, Technology and International Competitiveness
Chair: Department of Commerce
Bilateral and Multinational Activities
Chair: Department of State
Strategic Science, Engineering, and Technology Cooperation and Technology Transfer
Chair: Office of Science and Technology Policy

II. A. CISET Charter

B. Terms of Reference for Working Groups

Charter of the Committee on International Science, Engineering, and Technology of the Federal Coordinating Council for Science, Engineering, and Technology

Establishment

The significance of the international dimensions of science and technology to economic and research competitiveness and to U.S. foreign policy and national security interests has become increasingly apparent in recent years. Research policies and programs with major international ramifications cut across a number of departments and agencies of the Executive Branch. To ensure that the scientific and technological policies and priorities of the Executive Branch effectively address these international technical issues and support U.S. foreign policy directives and national security considerations, a senior level interagency mechanism is required to identify, coordinate and evaluate science and technology programs and activities with significant international implications. The FCCSET, established by 42 U.S.C. 6651 and under the Chairmanship of the Director of the Office of Science and Technology Policy, is the senior interagency science committee with the mission of coordinating science activities affecting more than one agency. Therefore, a Committee on International Science, Engineering, and Technology (CISET is hereby re-established by the Federal Coordinating Council for Science, Engineering, and Technology (FCCSET).

Purpose

The Committee on International Science, Engineering, and Technology shall act to strengthen and complement the international science and technology programs and activities of member agencies and not in lieu thereof. The establishment of this Committee in no way changes or diminishes statutory authority or responsibility of any agency or department. CISET shall serve as coordinator, clearinghouse, and technical evaluator of federal scientific research programs and activities in the international arena to further the domestic research effort, promote foreign policy goals, and protect national security interests.

Specifically, CISET will:

(a) Coordinate research planning and implementation of international scientific activities between agencies and provide technical oversight and evaluation of major programs;

(b) Advise on the formulation of broad national priorities and policies for international scientific cooperation in both the bilateral and multilateral fora;

(c) Identify emerging scientific issues with international implications and recommend policy options to formulate national strategies;

(d) Identify opportunities for new international scientific initiatives in order to strengthen domestic R&D efforts, complement U.S. foreign policy, and enhance national security.

Members and Chairman

(a) The Associate Director of the Office of Science and Technology Policy will chair the Committee.

(b) Membership of the CISET will be sub-Cabinet officers or the senior agency official responsible for scientific and technological research programs and international policy issues. The CISET will form an executive steering committee with the members from the Department of State and the National Science Foundation.

(c) Members shall be nominated by their respective agencies subject to the approval of the FCCSET Chairman. In addition, as deemed necessary by the committee's chairman, additional members or observers may be appointed.

(d) The CISET includes the following initial members:

- The Department of Agriculture
  - — Undersecretary for International Affairs and Commodity Programs
  - — Assistant Secretary for Science and Education
- The Department of Commerce
  - — Administrator, NOAA
  - — Director, National Bureau of Standards
  - — Deputy Undersecretary for International Trade Administration
  - — Assistant Secretary for Productivity, Technology and Innovation
- The Department of Defense
  - — Deputy Undersecretary for International Programs and Technology
  - — Deputy Undersecretary for Research and Advanced Technology
- The Department of Energy
  - — Director, Energy Research
  - — Assistant Secretary for International Affairs
- The Department of Health and Human Services
  - — Director, National Institute of Health
  - — Assistant Secretary for Health
- The Department of Housing and Urban Development
  - — Assistant Secretary for Policy Development & Research
- The Department of the Interior
  - — Director, U.S. Geological Survey
- The Department of Labor
  - — Deputy Undersecretary for International Affairs
- The Department of State
  - — Assistant Secretary, OES
- The Department of Transportation
  - — Assistant Secretary for Policy and International Affairs
- Agency for International Development
  - — Associate Administrator for Science and Technology
- Central Intelligence Agency
  - — Director, Office of Scientific and Weapons Research
  - — National Intelligence Officer for Science and Technology
- Environmental Protection Agency
  - — Deputy Administrator
- National Aeronautics and Space Administration
  - — Deputy Admninistrator
- National Science Foundation
  - — Deputy Director
- United States Information Agency
  - — Associate Director for Programs
- Executive Office of the President
  - — National Security Council
- Deputy Director for International Economic Affairs
  - — Office of Management and Budget
- Deputy Associate Director for Special Studies Division
  - — Office of Science and Technology Policy
- Associate Director

Administrative Provisions

(a) The Committee will report to FCCSET through the Chairman of that body.

(b) Meetings of the Committee, called as deemed appropriate by the Chairman or at the request of FCCSET, will serve as a forum for the identification of policy issues and problem areas, the discussions and exchange of relevant information, and the evaluation of the work undertaken by the Committee.

(c) The Executive Steering Committee will assist the Chairman in preparing a long-term agenda, recommending committee working groups to address policy issues and problem areas, advising the Committee on significant policy implications of federal science and technology programs, and reviewing completed committee reports and policy recommendations. Non-members with special expertise may be invited to participate in committee working groups as deemed appropriate by the Committee and working group chairman.

(d) Special studies, analysis, and recommendations may be initiated by the Committee. Ad hoc subcommittees or working groups, with participation not restricted to committee members, may be formed to assist the Committee in its work. These types of studies will be responsive to the charge of the specific working groups and the concerns of members agencies.

(e) Committee members will assign such working staff as requested by the Committee Chairman and as is necessary for the conduct of Committee activities and the achievement of its purpose. The agencies shall pay for direct and incidental costs arising from the participation of their members and staff in Committee activities.

(e) Two staff members of the Office of Science and Technology Policy will serve as the Executive Secretary of the CISET, responsible for non-defense and defense issues.

Compensation

All members will be full-time Federal employees who are allowed reimbursement for travel expenses by their agencies, plus per diem for subsistence while serving away from their duty stations in accordance with Standard Government Travel Regulations.

Duration

The Committee's activities and the continuing need for the Committee will be reviewed by the FCCSET Chairman bi-ennially.

Determination

I hereby determine that the formation of the CISET is in the public interest in connection with the duties imposed on the Executive Branch by law, and that such duties can best be performed through the advice and counsel of such a group.

Approved:
Dated: December 20, 1985.
G.A. Keyworth,
Chairman.

Terms of Reference of the FCCSET/CISET Working Group on International Science, Engineering, and Technology Education Infrastructure, and Facilities

Establishment: There is established a Working Group on International Science, Engineering and Technology Education, Infrastructure, and Facilities under the FCCSET Committee on International Science, Engineering and Technology (CISET). The purpose of the Working Group will be to develop policy options to increase the effectiveness of U.S. participation in the international science, engineering, and technology system, including recommendations related to education, mobility of scientists and engineers and the sharing of major research facilities internationally.

Members and Chairman: The Working Group will be chaired by the CISET member from the National Science Foundation who will report on its behalf to the Chairman of CISET. Other members will be CISET principals, to the extent possible, and otherwise nominees from their respective agencies.

Duration: The Working Group's activities and the continuing need for the Working Group will be reviewed by the CISET Chairman annually.

Terms of Reference of the FCCSET/CISET Working Group on Science, Engineering, Technology and International Competitiveness

Establishment: There is established a Working Group on Science, Engineering, Technology and International Competitiveness under the FCCSET Committee on International Science, Engineering and Technology (CISET). The purpose of the Working Group will be to assess the impact of R&D policies and investments on international economic and research competitiveness and to recommend new initiatives in international science and technology to promote the competitive position of the United States.

Members and Chairman: The Working Group will be chaired by the CISET member from the Department of Commerce who will report on its behalf to the Chairman of CISET. Other members will be CISET principals, to the extent possible, and otherwise nominees from their respective agencies.

Duration: The Working Group's activities and the continuing need for the Working Group will be reviewed by the CISET Chairman annually.

Terms of Reference of the FCCSET/CISET Working Group on Bilateral and Multinational Activities

Establishment: There is established a Working Group on Bilateral and Multinational Activities under the FCCSET Committee on International Science, Engineering and Technology (CISET). The purpose of the group will be to develop policy options and recommendations to optimize U.S. participation in bilateral and multinational activities of importance to the Government. Bilateral agreements and programs with significant strategic and security implications may be addressed in a separate working group.

Members and Chairman: The Working Group will be chaired by the CISET member from the Department of State who will report on its behalf to the Chairman of CISET. Other members will be CISET principals, to the extent possible, and otherwise senior nominees from their respective agencies.

Duration: The Working Group's activities will be reviewed by the CISET Chairman annually.

Terms of Reference of the FCCSET/CISET Working Group on Strategic Science, Engineering, and Technology Cooperation and Technology Transfer

Establishment: There is established a Working Group on Strategic Science, Engineering, and Technology Cooperation and Technology Transfer under the FCCSET Committee on International Science, Engineering and Technology (CISET). The purpose of the Working Group will be to identify the scientific and technological policy objectives of strategic science and technology cooperation, assess National Security, technology transfer, and foreign policy implications and recommend policy options to advance national goals and protect security interests.

Members and Chairman: The Working Group will be chaired by the CISET member from the Office of Science and Technology Policy who will report on its behalf to the Chairman of CISET. Other members will be CISET principals, to the extent possible, and otherwise nominees from their respective agencies.

Duration: The Working Group's activities will be reviewed by the CISET Chairman annually.

RAILROAD RETIREMENT BOARD

Agency Forms Submitted for OMB Review

AGENCY: Railroad Retirement Board.

ACTION: In accordance with the Paperwork Reduction Act of 1980 (44 U.S.C. Chapter 35), the Board has submitted the following proposal(s) for the collection of information to the Office of Management and Budget for review and approval.

SUMMARY OF PROPOSAL(S):

(1) Collection title: Employer's Deemed Service Month Questionnaire
(2) Form(s) submitted: GL–99
(3) Type of request: New collection
(4) Frequency of use: Annually
(5) Respondents: Businesses or other for-profit
(6) Annual responses: 18,000
(7) Annual reporting hours: 900
(8) Collection description: Under section 3(i) of the Railroad Retirement Act (RRA) the Board may deem additional months of service in some cases where an employee does not actually work in every month of the year. The collection obtains needed service and compensation information from railroad employers for determining if an employee may be credited with additional deemed months of railroad service.

ADDITIONAL INFORMATION OR COMMENTS: Copies of the proposed forms and supporting documents may be obtained from Pauline Lohens, the agency clearance officer (312–751–4692). Comments regarding the information collection should be addressed to Pauline Lohens, Railroad Retirement Board, 844 Rush Street, Chicago, Illinois 60611 and the OMB reviewer, Judy McIntosh (202–395–6880), Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503.

Pauline Lohens,

Director of Information and Data Management.

BILLING CODE 7905–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–23145; File No. SR–Amex–86–9]

Self-Regulatory Organizations; American Stock Exchange, Inc.; Order Approving Proposed Rule Change

On March 10, 1986, the American Stock Exchange, Inc. ("Amex" or "Exchange") submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) under the Securities Exchange Act of 1934 ("Act") [1] and Rule 19b–4 thereunder,[2] a proposed rule change to clarify its policy regarding the matching of orders by options traders affiliated with the same member organization.

The proposed rule change was noticed in Securities Exchange Act Release No. 23015 (March 13, 1986), 51 FR 9808 (March 21, 1986). No comments were received on the proposed rule change.

The Amex proposes to clarify its policy regarding when options traders who are affiliated with the same member or member organization may match orders in the trading crowd. The proposed policy is set forth in an information circular which will be distributed to the Amex membership. In brief, the proposed circular reconfirms that traders who are in a joint account, or who are associated with the same member organization, may not match orders. A limited exception to this policy will be made, however, if such traders who are associated with the same member firm have demonstrated that they are not officialted with one another. If traders are associated with the same member organization but are not affiliated with one another, they would be permitted to match subject to a limitation: If two or more such traders are on parity in an trading crowd, they would be entitled to that proportion of the trade which they could obtain if there were only two such affiliated traders. The Exchange will make determinations upon request as to whether such traders are in fact affiliated with one another, using the control test set forth in Exchange Rule 904, which governs aggregation of accounts in the context of position limits.[3]

Because the goal of the Amex policy is to ensure fairness in the execution of orders in the trading crowd (a single firm or a joint account should be prohibited from obtaining a larger portion of a match by "packing the crowd"), the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6 [4] and the rules and regulations thereunder.

It Is Therefore Ordered, pursuant to section 19(b)(2) of the Act, that the proposed rule change is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[5]

Dated: April 17, 1986.

John Wheeler,

Secretary.

Self-Regulatory Organizations; Order Approving Proposed Rule Change by Cincinnati Stock Exchange, Inc., Relating to Small Order Execution Guarantee

The Cincinnati Stock Exchange, Inc. ("CSE") submitted on March 6, 1986, copies of a proposed rule change pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act") and Rule 19b–4 thereunder, to amend its rules to increase from 1,099 to 2,099 the number of shares of a public agency market order that are guaranteed automatic execution at the best available price represented by all Intermarket Trading System participants.

Notice of the proposed rule change was given by the issuance of a Commission release (Securities Exchange Act Release No. 22987, March 7, 1986) and by publication in the **Federal Register** (51 FR 9130, March 17, 1986). No comments were received regarding the proposal.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange and, in particular, the requirements of Section 6 and the rules and regulations thereunder. Specifically, the rule change is consistent with section 6(b)(5) of the Act, in that it is consistent with section 6(b)(5) of the Act, in that it is designed to perfect the mechanism of a free and open market and a national market system. The proposed rule change further promotes the purposes of the Act by assuring economically effecient executions of securities transactions, to the benefit of the investing public.

It Is Therefore Ordered, pursuant to section 19(b)(2) of the Act, that the rule change be, and hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 17, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–23134; File No. SR–MSRB–86–8]

Self-Regulatory Organizations; Proposed Rule Change by the Municipal Securities Rulemaking Board; Relating to Syndicate Practices

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on April 3, 1986, the Municipal Securities Rulemaking Board ("Board") filed with the Securities and Exchange Commission a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule change would modify rule G–11(g) on syndicate practices to require syndicate managers to provide to syndicate members a written summary of allocations receiving priority over members' "take-down" orders within two business days after the date of sale, rather than 10 business days after the date of sale, as currently required by the rule. The proposed rule change also would delete the requirement in rule G–11(g) that information identifying persons placing group or related portfolio orders to which securities are allocated be provided to syndicate members within 10 business days of the date of sale and would add to section (h) of the rule the requirement that this information be provided at or before final settlement of the syndicate, with other final accounting information. The full text of the proposed rule change is available for inspection and copying at the Commission's Public Reference Section and at the offices of the Board.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change.

(a) Current rule G–(g) requires syndicate managers to provide syndicate members, within 10 business days following the date of sale, written disclosures including: the identity of allocation; the identity of each related portfolio (including sponsored municipal securities investment trusts or accumulation accounts for such trusts) to which securities were allocated and the amount of the allocation; and a summary, by priority category, of all allocations of securities to orders which were entitled to a higher priority than the members' "take-down" orders. Each of these disclosures of allocations must include the aggregate par value and maturity date of each maturity so allocated. The disclosures allow syndicate members to understand and to react to the syndicate's marketing practices and to monitor the syndicate manager's compliance with the syndicate priority allocation provisions.

Based on comments received from industry members, described more fully in Item II C below, the Board concluded that information on quantity and price of priority allocations would provide greater assistance to syndicate members in understanding and reacting to syndicate practices if provided earlier in the underwriting process than 10 business days after date of sale. The proposed rule change, accordingly, requires the written summary of priority allocation information to be provided within two business days after the date of sale, rather than within 10 business days. The Board also concluded that information on the identity of persons placing group or related portfolio orders to which securities are allocated, while useful to syndicate members in monitoring compliance with syndicate agreements, would continue to be useful for this purpose, and would create less administrative burden on the syndicate manager, if provided with other final accounting information at the settlement of the syndicate account. The proposed rule change deletes the requirement that the syndicate manager disclose this information within 10 business days of the date of sale and replaces it with a requirement that it be provided with other final accounting information at or before the settlement of the syndicate account.

(b) The proposed rule change is adopted pursuant to section 15B(2)(C) of the Securities Exchange Act of 1934, as amended (the "Act") which authorizes and requires the Board to adopt rules,

designed to . . . promote just and equitable principles of trade . . . and not be designed to permit unfair discrimination between customers, issuers, municipal securities brokers, or municipal securities dealers, to fix minimum profits to impose any schedule or fix rates of commissions, allowances, discounts or other fees to be charged by municipal securities brokers or municipal securities dealers . . .

and section 15B(b)(2)(K) of the Act, which requires and empowers the Board to adopt rules that

establish the terms and conditions under which any municipal securities dealer may sell, or prohibit any municipal securities dealer from selling, any part of a new issue of municipal securities to a municipal securities investment portfolio during the underwriting period. . . .

B. Self-Regulatory Organization's Statement on Burden on Competition

The board believes that the proposed rule change would not have any significant burden on competition because it would apply to all municipal securities dealers equally. The proposed rule change would require dealers serving as syndicate managers to share potentially useful market information with syndicate members at an earlier date in the underwriting process, and, thereby, should reduce any potential unfair competitive advantage that might be enjoyed by a syndicate manager having exclusive use of such information during a particular underwriting.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

June 1985 Notice Requesting Comment

In June 1985, in response to concern expressed by certain dealers regarding syndicate practices in the municipal securities industry, the Board published a notice requesting comment from interested persons whether rule G–11 should be modified, strengthened or withdrawn. The Board received 10 comments on the notice.

Two of the commentators argued that the rule is unnecessary and should be withdrawn. Three commentators stated that the rule serves a worthwhile purpose by forestalling abuses by syndicate managers in the allocation process. One commentator suggested an amendment requiring syndicate agreements to allocate a portion of an issue (15–20%) for individuals or small

VOL 51 ISS 79 AP 24 1986 UMI

buyers. Another commentator suggested that rule G–11 be amended to specify the priority or orders required to be followed by all syndicates.

August 21, 1985, Meeting With Industry Members

After considering the comments received on the June 1985 notice, the Board met in New York City on August 21, 1985, with several industry members that act as syndicate managers as well as syndicate members.

In general, the commentators suggested that while some benefits might be derived from strengthening rule G–11 to provide syndicate members with a greater chance to obtain syndicate allocations, the interests of syndicate members, issuers and investors would be served better by preserving the flexibility of syndicates to establish their own procedures for underwriting a new issue of municipal securities. A number of commentators at the meeting suggested that rule G–11 has a prophylactic effect in preventing abuse by managers because it subjects syndicate activities to scrutiny by syndicate members and, to some extent, by investors.

With regard to the disclosure provisions of the rule, several commentators stated that information on the amount and price of securities allocated on a priority basis required to be disclosed under section (g) is useful to syndicate members in understanding the syndicate's marketing practices and determining the price at with the securities can be sold. These commentators noted that such information would be much more useful if provided earlier than 10 business days after the date of sale. They stated that the identities of the persons placing priority orders is not necessary for the allocation information to be useful since the information primarily serves to indicate the quantities and price levels at which the securities were marketed by the syndicate.

November 1985 Exposure Draft

After considering the comments received at the August 21 meeting along with the previous comments on the rule, the Board, in November 1985, published an exposure draft of amendments to rule G–11 which were substantively the same as the proposed rule change.

The Board received three comment letters on the exposure draft. One commentator suggested that the benefits of receiving information on priority allocations two days after the date of sale would be no greater to syndicate members than if received 10 business days after the date of sale and could pose an unnecessary burden on some firms serving as syndicate managers. Based on the previous comments received, however, the Board believes that this information would be useful to syndicate members in understanding and reacting to the syndicate's marketing practices, thereby minimizing any marketing advantage that a syndicate manager might enjoy by exclusive use of this information. Therefore, the Board has concluded that the information should be provided within two business days after the date of sale rather than 10 business days after the date of sale.

Two commentators suggested that the requirement to provide allocation information to syndicate members in writing two business days after the date of sale would be difficult for syndicate managers to accomplish in some cases. The Board expects that syndicate managers utilizing electronic means of communicating information to syndicate members also will use this means to communicate the required disclosures. The Board notes, however, that the mailing of the disclosures within two business days following the date of sale will comply with the rule if the syndicate manager also makes the required information available within two business days following the date of sale by telephone to syndicate members requesting it.

One commentator supported as "appropriate" the provision of the November 1985 exposure draft regarding disclosure of the identities of persons placing related portfolio or group orders to which securities were allocated. Another commentator opposed the provision, stating that the identifying information would be more valuable within 10 business days after the date of sale than at the settlement of the syndicate. The Board concluded that the primary purpose of this disclosure is not to assist syndicate members in marketing new issue securities but rather to allow members to ensure compliance with the allocation provisions of syndicate agreements and ultimately to know the identity of persons who placed orders for the benefit of the entire syndicate. The Board believes that these purposes can be accomplished with the least burden to syndicate managers at or before the final settlement of the syndicate, when other final accounting information is provided.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the Federal Register or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section. Copies of such filing also will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by [May 15, 1986.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: April 16, 1986.

John Wheeler,

Secretary.

BILLING CODE 8010–01–M

[Release No. 34–23144; File No. SR–Phlx–86–9]

Self-Regulatory Organizations; Philadelphia Stock Exchange, Inc.; Order Approving Proposed Rule Change

On March 4, 1986, the Philadelphia Stock Exchange ("Phlx" or "Exchange"), submitted to the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) under the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to rescind Commentary .01(a)(i) of Phlx Rule 1010 relating to withdrawal of approval of underlying stocks for options trading. The Phlx filed Amendment No. 1 to the rule proposal on April 2, 1986.

The proposed rule change was noticed in Securities Exchange Act Release No. 23001 (March 12, 1986), 41 FR 9565 (March 19, 1986). One comment letter was received on the proposed rule change which supported the change.[3]

The rule proposal as originally submitted rescinds the Exchange's requirement that, in order to maintain approval of an underlying security for options trading, an issuer and its significant subsidiaries must meet their obligations concerning the payment of any dividend or sinking fund installment on preferred stock, or in the payment of any principal, interest, or sinking fund installment on any indebtedness for borrowed money, or in the payment of rentals under long-term leases.[4] The Phlx believes that this requirement is no longer necessary because when an issuer defaults in the payment of any of these obligations, the marketplace will assess the effect of such action and such assessment will be reflected in the price of the stock. In addition, the ability of investors to engage in strategies involving put options affords the opportunity to react accordingly in the event an issuer announces a default in the payment of its obligations. Should the stock fall below $6.00, then no additional series can be added and the option will be delisted in due course unless the underlying security is able to comply with eligibility criteria for listing required by Phlx Rule 1009.

In Amendment No. 1 to the rule filing, Phlx also requests approval to rescind Commentary .01(b) of Phlx Rule 1009, which lists the criteria for approval of underlying stocks or underlying foreign currencies for options trading. Commentary .01(b) contains the same requirement regarding an issuer's payment of dividends and indebtedness as is contained in Commentary .01(a)(i) of Rule 1010. In order to maintain consistency in the application of Rules 1009 and 1010, the Phlx requests that identical amendments be made to both rules.

Phlx maintains that rescission of these requirements is appropriate at this time given the maturation of standardized options trading over the past decade and the liberalization of the listing and maintenance criteria over the past five years. In addition, Phlx believes that stocks eligible for options trading will continue to be widely held and actively traded and considerable information regarding the issuer will be publically available. The Commission concurs in this rationale, and accordingly finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of section 6[5] and the rules and regulations thereunder.

It Is Therefore Ordered, pursuant to section 19(b)(2) of the Act,[6] that the proposed rule change is approved for a six month period commencing as of the date of this order.[7]

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[8]

Dated: April 17, 1986.

John Wheeler,

Secretary.

Self-Regulatory Organizations; Applications for Unlisted Trading Privileges and of Opportunity for Hearing; Boston Stock Exchange, Incorporated

April 18, 1986.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the following stocks:

Biocraft Laboratories, Inc.
Common Stock, $0.01 Par Value (File No. 7–8931)

Flemming Companies, Inc.
Common Stock, $2.50 Par Value (File No. 7–8932)

Pullman Peabody Co.
Common Stock, $0.10 Par Value (File No. 7–8933)

Rexnord, Inc.
Common Stock, $1.00 Par Value (File No. 7–8934)

First Bank Systems, Inc.
Common Stock, $1.25 Par Value (File No. 7–8935)

Central Fund of Canada, Ltd.
Class A Common Stock, No Par Value (File No. 7–8936)

PHH Group, Inc.
Common Stock, No Par Value (File No. 7–8937)

Resorts International, Inc.
Class A Common Stock, $1.00 Par Value (File No. 7–8938)

MDC Holdings, Inc.
Common Stock, $0.01 Par Value (File No. 7–8939)

These securities are listed and registered on one or more other national securities exchange and are reported in the consolidated transaction reporting system.

Interested persons are invited to submit on or before May 9, 1986, written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, DC 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and orderly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

John Wheeler,

Secretary.

BILLING CODE 4910-62-M

Coast Guard

[CGD 86-039]

Environmental Impact Statement on Proposed Midpoint Toll Bridge Construction Across Caloosahatchee River, between Cape Coral and Ft. Myers, Lee County, FL

AGENCY: U.S. Coast Guard, DOT.

ACTION: Notice of intent to prepare an Environmental Impact Statement.

SUMMARY: The Coast Guard is issuing this notice to advise the public that an Environmental Impact Statement (EIS) will be prepared in conjunction with actions (issuance or denial of a bridge permit) related to the approval of location and plans for the proposed construction of a toll bridge across the Caloosahatchee River. The Caloosahatchee River at the site of the proposed toll bridge has been determined to be navigable waters of the United States; therefore, a Coast Guard permit is required.

ADDRESS: Written comments should reference this notice and be addressed to: Commander, Seventh Coast Guard District, Aids to Navigation Branch, 51 SW. First Avenue, Miami, Florida, 33130.

FOR FURTHER INFORMATION CONTACT: Ms. Zonia C. Reyes, Bridge Administration Specialist, Bridge Section, Aids to Navigation Branch, Seventh Coast Guard District, at the above address (305) 536-4013/FTS 350-4103.

SUPPLEMENTARY INFORMATION: Lee County has submitted an application to the Coast Guard for a bridge permit to construct the subject bridge project. The Coast Guard is the lead Federal Agency for the preparation of the EIS. The purpose of the proposed bridge project is to improve traffic flow between Cape Coral and Ft. Myers, by constructing a toll bridge across the Caloosahatchee River. A range of alternative alignments and designs, including the no-action alternative, will be considered for the project. The consultant has held a series of public information meetings to identify potential impacts within the corridor. A scoping meeting open to the general public will be held on May 22, 1986 at 7:00 p.m., at the Ft. Myers Tourist Center, Hall of 50 States, 2254 Edwards Drive, Ft. Myers, Florida. To ensure all impacts related to the proposed action are addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. Comments or questions concerning the proposed action and EIS should be directed to the Coast Guard at the above address.

Dated: April 17, 1986.

T.J. Wojnar,

Rear Admiral, U.S. Coast Guard, Chief, Office of Navigation.

BILLING CODE 4910-14-M

Federal Aviation Administration

[Summary Notice No. PE-86-9]

Petition for Exemption; Summary of Petitions Received; Dispositions of Petitions Issued

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of petitions for exemption received and of dispositions of prior petitions.

SUMMARY: Pursuant to FAA's rulemaking provisions governing the application, processing, and disposition of petitions for exemption (14 CFR Part 11), this notice contains a summary of certain petitions seeking relief from specified requirements of the Federal Aviation Regulations (14 CFR Chapter I), dispositions of certain petitions previously received and corrections. The purpose of this notice is to improve the public's awareness of, and participation in, this aspect of FAA's regulatory activities. Neither publication of this notice nor the inclusion or omission of information in the summary is intended to affect the legal status of any petition or its final disposition.

DATE: Comments on petitions received must identify the petition docket number involved and must be received on or before: May 14, 1986.

ADDRESS: Send comments on any petition in triplicate to: Federal Aviation Administration, Office of the Chief Counsel, Attn: Rules Docket (AGC-204), Petition Docket No. _____, 800 Independence Avenue, SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: The petition, any comments received and a copy of any final disposition are filed in the assigned regulatory docket and are available for examination in the Rules Docket (AGC-204), Room 915G, FAA Headquarters Building (FOB 10A), 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 426-3644.

This notice is published pursuant to paragraphs (c), (e), and (g) of § 11.27 of Part 11 of the Federal Aviation Regulations (14 CFR Part 11)

Issued in Washington, DC, On April 17, 1986.

Richard C. Beitel,

Acting Assistant Chief Counsel, Regulations and Enforcement Division.

Docket No.	Petitioner	Regulations affected	Description of relief sought
23980	United States Hang Gliding Assn	14 CFR 91.17 and Portions of Part 103	Extension of Exemption 4144 to allow petitioner to tow aloft an unpowered ultralight (hand glider) by a powered ultralight.
23954	Airline Training Institute	14 CFR 61.157(d)(1) and 61.63(d)(2) and (3)	To allow trainees of petitioner to complete a practical test for the issuance of a type rating to be added to any grade of pilot certificate by substituting for the flight test required by § 61.63(d)(2) the test requirements in Appendix A, subject to specific conditions and limitations.
23462	United States Hang Gliding Assoc., Inc.	14 CFR 103.1(a) and (b)	To allow the definition of "ultralight vehicle" to apply to unpowered vehicles of not more than 155 pounds weight used to carry two occupants for the purpose of sport and recreation, including practicing for, or participating in, two-place competition, or flight instruction conducted by petitioner's certified instructors.
011CE	Cessna Aircraft Company	14 CFR 23.207	To permit Type Certification of derivative models of Cessna Models 406, 435, 441, and 208 airplanes with a stall warning beginning at airspeeds greater than 10 knots or 15 percent above the stall speed.
24020	Federal Exams Aviation Ground School	14 CFR 65.75(b)	To allow petitioner to issue a temporary certificate/rating to students upon satisfactory completion of all written, oral, and practical exams to avoid the waiting period involved pending FAA approval and issuance of the permanent certificate/rating.
22578	Ray's Flight System, Inc.	14 CFR 61.63(d)(2) and (3) and 1.157(d)(1)	Extension of Exemption 3544 to allow trainees of petitioner, who are applicants for a type rating to be added to any grade of pilot certificate, to substitute the practical test requirements of § 61.63(d) (2) and (3), and to complete a portion of that practical test in a simulator.
24081	G.L. Capps Company	14 CFR 145.57	To allow petitioner to continue its operations without the availability of a current manufacturer's manual.
24081	Air Illinois, Inc., d.b.a. Atlantic Gulf Airlines	14 CFR 145.71 and 145.79	To allow petitioner to utilize Federal Aviation Administration (FAA) repair station no. 5410 (Coopesa) to do heavy maintenance check in lieu of a U.S. facility.
24164	Royale Airlines	14 CFR 135.157(b)(2)(ii)	To add Gulfstream G-159, N725RA, to exemption 4319, which permits petitioner to operate nine Grumman Gulfstream (G-159) airliner aircraft up to 23,000 feet mean sea level without complying with the passenger oxygen dispensing requirements in its air carrier passenger-carrying operations.
23077	Trinidad & Tabago	14 CFR Portions of Parts 21 and 91	To extend the termination date of Exemption 3678, to allow petitioner to operate a leased, U.S. registered L1011-385-3, using a FAA-approved Minimum Equipment List and an FAA-approved continuous inspection and maintenance program.
24836	United Airlines	14 CFR 121.371(a) and 121.378	To modify Exemption 4815 to correct the type designation specified. The original exemptions allows petitioner to contract with Hong Kong Aviation Engineering Company to perform maintenance on L1011 aircraft.
24840	American Trans Air, Inc.	14 CFR 121.3	To allow petitioner to operate a limited number of "subservice", or "seat-lease" flights on behalf of scheduled U.S. or foreign air carriers as supplemental flights, under Part F of its domestic and flag operations specifications (ops specs), without further amendment of its authority. In the alternative, to the extent the FAA may require some form of ops specs amendment for any of its "subservice operations, petitioner requests an exemption to permit these amendments to be made to Part H of its ops specs without the procedures of formally adding these flights to Part C, necessitating placement of manuals, training of ground personnel, inspection of stations, and further steps.
22539	Air Methods, Inc	14 CFR 43.3(h)	To allow petitioner to permit its appropriately trained and certificated pilots to remove, check, and reinstall magnetic chip detector plugs installed on Allison 250 series turbine engines, transmissions, and tail rotor gearboxes of the Bell 206L-1/L-3 series helicopters operated by them in or en route to remote areas subject to stipulated conditions. Air Method also requested that the Lycoming LTS 101-750 series engines, and the tail rotor gearbox on the Bell 222 helicopter be included in the amended exemption, which expires August 31.

DISPOSITIONS OF PETITIONS FOR EXEMPTION

Docket No.	Petitioner	Regulations affected	Description of relief sought and disposition
24773	Transporte Aereo Rioplatense S.A.C.	14 CFR 91.203	To extend the January 1, 1985, noise level compliance date. *Amended grant 3/21/86.*
23997	Gulfstar Aviation	14 CFR 141.55	To allow petitioner to continue to have examining authority for written tests for Flight Instructor, Instrument Flight Instructor, and Airline Transport Pilot Certificates. *Granted 3/24/86.*

Customs Service

[T.D. 86–69]

Fish; Tariff-Rate Quota for Calendar Year 1986

AGENCY: Customs Service, Treasury.
ACTION: Announcement of the quota quantity on certain fish for Calendar Year 1986.

SUMMARY: The tariff-rate quota for fish pursuant to item 110.55 (TSUS) for the 1986 Calendar Year is 58,652,549 pounds.

EFFECTIVE DATES: The 1986 tariff-rate quota is applicable to fish described in item 110.50, TSUS, which are entered, or withdrawn from warehouse, for consumption during Calendar Year 1986.

FOR FURTHER INFORMATION CONTACT:
Karen L. Cooper, Acting Quota Program Manager, Admissibility Requirements Section, Commercial Law Enforcement Branch, Commercial Compliance Division, Office of Commercial Operations, U.S. Customs Service, Washington, DC 20229, (202) 566–8592.

SUPPLEMENTARY INFORMATION: This tariff-rate quota for fish is equal to 15 percent of the average aggregate apparent annual consumption in the United States of fish, fresh, chilled or frozen, fillets, steaks, and sticks of cod, cusk, haddock, hake, pollock, and rosefish, for the 3 preceding years, as provided for in Headnote 1, part 3A, Schedule 1, and item 110.50, TSUS.

It has been determined that the average aggregate consumption for Calendar Years 1983 through 1985 was 391,016,990 pounds.Therefore, the quota quantity for fish, item 110.50, TSUS for Calendar Year 1986 is 58,652,549 pounds.

Dated: April 21, 1986.

William von Raab,
Commissioner of Customs.

U.S. Production, Entries of American Fisheries, and Imports for Consumption of: Fresh or frozen fillets, steaks and sticks of cod, haddock, hake, pollock, cusk and rosefish.

[T.D. 86–68]

Revocation of Independent Surveyors of Petroleum, Inc., as a Customs Approved Public Gauger

AGENCY: Customs Service, Treasury.
ACTION: Notice of Revocation.

SUMMARY: Pursuant to § 151.43(b), Customs Regulations (19 CFR 151.43(b)), Independent Surveyors of Petroleum, Inc., Post Office Box 2175, Port Arthur, Texas, 77640, was approved to gauge imported petroleum and petroleum products in the Customs Districts of Tampa, Mobile, New Orleans, Port Authur, Laredo, and Houston-Galveston on December 12, 1983. Notice of this approval was published as T.D. 83–264 in the **Federal Register** of December 15, 1983 (48 FR 55799), and in the Customs Bulletin of December 28, 1983. To be approved and to keep approval in force, each public gauger must maintain an valid Customs bond in effect and must notify Customs, in writing, within 60 days of any change in name, address, ownership, or financial condition. Customs tried to get in touch with Independent Surveyors of Petroleum, Inc., several times to ask it to replace its obsolete bond with a Customs Form 301 bond as required by §§ 151.43(b)(6) and 113.67 of the Customs Regulations (19 CFR 151.43(b)(6) and 113.67) but has been unable to do so. After exhausting all feasible means to locate Independent Surveyors of Petroleum, Inc., Customs has been unable to get in touch with them or determine if they are still in business.

Accordingly, the approval of Independent Surveyors of Petroleum, Inc., to gauge imported petroleum and petroleum products is revoked.

EFFECTIVE DATE: April 18, 1986.

FOR FURTHER INFORMATION CONTACT:
Rober J. Crain, Technical Services Division, U.S. Customs Service, 1301 Constitution Avenue , N.W., Washington, DC 20229 (202–566–2446).

Dated: April 18, 1986.

Roger J. Crain,
Chief, Technical Section, Technical Services Division.

BILLING CODE 4820–02–M

Importation of Tuna and Tuna Products From Costa Rica Prohibited

AGENCY: Customs Service, Department of the Treasury.
ACTION: General notice.

SUMMARY: This notice is to advise that under the Fishery Conservation and Management Act of 1976 ("the Act"), the Secretary of State has certified to the Secretary of the Treasury that a U.S. fishing vessel, while fishing in waters beyond any foreign nation's territorial sea, to the extent that such sea is recognized by the U.S., was seized by Costa Rica as a consequence of a claim of jurisdiction which is not recognized by the U.S. Pursuant to section 205(b), of the Act, the Secretary of the Treasury has determined that the entry for consumption or withdrawal from warehouse for consumption of tuna and tuna products from Costa Rica is prohibited until the Department of State notifies the Secretary of the Treasury that the reasons for this prohibition no longer prevail.

EFFECTIVE DATE: This prohibition is effective as to tuna and tuna products from Costa Rica imported on or after April 24, 1986. Such importation shall not be entered for consumption or withdrawn from warehouse for consumption on or after that date.

FOR FURTHER INFORMATION CONTACT:
Harrison C. Feese, Commercial Law Enforcement Branch, Commercial Compliance Division, Office of Trade Operations, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229 (202–566–8651).

SUPPLEMENTARY INFORMATION:

Background

Section 205(a)(4)(C) of the Fishery Conservation and Management Act of 1976 (16 U.S.C. 1801 *et seq.*), provides that the Secretary of State shall certify to the Secretary of the Treasury any determination that a fishing vessel of the U.S., while fishing in waters beyond any foreign nation's territorial sea, to the extent that such sea is recognized by the U.S., has been seized by a foreign nation as a consequence of a claim of jurisdiction not recognized by the U.S.

Pursuant to section 205(b) of the Act, upon receiving this certification, the Secretary of the Treasury is required to take such action as may be necessary and appropriate to prohibit the importation of all fish and fish products from the fishery involved.

Section 205(c) of the Act provides that if the Secretary of State finds that the reasons for the import prohibition under section 205 no longer prevail, the Secretary of State shall notify the Secretary of the Treasury, who shall promptly remove the import prohibition.

On January 29, 1986, the Evelyn Da Rosa, a fishing vessel of the U.S., was seized by authorities of the government of Costa Rica approximately 50 miles off the coast of Costa Rica for fishing for tuna without the authorization required by Costa Rican law. Costa Rica claims jurisdiction over tuna within 200 miles of

VOL 51 ISS 79 AP 24 1986 UMI

its coast. The U.S. does not recognize this jurisdiction.

Pursuant to section 205(a) of the Act, on March 10, 1986, the Secretary of State certified the seizure of this vessel as meeting the requirements of section 205(a)(4)(C) of the Act.

Determination

Under the authority of section 205 (b) and (c) of the Fishery Conservation and Management Act of 1976, the Secretary of the Treasury has determined that the entry for consumption or withdrawal from warehouse for consumption of tuna and tuna products from Costa Rica (the "country of origin") is prohibited until the Department of State notifies the Secretary of the Treasury that the reasons for this prohibition no longer prevail. Tuna and tuna products processed in Costa Rica to any extent, will be considered tuna or tuna products from Costa Rica. At this time, this prohibition does not extend to in-bond shipments to and through the U.S.

Drafting Information

The principal author of this document was John E. Doyle, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Dated: April 11, 1986.

Francis A. Keating, II,

Assistant Secretary of the Treasury.

VETERANS ADMINISTRATION

Agency Forms Under OMB Review

AGENCY: Veterans Administration.

ACTION: Notice.

The Veterans Administration has submitted to OMB for review the following proposals for the collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). This document contains requests for five extensions and one revision. The following information is listed for each: (1) The department of staff office issuing the form, (2) the title of the form, (3) the agency form number, if applicable, (4) how often the form must be filled out, (5) who will be required or asked to report, (6) an estimate of the number of responses, (7) an estimate of the total number of hours needed to fill out the form, and (8) an indication of whether section 3504(h) of Pub. L. 96-511 applies.

ADDRESSES: Copies of the forms and supporting documents may be obtained from Nancy C. McCoy, Agency Clearance Officer (732), Veterans Administration, 810 Vermont Avenue, NW., Washington, DC 20420, (202) 389-2146. Comments and questions about the items on the list should be directed to the VA's OMB Desk Officer, Dick Eisinger, Office of Management and Budget, 726 Jackson Place, NW., Washington, DC 20503, (202) 395-7316.

DATES: Comments on the information collection should be directed to the OMB Desk Officer within 60 days of this notice.

Dated: April 18, 1986.

By direction of the Administrator.

Randall H. Bryant,

Executive Assistant to the Associate Deputy Administrator for Management.

Office of Personnel Management

Senior Executive Service Positions That Were Career Reserved During 1985

VOL 51 ISS 79 AP 24 1986 UMI

OFFICE OF PERSONNEL MANAGEMENT

Senior Executive Service Positions That Were Career Reserved During 1985

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: As required by the Civil Service Reform Act of 1978, this gives notice of all positions in the Senior Executive Service (SES) that were career reserved during 1985.

FOR FURTHER INFORMATION CONTACT: Charles Vaughn, Office of Executive Personnel, (202) 632–4625.

SUPPLEMENTARY INFORMATION: Below is a list of titles of SES positions that were career reserved any time in calendar year 1985, whether or not they were still career reserved on December 31, 1985. Section 3132(b)(4) of title 5, United States Code, requires that the head of each agency publish the list by March of the following year. OPM is publishing a consolidated list for all agencies.

U.S. Office of Personnel Management.

Constance Horner,

Director.

POSITIONS THAT WERE CAREER RESERVED DURING CALENDAR YEAR 1985

Agency organization	Career reserved positions
ACTION	
Office of Assistant Director Compliance.	Inspector General.
Office of Assistant Director for Financial Management.	Asst Dir for Financial Management.
Administrative Conference of the U.S.	
Administrative Conference of the US.	Executive Director. General Counsel. Research Director.
Advisory Council on Historic Preservation	
OFC of the Exec Director.	Executive Director.
Department of Agriculture	
OFC of the Inspector General.	Asst Inspector General for Investigation. Dep Asst Inspector General for Investigation. Asst Inspector General for Audit. Asst Inspector General for Sec & Spec Oper. Asst Inspector General for Analysis and Eval.
Office of Operations	Director Office of Operations.
Farmers Home Administration.	Dep Admr-Financial and Administrative Opers. Asst Admin. Accounting & Dir, Finance Ofc. Asst Dep Admin for Automated Sys Development. Asst Admin for Planning, Budgeting & Finance. Asst Admr, Community and Business Programs.
Agricultural Marketing Service.	Deputy Administrator, Management. Director, Fruit & Vegetable Division. Director, Cotton Division.
	Director, Dairy Division. Director, Livestock Division. Director, Warehouse & Seed Division. Director, Tobacco Division.
	Agricultural Marketing Svc. Dir Poultry Div.
Animal & Plant Health Inspection Service.	Assoc. Deputy Administrator for Compliance. Director. Deputy Administrator for Management & Budget.
Veterinary Services	Assoc Dep Administrator for Mgt. & Budget. Asst Dep Admr. R-Animal Health Progs-Vet Serv. Asst Dep Admr, Animal Prog, Vet. Services. Dir Natl Veterinary Services Labs, Ames.
	Dir, Nat Prog Planning Staffs, Vet Services.
	Director, Northern Region.
	Dir, SE Region, Veterinary Services.
	Dir, Natl Brucellosis Eradication Program.
	Director, Western Region.
	Director, South Central Region.
	Director, North Central Region.
Plant Protection & Quarantine Service.	Assistant Deputy Administrator. Dir, Nat Prog Plan Staff, Plant Prot & Quarantine.
	Assist Dep Admin for Natl & Emergency Progr.
	Assist Dep Admin for International Programs.
	Director Northeastern Region.
	Director, South Central Region.
	Director Western Region.
	Assistant to Director.
	Asst Dep Admin, National & Emergency Programs.
	Director, Southeastern Region.
Food Safty and Inspection Service.	Asst Deputy Admin Technical Services.
	Dep Admin-Administrative Mgmt.
	Dir Northeast Region, Phila., PA.
	Regl Director, Atlanta Georgia.
	Dir, North Central Region, Des Moines, Iowa.
	Director, Southwestern Region, Dallas, Texas.
	Dir, Western Region, Alameda, California.
	Asst Dep Admr Comp & Staff Operations.
	Asst Deputy Admin Regional Operations.
	Assistant Deputy Admr Science FSQS.
	Asst Dept Admin (Admin Mgt).
	Deputy Administrator, Science.
	Dep Admr Interntl Programs.
	Asst Dep Admr Administrative Management.
Food & Nutrition Service.	Deputy Admin for Financial Management.
	Deputy Admr for Management.
Agricultural Stabilization & Conservation Service.	Accounting Officer.
Foreign Agricultural Service.	Asst Administrator, Management.
	Dir, Grain & Feed Div.
	Dir, Oilseeds & Prod DIV.
	Deputy Assistant Administrator Export Credits.
	Dep Asst Admr, Interntl Agric Statistics.
Agriculture Research Service.	Dep Admr for Adm Mgmt.
	Assoc Dep Admin for Administrative Management.
	Asst Adm for Cooperative Interactions.
National Program Staff Office.	Deputy Administrator National Program Staff.
	Assoc Dep Admr.
	Assoc Dep Admr, Natl Prog Staff.

POSITIONS THAT WERE CAREER RESERVED DURING CALENDAR YEAR 1985—Continued

Agency organization	Career reserved positions
Beltsville Area Office	Dir, Beltsville Human Nutrition Research Ctr.
	Director, Northern States Area.
	Director Beltsville Area Office.
North Atlantic Area Office.	Director, Eastern Regl Research Center.
	Dir, Plum Island Animal Disease Ctr.
	Director, North Atlantic Area.
South Atlantic Area Office.	Research Leader-Forage and Turf Research.
	Res Leader-Plant Physio & Photosynthesis Res.
	Director South Atlantic Area.
Midwest Area Office	Dir Northern Regional Research Center.
	Chief Fermentation Laboratory.
	Director, Natl Soil Erosion Res Laboratory.
	Dir Midwest Area.
Midsouth Area Office	Dir, Southern Regional Res Center, New Orleans.
	Director, Mid-South Area.
Northern States Area Office.	Dir, Grand Forks Human Nutrition Res Ctr.
	Director Northern States Area.
Central Plains Area Office.	Dir., Nat'l. Animal Disease Ctr.
	Research Leader, Wheat Research.
	Director Central Plains Area.
Southern Plains Area Office.	Director, Southern Plains Area.
	Director Conservation & Production Res Lab.
Mountain States Area Office.	Director, USDA Honey Bee Research Laboratory.
	Director Mountain States Area.
Northwest Area Office	Director, Northwest Region.
Pacific Basin Area Office.	Director, Western Regional Research Center.
	Research Leader-Fruit & Vegetable Chem Research.
	Director, U.S. Salinity Laboratory.
	Res Leader Natural Products Chemistry Res.
	Dir, Western Human Nutrition Research Center.
	Dir Pacific Basin Area.
	Director, Plant Gene Expression Center.
Extension Service	Deputy Admin Management.
	Dep Admr, Home Economics & Human Nutrition.
	Dep Admin Natural Resources and Rural Dev.
Office of Grants and Program Systems.	Administrator, Olc of Grants & Prog Systems.
Soil Conservation Service.	Director Engineering Division.
	Dir Ecological Sciences and Technology Divisi.
	Dep Chf for Administration.
	Dir, Consv Planning and App.
	Dir, Project Dev and Maint.
	Dir, Basin & Area Planning (Soil Conserv).
	Assoc Dep Chief for Administration.
	Dir, Soils (Soil Scientist).
	Dir, Land Treatment Program.
	Dir Information Resources Management.
	Dir South National Technical Center.
	Spacial Asst for Science & Technol.
	Dir Midwest National Technical Center.
Forest Service	Dep Chf for Administration.
	Associate Deputy Chief-Administration.
	Dir Forest Pest Mgmt Staff.
	Dir Fiscal and Accounting Management.
	Director, Cooperative Fire Protection.
	Associate Deputy Chief for Administrator.

Agency organization	Career reserved positions
Research	Director, Timber Mgmt Research Staff.
	Dir Insect and Disease Research Staff.
	Dir Forest Environment Research Staff.
	Director, Forest Resource Economics Staff.
	Dir Forest Prod & Harvesting & Research Staff.
	Dir, Forest Fire & Atmos Sciences Res Staff.
Nat'l Forest System	Dir, Range Management Staff.
	Dir, Recreation, Mgmt Staff.
	Dir, Timber Management Staff.
	Director, Engineering Staff.
	Director, Aviation and Fire Management Staff.
	Director, Lands Staff.
	Dir Land Management Planning Staff.
	Dir, Wildlife & Fisheries Mgt Staff.
	Dir, Minerals & Geology Staff.
	Dir, Watershed Mgt Staff.
State & Private Forestry	Dir of Area Planning & Dev Staff.
	Dir Cooperative Forestry.
Field Units	NE Area Dir, State & Private Forestry, U DARB.
	Dir Intermountain Forest & Range Exp Stat, OGD.
	Dir N Eastern Forest Experiment Station.
	Dir, North Central Forest Exp Station.
	Dir, Pacific NW Forest & Range Exp Station.
	Dir, Pacific SW For & Range Exper Sta.
	Director Rocky MT Forest & Range Exper Stat.
	Dir S Eastern Forest Experiment Station.
	Dir, S. Forest Experiment Station, New Orleans.
	Director, Forest Products Laboratory.
	Dep Dir Forest Products Lab.
Economic Research Service.	Admr, Economic Research Service.
	Associate Administrator-Economic Rsch Svc.
	Director International Economics Division.
	Director National Economics Division.
	Dir, Natural Resource Economics Div.
	Director, Economic Development Division.
	Dep Admr/Planning & Organizational Relations.
Economics Management Staff.	Director, Economics Management Staff.
Statistical Research Service.	Administrator Srs.
	Dep Administrator, Statistical Reporting Svc.
	Dir Estimates Div.
	Director Survey Division.
	Director Statistical Research Division.
	Director State Statistical Division.
World Agricultural Outlook Board.	Chairperson.
	Dep Chairperson.
Board for International Broadcasting	
Board Staff	Exec Director.
	Financial Manager.
	Foreign Information Officer.
	Foreign Information Officer.
Department of Commerce	
Office of the General Counsel.	Dep Asst. GC for Administration.
	Asst General Counsel for Finance & Litigation.
Director for Management and Information.	Dir, Olc of Information Resources Management.

POSITIONS THAT WERE CAREER RESERVED DURING CALENDAR YEAR 1985—Continued

Agency organization	Career reserved positions
Director for Procurement & Administrative Services.	Dep Dir for Procurement & Admin Services.
	Dir Olc of Adm Serv.
	Dir, Olc of Admin Services Operations.
Director Personnel and Civil Rights.	Director for Personnel and Civil Rights.
	Deputy Director of Personnel.
Director for Planning Budget and Evaluation.	Director, Office of Budget.
Olc of the Under Secy for Economic Affairs.	Dep Dir Bureau of Industrial Economics.
	Statistical Coor for the Asst Sec for Eco Aff.
Bureau of Economic Analysis.	Dir Office of Business Analysis.
	Supervisory Economist.
	Director.
	Dep Dir, Bur of Economic Analysis.
	Assoc Dir for Natl Economic Accounts.
	Assoc Dir for Natl Analysis & Projections.
	Assoc Dir for Regional Economics.
	Assoc Dir for Internat: L Economics.
	Chief Economist.
	Chf Statistician.
	Asst to the Director for Econometrics.
	Chf, Nat: L Income & Wealth Div.
	Chief, Current Business Analysis Div.
	Chief, Business Outlook Div.
	Assistant to the Director for Measurement.
Bureau of the Census	Dep Dir.
	Asst Dir for Computer Services.
	Chief Data User Services Division.
	Chief, Technical Services Division.
	Assoc Dir for Management Services.
	Senior Program Analyst.
	Asst Dir for Administration.
	Chief Counsel.
	Chief, Computer Services Division.
Demographic Fields	Associate Director for Demographic Fields.
	Asst Dir for Demographic Censuses.
	Chf, Population Div.
	Chf, Statistical Methods Div.
	Chief Demographic Surveys Division.
	Asst Dir for International Programs.
	Chief, Decennial Planning Division.
Statistical Standards and Methodology.	Assoc Dir for Statistical Standards & Method.
	Chief Statistical Research Division.
Field Operations	Assoc Dir for Field Operations.
	Chf, Geography Div.
	Chief, Field Div.
	Chief Data Preparation Division.
Economic Fields	Associate Director for Economic Fields.
	Asst Dir for Economic & Agric Censuses.
	Chief, Agriculture Div.
	Chf, Business Div.
	Chf, Construction Statistics Div.
	Chf, Econ Surveys Div.
	Chf, Foreign Trade Div.
	Chf, Government Div.
	Chf, Industry Div.
	Chief Center for Economic Studies.
	Asst Dir for Economic Surveys.
Institute for Telecommunications Sciences.	Assoc Admr for Telecommunications Science.
	Deputy Dir for Systems & Networks.
	Special Technology Liaison.
Economic Development Administration.	Deputy Director for Spectrum.
	Dir, Off of Public Works.
	Spec Asst for Indian Affairs.
	Director, Olc of Plan, Techn Asst, Res & Eval.

POSITIONS THAT WERE CAREER RESERVED DURING CALENDAR YEAR 1985—Continued

Agency organization	Career reserved positions
Olc of the Inspector General.	Assistant Inspector General for Auditing.
	Assistant Inspector General for Investigations.
	Deputy Assistant Inspector Gen for Auditing.
	Asst Inspector Gen for Planning & Evaluation.
	Technical Advisor to the Inspector General.
	Counsel to the Inspector General.
	Technical Advisor to the Inspector General.
	Asst Inspector General for Auto Info Sys.
Olc Dep Asst Secy for Cap Goods & Inst Consl.	Dir, Office of Special Industrial Machinery.
Olc of Dep Asst Secy for Basic Industries.	Dir, Olc of Metals, Minerals & Commodities.
Olc of Dep Asst Secy for Automotive Aff & Cons Gds	Director Office of Consumer Goods.
Office of Budget and Finance.	Director, Office of Budget and Finance.
	Dep Dir, Office of Budget and Finance.
Office of Administrative & Management Services.	Chief, Personnel Division.
National Marine Fisheries Service.	Chief, Management and Budget Staff.
Regional Offices	Director, Northeast Region.
	Director, Southeast Region.
	Director, Northwest Region.
	Director, Alaska Region.
Fisheries Centers	Dir NE Fisheries Ctr.
	Dir-SE Fisheries Ctr.
	Dir SW Fisheries Center.
	Dir NW & Alaska Fisheries Ctr.
Natl Environ Satellite, Data & Info Services.	General Physical Scientist.
	Chief, Systems Planning & Development Staff.
Deputy Asst Admr for Satellites.	Chief Satellite Experiment Laboratory.
Dep Asst Admr for Information Services.	Dir, Natl. Oceanographic Data Center.
	Dir, Assessment and Information Services.
	Deputy Director.
	Director, National Climatic Data Center.
	Dir, National Geophysical Data Center.
Office of Sea Grant & Extramural Programs.	Dep Dir, Olc of Sea Grant & Extramural Progr.
Environmental Research Laboratories.	Dep Dir, Environmental Research Laboratories.
	Dir, Space Environmental Laboratory.
Atlantic Oceanographic and Meteorological Labs.	Dir, Atlantic Oceanographic & Meterological.
	Deputy Dir Atlantic Oceanographic & Meteorologi.
Wave Propagation Lab	Director.
Aeronomy Lab	Director, Aeronomy Laboratory.
	Senior Scientist/Deputy Director.
Geophysical Fluid Dynamics Laboratories.	Director.
	Supervisory Rsch Meteorologist.
	Supervisory Rsch Meteorologist.
	Supervisory Rsch Meteorologist.
Great Lakes Environmental Research Lab.	Dir Great Lakes Environmental Research Lab.
National Severe Storms Laboratory.	Dir Nat'l Severe Storms Lab.
Air Resources Laboratory.	Director Air Resources Laboratory.
Pacific Marine Environmental Lab.	Dir Pacific Marine Environmental Lab.
Ocean Services & Coastal Zone Management.	Chf Scientist.
	Special Assistant to the Chief Scientist.
Ocean and Coastal Resources Management.	Spec Asst to Dir Olc of Ocean & Coastal Res.
	Dir, National Marine Pollution Programs Olc.

Positions That Were Career Reserved During Calendar Year 1985—Continued

Agency organization	Career reserved positions
Oceanography & Marine Services.	Chief, Ocean Systems Division.
	Chief, Ocean Resources Assessment Division.
	Chief, Ocean Services Division.
	Chief, Ocean Requirements & Data Anal Div.
National Ocean Service.	Dir Geodetic Research & Development Lab.
	Assoc Dir Otc of Aeronautical Charting & Cart.
	Chief Geodesist.
National Weather Service.	Dep Dir-National Weather Service.
	Director, NOAA Data Buoy Office.
	Chief, International Affairs Staff.
	Dir, Nearest Joint Systems Program Otc.
	Chief, Management and Budget Staff.
	Chf, External Relat & Indus Meteorology Staff.
	Chf, Otc of the Fed Coordinator for Meteorolg.
	Chief, Policy and Long Range Planning Staff.
Office of Meteorology.	Dir, Office of Meteorology.
	Chief Operations Division.
	Chf, Prog Requirements & Plng Division.
Office of Hydrology.	Director, Office of Hydrology.
	Chief, Hydrologic Services Division.
	Chief, Hydrologic Research Laboratory.
Office of Technical Services.	Dir, Otc of Technical Services.
	Chf, Communications Division.
	Chief, Engineering Division.
	Chief AFOS Operations Division.
Office of Systems Development.	Director, Office of Systems Development.
	Chief, Integrated Systems Laboratory.
	Chief, Techniques Devel Laboratory.
	Chief, Advanced Systems Laboratory.
National Meteorological Ctr.	Director National Meteorological Center.
	Deputy Director.
	Chief, Climate Analysis Center.
	Chief, Automation Division.
	Chief, Development Div.
	Chf-Forecast Division.
Regional Offices & Centers.	Dir Southern Region, Ft Worth.
	Dir, Salt Lake City Region.
	Dir, Alaska Region, Anchorage.
	Dir Eastern Region Nwe.
	Director Central Region.
	Dir, Natl Severe Storms Forecast Center.
	Director, Nat'l Hurricane Center.
National Bureau of Standards.	Assoc Dir for International Affs.
	Tech Advisor to the Director.
	Chief, Program Office.
	Director, Planning Otc.
	Assoc Dir for Programs, Budget, and Finance.
	Deputy Dir Office of Product Standards Policy.
	Senior Science Advisor.
National Measurement Lab.	Senior Mathematical Statistician.
	Associate Director for Planning.
	Group Leader Surface and Structure Kinetics.
	Chief, Molecular Spectroscopy Division.
	Chief Inorganic Analytical Research Division.
	Chief Gas and Particulate Science Division.
Deputy Director for Programs.	Deputy Director for Programs.
	Chief, Off of Environmental Mgmts.
	Director, Standard Reference Data.
	Prog Manager, Industrial Process Data.
	Director, Measurement Services.

Positions That Were Career Reserved During Calendar Year 1985—Continued

Agency organization	Career reserved positions
Center for Basic Standards.	Director, Center for Basic Standards.
	Senior Research Fellow.
	Chief, Electricity Division.
	Mgr, Tech Applications of Measurement Stds.
Quantum Physics Division.	Chf, Quantum Physics Div (Dir for APO).
	Sr Sci & Fellow of JILA.
	Senior Research Scientist.
	Senior Scientist, Boulder.
	Sr Scientist & Fellow of JILA.
	Senior Scientist-Fellow of JILA.
Time and Frequency Division.	Group Leader & Senior Scientist.
Center for Analytical Chemistry.	Director-Center for Analytical Chemistry.
	Group Leader, Laser Analytical Chemistry.
	Deputy Director, Ctr for Analytical Chemistry.
	Scientific Asst to the Dir Ctr for Analytical.
Center for Radiation Research.	Dir Center for Radiation Research.
	Dep Dir, Ctr for Radiation Research.
	Chf Atomic & Plasma Radiation Div.
	Chf-Radiation Source & Instrumentation Divisi.
	Chief Radiometric Physics Division.
Ionizing Radiation Division.	Chief Nuclear Radiation Div.
	Physicist, (Nuclear).
	Principal Scientist Radiation Physics Div.
Center for Radiation Research.	Physicist (Nuclear).
	Prin Scientist in X-Ray Physics.
	Group Leader for Far Ultraviolet Physics.
Institute for Materials Science & Engineering.	Dir Institute for Materials Science & Eng.
	Dp Dir, Institute for Materials Science & Eng.
	Senior Scientist.
	Group Leader for Fiberous Systems.
	Chf, Otc of Nondestructive Evaluation.
	Chief, Metallurgy Div.
	Scientific Assistant to the Director.
Fracture and Deformation Division.	Chf Fracture and Deformation Division.
	Group Leader Mechanical Properties.
	Chief Inorganic Materials Division.
Ceramics Glass and Solid State Science Division.	Group Leader for Crystallography.
	Grp Leader for Glass Tech Inorganic Materl Dv.
	Physicist (Solid State).
Polymer Science and Standards Division.	
Reactor Radiation Division.	Chf, Reactor Radiation Div.
	Group Leader Neutron Condensed Matter Science.
Center for Chemical Physics.	Director Center for Chemical Physics.
	Deputy Director, Center for Chemical Physics.
	Quantum Chemistry Group Leader.
	Group Leader for Environ Chemical Proobes.
	Chief, Surface Science Div.
National Engineering Lab.	Assoc Dir for Technical Evaluation.
	Group Leader Equation of State.
	Chief, Office of Sponsored Programs.
	Deputy Director for Nat Programs.
Center for Fire Research.	Director-Center for Fire Research.
	Chief, Fire Safety Technology Division.
	Chief, Fire Measurement & Research Division.
	Chief, Office of Fire Research Resources.

Positions That Were Career Reserved During Calendar Year 1985—Continued

Agency organization	Career reserved positions
Center for Building Technology.	Director-Center for Building Technology.
	Deputy Director, Center for Building Tech.
	Chief, Structures Division.
	Chief, Building Physics Division.
	Chf, Building Materials Div.
Dir for Mechanical Engrng & Process Technology.	Chief, Building Equipment Division.
	Dir Center for Manufacturing Engineering.
	Chief, Automated Production Technology Div.
	Chief, Mechanical Production Metrology Div.
	Manager Otc of Auto Manufacturing Tech Transf.
	Chief, Industrial Systems Division.
	Chf, Thermophysical Properties Div.
Center for Applied Mathematics.	Director, Center for Applied Mathematics.
	Deputy Director.
	Chf, Statistical Engineering Division.
	Chief, Scientific Computing Division.
	Assoc Dir for Computing.
	Chief, Operations Research Division.
Center for Electronics and Electrical Engrng.	Dir-Ctr for Electronics & Electrical Engineer.
	Deputy Director.
	Chf, Electrosystems Division.
	Chf-Electromagnetic Technology Division.
	Senior Research Scientist.
	Chief, Semiconductor Materials & Proc Div.
	Dep Dir, Ctr for Electronics & Electrical Eng.
	Chief, Semiconductor Devices & Circuits Div.
	Chief, Electromagnetic Fields Division.
	Chief, Semiconductor Electronics Division.
Center for Field Methods.	Deputy Director Ctr for Chemical Engineering.
	Director Center for Chemical Engineering.
Inst for Computer Sciences and Technology.	Chief, Thermophysics Division.
	Dir Center for Programming Science & Techn.
	Dir Center for Computer Systems Engineering.
	Chief, Systems & Network Architecture Div.
	Chief, System Components Division.
	Chief, Information Systems Engineering Div.
Patent and Trademark Administration.	Asst Commissioner for Finance and Planning.
	Assistant Commissioner for External Affairs.
Office of Assistant Commissioner for Patents.	Adm'r for Documentation.
	Spec Asst to the Dep Asst Comm for Patents.
Chemical	Group Director 110.
	Group Director 120.
	Group Director for 130.
	Group Director 160.
	Group Director for 260.
Electrical	Group Director 210.
	Group Director for 220/290.
	Group Director 230.
	Group Director 240.
	Group Director 250.
Mechanical	Group Director 310.
	Group Director 320.
	Group Director 330.
	Group Director 340.
	Group Director 350.
Office of Assistant Commissioner for Trademarks.	Chairman, Trademark Trial & Appeal Board.
	Deputy Assistant Commissioner for Trademarks.
Board of Patent Interferences.	Chairman.

Positions That Were Career Reserved During Calendar Year 1985—Continued

Agency organization	Career reserved positions
Commodity Futures Trading Commission	
Office of the General Counsel.	Assoc Gen Counsel (Opinions & Review).
	Deputy General Counsel (Litigation).
	Deputy General Counsel (Reg & Adm).
Office of the Executive Director.	Dep Exec Dir.
Division of Economics Analysis.	Dep Chf Economist.
	Chf, Analysis Section.
	Associate Director for Surveillance.
Division of Enforcement.	Deputy Director (Western Operations).
	Deputy Director (Eastern Operations).
Division of Trading and Markets.	Deputy Director (Contract Markets).
	Chief Counsel.
Consumer Product Safety Commission	
Otc of Executive Dir.	Dir, Otc of Prog Mgt.
	Director, Otc of Budget, Prog Plan & Eval.
	Associate Executive Dir for Field Operations.
Office of AED for Epidemiology.	Associate Exec Dir for Epidemiology.
Otc of AED for Compliance & Administrative Litigation.	Assoc Exec Dir for Compl & Admin Litigation.
Otc of AED for Administration.	Assoc Exec Dir for Adm.
Otc of the AED for Economics.	Associate Executive Director for Economics.
Otc Secy of Defense	
Office of the Secretary.	Asst to the Secy of Defense (Intel Oversight).
Otc of Deputy Under Secy for Policy.	Dir, Counter Intel & Investigative Prog.
	Dir, Information Security.
Director Operational Test and Evaluation.	Dep Dir, Policy, Resources & External Affairs.
	Asst Dep Dir, Tactical & Elec Warfare Systems.
	Asst Dep Dir, Strategic, Space & C3I Systems.
Otc of Inspector General.	Deputy Inspector General.
	Asst Inspector General for Audit Followup.
	Asst Inspector General for Investigations.
	Asst Inspector General for Management.
	Dir, Internal Audit Oversight & Evaluation.
	Dir, Contract & Ext O/Sight and Evaluation.
	Dep Asst Inspector Gen for GAO Reports Analy.
	Director Major Acquisition Programs.
	Director, Contract Audits.
	Asst Inspector General for Auditing.
	Asst Insp Gen for Criminal Invest Pol & Overht
	Asst Inspector Gen for Audit Policy & Overslt
	Dep Inspector Gen Prog Plng, Review & Mgt.
	Asst Dep IG for Progr Planning, Review & Eval.
	Dep Asst Inspector General (Audit-Followup).
	Dep Asst Inspector General for Auditing.
	Dir Financial Manpower & Security Asst Audits.
	Dep Asst Inspector Gen for Investigations.
Defense Audit Service.	Director, Defense Audit Service.
	Assoc Director-Special Program Audits.

Positions That Were Career Reserved During Calendar Year 1985—Continued

Agency organization	Career reserved positions
	Assoc Dir Intelligence and Communications Aud.
	Assoc Dir, Systems & Logistics Audits
	Assoc Dir, Resources & Overseas Audits.
	Assoc Dir Financial Mgmt and Manpower Audits.
Otc Dep Asst Sec (Civilian Personnel Policy & Req).	Dir Personnel Management.
	Deputy Director for Labor Management Relation.
	Dep Dir Compensation & Overseas Emply Policy.
Otc of Dep Assist Secy (Force Management & Personnel).	Director, Accession Policy.
Office of Dep Assistant (Ed & Safety).	Dir for Civilian Equal Opportunity Programs.
Otc of Dir of DOD Dependents Schools.	Dir DOD Dependents Schools.
	Dir Pacific Region Dodds
	Director, Germany Region.
ODASD (Mobilization Planning & Requirements).	Assistant Director for Engineering.
Office Assistant Sec Health Affairs.	Dir, Def Enrolmnt Eligibil Reprng Sys (DEERS).
	Dir, Defense Medical Systems Support Center.
	DAS of Defense for Medical Resource Adm.
Office of Assistant Secretary, Public Affairs.	Dir, Freedom of Information & Security Review.
Otc of Dep Dir (Theater Assessments & Planning).	Assistant for Planning.
Otc of Dep Director (Strategic Programs).	Dir Strat Def and Theater Nuclear Forces Div.
Washington Headquarters Services.	Director of Personnel and Security.
DASD Contract Audit Cost Control.	Dep Comptroller for Audit Policy.
Otc of Under Secretary for Research and Engineering.	Asst Under Secy of Def (Plans & Devel).
	Spec Asst for Assessment & Exec Officer—DSB.
	Director, Program Control and Administration.
	Asst U/S of Def (Conv in) & Dir Conv in Prog.
	Special Assistant for Resource Planning.
Otc of Asst Secy (Acquisition & Logistics).	Deputy Director Weapon Support.
Otc of Dep Under Secy (International Programs and Tech).	Asst Dep Under Secy of Def (Intarnl Progs).
	Special Assistant for Technology Transfer.
	Director, NATO Affairs.
	Dir Far East & Southern Hemisphere Affairs.
	Asst Dep Under Secretary of Defense.
	Spec Asst for Internl Coop Matters & S T E.
	Asst Dep Under Secy of Def.
Otc of the Deputy Asst Secretary (Production Support).	DASD (Production Support).
	Dir Standardization & Acquisition Support.
	Dir Industriel Resources.
	Dir Industriel Productivity.
Office of the Deputy Asst Secretary (Procurement).	Dep Asst Sec of Defense (Procurement).
	Director Cost Pricing and Finance.
	Dir, Defense Acquisition Regulatory Systems.
	Director Major Systems Acquisition.
	Dir DOD Contract Studies & Mgmt Spt Services.
	Director Contract Policy.
	Director Contract Administration.
	Chairman, Defense Acquisition Subcouncil.
	Dir, Contract Policy and Administration.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers for $300.00 per year, or $150.00 for 6 months, payable in advance. The charge for individual copies is $1.50 for each issue, or $1.50 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

How To Cite This Publication: Use the volume number and the page number. Example: 51 FR 12345.

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: The Office of the Federal Register.

WHAT: Free public briefings (approximately 2 1/2 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: May 15; at 9 am.

WHERE: Office of the Federal Register, First Floor Conference Room, 1100 L Street NW., Washington, DC.

RESERVATIONS: Laurence Davey, 202-523-3517

Rules and Regulations

Federal Register
Vol. 51, No. 80
Friday, April 25, 1986

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 86-AWP-5]

Transition Area Revocation; Kaanapali, HI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The nature of this action is to revoke the 700 foot transition area currently designated for Kaanapali, Hawaii. This will return the associated 700 foot area to a 1,200 foot transition area. The Kaanapali, Hawaii, Airport has been permanently closed.

EFFECTIVE DATE: 0901 UTC, July 3, 1986.

FOR FURTHER INFORMATION CONTACT: Frank T. Torikai, Airspace Specialist, Airspace Branch, AWP-520, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90260; telephone (213) 297-1649.

SUPPLEMENTARY INFORMATION:

The Rule

This amendment to Part 71.181 of the Federal Aviation Regulations revokes the transition area currently designated for Kaanapali, Hawaii, and returns the associated 700 foot area to a 1,200 foot area. I find that notice and public procedure under 5 U.S.C. 553(b) are unnecessary because this action is a minor amendment in which the public would not be particularly interested. Section 71.181 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Transition Areas.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 106(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

§ 71.181 [Amended]

2. Section 71.181 is amended as follows:

Kaanapali, HI—[Removed]

Issued in Los Angeles, California, on April 17, 1986.

Lloyd Golden,
Acting Air Traffic Manager, Western Pacific Region.

[FR Doc. 86-9253 Filed 4-24-86; 8:45 am]
BILLING CODE 4910-13-M

---

14 CFR Part 71

[Airspace Docket No. 86-AWP-4]

Amended Control Zone Hours, Saipan, Mariana Islands, CM

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; Request for comments.

SUMMARY: There has been a significant increase in instrument flight rules (IFR) traffic during all hours to Saipan International Airport, Mariana Islands, CM. This amendment will amend the effective hours for the Saipan control zone and provide controlled airspace for all IFR traffic. The Saipan control zone will be a full time control zone.

DATES: Effective date—0901 UTC, July 3, 1986.

Comments must be received on or before June 16, 1986.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Attn: Manager, Airspace Branch, AWP-520, Docket No. 86-AWP-4, Air Traffic Division, P.O. Box 90027, WWPC, Los Angeles, California 90009.

The official docket may be examined in the Office of the Regional Counsel, Western-Pacific Region, Federal Aviation Administration, Room 6W14, 15000 Aviation Boulevard, Lawndale, California.

An informal docket may also be examined during normal business hours at the Office of the Manager, Airspace Branch, Air Traffic Division, at the above address.

FOR FURTHER INFORMATION CONTACT: Frank T. Torikai, Airspace Specialist, Airspace Branch, AWP-520, Air Traffic Division, Western-Pacific Region, Federal Aviation Administration, 15000 Aviation Boulevard, Lawndale, California 90260; telephone (213) 297-1649.

SUPPLEMENTARY INFORMATION:

Request for Comments on the Rule

Although this action is in the form of a final rule, which involves changing the Saipan, Mariana Islands, CM, control zone from a part-time to a full time control zone, and was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the FAA will use the comments submitted, together with other available information, to review the regulation. After the review, if the FAA finds that changes are appropriate, it will initiate rulemaking proceedings to amend the regulation. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule and determining whether additional rulemaking is needed. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental,

VOL 51 ISS 80 AP 25 1986 UMI

and energy aspects of the rule that might suggest the need to modify the rule.

The Rule

The purpose of this amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is to amend the effective hours of the Saipan, Mariana Islands, CM, control zone. Section 71.171 of Part 71 of the Federal Aviation Regulations was republished in Handbook 7400.6B dated January 2, 1986.

Under the circumstances presented, the FAA concludes that there is an immediate need for a regulation to amend the hours of the Saipan control zone. Therefore, I find that notice and public procedure under 5 U.S.C. 553(b) are impracticable and contrary to the public interest. For the same reasons, I find that good cause exists for making this amendment effective coincident with the next charting date.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Aviation safety, Control zones.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is/are (further) amended as follows:

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 1348(a), 1354(a), 1510; Executive Order 10854; 49 U.S.C. 108(g) (Revised Pub. L. 97-449, January 12, 1983); 14 CFR 11.69.

Part 71—[Amended]

§ 71.171 [Amended]

2. § 71.171 is amended as follows:

Saipan Island, Mariana Islands, CM—[Amended]

Within a 5-mile radius of Saipan International Airport (lat. 15°07'13" N., long. 145°43'40" E.), and within 3 miles each side of the Saipan RBN (lat. 15°06'46" N., long. 145°42'42" E.) 286° bearing, extending from the 5-mile radius zone to 8.5 miles west of the RBN, and within 2 miles each side of the extended centerline of the east/west runway extending from the 5-mile radius zone to 7.5 miles east of Saipan International Airport.

Issued in Los Angeles, California, on April 17, 1986.

B. Keith Potts,

Acting Director, Western-Pacific Region.

BILLING CODE 4910-13-M

14 CFR Part 97

[Docket No. 24971; Amdt. No. 1319]

Standard Instrument Approach Procedures; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of the adoption of new or revised criteria, or because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.

DATES: *Effective:* An effective date for each SIAP is specified in the amendatory provisions.

Incorporation by reference—approved by the Director of the Federal Register on December 31, 1980, and reapproved as of January 1, 1982.

ADDRESSES: Availability of matters incorporated by reference in the amendment is as follows:

For Examination—

1. FAA Rules Docket, FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591;

2. The FAA Regional Office of the region in which the affected airport is located; or

3. The Flight Inspection Field Office which originated the SIAP.

For Purchase—Individual SIAP copies may be obtained from:

1. FAA Public Inquiry Center (APA-430), FAA Headquarters Building, 800 Independence Avenue, SW., Washington, D.C. 20591; or

2. The FAA Regional Office of the region in which the affected airport is located.

By Subscription—Copies of all SIAPs, mailed once every 2 weeks, are for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

FOR FURTHER INFORMATION CONTACT: Donald K. Funai, Flight Procedures Standards Branch (AFO-230), Air Transportation Division, Office of Flight Operations, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone (202) 426-8277.

SUPPLEMENTARY INFORMATION: This amendment to Part 97 of the Federal Aviation Regulations (14 CFR Part 97) prescribes new, amended, suspended, or revoked Standard Instrument Approach Procedures (SIAPs). The complete regulatory description of each SIAP is contained in official FAA form documents which are incorporated by reference in this amendment under 5 U.S.C. 552(a), 1 CFR Part 51, and § 97.20 of the Federal Aviation Regulations (FARs). The applicable FAA Forms are identified as FAA Forms 8260-3, 8260-4, and 8260-5. Materials incorporated by reference are available for examination or purchase as stated above.

The large number of SIAPs, their complex nature, and the need for a special format make their verbatim publication in the **Federal Register** expensive and impractical. Further, airmen do not use the regulatory text of the SIAPs, but refer to their graphic depiction on charts printed by publishers of aeronautical materials. Thus, the advantages of incorporation by reference are realized and publication of the complete description of each SIAP contained in FAA form document is unnecessary. The provisions of this amendment state the affected CFR (and FAR) sections, with the types and effective dates of the SIAPs. This amendment also identifies the airport, its location, the procedure identification and the amendment number. This amendment to Part 97 is effective on the date of publication and contains separate SIAPs which have compliance dates stated as effective dates based on related changes in the National Airspace System or the application of new or revised criteria. Some SIAP amendments may have been previously issued by the FAA in a National Flight Data Center (FDC) Notice to Airmen (NOTAM) as an emergency action of immediate flight safety relating directly to published aeronautical charts. The circumstances which created the need for some SIAP amendments may require making them effective in less than 30 days. For the remaining SIAPs, an effective date at least 30 days after publication is provided.

Further, the SIAPs contained in this amendment are based on the criteria contained in the U.S. Standard for Terminal Instrument Approach Procedures (TERPs). In developing these SIAPs, the TERPS criteria were applied to the conditions existing or anticipated at the affected airports. Because of the close and immediate relationship between these SIAPs and safety in air commerce, I find that notice and public procedure before adopting these SIAPs is unnecessary, impracticable, and contrary to the public interest and, where applicable, that good cause exists for making some SIAPs effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Issued in Washington, D.C. on April 18, 1986.

John S. Kern,

Director of Flight Standards.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me, Part 97 of the Federal Aviation Regulations (14 CFR Part 97) is amended by establishing, amending, suspending, or revoking Standard Instrument Approach Procedures, effective at 0901 G.M.T. on the dates specified, as follows:

1. The authority citation for Part 97 continues to read as follows:

Authority: 49 U.S.C. 1348, 1354(a), 1421, and 1510; 49 U.S.C. 106(g) (revised, Pub. L. 97-449, January 12, 1983; and 14 CFR 11.49(b)(2)).

PART 97—[AMENDED]

By amending: § 97.23 VOR, VOR/DME, VOR or TACAN, and VOR/DME or TACAN; § 97.25 LOC, LOC/DME, LDA, LDA/DME, SDF, SDF/DME; § 97.27 NDB, NDB/DME; § 97.29 ILS, ILS/DME, ISMLS, MLS, MLS/DME, MLS/RNAV; § 97.31 RADAR SIAPs; § 97.33 RNAV, SIAPs; and § 97.35 COPTER SIAPs, identified as follows:

BILLING CODE 4910-13-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 522

Implantation or Injectable Dosage From New Animal Drugs Not Subject to Certification; Gentamicin Sulfate Injection

AGENCY: Food and Drug Administration HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a new animal drug application (NADA) filed by Med-Tech, Inc., providing for use of gentamicin sulfate injection in the treatment of urinary tract infections (cystitis) in dogs.

EFFECTIVE DATE: April 25, 1986.

FOR FURTHER INFORMATION CONTACT: Bob G. Griffith, Center for Veterinary Medicine (HFV–110), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–1963.

SUPPLEMENTARY INFORMATION: Med-Tech, Inc., P.O. Box 338, Elwood, KS 66024, filed NADA 137–310 for gentamicin sulfate injection (50 milligrams per milliliter). The drug is for intramuscular or subcutaneous injection in dogs for the treatment of urinary tract infections (cystitis) caused by *Proteus mirabilis, Escherichia coli,* and *Staphylococcus aureus.* The NADA is approved and the regulations amended to reflect the approval. The basis for approval is discussed in the freedom of information summary.

In accordance with the freedom of information provisions of Part 20 (21 CFR Part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)), a summary of safety and effectiveness data and information submitted to support approval of this application may be seen in the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857, from 9 a.m. to 4 p.m., Monday through Friday.

The agency has determined under 21 CFR 25.24(d)(1)(i) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects in 21 CFR Part 522

Animal drugs.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs and redelegated to the Center for Veterinary Medicine, Part 522 is amended as follows:

PART 522—IMPLANTATION OR INJECTABLE DOSAGE FROM NEW ANIMAL DRUGS NOT SUBJECT TO CERTIFICATION

1. The authority citation for 21 CFR Part 522 continues to read as follows:

Authority: Sec. 512(i), 82 Stat. 347 (21 U.S.C. 360b(i)); 21 CFR 5.10 and 5.83.

2. Section 522.1044 is amended by adding new paragraphs (b)(3) and (d)(5) to read as follows:

§ 522.1044 Gentamicin sulfate injection.

* * * * *

(b) * * *

(3) See No. 013983 for use of 50 milligram-per-milliliter solution in dogs as in paragraph (d)(5) of this section.

* * * * *

(d) * * *

(5) *Dogs.*—(i) *Amount.* 2 milligrams of gentamicin per pound of body weight, twice daily on the first day, then once daily.

(ii) *Indications for use.* For use in the treatment of urinary tract infections (cystitis) caused by *Proteus mirabilis, Escherichia coli,* and *Staphylococcus aureus.*

(iii) *Limitations.* Administer intramuscularly or subcutaneously. If no improvement is seen after 3 days, treatment should be discontinued and the diagnosis reevaluated. Treatment not to exceed 7 days. Federal law restricts this drug to use by or on the order of a licensed veterinarian.

Dated: April 21, 1986.

Gerald B. Guest,

Acting Director, Center for Veterinary Medicine.

[FR Doc. 86-9267 Filed 4-24-86; 8:45 am]
BILLING CODE 4160-01-M

21 CFR Parts 601, 610, 620, 630, 640, 650, 660, and 680

[Docket No. 86N-0113]

Biological Products; Corrections and Technical Amendments

AGENCY: Food and Drug Administration.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending its regulations on biological products to correct editorial and typographical errors and to make minor, noncontroversial, technical revisions.

DATES: Effective April 25, 1986; written comments by May 27, 1986.

ADDRESS: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, Rm. 4–62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Joseph G. Wilczek, Center for Drugs and Biologics (HFN–362), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8049.

SUPPLEMENTARY INFORMATION: FDA is amending certain of its biological products regulations to correct editorial and typographical errors. FDA is also making certain revisions in § 610.53 in the table of dating periods for licensed biological products. These changes represent current practice with respect to the storage periods for various products. FDA has accepted these periods in submitted license applications.

Because this final rule is not controversial and because when effective it provides notice of accepted standards, notice and comment procedure and delayed effective date are found to be unnecessary and not in the public interest (5 U.S.C. 553 (b)(B) and (d)). This final rule, therefore, is effective April 25, 1986. However, interested persons may, on or before May 27, 1986, submit written comments to the Dockets Management Branch (address above).

FDA has analyzed the regulatory impact of this rule in accordance with Executive Order 12291 and the Regulatory Flexibility Act (Pub. L. 96–354). The rule amends the regulations on biological products to correct editorial and typographical errors and to make minor technical revisions. Therefore, the agency has determined that the rule is not a major rule as defined in Executive Order 12291. Further, FDA certifies that the rule will not have a significant impact on a substantial number of small entities, as defined by the Regulatory Flexibility Act.

The agency has determined under 21 CFR 25.24(a)(9) (April 26, 1985; 50 FR 16636) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

List of Subjects

21 CFR Part 601

Biologics.

21 CFR Part 610

Biologics; Labeling; Reporting and recordkeeping requirements.

21 CFR Part 620

Biologics; Reporting and recordkeeping requirements.

Biologics; Blood.

Therefore, under the Public Health Service Act and under the authority delegated to the Commissioner of Food and Drugs, Parts 601, 610, 620, 630, 640, 650, 660, and 680 are amended as follows:

PART 601—LICENSING

1. The authority citation for 21 CFR Part 601 is revised to read as follows:

Authority: Secs. 215, 351, 58 Stat. 690 as amended, 702 as amended (42 U.S.C. 216, 262); 21 CFR 5.10.

§ 601.25 [Amended]

2. Section 601.25 *Review procedures to determine that licensed biological products are safe, effective, and not misbranded under prescribed, recommended, or suggested conditions of use* is amended in paragraph (d)(2) by changing "§ 314.111(a)(5)(ii)" to read "§ 314.126."

PART 610—GENERAL BIOLOGICAL PRODUCT STANDARDS

3. The authority citation for 21 CFR Part 610 is revised to read as follows:

Authority: Sec. 351, 58 Stat. 702 as amended (42 U.S.C. 262); 21 CFR 5.10.

§ 610.9 [Amended]

4. In § 610.9 *Equivalent methods and processes,* in paragraph (b) changing "20205" to read "20892."

§ 610.11 [Amended]

5. In § 610.11 *General safety,* in the introductory paragraph, in the introductory text of paragraph (c), (c)(2), and (3) by changing the reference "paragraph (f) of this section" to read "§ 610.9" wherever it appears.

§ 610.15 [Amended]

6. In § 610.15 *Constituent materials,* in the introductory text of praragraph (a) by revising in the second sentence the word "use" to read "used," and in the third sentence by changing "in 50 percent or more glycerin" to read "in 50 percent or more volume in volume (v/v) glycerin."

§ 610.40 [Amended]

7. In § 610.40 *Test for hepatitis B surface antigen,* paragraphs (b)(4), (d)(1)(v), and (d)(2)(iv), by changing "20205" to read "20892."

8. Section 610.53 is amended in paragraph (c) by revising the table to read as follows:

§ 610.53 Dating periods for licensed biological products.

* * * * *

(c) * * *

Product A	Manufacturer's storage period 1 to 5 °C (unless otherwise stated) B	Manufacturer's storage period 0 °C or colder (unless otherwise stated) C	Dating period after leaving manufacturer's storage when stored at 2 to 8 °C (unless otherwise stated) D
Adenovirus Vaccine Live Oral	6 months	Not applicable	6 months.
Albumin (Human)	3 years	do	(a) 5 years.
	do	do	(b) 3 years, provided labeling recommends storage at room temperature, no warmer than 37 °C.
	Not applicable	do	(c) 10 years, if in a hermetically sealed metal container and provided labeling recommends storage between 2 and 8 °C.
Allergenic Extracts labeled "No U.S. Standard of Potency":			
1. With 50 percent or more glycerin	3 years	do	3 years.
2. With less than 50 percent glycerin	18 months	do	18 months.
3. Products for which cold storage conditions are inappropriate	Not applicable	do	18 months (from date of manufacture), provided labeling recommends storage at 30 °C or colder.
4. Powders and tablets	do	do	5 years (from date of manufacture), provided labeling recommends storage at 30 °C or colder.
5. Freeze-dried products:			
a. Unreconstituted	do	do	4 years (from date of manufacture).
b. Reconstituted	do	do	18 months (cannot exceed 4-year unreconstituted dating period plus an additional 12 months).
Allergenic Extracts, Alum Precipitated labeled "No U.S. Standard of Potency"	18 months	do	18 months.
Anthrax Vaccine Adsorbed	2 years	do	1 year.
Antibody to Hepatitis B Surface Antigen:			
1. Antibody to Hepatitis B Surface Antigen	6 months	do	6 months.
2. Lyophilized coated red blood cells	do	do	Do.
3. Enzyme conjugated products	do	do	Do.
Iodinated (^{125}I) products	Not applicable	do	45 days (from date of manufacture).
Antihemophilic Factor (Human)	do	do	1 year (from date of manufacture).

VOL 51 ISS 80 AP 25 1986 UMI

Product	Manufacturer's storage period 1 to 5 °C (unless otherwise stated)	Manufacturer's storage period 0 °C or colder (unless otherwise stated)	Dating period after leaving manufacturer's storage when stored at 2 to 8 °C (unless otherwise stated)
A	B	C	D
Anti-Human Globulin Liquid	do	do	2 years.
Anti-Inhibitor Coagulant Complex	do	do	Do.
Antirabies Serum	1 year	do	Do.
Antivenin (Crotalidae) Polyvalent	do	do	5 years with an initial 10 percent excess of potency, provided labeling recommends storage at 37 °C or colder.
Antivenin (Latrodectus Mactans)	do	do	5 years with an initial 10 percent excess of potency.
Antivenin (Micrurus fulvius)	do	do	Do.
Asparaginase	Not applicable	do	18 months from the date of the last valid potency test.
BCG Vaccine	1 year	Not applicable	6 months.
Blood Grouping Serums:			
1. Liquid	Not applicable	Not applicable	2 years.
2. Dried	1 year	2 years	5 years.
Blood Group Substance AB	do	do	2 years.
Blood Group Substance A	do	do	Do.
Blood Group Substance B	do	do	Do.
Botulism Antitoxin	do	Not applicable	5 years with an initial 30 percent excess of potency.
Cholera Vaccine	do	do	18 months.
Coccidioidin	do	do	3 years.
Collagenase	Not applicable	do	4 years (from date of manufacture), provided labeling recommends storage at 37 °C or colder.
Cryoprecipitated AFH	do	do	12 months from the date of collection of source blood, provided labeling recommends storage at −18 °C or colder.
Diphtheria Antitoxin:			
1. Liquid	1 year	do	5 years with an initial 20 percent excess of potency.
2. Dried	do	2 years	5 years with an initial 10 percent excess of potency.
Diphtheria and Tetanus Toxoids and Pertussis Vaccine Adsorbed	do	Not applicable	18 months.
Diphtheria and Tetanus Toxoids, Adsorbed	do	do	2 years.
Diphtheria Toxin for Schick Test	do	do	1 year.
Diphtheria Toxoid	do	do	2 years.
Diphtheria Toxoid Adsorbed	do	2 years	Do.
Diphtheria Toxoid-Schick Test Control	Not applicable	Not applicable	1 year.
Factor IX Complex	do	do	1 year (from date of manufacture).
Fibrinolysin (Human)	1 year	2 years	2 years.
Fibrinolysin and Desoxyribonuclease Combined (Bovine)	do	do	3 years, provided labeling recommends storage at 30 °C or colder.
Fibrinolysin and Desoxyribonuclease Combined (Bovine) with Chloramphenicol	do	do	Do.
Hepatitis B Surface Antigen:			
1. Unlyophilized coated red blood cells	Not applicable	do	14 days (from date of manufacture).
2. Iodinated (^{125}I) product	do	do	45 days (from date of manufacture).
3. Enzyme conjugated product	6 months	do	6 months.
Histoplasmin	1 year	Not applicable	2 years.
Immunoglobulins:			
1. Hepatitis B Immune Globulin (Human)	Not applicable	2 year	1 year.
2. Immune Globulin (Human)	3 years	do	3 years.
3. Immune Globulin Intravenous (Human)	Not applicable	do	1 year.
4. Lymphocyte Immune Globulin, Anti-Thymocyte Globulin (Equine)	do	Not applicable	2 years.
5. Pertussis Immune Globulin (Human)	3 years	do	3 years from date the dried or frozen bulk product is placed in final solution.
6. Rabies Immune Globulin (Human)	1 years	do	1 year.
7. Rh$_0$(D) Immune Globulin (Human)	6 months	do	6 months.
8. Tetanus Immune Globulin (Human)	1 year	do	3 years with an initial 10 percent excess of potency.
9. Vaccinia Immune Globulin (Human)	3 years	do	3 years.
10. Varicella-Zoster Immune Globulin (Human)	Not applicable	do	1 year.
Hepatitis B Vaccine	2 years at 12 to 8 °C	Not applicable	3 years.
Influenza Virus Vaccine	1 year	do	18 months.
Limulus Amebocyte Lysate	Not applicable	Not applicable	18 months (from date of manufacture).
Measles, Mumps, and Rubella Virus Vaccine Live	do	1 year (−20 °C or colder).	1 year.
Measles and Mumps Virus Vaccine Live	do	do	1 year.
Measles and Rubella Virus Vaccine Live	do	do	Do.
Measles Live and Smallpox Vaccine	Not applicable	do	1 year (from date of manufacture).
Measles Virus Vaccine Live	do	do	1 year.
Meningococcal Polysaccharide Vaccine Group A:			
1. Final bulk powder	do	2 years (−20 °C or colder).	Not applicable.
2. Final container	Not applicable	3 years (−20 °C or colder).	2 years.
Meningococcal Polysaccharide Vaccine Group C:			
1. Final bulk powder	do	2 years (−20 °C or colder).	Not applicable.
2. Final container	do	3 years (−20 °C or colder).	2 years.
Meningococcal Polysaccharide Vaccine Groups A and C combined:			
1. Final bulk powder	do	2 years (−20 °C or colder).	Not applicable.
2. Final container	do	3 years (−20 °C or colder).	2 years.
Meningococcal Polysaccharide Vaccine Groups A, C, Y, and W135 combined:			
1. Final bulk power	do	2 years (−20 °C or colder).	Not applicable.
2. Final container	do	3 years (−20 °C or colder).	2 years.
Mumps Skin Test Antigen	6 months	Not applicable	18 months.
Mumps Virus Vaccine Live	Not applicable	1 year (−20 °C or colder).	1 year.
Normal Horse Serum	1 year	2 years	5 years.
Pertussis Vaccine	do	Not applicable	18 months.

Product	Manufacturer's storage period 1 to 5 °C (unless otherwise stated)	Manufacturer's storage period 0 °C or colder (unless otherwise stated)	Dating period after leaving manufacturer's storage when stored at 2 to 8 °C (unless otherwise stated)
A	B	C	D
Pertussis Vaccine Adsorbed	do	do	Do.
Plague Vaccine	do	do	Do.
Plasma products:			
1. Fresh Frozen Plasma	Not applicable	do	1 year from date of collection of source blood (−18 °C or colder).
2. Liquid Plasma	do	do	(a) 26 days from date of collection of source blood (between 1 and 6 °C). (b) 40 days from date of collection of source blood only when CPDA-1 solution is used as the anticoagulant (between 1 and 6 °C).
3. Plasma	do	do	5 years from date of collection of source blood (−18 °C or colder).
4. Platelet Rich Plasma	do	do	72 hours from time of collection of source blood, provided labeling recommends storage (20 to 24 °C or between 1 and 6 °C). 5 days if certain approved containers are used (20 to 24 °C).
5. Source Leukocytes	do	do	In lieu of expiration date, the collection date shall appear on the label.
6. Source Plasma	do	do	10 years (at the recommended storage temperature stated on the label).
7. Therapeutic Exchange Plasma	do	do	10 years.
Plasma Protein Fraction (Human)	1 year	do	(a) 5 years. (b) 3 years provided labeling recommends storage at room temperature, no warmer than 30 °C).
Platelets	Not applicable	do	72 hours from time of collection of source blood, provided labeling recommends storage at 20 to 24 °C or between 1 and 6 °C. 5 days if certain approved containers are used (20 to 24 °C).
Pneumococcal Vaccine Polyvalent:			
1. Final bulk powder	do	24 months after potency assay (−20 °C or colder).	Not applicable.
2. Final container	do	Not applicable	2 years (from date of manufacture).
Poliovirus Vaccine Inactivated	1 year	do	1 year.
Poliovirus Vaccine Live Oral Trivalent:			
1. Frozen	Not applicable	1 year (−10 °C or colder).	1 year, provided labeling recommends storage at a temperature which will maintain ice continuously in a solid state.
2. Liquid	do	Not applicable	30 days, provided labeling recommends storage between 2 and 8 °C and container has been unopened.
Poliovirus Vaccine Live Oral Type I:			
1. Frozen	do	1 year (−10 °C or colder).	1 year, provided labeling recommends storage at a temperature which will maintain ice continuously in a solid state.
2. Liquid	do	Not applicable	30 days, provided labeling recommends storage between 2 and 8 °C and container has been unopened.
Poliovirus Vaccine Live Oral Type II:			
1. Frozen	do	1 year (−10 °C or colder).	1 year, provided labeling recommends storage at a temperature which will maintain ice continuously in a solid state.
2. Liquid	do	Not applicable	30 days, provided labeling recommends storage between 2 and 8 °C and container has been unopened.
Poliovirus Vaccine Live Oral Type III:			
1. Frozen	do	1 year (−10 °C or colder).	1 year, provided labeling recommends storage at a temperature which will maintain ice continuously in a solid state.
2. Liquid	do	Not applicable	30 days, provided labeling recommends storage between 2 and 8 °C and container has been unopened.
Polyvalent bacterial antigens with "No U.S. Standard of Potency" liquid.	1 year	do	18 months.
Polyvalent bacterial vaccines with "No U.S. Standard of Potency" liquid.	do	do	Do.
Rabies Vaccine:			
1. Dried	do	2 years	Do.
2. Liquid	3 months	Not applicable	6 months.
Reagent Red Blood Cells	Not applicable	do	35 days from earliest date of collection.
ACD Red Blood Cells	do	do	(a) 21 days from date of collection of source blood, provided labeling recommends storage between 1 and 6 °C and the hermetic seal is not broken during processing. (b) 24 hours after plasma removal, provided labeling recommends storage between 1 and 6 °C and the hermetic seal is broken during processing.
CPD Red Blood Cells	do	do	(a) 21 days from date of collection of source blood, provided labeling recommends storage between 1 and 6 °C and the hermetic seal is not broken during processing. (b) 24 hours after plasma removal, provided labeling recommends storage between 1 and 6 °C and the hermetic seal is broken during processing.
CPDA-1 Red Blood Cells	do	do	(a) 35 days from date of collection of source blood, provided labeling recommends storage between 1 and 6 °C and the hermetic seal is not broken during processing. (b) 24 hours after plasma removal, provided labeling recommends storage between 1 and 6 °C and the hermetic seal is broken during processing.
Red Blood Cells Deglycerolized	do	do	24 hours after removal from storage at −65 °C or colder, provided labeling recommends storage between 1 and 6 °C.
Red Blood Cells Frozen	do	do	3 years from date of collection of source blood, provided labeling recommends storage at −65 °C or colder.
Rubella and Mumps Virus Vaccine Live	do	1 year (−20 °C or colder). °C.	1 year.
Rubella Virus Vaccine Live	do	Not applicable	Do.
Skin Test Antigens for Cellular Hypersensitivity	6 months		Do.

Product	Manufacturer's storage period 1 to 5 °C (unless otherwise stated)	Manufacturer's storage period 0 °C or colder (unless otherwise stated)	Dating period after leaving manufacturer's storage when stored at 2 to 8 °C (unless otherwise stated)
A	B	C	D
Smallpox Vaccine:			
1. Liquid	Not applicable	9 months (−10 °C or colder, if product is maintained as glycerinated or equivalent vaccine in bulk or final containers).	3 months, provided labeling recommends storage at 0 °C or colder.
2. Dried	6 months	Not applicable	18 months.
Streptokinase	Not applicable	do	Do.
Tetanus and Diphtheria Toxoids Adsorbed for Adult Use	1 year	do	2 years.
Tetanus Antitoxin:			
1. Liquid	do	do	5 years with an initial 20 percent excess of potency.
2. Dried	do	2 years	5 years with an initial 10 percent excess of potency.
Tetanus Toxoid	do	Not applicable	2 years.
Tetanus Toxoid Adsorbed	do	do	Do.
Thrombin	do	2 year	3 years.
Thrombin Impregnated Pad	Not applicable	Not applicable	1 year, or 6 months at 20 to 24 °C.
Tuberculin:			
1. Purified Protein Derivative, diluted	6 months	do	1 year.
2. Old or Purified Protein Derivative dried on multiple puncture device.	1 year (not to exceed 30 °C; do not refrigerate).	do	2 years, provided labeling recommends storage at a temperature not to exceed 30 °C. Do not refrigerate.
3. Old on multiple puncture device	do	do	Do.
Typhoid Vaccine	1 year	do	18 months.
ACD Whole Blood	Not applicable	do	21 days from date of collection, provided labeling recommends storage between 1 and 6 °C.
CPD Whole Blood	do	do	Do.
CPDA–1 Whole Blood	do	do	35 days from date of collection, provided labeling recommends storage between 1 and 6 °C.
Heparin Whole Blood	do	do	48 hours from date of collection, provided labeling recommends storage between 1 and 6 °C.
Yellow Fever Vaccine	do	1 year (−20 °C or colder).	1 year, provided labeling recommends storage at 5 °C or colder.

PART 620—ADDITIONAL STANDARDS FOR BACTERIAL PRODUCTS

9. The authority citation for 21 CFR Part 620 is revised to read as follows:

Authority: Secs. 215, 351, 58 Stat. 690 as amended, 702 as amended (42 U.S.C. 216, 262); 21 CFR 5.10.

§ 620.6 [Amended]

10. In § 620.6 *General requirements*, in paragraph (h) by changing "Building 29A, 9000 Rockville Pike, Bethesda, MD 20205" to read "8800 Rockville Pike, Bethesda, MD 20892."

§ 620.12 [Amended]

11. In § 620.12 *U.S. Standard preparations*, in the introductory paragraph by removing the word "National" and by changing "20205" to read "20892."

§ 620.14 [Amended]

12. In § 620.14 *General requirements*, in the introductory text of paragraph (c) by removing the word "National" and by changing "20205" to read "20892."

§ 620.24 [Amended]

13. In § 620.24 *General requirements*, in the introductory text of paragraph (c) by changing "Building 29A, 9000 Rockville Pike, Bethesda, MD 20205" to read "8800 Rockville Pike, Bethesda, MD 20892."

§ 620.35 [Amended]

14. In § 620.35 *General requirements*, in the introductory text of paragraph (e) by changing "20205" to read "20892."

§ 620.43 [Amended]

15. In § 620.43 *Reference BCG Vaccine*, by changing "20205" to read "20892."

§ 620.48 [Amended]

16. In § 620.48 *Samples; protocols; official release*, in the introductory text of paragraph (a) and in (a)(2) by changing "20205" to read "20892."

PART 630—ADDITIONAL STANDARDS FOR VIRAL VACCINES

17. The authority citation for 21 CFR Part 630 is revised to read as follows:

Authority: Secs. 215, 351, 58 Stat. 690 as amended, 702 as amended (42 U.S.C. 216, 262); 21 CFR 5.10.

§ 630.5 [Amended]

18. In § 630.5 *General requirements*, in the introductory text of paragraph (c) by changing "20205" to read "20892."

§ 630.16 [Amended]

19. In § 630.16 *Test for safety*, in paragraph (a)(6) by revising in the first sentence the phrase "At least 500 doses of 50 ml." to read "At least 500 doses or 50 mL."

§ 630.17 [Amended]

20. In § 630.17 *General requirements*, in the introductory text of paragraph (e) by changing "Building 29A, 9000 Rockville Pike, Bethesda, MD 20205" to read "8800 Rockville Pike, Bethesda MD 20892."

§ 630.36 [Amended]

21. In § 630.36 *General requirements*, in the introductory text of paragraph (h) by removing the phrase "Bldg. 29A" and by changing "20205" to read "20892."

§ 630.56 [Amended]

22. In § 630.56 *General requirements*, in the introductory text of paragraph (f) by changing "Building 29A, 9000 Rockville Pike, Bethesda, MD 20205" to read "8800 Rockville Pike, Bethesda, MD 20892."

§ 630.66 [Amended]

23. In § 630.66 *General requirements*, in the introductory text of paragraph (e) by removing the phrase "Bldg. 29A" and by changing "20205" to read "20892."

§ 630.75 [Amended]

24. In § 630.75 *General requirements*, in the introductory text of paragraph (d) by changing "Building 29A, 9000 Rockville Pike, Bethesda, MD 20205" to read "8800 Rockville Pike, Bethesda, MD 20892."

§ 630.86 [Amended]

25. In § 630.86 *General requirements*, in the introductory text of paragraph (e) by removing the phrase "Bldg. 29A" and by changing "20205" to read "20892."

PART 640—ADDITIONAL STANDARDS FOR HUMAN BLOOD AND BLOOD PRODUCTS

26. The authority citation for 21 CFR Part 640 continues to read as follows:

Authority: Secs. 215, 351, 58 Stat. 690 as amended; 702 as amended (42 U.S.C. 216, 262); 21 CFR 5.10.

§ 640.3 [Amended]

27. In § 640.3 *Suitability of donor*, in the introductory text of paragraphs (b) and (c), and paragraphs (d) and (e) by changing "Whole Blood (Human)" to read "Whole Blood."

§ 640.101 [Amended]

28. In § 640.101 *General requirements*, in the introductory text of paragraph (f) by changing "Building 29A, 9000 Rockville Pike, Bethesda, MD 20205" to read "8800 Rockville Pike, Bethesda, MD 20892."

§ 640.111 [Amended]

29. In § 640.111 *General requirements*, in the introductory text of paragraph (g) by changing "Building 29A, 9000 Rockville Pike, Bethesda, MD 20205" to read "8800 Rockville Pike, Bethesda, MD 20892."

PART 650—ADDITIONAL STANDARDS FOR DIAGNOSTIC SUBSTANCES FOR DERMAL TESTS

30. The authority citation for 21 CFR Part 650 is revised to read as follows:

Authority: Secs. 215, 351, 58 Stat. 690 as amended; 702 as amended (42 U.S.C. 216, 262); 21 CFR 5.10.

§ 650.11 [Amended]

31. In § 650.11 *General requirements*, in the introductory text of paragraph (c) by changing "Building 29A, 9000 Rockville Pike, Bethesda, MD 20205" to read "8800 Rockville Pike, Bethesda, MD 20892."

PART 660—ADDITIONAL STANDARDS FOR DIAGNOSTIC SUBSTANCES FOR LABORATORY TESTS

32. The authority citation for 21 CFR Part 660 is revised to read as follows:

Authority: Secs. 215, 351, 58 Stat. 690 as amended, 702 as amended (42 U.S.C. 216, 262); 21 CFR 5.10.

§ 660.6 [Amended]

33. In § 660.6 *Samples; protocols; official release*, in paragraph (a)(2) by changing "20205" to read "20892."

§ 660.22 [Amended]

34. In § 660.22 *Reference preparations* by changing "20205" to read "20892."

§ 660.29 [Amended]

35. In § 660.29 *Samples; protocols; official release*, in the introductory text of paragraph (a) by changing "20205" to read "20892."

§ 660.36 [Amended]

36. In § 660.36 *Samples and protocols*, in the introductory text of paragraph (a) by changing "20205" to read "20892."

§ 660.42 [Amended]

37. In § 660.42 *Reference panel* by changing "20205" to read "20892."

§ 660.46 [Amended]

38. In § 660.46 *Samples; protocols; official release*, in paragraph (a)(2) by changing "20205" to read "20892."

§ 660.52 [Amended]

39. In § 660.52 *Reference preparations* by changing "20205" to read "20892."

§ 660.53 [Amended]

40. In § 660.53 *Controls for serological procedures* by changing "20205" to read "20892."

§ 660.54 [Amended]

41. In § 660.54 *Potency tests, specificity tests, tests for heterospecific antibodies, and additional tests for nonspecific properties*, in the introductory paragraph by changing "20205" to read "20892."

§ 660.101 [Amended]

42. In § 660.101 *U.S. Standard/Reference Preparations*, in the introductory paragraph by changing "20205" to read "20892."

§ 660.105 [Amended]

43. In § 660.105 *Samples and protocols: official release*, in the introductory text of paragraph (a) by changing "20205" to read "20892."

PART 680—ADDITIONAL STANDARDS FOR MISCELLANEOUS PRODUCTS

44. The authority citation for 21 CFR Part 680 is revised to read as follows:

Authority: Secs. 215, 351, 58 Stat. 690 as amended, 702 as amended (42 U.S.C. 216, 262); 21 CFR 5.10.

§ 680.4 [Amended]

45. In § 680.4 *Short ragweed pollen extracts*, in the introductory text of paragraph (c)(1) by removing the phrase "Building 29A" and by changing "20205" to read "20892."

§ 680.21 [Amended]

46. In § 680.21 *Reference preparations* by changing "20205" to read "20892."

§ 680.26 [Amended]

47. In § 680.26 *Samples; protocols; official release* by removing the phrase "Building 29A" and by changing "20205" to read "20892."

Dated: April 17, 1986.

John M. Taylor,

Acting Associate Commissioner for Regulatory Affairs.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Parts 200, 812, 881, 882, and 912

[Docket No. R-85-974; FR-1589]

Restriction on Use of Assisted Housing

Correction

In FR Doc. 86-7050 beginning on page 11198 in the issue of Tuesday, April 1, 1986, make the following corrections:

§ 200.180 [Corrected]

1. On page 11214, third column, in § 200.180(a), seventh line, "1985" should read "1965".

§ 200.182 [Corrected]

2. On page 11215, third column, in § 200.182(a)(5)(i)(A)(1), second line, insert "(i)" between "(5)" and "(B)". In § 200.182(a)(5)(i)(A)(2), last line, "§ 200.182" should read "§ 200.183".

§ 812.5 [Corrected]

3. On page 11220, third column, in § 812.5, paragraph "(4)(1)" should read "(4)(i)". In § 812.5(a)(4)(i)(A), second line, "PHA.g" should read "PHA.".

4. On page 11221, third column, seventh line, "250–0204" should read "2502–0204".

§ 812.7 [Corrected]

5. On page 11222, first column, in § 812.7(a)(1)(ii)(B), eighth line, "follow" should read "allow".

§ 881.504 [Corrected]

6. On page 11225, first column, in § 881.504(e), eighth line, "than" should read "then".

VOL 51 ISS 80 AP 25 1986 UMI

§ 862.209 [Corrected]

7. On page 11228, first column, in § 862.209(a)(7), thirteenth line, "states" should read "stated".

§ 912.7 [Corrected]

8. On page 11230, third column, in § 912.7(a)(2)(ii), second line, "(d)(2)(i)" should read "(a)(2)(i)".

BILLING CODE 1505-01-M

DEPARTMENT OF JUSTICE

28 CFR Part 0

[Order No. 1131-86]

Organization of the Department of Justice

AGENCY: Department of Justice.

ACTION: Final rule.

SUMMARY: This rule will amend 28 CFR 0.111 by striking the existing language in paragraph (i) and adding a new paragraph to reflect a delegation of authority to the Director of the United States Marshals Service. On March 6, 1984 and May 24, 1985, the Director was delegated the authority to maintain, safekeep, and dispose of assets forfeited to the United States, and to administer the Department of Justice Asset Forfeiture Fund.

EFFECTIVE DATE: April 10, 1986.

FOR FURTHER INFORMATION CONTACT: Gerald M. Auerbach, General Counsel, United States Marshals Service, McLean, Virginia; telephone No. (703) 285-1004, which is not a toll-free number.

SUPPLEMENTARY INFORMATION: The Attorney General has delegated certain authority over asset forfeiture matters to the Director of the United States Marshals Service. This rule will amend 28 CFR 0.111 to add new language to paragraph (i) reflecting this delegation in order to alert the public to the present organizational structure of the Department.

This regulation is not a major rule within the meaning of Executive Order 12291, 3 CFR 127 (1982 Comp.) because it imposes no new requirements. It does not have an impact on small businesses and, therefore, is not subject to the Regulatory Flexibility Act, 5 U.S.C. 601-612. Compliance with 5 U.S.C. 553 as to notice of proposed rule making and delayed effective date is not necessary because this rule relates to agency organization and management.

List of Subjects in 28 CFR Part 0

Organization and functions (Government agencies), Assets, Forfeiture.

By virtue of the authority vested in me by 28 U.S.C. 509, 510, 524, 569; and 5 U.S.C. 301, Subpart T of Part 0 of Title 28 of the Code of Federal Regulations is amended as follows:

1. The authority citation for Subpart T continues to read as follows:

Authority: 28 U.S.C. 509, 510, 524, 569; 5 U.S.C. 301.

2. In Section 0.111, paragraph (i) is revised to read as follows:

§ 0.111 General functions.

* * * * *

(i) Maintenance of custody, management control, and disposal of property and money seized or forfeited pursuant to any law enforced or administered by the Department of Justice, when the property is seized by the United States Marshals Service or delivered to the United States Marshals Service in accordance with regulations; and administer the Department of Justice Asset Forfeiture Fund.

* * * * *

Dated: April 10, 1986.

Edwin Meese III,

Attorney General.

BILLING CODE 4410-01-M

NATIONAL LABOR RELATIONS BOARD

29 CFR Part 102

Procedural Rules; Advisory Opinion Requests by State Agencies and Courts

AGENCY: National Labor Relations Board.

ACTION: Final rule.

SUMMARY: In response to requests that the Board facilitate the procedure for issuing an advisory opinion to a court or state agency on assertion of jurisdiction over an employing enterprise, the Board is amending §§ 102.98 and 102.99 to allow a court or state agency to request an advisory opinion from the Board as to whether it would assert jurisdiction over that enterprise.

EFFECTIVE DATE: June 1, 1986.

FOR FURTHER INFORMATION CONTACT: John C. Truesdale, Executive Secretary, 1717 Pennsylvania Avenue, NW., Room 701, Washington, DC 20570, Telephone: (202) 254-9430.

SUPPLEMENTARY INFORMATION: Pursuant to its authority under section 6 of the National Labor Relations Act, as amended (29 U.S.C. 156), the National Labor Relations Board is amending its rules that provide for the Board's issuance of advisory opinions on the issue of whether an employer is within the Board's jurisdiction on the basis of its jurisdictional standards. The Association of Labor Relations Agencies (ALRA) petitioned the Board to consider the amendment of §§ 102.98 and 102.103 to enable state labor relations agencies to obtain administrative advice from the Board on whether the Board would assert jurisdiction over a particular employing enterprise. In determining an appropriate procedure, the Board was cognizant of the ALRA's interest in having a readily available, if less formalized, decisional response from the Board than the present advisory opinion procedure provides.

Rather than adopting a separate approach for responding to requests for advisory opinions by state agencies, the Board is amending its rules to allow for an expanded use of the advisory opinion procedure by state agencies and courts. The amendments to §§ 102.98 and 102.99 enlarge the present provisions that apply to requests for advisory opinions by state agencies and courts only when there is a question of whether the Board would assert jurisdiction under its current standards. The amended sections provide for advisory opinions on the broader issue of whether the Board would assert jurisdiction over an employing enterprise, thereby including jurisdiction under the National Labor Relations Act as well as the Board's current standards. The amended procedure utilizes an established procedure culminating in an opinion that would be published in a Board volume. This procedure will provide access to the Board by state agencies and courts on a greater range of jurisdictional issues. Access to the Board by the parties to the state proceeding where the state agency or court does not seek Board assistance is not deemed appropriate.

The remaining provisions pertaining to the advisory opinion process, §§ 102.100 to 102.104, are unchanged.

List of Subjects in 29 CFR Part 102

Administrative practice and procedure, labor management relations.

Accordingly, 29 CFR Part 102 is amended to read as follows:

PART 102—RULES AND REGULATIONS, SERIES 8, AS AMENDED

1. The authority citation for 29 CFR Part 102 is revised to read as follows:

Authority: Section 6, National Labor Relations Act, as amended (29 U.S.C. 151, 156).

2. Section 102.98 is amended by revising paragraph (b) to read as follows:

§ 102.98 Petition for advisory opinion; who may file; where to file.

* * * * *

(b) Whenever an agency or court of any State or territory is in doubt whether the Board would assert jurisdiction over the parties in a proceeding pending before such agency or court, the agency or court may file a petition with the Board for an advisory opinion on whether the Board would decline to assert jurisdiction over the parties before the agency or the court (1) on the basis of its current standards, or (2) because the employing enterprise is not within the jurisdiction of the National Labor Relations Act.

3. Section 102.99 is amended by revising paragraphs (b) and (c) to read as follows:

§ 102.99 Contents of petition for advisory opinion; contents of request for administrative advice.

* * * * *

(b) A petition for an advisory opinion, when filed by an agency or court of a State or territory, shall allege the following:

(1) The name of the agency or court.

(2) The names of the parties to the proceeding and the docket number.

(3) The nature of the proceeding, and the need for the Board's opinion on the jurisdictional issue to the proceeding.

(4) The general nature of the business involved in the proceeding and, where appropriate, the nature of and details concerning the employing enterprise.

(5) The findings of the agency or court or, in the absence of findings, a statement of the evidence relating to the commerce operations of such business and, where appropriate, to the nature of the employing enterprise.

(c) Eight copies of such petition or request shall be submitted to the Board in Washington, DC. Such petition or request shall be printed or otherwise legibly duplicated. Carbon copies of typewritten matter will not be accepted.

Dated, Washington, DC, April 22, 1986.

By direction of the Board. National Labor Relations Board.

John C Truesdale,

Executive Secretary.

BILLING CODE 7545-01-M

29 CFR Part 102

Procedural Rules; Filing of Briefs

AGENCY: National Labor Relations Board.

ACTION: Final rule.

SUMMARY: In 1982, the Board revised its rules and regulations to provide that briefs that are filed with the Board contain no more than 50 pages. Practice under the rules has shown that there has been some confusion and misuse regarding the exceptions document upon which there is no 50-page limitation. The changes in the rule are designed to provide a clearer description of the contents of the exceptions document and the brief, and, therefore, to facilitate administration of the 50-page limit on briefs by precluding placement in the exceptions of material that appropriately belongs in the brief.

EFFECTIVE DATE: June 1, 1986.

FOR FURTHER INFORMATION CONTACT: John C. Truesdale, Executive Secretary, 1717 Pennsylvania Avenue, NW., Washington, DC 20570, Telephone: (202) 254-9430.

SUPPLEMENTARY INFORMATION: Pursuant to its authority under section 6 of the National Labor Relations Act, as amended (29 U.S.C. 156), the National Labor Relations Board is amending its rule regarding the filing of briefs and exceptions with the Board. Section 102.46(a) of the Board's rules presently provides that any party may file with the Board exceptions to the administrative law judge's decision or to any other part of the record or proceedings, together with a brief in support of exceptions. Section 102.46(j) restricts the length of briefs to 50 pages. There is no similar restriction for the length of exceptions. In order to ensure that material that properly belongs in briefs to the Board is not inserted in the exceptions, the descriptions of materials appropriately belonging in exceptions and briefs have been revised.

The present paragraph (b) has been divided into (b)(1) and (b)(2). The new (b)(1) has the present (1), (2), (3), and (4) of paragraph (b) redesignated as (b)(1)(i), (ii), (iii), and (iv). In (b)(1)(iv), the word "concisely" has been inserted to define the manner in which the grounds for exceptions should be stated. This is to emphasize that the statement of grounds should be short and to the point.

Paragraph (b)(1) has been further modified to distinguish the situation when a single document has been filed containing both the exceptions and the brief argument from the situation when separate documents have been filed, one setting forth the exceptions and the other constituting the brief. The subsection provides that when only a single document is filed, the document is subject to the 50-page limit for a brief in § 102.46(j), even though it also contains the exceptions. The subsection further provides that when two documents are filed—one an exceptions document and the other a brief—any argument or citation of authority in support of the exceptions shall be set forth only in the brief. In that situation, the subsection specifically states that the exceptions document shall not contain any argument or citation of authority. Under these provisions, the Executive Secretary's Office should be more readily able to identify in the two-document situation whether the exceptions document improperly contains argument or citation of authority. The presence in the exceptions document of citations of authority would clearly establish it as not in compliance with the rule.

Paragraph (b)(2) is a separate statement of the last two sentences of present § 102.46(b), which provides that any exception not urged before the Board is deemed waived.

Paragraph (c)(2) has been modified by adding the requirement that the specification of questions in the brief identify the specific exceptions that they are designed to support. This will facilitate identification of those exceptions for which no supporting argument is provided in the brief.

Paragraph (c)(3) has been modified to insert the word "record" rather than the present page of transcript to which argument in briefs must refer, because the scope of the record is broader and defined in § 102.45(b) of the Board's rules.

List of Subjects in 29 CFR Part 102

Administrative practice and procedure, Labor management relations.

Accordingly, 29 CFR Part 102 is amended to read as follows:

PART 102—RULES AND REGULATIONS, SERIES 8, AS AMENDED

1. The authority citation for 29 CFR Part 102 is revised to read as follows:

Authority: Section 6, National Labor Relations Act, as amended (29 U.S.C. 151, 156).

2. Section 102.46 is amended by revising paragraphs (b), (c), and (j) to read as follows:

VOL 51 ISS 80 AP 25 1986 UMI

§ 102.46 Exceptions, cross-exceptions, briefs; answering briefs; time for filing; where to file; service on the parties; extension of time; effect of failure to include matters in exceptions; oral arguments.

* * * * *

(b)(1) Each exception (i) shall set forth specifically the questions of procedure, fact, law, or policy to which exception is taken; (ii) shall identify that part of the administrative law judge's decision to which objection is made; (iii) shall designate by precise citation of page the portions of the record relied on; and (iv) shall concisely state the grounds for the exception. If a supporting brief is filed the exceptions document shall not contain any argument or citation of authority in support of the exceptions, but such matters shall be set forth only in the brief. If no supporting brief is filed the exceptions document shall also include the citation of authorities and argument in support of the exceptions, in which event the exceptions document shall be subject to the 50-page limit as for briefs set forth in § 102.46(j).

(2) Any exception to a ruling, finding, conclusion, or recommendation which is not specifically urged shall be deemed to have been waived. Any exception which fails to comply with the foregoing requirements may be disregarded.

(c) Any brief in support of exceptions shall contain no matter not included within the scope of the exceptions and shall contain, in the order indicated, the following:

(1) A clear and concise statement of the case containing all that is material to the consideration of the questions presented.

(2) A specification of the questions involved and to be argued, together with a reference to the specific exceptions to which they relate.

(3) The argument, presenting clearly the points of fact and law relied on in support of the position taken on each question, with specific reference to the record and the legal or other material relied on.

* * * * *

(j) Exceptions to the administrative law judge's decision, or to the record, and briefs shall be printed or otherwise legibly duplicated. Carbon copies of typewritten matter will not be accepted. Eight copies of such documents shall be filed with the Board in Washington, DC., and copies shall also be served promptly on the other parties. All documents filed pursuant to this section shall be double spaced on 8½-by 11-inch paper. A brief filed pursuant to this section shall not be combined with any other brief, and shall not exceed 50 pages in length, exclusive of subject index and table of cases and other authorities cited, unless permission to exceed that limit is obtained from the Board by motion, setting forth the reasons therefore, filed not less than 10 days prior to the date the brief is due. Where any brief filed pursuant to this section exceeds 20 pages, it shall contain a subject index with page references and an alphabetical table of cases and other authorities cited.

Dated: Washington, DC, April 22, 1986.

By direction of the Board. National Labor Relations Board.

John C. Truesdale,

Executive Secretary.

BILLING CODE 7545-01-M

DEPARTMENT OF LABOR

Wage and Hour Division

29 CFR Part 511

Wage Order Procedure for Puerto Rico, the Virgin Islands and American Samoa; Compensation of Committee Members

AGENCY: Employment Standards Administration, Labor.

ACTION: Final rule.

SUMMARY: This document increases from $164 to $182 a day the per diem allowance to which members of industry committees in Puerto Rico, the Virgin Islands, and American Samoa are entitled. The industry committees, whose members include representatives of employees, employers, and the public, as appointed by the Secretary of Labor, meet periodically to review the wage rates in various industries and to recommend wage increases where appropriate. The committees meet pursuant to the Fair Labor Standards Act which authorized the establishment of minimum wage rates in Puerto Rico, the Virgin Islands, and American Samoa which are lower than the mainland minimum wage rate. This increase is in accord with changes in General Schedule salary rates effective January 6, 1985 for regular employees of the U.S. Department of Labor.

EFFECTIVE DATE: April 25, 1986.

FOR FURTHER INFORMATION CONTACT: James L. Valin, Assistant Administrator, Wage and Hour Division, U.S. Department of Labor, 200 Constitution Avenue, NW., Room S3502, Washington, DC 20210, 202-523-8353.

SUPPLEMENTARY INFORMATION: It is the standard practice to adjust compensation for Industry Committee members in accordance with changes in General Schedule salary rates. The purpose of this amendment is to increase the compensation of each member of an industry committee from $164 to $182 for each day spent in the work of the committee. It accords with changes in General Schedule salary effective January 6, 1985 for regular employees of the U.S. Department of Labor.

As this amendment concerns only a rule of agency practice, and is not substantive, notice of proposed rule making, opportunity for public participation, and delay in effective date are not required by 5 U.S.C. 553. It does not appear that such participation or delay would serve a useful purpose. Accordingly, this revision shall be effective immediately.

Drafting Information

This document was prepared under the direction and control of James L. Valin, Assistant Administrator, Wage and Hour Division, Employment Standards Administration, U.S. Department of Labor, Room S3502, 200 Constitution Avenue, NW, Washington, DC 20210, telephone: 202-523-8353.

Classification

This rule relates to agency organization, management, or personnel pursuant to section 1(a)(3) of Executive Order 12291. Accordingly, it does not fall within the definition of "rule" under section 1(a) of the Executive Order.

Regulatory Flexibility Act

Because no notice of proposed rulemaking is required for this rule under 5 U.S.C. 553(b), the requirements of the Regulatory analyses do not apply to this rule.

Paperwork Reduction Act

This rule is not subject to section 3504(h) of the Paperwork Reduction Act, since it would not require the collection or retention of information.

List of Subjects in 29 CFR Part 511

Administrative practice and procedure, Minimum wages, Wage and Hour Division, Puerto Rico, Virgin Islands, American Samoa.

Pursuant to authority in section 5 of the Fair Labor Standards Act of 1938 (52 Stat. 1062 as amended; 29 U.S.C. 205) and Reorganization Plan No. 6 of 1950 (3 CFR 1949-53 Comp. p. 1004), 29 CFR Part 511 is amended as follows:

PART 511—WAGE ORDER PROCEDURE FOR PUERTO RICO, THE VIRGIN ISLANDS AND AMERICAN SAMOA

1. The authority citation for Part 511 is revised to read as set forth below and the authority citation following § 511.4 is removed:

Authority: Secs. 5, 6, 8, 52 Stat. 1062, 1064; 29 U.S.C. 205, 206, 208; Secs. 2-12, 80 Stat. 237-244; 5 U.S.C. 1001-1011; § 511.4 is issued under Sec. 5, 52 Stat. 1062, as amended (29 U.S.C. 205).

2. Section 511.4 is revised to read as follows:

§ 511.4 Compensation of Committee members.

Each member of an industry committee will be allowed a per diem of $182 for each day actually spent in the work of the committee, and will, in addition, be reimbursed for necessary transportation and other expenses incident to traveling in accordance with Standard Government Travel Regulations then in effect. All travel expenses will be paid on travel vouchers certified by the Administrator or his authorized representative. Any other necessary expenses which are incidental to the work of the committee may be incurred by the committee upon approval of, and shall be paid upon, certification of the Administrator or his authorized representative.

Signed at Washington, DC this 22nd day of April, 1986.

Susan R. Meisinger,

Deputy Under Secretary for the Employment Standards Administration.

BILLING CODE 4510-27-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[A-5-FRL-3007-4]

Air Quality; Approval and Promulgation of Implementation Plans; Illinois

AGENCY: Environmental Protection Agency (USEPA).

ACTION: Final rulemaking.

SUMMARY: USEPA is approving a site-specific revision to the Illinois State Implementation Plan (SIP) for Total Suspended Particulates (TSP) as it applies to the Navy Public Works Center (NPWC), Department of the Navy, which is located at the Great Lakes Naval Base, Great Lakes, Shields Township, Illinois. The revision would allow NPWC a variance from the requirements of Illinois Rule 202(b) until July 30, 1985. This variance has already expired. This action is being taken in response to a May 13, 1985, request from the State of Illinois.

DATE: This action will be effective June 24, 1986 unless notice is received within 30 days that someone wishes to submit adverse or critical comments.

ADDRESSES: Copies of this revision to the Illinois SIP are available for inspection at: The Office of the Federal Register, 1100 L Street, N.W., Room 8401, Washington, D.C.

Copies of the SIP revision and other materials related to this rulemaking are available for inspection at the following addresses: (It is recommended that you telephone Uylaine E. McMahan, at (312) 353-0396, before visiting the Region V Office.)

U.S Environmental Protection Agency, Region V, Air and Radiation Branch (5AR-26), 230 South Dearborn Street, Chicago, Illinois 60604.

U.S Environmental Protection Agency, Public Information Reference Unit, 401 M Street, SW., Washington, DC 20460

Illinois Environmental Protection Agency, Division of Air Pollution Control, 2200 Churchill Road, Springfield, Illinois 62706

Written comments should be sent to:

Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR-26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Uylaine E. McMahan, Air and Radiation Branch (5AR-26) U.S. Environmental Protection Agency, Region V, Chicago, Illinois 60604, (312) 886-6031.

SUPPLEMENTARY INFORMATION: On May 13, 1985, the Illinois Environmental Protection Agency (IEPA) submitted a variance from Illinois Rule 202(b) for a Brule pathological waste incinerator (BPWI) at NPWC's facility in Great Lakes, Shields Township, Illinois, as a revision to its TSP SIP. Shields Township is an attainment area for both the primary and secondary national ambient air quality standards (NAAQS) for TSP.

The State is requesting that the NPWC be allowed a variance from the requirements of the opacity limit contained in Illinois Rule 202(b) until July 30, 1985. Rule 202(b) requires that:

> The emission of smoke or other particulate matter from any such emission source may have an opacity greater than 30 percent but not greater than 60 percent for a period or periods aggregating 8 minutes in any 60 minute period provided that such more opaque emissions permitted during any 60 minute period shall occur from only one such emission source located within a 305 meter (1000 feet) radius from the center point of any other such emission source owned or operated by such person, and provided further that such more opaque emissions permitted from each such emission source shall be limited to 3 times in any 24 hour period.

Before July 30, 1985, NPWC installed a new BPWI in order to comply with the opacity requirements contained in Rule 202(b). The BPWI is presently operating. It has been stack tested and demonstrated compliance with the particulate matter mass emission rate and the opacity limit.

The Illinois Pollution Control Board granted NPWC a variance from the Rule 202(b) subject to the following conditions:

1. The variance expired on July 30, 1985.

2. The compliance schedule is as follows:

October 20, 1984—95 percent design complete
October 25, 1984—Preadvertise documentation
November 15, 1984—Final design complete
December 10, 1984—Advertise for construction contract
January 10, 1985—Award contract
January 25, 1985—Apply for construction permit
February 25, 1985—Begin construction
March 10, 1985—Apply for operating permit
May 10, 1985—Completion and start up

3. Beginning with the first calendar month following the granting of the variance, the Navy shall submit to the IEPA monthly reports detailing its progress in achieving the final compliance date of May 10, 1985.

4. The afterburner of the present pathological waste incinerator should be pre-heated to 1400°F, or greater, and maintained at that operating temperature throughout the period of the variance.

Shields Township, where the NPWC is located, has been designated as an attainment area for both the primary and the secondary TSP standards throughout the period covered by the variance. During that period, the facility was in compliance with the mass emissions limit applicable to the source. Although the facility was not meeting the opacity limit throughout that period, the area continued to attain the TSP standards. For that reason, USEPA concludes that the facility's failure to meet the opacity limit during that period did not in fact interfere with

BEST COPY AVAILABLE

VOL 51 ISS 80 AP 25 1986

maintenance of the standards. Therefore, USEPA is approving NPWC's variance request.

Because USEPA considers today's action noncontroversial and routine, we are approving it today without prior proposal. The action will become effective on June 24, 1986. However, if we receive notice by May 27, 1986 that someone wishes to submit critical comments, *then* USEPA will publish: (1) A notice that withdraws the action, and (2) a notice that begins a new rulemaking by proposing the action and establishing a public comment period.

The Office of Management and Budget has exempted this rule from the requirements of Section 3 of Executive Order 12291.

Under 5 U.S.C. section 605(b), I certify that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 24, 1986. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Incorporation by reference, Particulate matter, Intergovernmental relations.

Note.—Incorporation by reference of the State Implementation Plan for the State of Illinois was approved by the Director of the Federal Register on July 1, 1982.

Dated: April 17, 1986.

Lee M. Thomas,

Administrator.

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Illinois

Title 40 of the Code of Federal Regulations, Chapter I, Part 52, is amended as follows:

1. The authority citation for Part 52 continues to read as follows: Authority: 42 U.S.C. 7401–7642.

2. Section 52.720 is amended by adding new paragraph (c)(64) as follows:

§ 52.720 Identification of plan.

* * * * *

(c) * * *

(64) On May 13, 1985, the Illinois Environmental Protection Agency (IEPA) submitted a variance from Illinois Rule 202(b) for a Brule pathological waste incinerator (BPWI) at NPWC's facility located at the Great Lakes Naval Base, Great Lakes, Shields Township, Illinois, as a revision to its TSP SIP. Shields Township is an attainment area for both the primary and secondary national ambient air quality standards (NAAQS) for TSP.

(i) Incorporation by reference.

(A) Opinion and Order of the Illinois Pollution Control Board 84–156 adopted on March 22, 1985.

BILLING CODE 6560-50-M

---

40 CFR Part 52

[A-5-FRL-3009-3]

Air Quality; Approval and Promulgation of Implementation Plans; Illinois

AGENCY: Environmental Protection Agency (USEPA).

ACTION: Final rulemaking.

SUMMARY: USEPA is approving a site-specific revision to the Illinois State Implementation Plan (SIP) for Volatile Organic Compounds (VOC) as it applies to Precision Coatings, Incorporated (PCI), which is located in Bureau County, Illinois. The revision would allow PCI a variance from the requirements of Illinois Pollution Control Board (IPCB) Rule 215.204(C) until June 1, 1985. This variance has expired. This action is being taken in response to a July 22, 1985, request from the State of Illinois.

DATES: This action will be effective June 24, 1986 unless notice is received within 30 days that someone wishes to submit adverse or critical comments.

ADDRESSES: Copies of this revision to the Illinois SIP are available for inspection at:

The Office of the Federal Register, 1100 L Street, NW., Room 8401, Washington, DC

Copies of the SIP revision and other materials related to this rulemaking are available for inspection at the following addresses: (It is recommended that you telephone Uylaine E. McMahan, at (312) 353–0396, before visiting the Region V Office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch (5AR–26), 230 South Dearborn Street, Chicago, Illinois 60604

U.S. Environmental Protection Agency, Public Information Reference Unit, 401 M Street, S.W., Washington, D.C. 20460

Illinois Environmental Protection Agency, Division of Air Pollution Control, 2200 Churchill Road, Springfield, Illinois 62706.

Written comments should be sent to: Gary Gulezian, Chief, Regulatory Analysis Section, Air and Radiation Branch (5AR–26), U.S. Environmental Protection Agency, Region V, 230 South Dearborn Street, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Uylaine E. McMahan, Air and Radiation Branch (5AR–26), U.S. Environmental Protection Agency, Region V, Chicago, Illinois 60604, (312) 886–6031.

SUPPLEMENTARY INFORMATION: Rule 215.204 [formerly 205(n)(1)(C)][1] requires that each coating used at a paper coating line meet at emission limit of 2.9 pounds of VOC (excluding water) per gallon of coating not later than December 31, 1982. As an alternative to 215.204(C), a source may elect to install VOC control equipment, pursuant to Rule 215.205(a) [formerly 205(n)(2)(A)].[2] The control equipment (an afterburner system) must oxidize to carbon dioxide and water 75 percent of the emissions from the coating line and 90 percent of the nonmethane volatile organic material which enters it. Compliance with this alternative method was to be achieved by December 31, 1982.

On July 22, 1985, the Illinois Environmental Protection Agency (IEPA) submitted a variance from IPCB 215.204(C) for coating Machine Number 2 at the PCI facility in Spring Valley, Illinois, as a revision to its VOC SIP. Spring Valley is in Bureau County which has attained the NAAQS for ozone. This revision is in the form of a February 20, 1985, Opinion and Order of the Illinois Pollution Control Board (IPCB) Number 84–117. This Order was later modified by an April 4, 1985, Order of the Board. It grants a variance from the existing SIP requirement until June 1, 1985, and provides a legally enforceable compliance schedule.

Under the existing federally approved SIP, each coating used on Machine Number 2 at PCI is subject to the emission limits in Rule 215.204(C); or PCI may elect to install an afterburner system, pursuant to 215.205(a).

In lieu of the current SIP compliance date of December 31, 1982, the State is requesting an extended compliance date to June 1, 1985, for PCI's coating operations for Machine Number 2, in order for PCI to achieve compliance with 215.205(a) through the installation of an afterburner system.

Machine Number 2

PCI's control strategy of reformulation was not successful for the coatings used on Machine Number 2. Therefore, PCI committed to the installation of thermal oxidation equipment to comply with Rule 215.205(a). PCI has installed this thermal oxidation equipment, and it is presently operating. This equipment is similar to that used at PCI's Michigan facility and has a reported control efficiency of 90 percent. PCI's average annual emissions from Machine Number 2 before the installation of the thermal oxidation equipment were 175 tons. The allowable emissions are 43.8 tons per year (using a 75 percent overall control efficiency).

USEPA is approving this variance for the following reasons: (1) PCI's Spring Valley facility is located in an ozone attainment area, (2) this variance does not jeopardize the attainment and maintenance of the ozone National Ambient Air Quality Standards, and (3) PCI has now installed thermal oxidation equipment. Therefore, in today's final rulemaking, USEPA is approving Illinois' variance request.

Because USEPA considers today's action noncontroversial and routine, we are approving it today without prior proposal. The action will become effective on June 24, 1986. However, if we receive notice by May 27, 1986 that any person wishes to submit critical comments, *then* USEPA will publish: (1) A notice that withdraws the action, and (2) a notice that begins a new rulemaking by proposing the action and establishing a public comment period.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under 5 U.S.C. Section 605(b), the Administrator has certified that SIP approvals do not have a significant economic impact on a substantial number of small entities. (See 46 FR 8709).

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by June 24, 1986. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

List of Subjects in 40 CFR Part 52

Air pollution control, Incorporation by reference, Particulate matter, Intergovernmental relations.

40 CFR Part 52

[A-5 FRL-3009-2]

Air Quality Approval and Promulgation of Implementation Plans, Indiana

AGENCY: Environmental Protection Agency (USEPA).

ACTION: Final rulemaking.

SUMMARY: On September 2, 1983, Indiana submitted as a revision to its State Implementation Plan (SIP) for total suspended particulates (TSP) an alternative emission control plan for the Occidental Chemical Corporation (OCC) facility in Jeffersonville Township, Clark County, Indiana. USEPA today is approving the emission limits within it as a site specific SIP revision.

EFFECTIVE DATE: This final rulemaking becomes effective on May 27, 1986.

ADDRESSES: Copies of this revision to the Indiana SIP are available for inspection at: The Office of the Federal Register, 1100 L Street NW., Room 8401, Washington, DC 20408.

Copies of the SIP revision, public comments on the notice of proposed rulemaking and other materials relating to this rulemaking are available for inspection at the following addresses: (It is recommended that you telephone Uylaine E. McMahan, at (312) 886–6031, before visiting the Region V Office.)

U.S. Environmental Protection Agency, Region V, Air and Radiation Branch (5AR–26), 230 South Dearborn Street, Chicago, Illinois 60604

U.S. Environmental Protection Agency, Public Information Reference Unit, 401 M Street SW., Washington, DC 20460

Indiana Air Pollution Control Division, Indiana State Board of Health, 1330 West Michigan Street, Indianapolis, Indiana 46206.

SUPPLEMENTARY INFORMATION: On September 2, 1983, the Indiana Air Pollution Control Board (Board) submitted a SIP revision in the form of revised operating permits [1] for OCC and requested that USEPA approve it as a "bubble" under the USEPA proposed Emissions Trading Policy Statement (ETPS), published April 7, 1982 (47 FR 15076). Amendments to these operating permits were submitted by the State on December 21, 1983.

The OCC Jeffersonville Township facility produces phosphoric acid and salts. This facility is located in the portion of Clark County, Indiana, which is designated as a secondary nonattainment area for TSP.[2]

USEPA proposed on May 15, 1984 (49 FR 20518), to disapprove the OCC proposed revision. USEPA determined that the proposed bubble was not approvable because it was not consistent with the ETPS and the technical support materials were insufficient.

USEPA received comments in response to the May 15, 1984, notice. Based upon the State and OCC

---

[1] Rule 215.204(C) was incorporated into the Illinois SIP as Rule 205(n)(1)(C) on February 21, 1980 (45 FR 11472). It was subsequently recodified by the State as Rule 215.204(C). This recodification has not been submitted to USEPA as a SIP revision. USEPA, therefore, approves this SIP revision as a variance from the requirements of Rule 205(n)(1)(C) which is part of the Illinois SIP.

It should also be noted that, because of a typographical error, PCI was granted a variance from Rule 205.204(C) on February 20, 1985, Opinion and Order of the IPCB. There is no such rule. USEPA has conferred with the IPCB staff on this matter and confirmed that this citation was in error, and the intent of the IPCB was to grant a variance from the requirements of Rule 215.204(C). Reinforcing this intent is the fact that Rule 215.204(C) was correctly cited elsewhere in the Opinion and Order. USEPA, therefore, approves a variance from Rule 215.204(C) which was incorporated in the SIP as Rule 205(n)(1)(C).

[2] Rule 215.205(a) was incorporated in the Illinois SIP as Rule 205(n)(2)(A) on February 21, 1980 (45 FR 11472). It has been recodified by the State as Rule 215.205(a).

[1] These operating permits revise Indiana's Rule 325 IAC 6-1-17.

[2] On March 22, 1985 (50 FR 11503), USEPA approved the State of Indiana's request to redesignate Jeffersonville Township from primary nonattainment to secondary nonattainment.

UMI

VOL 51 ISS 80 APR 25 1986

comments, USEPA published a second notice of proposed rulemaking March 1, 1985 (50 FR 8346), to approve the OCC proposed revision request.

During the public comments period for the March 1, 1985, notice, USEPA received one comment from OCC. OCC noted that the potassium phosphate salt production line tons per year current SIP limit was an error and that there is no current independent SIP limit for this salt production line. USEPA disagrees with OCC. Because the potassium phosphate salt line was not explicitly included in the Clark County, Appendix to Indiana's nonattainment TSP regulations, 325 IAC 6-1, it is governed by the general emission limitations in 325 IAC 6-1, Section 2(a) of this regulation, that limits the potassium phosphate salt line to 0.03 grains per dry standard cubic foot (gr/dscf).

This action is not affected by the PSD regulations because the revision does not result in an increase in actual emissions. Thus, the action does not qualify as a major modification and does not consume PSD increment.

Based on the proposal, USEPA has determined that the emission limits contained in the operating permits can be approved as a site-specific SIP revision. The current and proposed limits are:

Source	Current SIP limits		Proposed SIP limits	
	gr/dscf	T/yr	gr/dscf	T/yr
Thermal Process (Acid Line)	0.023	8.7	[1] 0.122	46
Sodium Phosphate Salt Production Line	0.026	85.2	[1] 0.037	48.9
Potassium Phosphate Salt Production Line	0.03		[1] 0.109	13
Total		93.9		93.9

[1] Based on actual stack test data.
Note: T/yr = Tons per year.

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive Order 12291.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by May 27, 1986. This action may not be challenged later in proceedings to enforce its requirements. (See 307(b)(2).)

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Title 40 of the Code of Federal Regulations, Chapter I, Part 52, is amended as follows:

1. The authority citation for Part 52 continues to read as follows:

Authority: 42 U.S.C. 7401–7642.

2. Section 52.770 is amended by adding new paragraph (c)(56) as follows:

§ 52.770 Identification of Plan.

* * * * *

(c) * * *

(56) On September 2, 1983, the Indiana Air Pollution Control Board (Board) submitted revised emission limitations for Occidental Chemical Corporation (OCC), located in Clark County, Indiana. Amendments to these operating permits were submitted by the State on December 21, 1983. These emission limits replace those approved for OCC (under its former name, Hooker Chemical) at (c)(34).

(i) Incorporation by reference.

(A) Indiana Air Pollution Control Board Operation Permits:

(1) Control Number 16113, date issued December 27, 1982.

(2) Control Number 16114, date issued December 27, 1982.

(3) Control Number 16115, date issued December 27, 1982.

(ii) Additional material.

(A) OCC corrected emissions dated September 13, 1984.

(B) OCC's new modeled data, dated November 6, 1984.

(C) State's modeling for OCC and surrounding area, dated July 2, 1984 and August 7, 1984.

BILLING CODE 6560-50-M

COUNCIL ON ENVIRONMENTAL QUALITY

40 CFR Part 1502

National Environmental Policy Act Regulations; Incomplete or Unavailable Information

AGENCY: Council on Environmental Quality, Executive Office of the President.

ACTION: Final rule.

SUMMARY: The Council on Environmental Quality (CEQ) promulgates regulations, binding on all federal agencies, to implement the procedural provisions of the National Environmental Policy Act (NEPA). The regulations address the administration of the NEPA process, including preparation of environmental impact statements for major federal actions which significantly affect the quality of the human environment. On August 9, 1985, CEQ published a proposed amendment to one of these regulations (40 CFR 1502.22), which addresses incomplete or unavailable information in an environmental impact statement (EIS). 50 FR 32234. After reviewing the comments received in response to that proposal, the CEQ now issues the final amendment to that regulation. The final amendment requires all federal agencies to disclose the fact of incomplete or unavailable information when evaluating reasonably foreseeable significant adverse impacts on the human environment in an EIS, and to obtain that information if the overall costs of doing so are not exorbitant. If the agency is unable to obtain the information because overall costs are exorbitant or because the means to obtain it are not known, the agency must (1) affirmatively disclose the fact that such information is unavailable; (2) explain the relevance of the unavailable information; (3) summarize the existing credible scientific evidence which is relevant to the agency's evaluation of significant adverse impacts on the human environment; and (4) evaluate the impacts based upon theoretical approaches or research methods generally accepted in the scientific community. The amendment also specifies that impacts which have a low probability of occurrence but catastrophic consequences if they do occur, should be evaluated if the analysis is supported by credible scientific evidence and is not based on pure conjecture, and is within the rule of reason. The requirement to prepare a "worst case analysis" is rescinded.

The existing guidance regarding 40 CFR 1502.22, found in Question 20 of *Forty Most Asked Questions Concerning CEQ's National Environmental Policy Act Regulations*, 46 FR 18032 (1981), is hereby withdrawn. Guidance relevant to the amended regulation will be published after the regulation becomes effective.

EFFECTIVE DATE: May 27, 1986.

FOR FURTHER INFORMATION CONTACT: Dinah Bear, General Counsel, Council on Environmental Quality, 722 Jackson Place NW., Washington, DC 20006. (202) 395–5754.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

Under Executive Order 12291, CEQ must judge whether a regulation is major and, therfore, whether a Regulatory Impact Analysis must be prepared. This regulation does not satisfy any of the criteria specified in section 1(b) of the Executive Order and, as such, does not constitute a major rulemaking. As required by Executive Order 12291, this regulation was submitted to the Office of Management and Budget (OMB) for review. There were no comments from OMB to CEQ regarding compliance with Executive Order 12291 in relationship to amendment of 40 CFR 1502.22.

Paperwork Reduction Act

The information collection requirements in this proposed rule were submitted for approval to OMB under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.* No comments were submitted by OMB or the public on the information collection requirements.

Regulatory Flexibility Act

Under the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, CEQ is required to prepare a Regulatory Flexibility Analysis for proposed regulations which would have a significant impact on a substantial number of small entities. No analysis is required, however, when the Chairman of the Council certifies that the rule will not have a significant economic impact on a substantial number of small entities. Accordingly, I hereby certify, pursuant to 5 U.S.C. 605(b), that this final amendment would not have a significant impact on a substantial number of small entities.

Environmental Assessment

Although there are substantial legal questions as to whether entities within the Executive Office of the President are required to prepare environmental assessments, CEQ, consistent with its practice in 1978, has prepared a special environmental assessment and a Finding of No Significant Impact regarding amendment of this regulation, which is available to the public upon request. For the reasons stated in the Finding of No Significant Impact, CEQ has concluded that the amendment to 40 CFR 1502.22 will not have a significant impact on the quality of the human environment.

Background

The National Environmental Policy Act, signed into law by President Nixon on January 1, 1970, articulated national policy and goals for the nation, established the Council on Environmental Quality, and, among other federal agencies to assess the environmental impacts of and, among other things, required all federal agencies to assess the environmental impacts of and alternatives to proposals for major federal actions significantly affecting the quality of the human environment. The Council on Environmental Quality, charged with the duty of overseeing the implementation of NEPA, developed guidelines to aid federal agencies in assessing the environmental impacts of their proposals. A combination of agency practice, judicial decisions and CEQ guidance resulted in the development of what is commonly referred to as "the NEPA process", which includes the preparation of environmental impact statements for certain types of federal actions.

Because of complaints about paperwork and delays in projects caused by the NEPA process, and a perception that the problem was caused in part by lack of a uniform, binding authority, CEQ was directed in 1977 to promulgate binding regulations implementing the procedural provisions of NEPA. (Executive Order 11991, 3 CFR 123 (1978). Council was directed to specifically: "make the environmental impact statement process more useful to decisionmakers and the public; and to reduce paperwork and the accumulation of extraneous background data, in order to emphasize the need to focus on real environmental issues and alternatives." After undertaking an extensive process of review and comment with federal, state and local governmental officials, private citizens, business and industry representatives, and public interest organizations, the Council issued the NEPA regulations on November 29, 1978. 40 CFR 1500–1508 (1986). The regulations were hailed as a "significant improvement on prior EIS guidelines", (Letter, Chamber of Commerce of the United States, January 8, 1979), and became effective for, and binding upon, most federal agencies on July 30, 1979, and for all remaining federal agencies on November 29, 1979.

Since promulgation of the NEPA regulations, the Council has continually reviewed the regulations to identify areas where further interpretation or guidance is required.[1] No broad support for amendment of the regulations surfaced during review under the 1981 Vice President's Regulatory Relief Task Force; indeed, some recommended that, "CEQ's streamlining regulations for the implementation of NEPA requirements should receive full support from the Administration and the federal agencies". (Letter, National League of Cities, May 14, 1981). Although continual attention is required to ensure that the mandate of the regulations is being fulfilled, the regulations appear to be generally working well.

During the past two and a half years, however, the Council has received numerous requests from both government agencies and private parties to review and amend the regulation which addresses "incomplete or unavailable information" in the EIS process. That regulation currently reads as follows:

"Section 1502.22. Incomplete or unavailable information.

"When an agency is evaluating significant adverse effects on the human environment in an environmental impact statement and there are gaps in relevant information or scientific uncertainty, the agency shall always make clear that such information is lacking or that uncertainty exists.

"(a) If the information relevant to adverse impacts is essential to a reasoned choice among alternatives and is not known and the overall costs of obtaining it are not exorbitant, the agency shall include the information in the environmental impact statement.

"(b) If (1) the information relevant to adverse impacts is essential to a reasoned choice among alternatives and is not known and the overall costs of obtaining it are exorbitant or (2) the information relevant to adverse impacts is important to the decision and the means to obtain it are not known (e.g., the means for obtaining it are beyond the state of the art) the agency shall weigh the need for the action against the risk and severity of possible adverse impacts were the action to proceed in the face of uncertainty. If the agency proceeds, it shall include a worst case analysis and an indication of the probability or improbability of its occurrence." 40 CFR 1502.22.

On August 11, 1983, the Council proposed guidance regarding the "worst case analysis" requirement and asked for comments on the proposed guidance 48 FR 36486 (1983). The draft guidance suggested that an initial threshold of probability should be crossed before the requirements in 40 CFR 1502.22 became applicable. Although some

[1] See, *Forty Most Asked Questions Concerning CEQ's National Environmental Policy Act Regulations*, 46 FR 18026 (1981); *Memorandum for General Counsels, NEPA Liaisons and Participants in Scoping*, April 30, 1981 (available upon request from the General Counsel's office, CEQ); *Guidance Regarding NEPA Regulations*, 48 FR 34263 (1983).

UMI

VOL 51 ISS 80 AP 25 1986 UMI

commentators agreed with the guidance, others believed that the proposed threshold would weaken analysis of low probability and severe consequences impacts. Other writers suggested different approaches to the issue, or advocated amendment of the regulation rather than guidance. After reviewing the comments received in response to that proposal, the Council withdrew the proposed guidance, stating its intent to give the matter additional examination before publishing a new proposal. 49 FR 4803 (1984).

After many discussions with federal agency representatives and other interested parties in state governments, public interest groups, and business and industry, the Council published an Advance Notice of Proposed Rulemaking (ANPRM) for 40 CFR 1502.22, and stated that it was considering the need to amend the regulation. 49 FR 50744 (1984). The ANPRM posed five questions about the issue of incomplete or unavailable information in an EIS and asked for thoughtful written responses to the questions. The Council received 161 responses to the ANPRM. A majority of the commentators cited problems with the "worst case analysis" requirement, but recognized the need to address potential impacts in the face of incomplete or unavailable information. Many commentators thought that either the regulation itself or recent judicial decisions required agencies to go beyond the "rule of reason". These commentators suggested that the "rule of reason" should be made specifically applicable to the requirements of the regulation. A minority of commentators felt strongly that the original regulation was adequate and should not be amended.

On March 18, 1985, the Council held a meeting, open to the public, to discuss the comments received in response to the Advance Notice of Proposed Rulemaking. 50 FR 9535 (1985). Shortly after that meeting, the Council voted to amend the regulation. On August 9, 1985, CEQ published a proposed amendment to 40 CFR 1502.22 which read as follows:

"Section 1502.22. Incomplete of unavailable information.

"In preparing an environmental impact statement, the agency shall make reasonable efforts, in light of overall costs and state of the art, to obtain missing information which, in its judgment, is important to evaluating significant adverse impacts on the human environment that are reasonably foreseeable. If, for the reasons stated above, the agency is unable to obtain this missing information, the agency shall include within the environmental impact statement (a) a statement that such information is missing, (b) a statement of the relevance of the missing information to evaluating significant adverse impacts on the human environment, (c) a summary of existing credible scientific evidence which is relevant to evaluating the significant adverse impacts on the human environment, and (d) the agency's evaluation of such evidence. 'Reasonably foreseeable' includes impacts which have catastrophic consequences, even if their probability of occurrence is low, provided that they have credible scientific support, are not based on pure conjecture, and are within the rule of reason." 50 FR 32238 (1985).

The Council received 184 comments in response to the proposed amendment: 81 comments from business and industry; 39 comments from private citizens; 30 comments from public interest groups; 15 comments from federal agencies; 14 comments from state governments; 4 comments from local governments; and one comment from a Member of Congress.

A majority of the commentators favored an amendment to the regulation, and supported the general approach of the proposed amendment. However, many of these writers offered specific suggestions for improving the proposal. Many commentators asked for definitions of terms used in the proposal, particularly for the phrase "credible scientific evidence." Some commentators wanted the Council to specify a particular methodology, such as risk assessment, as a substitute for a worst case analysis. Many commentators had specific comments about particular words or phrases used in the proposed amendment. Many commentators asked CEQ to provide further guidance or monitoring after the regulation was issued in final form.

A minority of commentators strongly opposed the amendment. Some of these writers were concerned over perceived changes in the first two paragraphs of the original regulation—requirements to disclose the fact that information is missing, and to obtain that information, if possible. Some commentators opposed deletion of the "worst case analysis" requirement. Other commentators believed that the proposed amendment did not require agencies to analyze or evaluate impacts in the face of incomplete or unavailable information. These comments, and others, will be discussed below in the section "Comments and the Council's Response".

On January 9, 1986, CEQ held a meeting, open to the public, to discuss the comments received in response to the proposed amendment. 50 FR 53061 (1985). A summary of the presentation made at that meeting is available from the Office of the General Counsel. Shortly after that meeting, the Council voted to proceed to final amendment of the regulation.

Purpose and Analysis of Final Amendment

CEQ is amending this regulation because it has concluded that the new requirements provide a wiser and more manageable approach to the evaluation of reasonably foreseeable significant adverse impacts in the face of incomplete or unavailable information in an EIS. The new procedure for analyzing such impacts in the face of incomplete or unavailable information will better inform the decisionmaker and the public. The Council's concerns regarding the original wording of 40 CFR 1502.22 are discussed at length in the preamble to the proposed amendment. 50 FR 32234 (1985). It must again be emphasized that the Council concurs in the underlying goals of the original regulation—that is, disclosure of the fact of incomplete or unavailable information; acquisition of that information if reasonably possible; and evaluation of reasonably foreseeable significant adverse impacts even in the absence of all information. These goals are based on sound public policy and early NEPA case law.[1] Rather, the need for amendment is based upon the Council's perception that the "worst case analysis" requirement is an unproductive and ineffective method of achieving those goals; one which can breed endless hypothesis and speculation.

The amended regulation applies when a federal agency is preparing an EIS on a major federal action sigificantly affecting the quality of the human environment and finds that there is incomplete or unavailable information relating to reasonably foreseeable significant adverse impacts on the environment. It retains the legal requirements of the first paragraph and subsection (a) of the original regulation. Thus, when preparing an EIS, agencies must disclose the fact that there is incomplete or unavailable information. The term "incomplete information" refers to information which the agency cannot obtain because the overall costs of doing so are exorbitant. The term "unavailable information" refers to information which cannot be obtained because the means to obtain it are not known. If the incomplete information relevant to adverse impacts is essential to a reasoned choice among alternatives and the overall costs of obtaining it are not exorbitant, the agency must include the information in the EIS. The first paragraph and subsection (a) of the original regulation have been amended only insofar as the phrases "incomplete or unavailable information" (title of the original regulation) or "incomplete information" are substituted for synonymous phrases and the term "reasonably foreseeable" is added to modify "significant adverse impacts". These changes are made for consistency, clarity and readability.

Subsection (b) is amended to require federal agencies to include four items in an EIS if the information relevant to reasonably foreseeable significant adverse impacts remains unavailable because the overall costs of obtaining it are exorbitant or the means to obtain it are not known. The first step is disclosure of the fact that such information is incomplete or unavailable; that is, "a statement that such information is incomplete or unavailable". The second step is to discuss why this incomplete or unavailable information is relevant to the task of evaluating reasonably foreseeable significant adverse impacts; thus, "a statement of the relevance of the incomplete or unavailable information to evaluating reasonably foreseeable relevant to evaluating the reasonably foreseeable significant adverse impacts, impacts on the human environment". Fourth, the agency must use sound scientific methods to evaluate the potential impacts; or in the words of the regulation, "the agency's evaluation of such impacts based upon theoretical approaches or research methods generally accepted in the scientific community".

The regulation also makes clear that the reasonably foreseeable potential impacts which the agency must evaluate include those which have a low probability of occurrence but which would be expected to result in catastrophic consequences if they do occur. However, the regulation specifies that the analysis must be supported by credible scientific evidence, not based on pure conjecture, and be within the rule of reason.

Subsection (b) deletes two substantive requirements from the same subsection of the original regulation, promulgated in 1978. First, it eliminates the requirement for agencies to "weigh the need for the action against the risk and severity of possible adverse impacts were the action to proceed in the face of uncertainty" while in the process of preparing an EIS. The Council believes that the weighing of risks and benefits for the particular federal proposal at hand is properly done after completion of the entire NEPA process, and is reflected in the Record of Decision. Nothing, of course, prohibits a decisionmaker from withdrawing a proposal during the course of EIS preparation.

Second, the regulation eliminates the "worst case analysis" requirement. It does not, however, eliminate the requirement for federal agencies to evaluate the reasonably foreseeable significant adverse impacts of an action, even in the face of unavailable or incomplete information. Rather, it specifies that the evaluation must be carefully conducted, based upon credible scientific evidence, and must consider those reasonably foreseeable significant adverse impacts which are based upon scientific evidence. The requirement to disclose all credible scientific evidence extends to responsible opposing views which are supported by theoretical approaches or research methods generally accepted in the scientific community (in other words, credible scientific evidence).

The regulation also requires that analysis of impacts in the face of unavailable information be grounded in the "rule of reason". The "rule of reason" is basically a judicial device to ensure that common sense and reason are not lost in the rubric of regulation. The rule of reason has been cited in numerous NEPA cases for the proposition that, "An EIS need not discuss remote and highly speculative consequences. . . . This is consistent with the (CEQ) Council on Environmental Quality Guidelines and the frequently expressed view that adequacy of the content of the EIS should be determined through use of a rule of reason." *Trout Unlimited* v. *Morton*, 509 F.2d 1276, 1283 (9th Cir. 1974). In the seminal case which applied the rule of reason to the problem of unavailable information, the court stated that, "[NEPA's] requirement that the agency describe the anticipated environmental effects of a proposed action is subject to a rule of reason. The agency need not foresee the unforeseeable, but by the same token, neither can it avoid drafting an impact statement simply because describing the environmental effects of alternatives to particular agency action involves some degree of forecasting . . . 'The statute must be construed in the light of reason if it is not to demand what is, fairly speaking, not meaningfully possible . . .'" *Scientists' Institute for Public Information, Inc.* v. *Atomic Energy Commission*, 481 F.2d 1079, 1092 (D.C. 1973), citing *Calvert Cliffs' Coordinating Committee* v. *Atomic Energy Commission*, 449 F.2d 1109, 1114 (D.C. Cir. 1971). The Council's amendment supports and conforms with this direction.

The evaluation of impacts under § 1502.22 is an integral part of an EIS and should be treated in the same manner as those impacts normally analyzed in an EIS. The information included in the EIS to fulfill the requirements of § 1502.22 is properly a part of the "Environmental Consequences" section of the EIS (40 CFR 1502.16). As with other portions of the EIS, material substantiating the analysis fundamental to the evaluation of impacts may properly be included in an appendix to the EIS.

Comments and the Council's Response

Comment: CEQ does not make clear the fact that the first paragraph and paragraph (a) of 1502.22 would be eliminated in the proposed amendment. The preamble says nothing about radical changes in the research requirements of the existing regulation.

Response: The changes to the first paragraph and subsection (a) of the existing regulation in the proposed amendment were made primarily for the purpose of attempting to clarify and simplify the existing requirements. However, in response to a number of concerns regarding perceived changes in the legal requirements of these paragraphs, the Council has chosen to retain the original format of the regulation. The Council intends that the substitution of the phrase "incomplete or unavailable information" and "incomplete information" are taken from the title of the regulation itself, and are being inserted for the sake of consistency of terms and clarity.

Comment: The term "reasonable efforts" should be defined.

Response: The term "reasonable efforts" does not appear in the final regulation.

Comment: The proposed amendment drops the standard of "exorbitant costs"

[1] See, for example, *Scientists' Institute for Public Information, Inc. v. Atomic Energy Commission*, 481 F.2d 1079 (D.C. Cir. 1973).

VOL 51 ISS 80 AP 25 1986 UMI

and substitutes "overall costs." Substantively, the current standard should be retained. It is a purposefully high standard, intended to counter agencies' demonstrated reluctance to seek out information. The proposed standard is lax and undefined.

Response: The final regulation retains the original standard.

Comment: The term "state of the art" should be replaced with "the availability of adequate scientific or other analytical techniques or equipment".

Response: The term has been deleted in the final regulation, and the phrase "the means to obtain it are not known" is substituted. That phrase is meant to include circumstances in which the unavailable information cannot be obtained because adequate scientific knowledge, expertise, techniques or equipment do not exist.

Comment: The regulation should make clear that "overall costs" include, among other things, all economic costs and delays in timing. The "overall cost" requirement needs to be further defined to reflect items such as comparing low cost/high cost risk (and vice versa), costs of time in obtaining information, costs of delaying projects, benefit/cost ratio and outyear impact cost.

Response: CEQ intends that the term "overall costs" encompasses financial costs and other costs such as costs in terms of time (delay) and personnel. It does not intend that the phrase be interpreted as a requirement to weigh the cost of obtaining the information against the severity of the impacts, or to perform a cost-benefit analysis. Rather, it intends that the agency interpret "overall costs" in light of overall program needs.

Comment: The term "missing information" should be clarified or changed.

Response: The term "missing information" is deleted in the final regulation, and is replaced with the terms "incomplete or unavailable information" and "incomplete information". These terms are consistent with the title of the regulation.

Comment: The word "material" should be substituted for the word "significant" because the word "significant" is a term of art and incorporates consideration of controversy surrounding a proposal. The word "material" would be more appropriate.

Response: The final regulation retains the term "significant". "Significant" is indeed a term of art which connotes the type of environmental impact which the agency is obligated to analyze in an EIS. Consideration of controversy is one of many factors which must be considered in determining whether an impact is "significant"; others include the degree to which the proposed action affects public health or safety, unique characteristics of the geographic area such as wetlands, wild and scenic rivers, etc., the degree to which the possible effects on the human environment are highly uncertain or involve unique or unknown risks, the cumulative impacts of an action, whether the action may adversely affect an endangered species or critical habitat, the degree to which an action may adversely affect historic areas, and whether the proposed action would violate another federal, state or local environmental law. 40 CFR 1508.27. The 1978 CEQ regulations differed from the earlier CEQ Guidelines in stating that the fact of controversy does not, alone, require preparation of an EIS; rather, it is one of many factors which the responsible official must bear in mind in judging the context and intensity of the potential impacts.

Comment: The term "in its judgment" gives agencies the administrative discretion to limit the data needed to prepare an EIS. It gives too much discretionary authority to agency officials to decide if they need to obtain the information. Suggest deleting "in its judgment" or adding "and with the concurrence of appropriate federal or state resource agencies".

Related Comment: It is important to allow an agency discretion to determine the extent of the investigation required to obtain information.

Response: The term "in its judgment" is deleted from the final regulation. However, deletion of that phrase is not intended to change the discretion currently vested in the agencies to determine the extent of the investigation required to obtain information. The agency's discretion must be used to make judgments about cost and scientific availability of the information.

Comment: The proposed amendment's definition of "reasonably foreseeable" should be strengthened or clarified or the use of this phrase should be changed.

Response: The term "reasonably foreseeable" has a long history of use in the context of NEPA law, and is included elsewhere in the CEQ NEPA regulations. 40 CFR 1508.8(b). Generally, the term has been used to describe what kind of environmental impacts federal agencies must analyze in an EIS; for example, ". . . if the [agency] makes a good faith effort in the survey to describe the *reasonably foreseeable* environmental impact of the program, alternatives to the program and their *reasonably foreseeable* environmental impact, and the irreversible and irretrievable commitment of resources the program involves, we see no reason why the survey will not fully satisfy the requirements of [NEPA] section 102(C)." *Sierra Club* v. *Morton*, 379 F. Supp. 1254, 1259 (D. Col. 1974) (emphasis added). *See also, Town of Orangetown* v. *Gorsuch*, 718 F.2d 29, 34 (2d Cir. 1983); *NRDC* v. *NRC*, 685 F.2d 459, 476 (D.C. Cir. 1982). The term has also been used in the context of incomplete or unavailable information. *See Scientists' Institute for Public Information* v. *Atomic Energy Commission*, 481 F.2d 1079, 1092 (D.C. Cir. 1973).

Because of the controversy and nature of this particular regulation, CEQ has specified that in the context of 40 CFR 1502.22, the term "reasonably foreseeable" includes low probability/severe consequence impacts, provided that the analysis of such impacts is supported by credible scientific evidence, is not based on pure conjecture, and is within the rule of reason.

Comment: To prevent confusion, the proposed amendment should use either the term "credible scientific evidence" or "credible scientific support"—not both.

Response: The final regulation uses the term "credible scientific evidence" and deletes the term "credible scientific support".

Comment: The term "credible scientific evidence" should be defined. (A number of commentators offered specific suggestions for such a definition).

Response: The final regulation states that the agency's evaluation of impacts in the face of incomplete or unavailable information should be based upon theoretical approaches or research methods generally accepted in the scientific community. While this is admittedly a broad and general direction, CEQ is concerned that a narrow definition of "credible scientific evidence" would prove inappropriate in some circumstances, given the wide variety of actions which potentially fall under the auspices of this regulation. In many cases, the Council expects that "theoretical approaches or research methods generally accepted in the scientific community" will include commonly accepted professional practices such as literature searches and peer review.

Comment: The term "credible" should be deleted from the regulation, and all information should be considered.

Response: The definition of the word "credible" is, "capable of being believed". *Webster's II New Riverside University Dictionary*, 1984. Information which is unworthy of belief should not be included in an EIS.

Comment: The term "scientific" is overly restrictive since measurement of an action's environmental effects may be grounded in, among other things, economic, historical or sociological information.

Response: In an EIS, federal agencies are responsible for analysis of significant environmental effects which include "ecological, aesthetic, historic, cultural, economic, social, or health, whether direct, indirect, or cumulative." 40 CFR 1508.8(b). The requirement to analyze these potential impacts or effects are not modified in any manner by the qualified "scientific evidence" in 40 CFR 1502.22. Rather, the term "scientific" is meant to imply that the evidence presented about the possibility of a certain impact should be based upon methodological activity, discipline or study. *Webster's II New Riverside University Dictionary, 1984.*

Comment: The amendment should include some recognized scientific method for evaluating uncertainty, such as, perhaps, a risk assessment approach.

Response: Because of the wide variety of types of incomplete or unavailable information which may potentially fall within the scope of this regulation, CEQ does not choose to specify a particular methodology. Rather, each agency should select that approach which best meets the goals of evaluating potential impacts in the face of unavailable information. Further, a requirement that a particular methodology be utilized might be soon outdated by scientific developments in a particular field.

Comment: The draft preamble states that the summary of credible scientific evidence must include all information from all sources, including minority or opposing viewpoints. What are "minority views" as they relate to credible scientific evidence?

Response: The preamble to the proposed amendment states that the requirement to disclose all credible scientific evidence extends to those views which are generally regarded as "minority views" within the scientific community. The final preamble adopts the term "responsible opposing views" as the preferred term, consistent with 40 CFR 1502.9(b). The requirement to include responsible opposing views reflects the belief that many times, particularly when dealing with questions of incomplete or unavailable information, there will be more than one point of view about potential environmental impacts which has scientific credibility. The regulation requires an agency to include information about such views which have scientific credibility, rather than simply selecting one concept which supports its particular view. The responsible opposing views, must, of course, meet the criteria set out in subsection (b) of the regulation. Once such information is set out in the EIA, the agency must then use its own judgment and discretion to determine which viewpoint it believes is the most worthy of acceptance.

Comment: CEQ should indicate in the preamble that along with available scientific evidence, the views and conclusions of other government agencies and departments may be considered.

Response: The views and conclusion of other government agencies and departments are appropriately considered throughout the EIS process, beginning with the scoping process. Section 1502.22 does not limit involvement by other federal agencies in that process. Special attention should be paid to the views of those agencies with special expertise or jurisdiction by law in a particular field of inquiry. 40 CFR 1503.1(a)(1). The views of the public, and indeed all interested parties, are, of course also to be considered throughout the EIS process.

Comment: It should be made clear that the summary should be limited to credible scientific evidence only.

Response: This is precisely the requirement of the regulation itself. Again, credible scientific evidence includes both majority views and responsible opposing views, so long as these views meet the criteria in the regulation.

Comment: The regulation should require agencies to state the probability or improbability of the occurrence of the impacts which are identified.

Response: Although this requirement is not part of the final regulation, agencies are free to include this information in the EIS. The Council encourages the inclusion of such data when it is relatively reliable and when such information would help to put the analysis in perspective for the decisionmaker and other persons who read and comment on the EIS.

Comment: The fourth requirement, to include the agency's "evaluation" of the scientific evidence is vague. Presumably, what is meant is not a critique of the evidence, but an application of the evidence to predict impacts.

Response: The fourth requirement has been reworded so that it is clear that the agency is required to evaluate reasonably foreseeable significant adverse impacts which significantly affect the quality of the human environment.

Comment: There is no requirement for the agencies to analyze impacts—the basic purpose of the regulation.

Response: The fourth requirement clearly states a requirement for the agencies to evaluate the reasonably foreseeable significant adverse impacts.

Comment: The final amendment should require agencies to address high probability/low or chronic impacts, as well as low probability/catastrophic impacts.

Response: If there is a high probability of an impact occurring, an agency is probably not in the realm of incomplete or unavailable information; hence, the impacts would be analyzed under the ordinary requirements in the "Environmental consequences" section. This section includes the analysis of the environmental impacts of the proposal and the environmental impacts of alternatives to the proposed action. 40 CFR 1502.16.

Comment: The preamble to the draft amendment errs in asserting that case law has established a precedent to go beyond the rule of reason and it ignores subsequent Ninth Circuit case law which applies the rule of reason to find that agencies properly refused to prepare a worst case analysis.

Response: The Ninth Circuit decision referred to in this comment held that a worst case analysis was not required because the lead agency had obtained the information which it needed; thus there was no incomplete or unavailable information to trigger the worst case analysis requirement. *Friends of Endangered Species* v. *Jantzen*, 760 F.2d 976 (9th Cir. 1985).

Comment: The threshold triggering the agency's responsibility to comply with 40 CFR 1502.22(b) is actually the existance of incomplete or unavailable information. "Scientific credibility" is not a threshold, but rather a standard to be applied to the analysis once the duty to comply is triggered.

Response: This comment is correct.

Comment: The Council should make clear in the regulation itself that "scientific credibility" is the threshold which triggers the regulation.

Response: "Scientific credibility" is the criterion for the evidence which should be used to evaluate impacts in the face of incomplete or unavailable information. The trigger to comply with the regulation itself is incomplete or unavailable information.

Comment: If the phrase "worst case analysis" is unacceptable, the Council should consider replacing the term with

VOL 51 ISS 80 AP 25 1986 UMI

its functional equivalent, "spectrum of events".

Response: In the final regulation, a lead agency is required to evaluate "impacts". "Impacts" or "effects" (the two are synonymous under CEQ regulations) are the subject of analysis in an EIS, not "events". Indeed, the event to be anticipated is the proposed action itself.

Under the final regulation, agencies are required to evaluate impacts for which there is credible scientific evidence. In implementing this section, agencies will have to determine the appropriate range of analysis based on the unique facts of each particular proposal. In some cases, this may amount to a spectrum or range of impacts. In other cases, the scope of suggested impacts may be much more limited. Credible scientific evidence should determine the scope of the analysis, as opposed to a pre-determined number of impacts.

Comment: A careful reading of the case law reveals that neither the Ninth Circuit nor any other circuit has required worst case analysis in the absence of scientific opinion, evidence, and experience, as alleged in the draft preamble.

Response: Although CEQ was asked to consider this question by various persons who were concerned about the effect in future cases of possible interpretations of judicial decisions involving the worst case analysis requirement, CEQ has amended the regulation because it believes, based on further review, that the worst case analysis requirement is flawed, and the new requirements provide a better and more logical means of dealing with the analysis of impacts in the face of incomplete or unavailable information in an EIS.

Comment: Deletion of the worst case requirement will weaken environmental protection.

Response: This assertion is incorrect. The amended regulation establishes a better approach to dealing with the issue of incomplete and unavailable information in an EIS. It is a less sensational approach, but one which is a more careful and professional approach to the analysis of impacts in the face of incomplete or unavailable information. It should improve the quality of the EIS and the decision which follows, and, hence, strengthen environmental protection, in conformance with the purpose and goals of NEPA. 42 U.S.C. 4321, 4331. It will provide the public and the decisionmaker with an improved and more informed basis for the decision.

Comment: Before eliminating the term "worst case analysis", the Council should determine whether a worst case analysis is really impossible to prepare, or whether it is being resisted by agencies unwilling to learn because they do not want to admit the adverse impacts of their preferred programs.

Response: The Council does not maintain that a worst case analysis is impossible to prepare; however, it does view the worst case analysis requirement as a flawed technique to analyze impacts in the face of incomplete or unavailable information. The new requirement will provide more accurate and relevant information about reasonably foreseeable significant adverse impacts. To the extent that agencies were reluctant to discuss such impacts under the requirements of the original regulation, the amended regulation will not offer them an escape route.

Comment: The expressed need for clarification can be met by simply adding the "rule of reason" to the existing regulation.

Response: While the "rule of reason" is indeed added to the language of the regulation, CEQ believes that it is also important to amend the requirement to prepare a worst case analysis. The requirement that the analysis of impacts be based on credible scientific evidence is viewed as a specific component of the "rule of reason".

Comment: The proposal inappropriately removes the obligation to weigh the need for an action against its potential impacts.

Response: The regulation deletes this requirement because it is more properly accomplished at the conclusion of the entire NEPA process. A decisionmaker may, of course, decide to withdraw a proposal at any stage of the NEPA process for any reason, including the belief that the paucity of information undermines the wisdom of proceeding in the face of possibly severe impacts. However, such weighing and balancing in the middle of EIS preparation is a matter of policy, not law.

It is clear that, "one of the costs that must be weighed by decisionmakers is the cost of uncertainty—i.e., the costs of proceeding without more and better information." *Alaska v. Andrus*, 580 F.2d 465, 473 (D.C. Cir. 1978). However, that weighing takes place after completion of the EIS process, including the public comment process. Indeed, it would seem that the results of such a weighing process would naturally be more informed and wiser after the agency has completed the requirements of § 1502.22 to evaluate the potential impacts in the face of incomplete or unavailable information. After completion of the EIS process, the responsible decisionmaker must then weigh the costs of proceeding in the face of uncertainty, "and where the responsible decision-maker has decided that it is outweighed by the benefits of proceeding with the project without further delay . . ." he may proceed to do so. *Id.* Similarly, he or she may also decide, with the benefit of the best possible information, to delay the project until further information is obtained or to cancel the project altogether.

Comment: CEQ should provide additional guidance about the new regulation, and oversee and actively monitor its implementation.

Response: CEQ plans to provide additional guidance about the new regulation in the form of an amended question 20 of *Forty Most Asked Questions Concerning CEQ's National Environmental Policy Act Regulations.* CEQ also plans to actively monitor the implementation of the amended regulation, and evaluate its effectiveness after it has been implemented for a sufficient period of time to make a reasonable assessment.

Comment: It is unclear in which situations the new rule would apply, and what specific information it mandates. CEQ should apply the rule to actual or hypothetical situations and explain how the rule will apply and how the agencies' obligations differ under the new rule from those of the old. Request the Council provide such an analysis for particular fact patterns.

Response: CEQ plans to provide specific examples of the application of the rule to hypothetical situations in its guidance, following issuance of the final rule. The amended regulation will apply, of course, to the very same situations to which the original regulation applies; that is, the existence of incomplete or unavailable information related to significant adverse impacts on the human environment. The modifications to the regulation are designed to better articulate the precise requirements with which an agency must comply once it finds itself in this situation.

Comment: It is essential to mention the Committee of Scientists which was instrumental in development of the proposed regulation.

Response: The writer is probably referring to a proposed Advisory Committee on Worst Case Analysis, which would have included scientists. The Committee was never formed, and thus had no role in developing the amended regulation. Instead, the Council sought public comment through the process of asking questions in the Advance Notice of Proposed Rulemaking.

Comment: CEQ should state that this analysis is to be done only in conjunction with an EIS, as opposed to an environmental assessment.

Response: Section 1502.22 is part of the set of regulations which govern the EIS process, as opposed to the preparation of an environmental assessment. *It is only appropriate to require this level of analysis when an agency is preparing an EIS.* The type of analysis called for in § 1502.22 is clearly much more sophisticated and detailed than the scope of an environmental assessment. Environmental assessments should be concise public documents which *briefly* provide sufficient analysis for determining whether to prepare an EIS, and aid in an agency's compliance with NEPA when no EIS is necessary. "Since the EA [environmental assessment] is a concise document, it should not contain long descriptions or detailed data which the agency may have gathered". The Council's suggested page limit for environmental assessments are ten to fifteen pages. *Forty Most Asked Questions Concerning CEQ's National Environmental Policy Act Regulations,* Question 36a, 46 FR 18026, 18037 (1981).

Comment: CEQ should state clearly that the amendment is intended to repudiate and overrule the Ninth Circuit decisions on worst case analysis.

Response: The Ninth Circuit opinions are based on the requirements of former § 1502.22, or agency reflections thereof, and are inapplicable to this revision. The regulation is being amended to provide a better approach to the problem of analyzing environmental impacts in the face of incomplete or unavailable information. Because the requirements of the amended regulation are more clearly articulated and manageable than the "worst case analysis" requirement, CEQ expects that there will be less litigation based on § 1502.22 than the former version of § 1502.22 interpreted by the Ninth Circuit.

Comment: CEQ should withdraw the guidance contained in the 1981 publication, *Forty Most Asked Questions about CEQ's NEPA Regulations,* relating to worst case analysis.

Response: That guidance is withdrawn by this publication.

Comment: CEQ has not complied with its duties to assert its substantive powers over federal agencies to comply with NEPA, to coordinate programs, and to issue instructions to agencies, but has instead succumbed to pressure from defendant agencies and their attorneys to amend the regulation. Further, CEQ is collaterally estopped from overruling the Ninth Circuit decisions.

Response: CEQ manifests its oversight of the NEPA process in a number of ways on a daily basis; for example, review of agency NEPA procedures, resolving referrals of proposals of major federal actions, and assisting parties on an individual basis in resolving difficulties with the NEPA process. The requirements of the amended regulation are a more productive use of the agencies' resources than attempting to prepare a worst case analysis. Collateral estoppel is a doctrine by which a party may be barred from relitigating a question decided in a prior case. It does not bar an agency from changing a regulation that the courts have interpreted.

Comment: Agencies should be required to present an evaluation of the existing evidence of the most likely outcome.

Response: Step four of subsection (b) requires agencies to evaluate potential impacts. The lead agency may wish to specify which of the impacts are the most likely to occur, and the Council encourages inclusion of such data when it is reliable information which would be useful to the decisionmaker and the public.

Comment: Case law required worst case analysis prior to adoption of 40 CFR 1502.22.

Response: This assertion is incorrect. Case law prior to the adoption of 40 CFR 1502.22 *did* require agencies to make a "good faith effort . . . to describe the reasonably foreseeable environmental impact[s]" of the proposal and alternatives to the proposal in the face of incomplete or unavailable information, consistent with the "rule of reason". *Scientists' Institute for Public Information* v. *Atomic Energy Commission,* 481 F.2d 1079, 1092 (D.C. Cir. 1973). The "worst case analysis" requirement was a technique adopted by CEQ as a means of achieving the goals enunciated in such case law. The "worst case" requirement itself, however, was clearly a "major innovation". Comment, *New Rules for the NEPA Process: CEQ Establishes Uniform Procedures to Improve Implementation,* 9 Envt'l L.Rep. 10,005, 10,008 (1979). The U.S. Court of Appeals for the Fifth Circuit, interpreting the "worst case analysis" requirement for the first time in a litigation context, recognized that it was an innovation of CEQ. *Sierra Club* v. *Sigler,* 695 F.2d 957, 972 (5th Cir. 1983). CEQ has since observed difficulties with the technique of "worst case analysis" and is replacing it with a better approach to the problem of incomplete or unavailable information in an EIS.

List of Subjects in 40 CFR Part 1502

Environmental impact statements.

PART 1502—[Amended]

40 CFR Part 1502 is amended as follows:

1. The authority citation for Part 1502 continues to read:

Authority: NEPA, the Environmental Quality Improvement Act of 1970, as amended (42 U.S.C. 4371 *et seq.*), sec. 309 of the Clean Air Act, as amended (42 U.S.C. 7609), and E.O. 11514 (Mar. 5, 1970, as amended by E.O. 11991, May 24, 1977).

2. Section 1502.22 is revised to read as follows:

§ 1502.22 Incomplete or unavailable information.

When an agency is evaluating reasonably foreseeable significant adverse effects on the human environment in an environmental impact statement and there is incomplete or unavailable information, the agency shall always make clear that such information is lacking.

(a) If the incomplete information relevant to reasonably foreseeable significant adverse impacts is essential to a reasoned choice among alternatives and the overall costs of obtaining it are not exorbitant, the agency shall include the information in the environmental impact statement.

(b) If the information relevant to reasonably foreseeable significant adverse impacts cannot be obtained because the overall costs of obtaining it are exorbitant or the means to obtain it are not known, the agency shall include within the environmental impact statement: (1) A statement that such information is incomplete or unavailable; (2) a statement of the relevance of the incomplete or unavailable information to evaluating reasonably foreseeable significant adverse impacts on the human environment; (3) a summary of existing credible scientific evidence which is relevant to evaluating the reasonably foreseeable significant adverse impacts on the human environment, and (4) the agency's evaluation of such impacts based upon theoretical approaches or research methods generally accepted in the scientific community. For the purposes of this section, "reasonably foreseeable" includes impacts which have catastrophic consequences, even if their probability of occurrence is low, provided that the analysis of the impacts is supported by credible scientific evidence, is not based on pure

VOL 51 ISS 80 AP 25 1986 UMI

conjecture, and is within the rule of reason.

(c) The amended regulation will be applicable to all environmental impact statements for which a Notice of Intent (40 CFR 1508.22) is published in the Federal Register on or after May 27, 1986. For environmental impact statements in progress, agencies may choose to comply with the requirements of either the original or amended regulation.

Dated: April 21, 1986.

A. Alan Hill,

Chairman.

[FR Doc. 86-9270 Filed 4-24-86; 8:45 am]

BILLING CODE 3125-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

45 CFR Part 73

Standards of Conduct—Participation in Matters Affecting a Financial Interest—Exemption of Employment at One Campus of Certain Multi-Campus Colleges and Universities as a Restriction on the Review of a Funding Application from a Separate Campus by Special Government Employees

AGENCY: Department of Health and Human Services.

ACTION: Final rule.

SUMMARY: This Rule amends the Standards of Conduct regulations, 45 CFR 73.735–1004 by adding new paragraph (c) to exempt, in certain circumstances, faculty members of certain multi-campus colleges and universities, who serve as experts and consultants to the Department, from the prohibition against Federal employees participating in matters affecting the financial interest of the institution by which they are employed. Currently, experts and consultants performing services for the Department who are affiliated with multi-campus institutions of higher education are precluded from participating in matters which affect one campus within their university system even though they are employed at a separate campus. As authorized by 18 U.S.C. 208(b), the Secretary has determined that such an interest is too inconsequential and too remote to affect the integrity of the services performed for the Department by these individuals.

EFFECTIVE DATE: April 25, 1986.

FOR FURTHER INFORMATION CONTACT: Timothy M. White, Office of the General Counsel, Business and Administrative Law Division (202) 475–0153.

SUPPLEMENTARY INFORMATION: The Federal Conflict of Interest statutes, 18 U.S.C. 208, prohibit an officer or employee of the United States Government, including special government employees, from participating personally and substantially as a Government officer or employee in any contract, claim, controversy or other particular matter in which, to his knowledge, an organization in which he is serving as an officer or employee has a financial interest. As explained in the DHHS Standards of Conduct, 45 CFR 73.735–801 *et seq.*, the restrictions of section 208 require Government employees to be disqualified from participating as such in a matter of any type, the outcome of which will have a direct and predictable effect upon the financial interest covered by section 208.

Under the restrictions of 18 U.S.C. 208, some experts, consultants, and other temporary employees who are employed by a multi-campus college or university and who review applications for grants and contract proposals for the Department may be disqualified from reviewing an application or proposal from their employing institution even though they are employed at a separate campus and have no connection with the application other than that employment. The basis for disqualification is the financial interest of the institution in the application. Disqualification of these reviewers poses significant administrative burdens upon the Department, particularly considering the difficulty in recruiting experts in various fields to perform review functions. Furthermore, the Secretary has determined that any interest of an employee in a separate campus within a multi-campus institution would be too remote or too inconsequential to affect the integrity of the employee's review of an application for funding from a different campus of the multi-campus institution.

In an opinion dated February 12, 1982, the Office of Government Ethics (OGE) advised this Department: (1) Where a reviewer is an employee of a State institution of higher education, he or she may participate in the review of an application from another department or agency of the state, when the employing institution and the applicant agency are not part of the same organization for purposes of 18 U.S.C. 208; (2) if a State has established and provides funds to its institutions of higher education separately rather than through a system, those institutions are considered distinct from one another, as well as from the rest of State government; (3) because of the diversity among the states, no general rule can be formulated for the status, under section 208, of separate educational systems within a state or of individual institutions within a system. However, it may be determined that separate systems within a state, or separate institutions within a system, are not the same "organization" within the meaning of section 208(a). Furthermore, an agency may grant waivers under 208(b) if it takes into account such factors as the statutes establishing the university system or systems, the manner in which grants and contracts are sought (by institution or by system), the entity being reimbursed for the indirect costs of a grant or contract, and the entity accountable for the awarded funds. The OGE opinion noted, for example, that the University of Colorado and Colorado State University were separate institutions within that state and that the University of California, the California State Universities and Colleges, and the California Community Colleges were separate systems within that State.

Subsequent to the OGE opinion, we have determined that certain institutions are separate "organizations" within the meaning of 18 U.S.C. 208(a) so that a waiver is unnecessary. Those systems or institution are listed in subparagraph (c)(2). In addition, we have determined that other multi-campus institutions and systems are eligible for a waiver under 18 U.S.C. 208(b). Those systems and institutions are listed in subparagraph (c)(1).

18 U.S.C. 208(b) provides for a waiver of the disqualification in 18 U.S.C. 208(a) if the Secretary by general rule or regulation published in the Federal Register exempts the financial interest as being too remote or too inconsequential to affect the integrity of the services to be provided by the Government employee. In addition, section 208(b) provides for waivers on a case-by-case basis upon a written determination by the appointing Government official that the affected interest is not so substantial as to be deemed likely to affect the integrity of the employee's services to the Government.

This rule grants a waiver of the prohibitions of 18 U.S.C. 208(a), and of the Department regulations implementing that statute, where part-time intermittent employees responsible for the review of funding applications and contract proposals have an interest in a particular application or proposal which consists solely of employment as a faculty member at a campus of a multi-campus institution or system of higher education which is separate from the campus from which the application originated. This waiver is limited to the institutions and systems listed for which a determination has been made, based on information provided by the institutions, that because the campuses are sufficiently separate, the financial interest created by the employment at one campus is too remote or too inconsequential to affect the integrity of a part-time or intermittent Government employee's review of an application from another campus of the institution. Waivers of the restrictions of 18 U.S.C. 208(a) for those employees from multi-campus institutions which are not included on the list published with this rule may continue to be considered on a case-by-case basis.

The regulation also is amended to list those state institutions of higher education which are so separate (separate systems or separate individual institutions) that they are not within the same "organization" for purposes of 18 U.S.C. 208(a). Thus, no waiver is necessary for these institutions.

This rule pertains to internal personnel management and is exempt from the notice and comment procedures.

Economic Impact

The Secretary has determined that this is not a "major" regulation within Executive Order 12291.

Regulatory Flexibility Act

The Secretary has determined that this regulation will not have a significant economic impact on a substantial number of small entities because it affects only individual special government employees of the Department.

List of Subjects in 45 CFR Part 73

Standards of conduct, Experts, Consultants and advisory committee members.

PART 73—[AMENDED]

Section 73.735–1004 of Title 45 Code of Federal Regulations is amended by adding a new paragraph (c), as follows:

§ 73.735–1004 Requesting waivers or exemptions.

(a) * * *

(b) * * *

(c)(1) *Waiver for reviewers from certain multi-campus institutions.* Applicability of the prohibitions of 18 U.S.C. 208(a) and this subpart are hereby waived pursuant to a determination that the interest involved is too remote or too inconsequential to affect the integrity of a special Government employee's review of a funding application or contract proposal from one campus of one of the following multi-campus institutions, where the interest consists solely of employment as a faculty member (including Department Chairman) at a separate campus of the same multi-campus institution:

The University of Alabama system consisting of the University of Alabama, the University of Alabama in Birmingham, and the University of Alabama in Huntsville.

The campuses of the University of California.

The system consisting of Colorado State University, the University of Southern Colorado, and Fort Lewis College.

The Indiana University system consisting of eight universities on nine campuses, with the exception of the system-wide schools: the School of Business; the School of Dentistry; the School of Medicine; the School of Nursing; and the School of Public and Environmental Affairs.

The University of Nebraska system consisting of the University of Nebraska—Lincoln, the University of Nebraska at Omaha, and the University of Nebraska Medical Center.

The campuses of the State University of New York.

The Oregon system of higher education consisting of the University of Oregon, Oregon State University, Oregon Health Sciences University, Portland State University, Western Oregon State College, Southern Oregon State College, Eastern Oregon State College, and the Oregon Institute of Technology.

The campuses of the University of Tennessee.

The separate universities comprising the University of Texas System.

The separate universities comprising the University of Wisconsin System.

(2) *Institutions that are not subject to 18 U.S.C. 208(a) and the subpart, because they are not part of the same organization within the State.* The following State institutions and systems of higher education have been determined to be separate from each other to such a degree that no waiver is necessary in order to permit a faculty member (including Department Chairman) employed by one of the State institutions of higher education to review a funding application or contract proposal from another of the named institutions within that State:

The University of Alabama System and other Alabama State owned institutions of higher education.

The California Community Colleges, the California State Universities and Colleges, and the University of California.

The University of Colorado, Colorado State University, and other Colorado State owned institutions of higher education.

The University of Connecticut, Connecticut State University, the Connecticut Technical Colleges, and the Connecticut Community Colleges.

The University of Illinois, Illinois State University, Western Illinois University, Southern Illinois University, and the Illinois Community Colleges.

The Indiana University and the other Indiana State owned institutions of higher education.

BILLING CODE 4160-04-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 1

[MM Docket No. 85-41; RM-4864; FCC 86-117]

Educational Television Stations; Commercial and Noncommercial Channel Assignments

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This action amends the Commission's Rules to permit modification of licenses (and permits) to other channels within the same band pursuant to channel exchange agreements between commercial and noncommercial educational television stations upon a finding that the public interest will be served. The proposed exchanges will be considered in the context of rule making proceedings to amend the TV Table of Assignments. This action is taken in response to a petition filed by the permittees of noncommercial Channel *50 and commercial Channel 56 in Gary, Indiana.

EFFECTIVE DATE: May 23, 1986.

ADDRESS: Federal Communications Commission, Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Joel Rosenberg, Mass Media Bureau (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's Report and Order, MM Docket No. 85-41, adopted March 13, 1986, and released March 21, 1986.

The full texts of Commission decisions are available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, (202) 857-3800, 2100 M Street, NW., Suite 1440, Washington, DC 20037.

Summary of Report and Order

1. The Commission amends § 1.420 of its Rules by adding a new paragraph (h). This action provides a new procedure whereby the Commission may, upon finding that the public interest, convenience, and necessity will be advanced thereby, modify television licenses and permits and switch educational channel reservations in the course of rule making proceedings amending the Television Table of Assignments, § 73.606(b) of the Rules. Such modifications and reservations switches would be in response to joint petitions filed by commercial and noncommercial educational television licensees and permittees seeking to exchange channels within the same band (*i.e.* UHF for UHF and VHF for VHF) and in substantially the same market.

2. The instant proceeding was commenced in response to a proposal by the permittees of Channels *50 and 56 Gary, Indiana to exchange channels and to institute a procedure to do so without jeopardizing their authorizations. Under existing Commission assignment procedures, if, during rule making proceedings other parties express interest in applying for the channels being exchanged, the process generally is terminated, as petitioners decline to risk their current authorizations and withdraw their rule making requests. Thus, there is no competition for the channels in question, and potentially beneficial exchanges are not effectuated. Termination also means that Commission, petitioner, and public resources are wasted. Existing procedures can be abused by competitors who can cause the filing of interests to delay or block enhanced service. Further, when otherwise benefical requests are withdrawn, the opportunity for a more efficient utilization of the spectrum as provided for in section 307(b) of the Communications Act of 1934, as amended, is lost.

3. Many commenters expressing reservations about the new procedure focused on exchanges of VHF noncommercial channels for UHF commercial channels. While many of their objections to such inter-band exchanges may be significant in the context of specific proposals, they do not justify *per se* rejection of the new procedure insofar as it provides for intra-band (*i.e.* UHF-UHF and VHF-VHF) transactions. Thus, the Commission here addresses only intra-band exchanges.

4. The Commission concludes that intra-band exchanges are desirable because of the resulting benefits to participating stations and thereby to the public. Such benefits include the opportunity to move to a more favorable transmitter site, savings in operating costs, and financial advantages. Particular benefits which accrue to noncommercial educational stations include the consideration received from commercial stations as inducement to enter exchange agreements. Accordingly, the Commission here provides for individual rule making proceedings in which it will consider specific exchange proposals. Where the Commission determines that specific exchanges would provide sufficient public interest benefits, it will amend the Table of Assignments and modify the authorizations of petitioners pursuant to "show cause" procedures contained in section 316 of the Act.

5. Providing for channel exchanges and amendments to the Table of Assignments is consistent with recent Commission action encouraging its broadcast licensees to improve service to the public by enhancing their facilities. Channel exchanges will not eliminate educational reservations. Rather, they may facilitate the introduction of noncommercial educational service.

6. The Commission has legal authority to provide for commercial and noncommercial television channel exchanges. Section 316 contains statutory authority to modify authorizations where such action furthers the public interest. That section has often been used in response to licensee requests for modification to other channels, and the Commission's ability to act in the public interest does not depend on whether it acted of its own initiative or pursuant to a licensee petition. Since the channels which are subject to specific exchange proposals are occupied by petitioners, they are not otherwise available for application by others. Rather, they are available only to potential exchange partners. Since petitioners would withdraw in the face of other interest, other interested parties have no comparative application rights pursuant to section 309 of the Act, and the rule of *Ashbacker Radio Corp.* v. *F.C.C.*, 326 U.S. 327 (1945), does not apply here. Commercial-noncommercial channel exchanges are more akin to the situations before the Commission in *Mairite of New York, Inc.*, FCC 84-338, released July 31, 1984, and in *Storer Brodcasting* v. *F.C.C.*, 351 U.S. 192 (1956), where the opportunities to file competing applications were limited in order to advance public interest objectives. Further, subsequent "spirit of *Ashbacker*" cases are also inapplicable here, as the opportunity to apply for the affected channels is merely theoretical and does not offer the possibility for a wider selection of applicants to choose from.

7. The Commission initiated this proceeding to consider changes in its license modification policy. That policy, derived from principles espoused in *Cheyenne, Wyoming*, 62 F.C.C. 2d 63 (1976), and in *Ashbacker*, limited modifications to situations where no other interests were expressed. However, the Commission has never previously directly faced the issue in the context of channel exchanges. Its experience subsequent to *San Francisco and San Mateo, California*, 66 F.C.C. 2d 80 (1978), *recon. denied*, 45 R.R. 2d 233 (1979), in this area leads it to conclude that application of *Ashbacker* and its progeny to channel exchanges is inappropriate. The Commission also has the advantage of the comments in this proceeding regarding potential public interest benefits. Further, while not explicitly relying on it, the Commission believes that the policy underlying section 310(d) of the Act is analogous to that underlying the new procedure. That section was enacted to prohibit comparative consideration of third party interests in commercial license transfers and assignments.

8. In light of public television's unique service, a significant factor in the Commission's public interest determination in individual rule making proceedings will be the extent to which the noncommercial station will subsequently be able to continue to serve its audience in terms of both signal reach and quality. The Commission will not require that such a station share the proceeds received for the channel exchange with other noncommercial broadcast entities. The Commission is reluctant to reduce or eliminate incentives to otherwise beneficial exchanges, because viewers are arguably entitled to the full benefits of such transactions and because of practical problems where the consideration consists of assets other than cash. In light of the purpose underlying the new procedure, noncommercial petitioners are expected to provide assurances that proceeds will be devoted to broadcast operations. In order to maximize potential benefits to the public, the Commission will consider proposals involving separate communities. However, the new procedure will not apply where stations seek to change their communities of license. Because this procedure could enable permittees to acquire the resources to construct facilities and commence operations, it is available to permittees as well as licensees. In this regard, absent assurances that the consideration received by noncommercial permittees would be so utilized, it is unlikely that the Commission could find the requisite public interest benefits to warrant modifications and reservations switches. In individual rule making proceedings, the Commission will also assume that licensees are more familiar with the needs of their audiences and will, accordingly, give significant weight to the determinations of directors of public stations. The Commission recognizes that all petitioning parties have substantial incentives to reach exchange agreements serving the best interests of their audiences. However, opponents of specific proposals will be invited to comment fully on the extent to which petitioners bargained in good faith to benefit the public.

9. In light of this action, petitioners' request to bifurcate this proceeding by granting expedited consideration to its Gary proposal is moot. In this regard, the staff is instructed to prepare a *Notice of Proposed Rule Making* pertaining to the Gary channel exchange proposal.

10. Pursuant to the Regulatory Flexibility Act of 1980, 5 U.S.C. 604, a final regulatory flexibility analysis has been prepared. It is available for public viewing as part of the full text of this decision, which may be obtained from the Commission or its copy contractor.

11. The Rule contained herein has been analyzed with respect to the Paperwork Reduction Act of 1980 and found to contain no new or modified form, information collection and/or record keeping, labeling, disclosure, or record retention requirements and will not increase or decrease burden hours imposed on the public.

12. Accordingly, It Is Ordered, that Part I of the Commission's rules and regulations Is Amended, effective May 23, 1986.

List of Subjects in 47 CFR Part 1

Administrative practice and procedure.

Part 1 of Title 47 of the Code of Federal Regulations is amended as follows:

1. The authority citation for Part 1 continues to read as follows:

Authority: Sections 4 and 303, 48 Stat. 1066, as amended, 1082, as amended; 47 U.S.C. 154, 303. Interpret or apply Sections 301, 303, 307, 48 Stat. 1081, 1082, as amended, 1083, as amended, 47 U.S.C. 301, 303, 307. Other statutory and executive order provisions authorizing or interpreted or applied by specific sections are cited to text.

PART 1—[AMENDED]

2. Section 1.420(h) is added to read as follows:

§ 1.420 Additional Procedures in Proceedings for Amendment of the FM, Television or Air-Ground Table of Assignments.

* * * * *

(h) Where licensees (or permittees) of television broadcast stations jointly petition to amend § 73.606(b) and to exchange channels, and where one of the licensees (or permittees) operates on a commercial channel while the other operates on a reserved noncommercial educational channel within the same band, and the stations serve substantially the same market, then the Commission may amend § 73.606(b) and modify the licenses (or permits) of the petitioners to specify operation on the appropriate channels upon a finding that such action will promote the public interest, convenience, and necessity.

William J. Tricarico,

Secretary.

BILLING CODE 6712-01-M

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1011

Commission Organization; Delegations of Authority—Office of Public Assistance

AGENCY: Interstate Commerce Commission.

ACTION: Final rules: Delegations of authority.

SUMMARY: The purpose of this document is to revise the Commission's delegations of authority by redesignating the Office of Special Counsel as the Office of Public Assistance. In assisting the Commission and the public in determining the public interest, the new Office of Public Assistance will assume the responsibilities previously assigned to the Office of Special Counsel, the Small Business Assistance Office, and the State/Community Affairs Liaison position formerly in the Office of Legislation and Governmental Affairs. Because this rule change involves the internal organization and procedures of the Commission, it is issued in final form and public comment is not being requested.

VOL 51 ISS 80 AP 25 1986 UMI

EFFECTIVE DATE: April 25, 1986.

FOR FURTHER INFORMATION CONTACT:
Kathleen King, 202–275–0956
Samuel Ewer Eastman, Director and Special Counsel (Acting), 202–275–7411

SUPPLEMENTARY INFORMATION: This revised delegation of authority reflects the establishment of a new office which assumes the responsibilities previously assigned to the Office of Special Counsel, the Small Business Assistance Office, and the State/Community Affairs Liaison. The Office of Public Assistance will assist the Commission and the public in determining and representing the public interest, with regard to the Interstate Commerce Act and related statutes.

In particular, the Office will act as the focal point to coordinate Commission activities insuring: (1) That the public interest is fully developed in proceedings before the Commission; (2) that small and minority owned transportation entities, transportation related entities, consumer groups, small communities, carriers and shippers, and State regulatory officials are advised on the applicability and interpretation of the law, and the availability of assistance from the Commission, as this applies to their enterprise; and (3) that the Commission is advised on policy matters related to its small business assistance functions and programs.

Consistent with the limitations previously imposed on the Office of Special Counsel, the Office will participate formally in Commission proceedings only upon submission of a petition to do so and approval of the petition by a majority of the Commission.

This action will not have a significant effect on a substantial number of small entities because it involves only the internal organization and procedures of the Commission.

This action will not have a significant impact on the quality of the human environment or the conservation of energy resources.

It is ordered

The amendment set forth in the appendix is adopted, effective on the date of Federal Register publication.

List of Subjects in 49 CFR Part 1011

Administrative practice and procedure, Authority delegations (Government agencies), Organization and functions.

Decided: April 9, 1986.

By the Commission, Chairman Gradison, Vice Chairman Simmons, Commissioners Sterrett, Andre, and Lamboley. Vice Chairman Simmons would have retained the designation "Office of Special Counsel".

James H. Bayne,
Secretary.

Appendix

Part 1011 of Title 49 of the Code of Federal Regulations is amended to read as follows:

PART 1011—[AMENDED]

(1) The authority citation for Part 1011 is revised to read as follows:

Authority: 49 U.S.C. 10301, 10302, 10304, 10305, 10321; 31 U.S.C. 9701; 5 U.S.C. 553.

(2) Title 49 CFR 1011.8(a) is revised to read as follows:

§ 1011.8 Delegation of authority by the Interstate Commerce Commission to specific bureaus and offices of the Commission.

(a) *Office of Public Assistance.* (1) There is established an Office of Public Assistance. The Office assumes the functions previously assigned to the former Office of Special Counsel, the former Small Business Assistance Office, and the State/Community Affairs Liaison position formerly in the Office of Legislation and Governmental Affairs. (2) The Office shall be managed by a Director, who will also serve as Special Counsel of the Commission, and by a Deputy Director, who will also serve as the Small Business Assistance Officer of the Commission. The Special Counsel shall be appointed by the Chairman, subject to the approval of a majority of the Commission. (3) The mission of the Office will be to assist the Commission and the public in determining and representing the public interest, with regard to the Interstate Commerce Act and related statutes. The primary function of the Office is to act as the focal point to coordinate Commission activities insuring: (i) That the public interest is fully developed in proceedings before the Commission and especially to contribute to the development of a complete record in proceedings in which important aspects of the public interest otherwise would not be adequately explored, in particular, proceedings affecting the interests of bus passengers, household goods shippers, owner operators, and Class II and III rail carriers and the shippers they serve; (ii) that small and minority owned transportation entities, transportation related entities, consumer groups, small communities, carriers and shippers, and State regulatory officials are advised on the applicability and interpretation of the law, and the availability of assistance from the Commission as this applies to their enterprise; and (iii) that the Commission is advised on policy matters related to its small business assistance functions and programs. (4) The Office will participate as a party in Commission proceedings, including rulemaking proceedings, only upon submission of a petition to do so and approval of the petition by a majority of the Commission. (5) So that parties having need of the assistance of the Office will be adequately informed, the Office of Hearings is directed in noticing cases for public hearings, to advise parties of the availability of this program.

Proposed Rules

Federal Register
Vol. 51, No. 80
Friday, April 25, 1986

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Rural Electrification Administration

7 CFR Part 1701

[REA Bulletin 384–1]

Telephone Borrowers; Purchasing and Installing Central Office Equipment

AGENCY: Rural Electrification Administration, USDA.

ACTION: Proposed rule.

SUMMARY: REA proposes to amend Appendix A—REA Bulletins by issuing a supplementary to REA Bulletin 384–1, "Purchasing and Installing Central Office Equipment, in the form of a "File With" memorandum from the Administrator. The supplement will change the procedure for awarding competitive bids for central office equipment. At present, the award is made on the basis of bids which exclude the price of spare parts required for proper operation even though the bidders are required to show the price of the spare parts as an alternate and the purchaser almost always purchases the spare parts at the bid price. The proposed procedure would require that the cost of spare parts be included in calculating the price of the bid to be used in awarding the contract. This proposed action will impact REA borrowers and their consulting engineers as well as the manufacturers which bid on competitive contracts for central office equipment.

DATE: Public comments must be received by REA no later than June 24, 1986.

ADDRESS: Submit written comments to M. Wilson Magruder, Director, Telecommunications Engineering and Standards Division, Rural Electrification Administration, Room 2835, South Building, U.S. Department of Agriculture, Washington, DC 20250.

FOR FURTHER INFORMATION CONTACT:
Arthur H. Marthens, Chief, Central Office Equipment Branch, Telecommunications Engineering and Standards Division, Rural Electrification Administration, Washington, DC 20250, telephone (202) 382–8671. The Draft Impact Analysis describing the options considered in developing this proposed rule and the impact of implementing each option is available on request from the above office.

SUPPLEMENTARY INFORMATION: Pursuant to the Rural Electrification Act, as amended (7 U.S.C. 901 et seq.), REA proposes to amend Appendix A—REA Bulletins by issuing a supplement to REA Bulletin 384–1, Purchasing and Installing Central Office Equipment, in the form of a "File With" memorandum from the Administrator. This proposed action has been reviewed in accordance with Executive Order 12291, Federal Regulation. This action will not (1) have an annual effect on the economy of $100 million or more; (2) result in a major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions; (3) result in significant adverse effects on competition, employment, investment or productivity, innovation, or on the ability of the United States-based enterprises to compete with foreign-based enterprises in domestic or export markets and therefore has been determined to be "not major". This action does not fall within the scope of the Regulatory Flexibility Act. REA has concluded that promulgation of this rule would not represent a major Federal action significantly affecting the quality of the human environment under the National Environmental Policy act of 1969 (42 U.S.C. 432 *et seq.* (1976)) and, therefore does not require an environmental impact statement or an environmental assessment. This regulation contains no information or recordkeeping requirement which requires approval under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507 *et seq.*). This program is listed in the Catalog of Federal Domestic Assistance under No. 10.851, Rural Telephone Loans and Loan Guarantees and 10.852, Rural Telephone Bank Loans. For the reasons set forth in the Final Rule related Notice to 7 CFR 3015, Subpart V (50 FR 47034, November 14, 1985), this program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Copies of the document are available upon request from the address indicated above. Interested persons are invited to submit comments on this action. Written comments must be sent to the address stated above. All written submissions made pursuant to this action will be made available for public inspection during regular business hours at the above address.

Background

REA has issued a series of publications entitled "bulletins" which serve to implement the policy, procedures and requirements for administering its loan and loan guarantee programs and the security instruments which provide for and secure REA financing. REA Bulletin 384–1 sets forth the methods and procedures to be employed by REA telephone borrowers in purchasing and installing central office equipment with REA loan funds. REA is proposing to supplement Bulletin 384–1 in the form of a "File With" memorandum from the Administrator. The supplement will modify the procedure by which competitive bids are awarded so as to include, rather than exclude the cost of spare parts in awarding of the bid. At present, the award is made on the basis of bids which exclude the price of spare parts required for proper operation even though the bidders are required to show the price of the spare parts as an alternate. In most cases the REA borrower purchases the spare parts alternate. Under the existing procedures, it is possible for a supplier to bid low on the base price and bid high on the spare parts. The spare parts, for the most part, are essential for proper operation in the field and available only from the original supplier. As a result the bid may go to a supplier who has deliberately bid low, but the REA borrower has no choice but to pay for the spare parts. When the total price is compared to that from another supplier it is possible that the other supplier's total price is less than the successful bidder. The purpose of this action is to prevent this situation by awarding the bid on the basis of the total price, including spare parts. To include the price of the spare parts in the base bid, it becomes necessary to change procedure to quantify the number and type of spare parts to be furnished so that bids can be compared on a fair basis. REA proposes to classify

VOL 51 ISS 80 AP 25 1986 UMI

the spare parts by importance and then quantify the spare parts by classification. The proposed action should result in lower first costs for central office equipment for REA telephone borrowers.

List of Subjects in 7 CFR Part 1781

Loan programs—communications, Telecommunications, Telephone.

Dated: April 11, 1986.

Jack Van Mark,

Acting Administrator.

BILLING CODE 3410-15-M

DEPARTMENT OF ENERGY

10 CFR Part 762

Proposed Uranium Enrichment Services Criteria

AGENCY: Department of Energy.

ACTION: Proposed rule; Additional Information and Comment Period.

SUMMARY: The Department of Energy (DOE) is responding to requests for further analysis with respect to those provisions of the proposed uranium enrichment criteria which relate to (1) the "enrichment of foreign origin uranium" and (2) the "recovery of prior government costs." After careful consideration, DOE has determined that the analysis of the "enrichment of foreign origin uranium" provision in the preamble to the proposed criteria provides a clear and complete discussion of DOE's initial position. Accordingly, DOE has determined further analysis is unnecessary. However, DOE has determined additional analysis and information on issues related to "recovery of prior government costs" would be helpful in developing the rulemaking record on which DOE will make its final decision. In order to permit comments in light of this response, DOE is providing for an additional written comment period of thirty days.

DATES: Written comments must be submitted by May 27, 1986, to the address below.

ADDRESS: Mr. John P. Thereault, Office of Technology, Deployment and Strategic Planning, Office of Uranium Enrichment, Room A-172, Germantown, MD 20545.

FOR FURTHER INFORMATION CONTACT:

John Thereault, Office of Uranium Enrichment, U.S. Department of Energy, Washington, D.C. 20545, (301) 353-4610

Lawrence Leiken, Office of General Counsel, U.S. Department of Energy, Washington, D.C. 20585, (202) 252-6975

Ben McRae, Office of General Counsel, U.S. Department of Energy, Washington, D.C. 20585, (202) 252-6667.

SUPPLEMENTARY INFORMATION:

I. Introduction

On January 29, 1986, DOE proposed several revisions to its Uranium Enrichment Services Criteria (51 FR 3624). DOE requested written comments on this proposal by February 28, 1986, and provided for a public hearing was held on March 18, 1986.

Among the written comments received were requests for additional analysis and information regarding two provisions of the proposed criteria. These provisions are (1) the "enrichment of foreign origin uranium" and (2) the "recovery of prior government costs." These comments also requested an opportunity to submit written comments on that information. On March 12, 1986, DOE indicated that it was in the process of considering these requests (51 FR 8509).

With respect to the "enrichment of foreign origin uranium, the preamble to the proposed criteria describes DOE's position in great detail. In brief, the Atomic Energy Act requires DOE to impose restrictions on the enrichment of foreign origin uranium "to the extent necessary to assure the maintenance of a viable domestic industry." However, in the current and foreseeable marketplace, no restrictions on the enrichment of foreign uranium would, in fact, "assure the maintenance of a viable domestic uranium industry." The plain language of the statute makes clear the restrictions are not to be imposed for their own sake. Rather, DOE has a duty to determine whether their imposition would achieve the statutory objective of assuring the viability of the domestic industry. And, when DOE determines imposition would have a meaningless or counterproductive effect on this objective, DOE should not, and indeed, cannot impose restrictions.

While the Secretary of Energy has determined the domestic mining and milling industry was not viable in 1984, this determination does not authorize or require import restrictions. Such restrictions could not assist the industry in any meaningful way and certainly could not assure its viability. The difficulties currently facing the domestic mining and milling industry stem from a number of factors, none of which would be influenced by import restrictions. Indeed, import restrictions would have no long term positive effect on the consumption of domestic uranium. DOE cannot force enrichment customers to use domestic uranium when it is not in their economic self-interest to do so. To the extent domestic uranium is not competitive with foreign uranium, import restrictions would cause enrichment customers to seek enrichment services abroad. At best, restrictions could result in a very short-term increase in consumption of domestic uranium and, most likely, would have a detrimental effect on the industry.[1]

After reviewing the full discussion on import restrictions in the preamble to the proposed criteria, DOE has determined that the discussion provides a full and complete analysis of DOE's initial position on this issue. As such, interested persons have a more than sufficient basis on which to comment. Accordingly, DOE does not find it necessary to provide additional information on import restrictions.

With respect to the "recovery of prior government costs" a review of the comments on this subject reveals considerable disagreement over the calculation of unrecovered costs. Some commentators have criticized DOE for indicating an excessive amount of unrecovered costs, while others have asserted DOE understated significantly the correct amount of unrecovered costs. In view of these comments, and the fact that pricing for separative work, cost recovery, and cost accounting (including allocation of costs) are interrelated, DOE has determined it would be useful to describe more completely its analysis of these subjects as it relates to the recovery of government costs and their calculation. Accordingly, this Notice sets forth (1) the analytical framework in which DOE considers unrecovered costs and (2) the methodology DOE followed to derive the specific amounts of unrecovered costs described in the preamble to the proposed criteria.

II. Analytical Framework Concerning Pricing for Separative Work, Cost Recovery, and Cost Allocation

DOE's framework for consideration of pricing, cost recovery, and cost allocation issues is its analysis of what the Atomic Energy Act requires. That statute's guidance to DOE in providing

[1] DOE's position is in accord with that of the United States Trade Representative. In his December 24, 1985 response to the Secretary, the Trade Representative rejected import restriction because any relief "would only be short term * * * without resolving the long-term problems of the industry."

enrichment services is set forth in section 161(v), which does not explicitly address cost recovery (let alone "full" cost recovery), cost allocation, or indeed disposition of revenues stemming from toll enrichment services. Section 161(v) does speak expressly to the pricing for separative work, but the entirety of its guidance is that prices "shall be established on a basis of recovery of the Government's costs over a reasonable period of time." In addition, section 161(v) requires DOE to implement this guidance through criteria such as those that are the subject of the current rulemaking.

Bringing meaning to these few words requires resort to the history of their development, as well as their implementation by DOE and its predecessor agencies. Briefly summarized, that history indicates that Congress has mandated, in broad terms, adherence to a cost-based policy in establishing charges for separative work in contrast to a policy intended to yield a profit. Furthermore, that history reveals that while actual costs have been the starting point for determining customer charges, DOE always has considered the extent to which actual costs have been incurred to provide enrichment services to customers and has found it appropriate in establishing charges to include only those actual costs which relate to providing services to customers. From their outset, the enrichment criteria have included a provision under which some, but not all, of plant capacity costs are allocated to customer charges.

The proposed criteria, which allocate only the actual costs of utilized plant capacity to establish charges for separative work, continue both of these traditional aspects of implementing section 161(v). They do so in a way that accurately reflects the current fiscal and operating circumstances of the enrichment program.

Consistent with the requirement of the 1970 amendment to the Atomic Energy Act that established the non-profit policy for establishing charges for enrichment services, DOE's proposed criteria establish charges on a basis of actual costs. The proposed criteria continue in the current factual setting the principle embodied in the original criteria of allocating to the charges for enrichment service only the costs of that part of plant capacity actually used to render enrichment services. In 1966, when the original criteria were first adopted, (31 FR 16479, Dec. 23, 1966), unused plant capacity was excluded under the "Conway formula." The only conceptual difference between the original criteria and the current approach is the absence in the current approach of a specific formula [2] under which unused capacity is excluded from establishing charges. The proposed criteria provide for establishing charges for commercial customers on a basis which recovers appropriate costs determined on a basis that includes the costs incurred in providing enrichment services to those customers.

DOE believes this approach makes common sense, is conceptually consistent with the way separative work has been priced since the beginning of the toll enrichment program, and is entirely consistent with the 1970 amendment to section 161(v) of the Atomic Energy Act. There the Congress rejected a proposal to charge for separative work based upon a hypothetical construct of phantom costs not actually experienced by the Government in providing enrichment services. That proposed policy was perceived by the Congress as a profit-oriented initiative. In the report that accompanied the 1970 legislation, the Joint Committee on Atomic Energy rejected establishing charges for enrichment services based on hypothetical costs. Indeed, the Committee repeatedly described DOE's proper function as established charges not on the basis of full actual costs but only on those of the actual costs that are "appropriate" for recovery from customers. Thus, the 1970 amendment required the pricing policy to be cost-oriented rather than profit-oriented and it required DOE, through the criteria, to determine which costs incurred by the Government were appropriate for recovery in establishing charges for separative work.

Establishing the basis for determining those costs that are "appropriate" for recovery in establishing charges for separative work is left by the Atomic Energy Act for DOE, through the criteria and its actions thereunder, to accomplish. This results necessarily from the approach of the Atomic Energy Act, which specifies resort to criteria and which otherwise is entirely silent on the method of capitalization of the program's assets, accounting procedures to be employed, and disposition of revenues. All of these factors are pertinent to the pricing of separative work, but under the scheme of the Atomic Energy Act are left to the criteria and annual authorization and appropriation acts to establish in detail.

Cash outlay for administering the enrichment program, including provision of toll enrichment services for commercial customers, are determined annually by appropriation acts. Typically, these acts appropriate specific sums for a specific fiscal year, including appropriation of the revenues anticipated to be received that year in connection with providing toll enrichment services. One way to determine whether, and to what extent, unrecovered costs exist would be simply to calculate the net appropriations made for this activity since the program began, by adding all uranium enrichment outlays and then subtracting from that amount the aggregate revenues received in charges for rendering enrichment services. This methodology provides a reasonable picture of how the program is operating on a day-to-day cash basis and, as such, has been used in discussions about the program, including discussions with Congressional Committees considering the amount of unrecovered Government costs. A cash basis methodology, however, does not reflect all costs. The principal dimension lacking in a cash basis method is the value of assets transferred to the program at its beginning (reflecting, of course, expenditures previously made by the Government), including undepreciated plant and equipment, together with interest accrued on that balance.

DOE's annual financial statements for the enrichment program have always reported on an accrual basis *all* cost incurred to provide enrichment services, not just those costs set forth in appropriation acts. Consistent with this approach, the initial annual financial statement used the costs of the transferred assets as the starting point for determining unrecouped Government costs since the Government as a whole sustained a cost in acquiring those assets.

Were the approach for determining appropriate costs to stop at the initial

[2] The formula itself does not appear in the statute and has never appeared in any version of the criteria. Rather, it is the product of a 1966 agreement between the Joint Committee on Atomic Energy and representatives of the Atomic Energy Commission. This history belies the contention the Conway formula is the only exception to "full" cost recovery under section 161(v). None of the discussions surrounding adoption of the Conway formula could have created an exception if section 161(v) required "full" cost recovery. Indeed, the Conway formula was lawful only because section 161(v) does not require full cost recovery. Adoption of the Conway formula confirms DOE's responsibility under section 161(v) to determine which costs are appropriate for recovery. See Uranium Enrichment Services Criteria and Related Matters, Hearings Before the Joint Committee on Atomic Energy, 89th Cong., 2d Sess. (August 2, 3, 4, 10 and 17, 1966) pgs. 32, 61-3. See also October 18, 1966, letter from Chairman Chet Holifield, Joint Committee on Atomic Energy, To Dr. Glenn T. Seaborg, and December 16, 1966, letter from Dr. Seaborg to Chairman Holifield. Both letters are reprinted in the 1966 Hearings at 517-519.

VOL 51 ISS 80 AP 25 1986 UMI

decision to include the cost of an item in the program's annual financial statement, the result would be more consistent with those commentators who have criticized DOE's proposal as understating unrecovered costs. Under such an approach, DOE would never reconsider the utilization of physical assets in behalf of commercial customers and depreciation on these assets would continue to be included in establishing charges whether or not the assets were being used to provide enrichment services. In effect, DOE would never review its determinations of what costs were properly "appropriate" for allocation to commercial customers through charges for separative work.

DOE did not adopt such an approach for several reasons, including DOE's view that the enrichment program historically has been affected by a public as well as a commercial interest, and even in an analogous public utility context ratepayers would not have included in their rate base the costs of assets that are not used and useful. Thus, DOE does not allocate to the costs to be used in establishing charges for separative work those costs associated with unused capacity, including investment associated with a capacity increment that was terminated before being brought on line in commercial production.

DOE believes this approach most fairly accommodates the various objectives of the Atomic Energy Act as a whole, including the governmental as well as the proprietary aspects of the enrichment program itself. It is also an approach that corresponds to, as closely as this Government-financed program can, cost accounting principles that are generally recognized and applied in other major commercial enterprises.

In considering the preceding analysis, it must be kept in mind that determining what costs are appropriate for recovery does not, standing alone, establish prices for separative work. Charges for separative work necessarily include estimates of future costs and judgments about what is the "reasonable period of time" under which those costs should be recovered, as well as consideration of the public interest and other objectives of the Atomic Energy Act. Necessarily they are subject to revision in light of actual experience, including the actual marketplace in which sales of separative work must and will occur in the future.

Finally, it is worth noting that section 161(v) does not indicate what form the disposition of revenues should take. During this period of budget deficits, DOE believes it proper for the disposition of revenues to take the form of payments to the U.S. Treasury and described a proposed payment schedule in the preamble to the proposed criteria. In this regard, DOE is aware that the Consolidated Omnibus Budget Reconciliation Act (COBRA) of 1985 established payment goals of $110 million for FY 1986, $150 million for FY 1987, and $150 million for FY 1987. Recognizing the interrelationship between pricing, cost recovery, disposition of revenue, and payments to the U.S. Treasury, the Conference Report on COBRA found that "maximizing repayments in the next three years may impair the financial integrity of the program in the longer term" and indicated that any payment schedule must be consistent with the financial integrity of the program, as well as reliability of supplies at competitive prices. In achieving the proper balance, the Report urged DOE "to consider a variety of factors . . ., including the appropriate price and market share, the impact upon existing enrichment facilities and other program expenditures, the impact upon research and development of advanced technologies for additional capacity, and the deficit reduction goals."

III. Unrecovered Government Costs

In the preamble to the proposed criteria, DOE stated there was $3,394 million[3] of prior unrecovered Government costs which should be considered in establishing charges for commercial customers. This amount is based on application of the approach discussed in the preceding section to the categories of costs listed in the existing criteria and the annual financial statements published in connection with the operation of the enrichment program.

A. Costs Listed in the Criteria

The criteria list those categories of costs which DOE considers for recovery. These costs include expenses incurred in providing enrichment services to customers, as follows:

(1) Electric power and all other costs, direct, and indirect, of operating the enrichment plants; (2) depreciation of enrichment plants; (3) costs of process development; (4) costs of DOE administration and other Government support functions; and (5) imputed interest on investment in plant, working capital, the natural uranium contained in those inventories at the DOE enrichment plants needed to provide enrichment services, and the separative work costs of preproduced inventories.

To the extent DOE determines a cost, which falls within one of these categories, is appropriate for recovery, the cost is used in establishing the charges for enrichment services. The unrecovered portion of such a cost is reflected in the annual financial statements as (1) inventory of separative work units (SWU), (2) undepreciated plant and equipment, (3) miscellaneous assets or (4) cumulative loss (or profit). SWU inventories include those costs which were incurred to preproduce enriched material which has not yet been sold. Plant and equipment includes those costs which were incurred to acquire processing facilities to the extent those costs have not been included as depreciation in the annual financial statements. Miscellaneous assets consist primarily of working capital items, along with other enrichment assets. Cumulative loss (or profit) includes all costs which have been expensed to the extent revenue has not (or has) exceeded these costs. Each of these items includes a component for imputed interest.

B. Financial Statement

1. Initial Assets

The first published financial statement included about $1.500 million of unrecovered Government costs. These costs represented the value of the assets which were transferred to the enrichment program at its inception, adjusted to reflect prior cost recognitions and the fact that these assets had originally been acquired for military purposes.

Specifically, the initial unrecovered government costs were:

	Thousands of dollars
Separative work inventories	$313,170
Plant and equipment	1,064,035
Other assets	110,590
Cumulative loss	2,775
Amount to be recovered	$1,490,570

Separative work inventories as of June 30, 1970, amounted to 15,962,000 SWU's. These inventories were produced in anticipation of higher future requirements for enrichment services. The $313 million value of this inventory reflects the cost of producing the inventory. The values established for the opening balances as of June 30, 1970, were based on accumulated costs and revenues since the start of preproduction of separative work in May 1964. Because of the varying judgments that could be used in establishing such values, computations were made using alternative accounting and economic methods in order to test the validity of the amounts established for these accounts. The results of these computations led to the conclusion that the valuation methods selected were appropriate and the amounts as of June 30, 1970, were fairly represented. The inclusion of the costs associated with the inventory was appropriate because the inventory was needed to provide enrichment services after 1970.

The plant and equipment balance of $1,064 million consisted of the undepreciated balance of the three gaseous diffusion plants (GDP). These plants were built to meet military needs at a cost of $2,044 million. The Department established a depreciation policy to expense the GDP costs over the service life of the individual components of each plant on a straight line basis. By the end of FY 1970, $996 million had been depreciated leaving a balance of $1,059 million. Construction work in progress amounted to $5 million.

After extensive discussions and hearings before the Joint Committee on Atomic Energy, it was determined it would not be appropriate to use the full undepreciated value of the GDP in establishing charges for customers after 1970 since considerable excess capacity existed. As a result, the portion of depreciation and interest on plant investment applicable to plants in standby status was not included in establishing customer charges and excess capacity was excluded as long as the percentage of plant used was less than 75 percent of the total capacity. This methodology was commonly referred to as the "Conway formula."

Other assets consisted primarily of working capital items, along with other miscellaneous enrichment assets. The accumulated loss of $3 million reflected the results of enrichment operations through FY 1970. The loss was carried over for recovery in the future.

2. Changes in Plant and Equipment

The costs of plant and equipment are recovered through the inclusion of an appropriate amount of depreciation in the enrichment program's annual financial statements. DOE has consistently used the straight line method of depreciation over established service lives for this purpose. The included depreciation, along with other costs, serves as the basis for establishing customer charges for enrichment services.

As a result of depreciation, the value of the initial plant and equipment has declined for purposes of calculating unrecovered government cost. At the same time, the program has invested in new plant and equipment. This investment initially increased the amount of unrecovered government costs. As with the initial unrecovered plant and equipment costs, this investment becomes less as it is recovered by means of depreciation.

3. Research and Development

The research and development costs used in establishing enrichment charges are limited to those research and development costs directly related to providing future enrichment services. All such costs relating to the diffusion process have been included. Centrifuge related costs were included beginning in FY 1975 when it was determined this research and development program was being conducted exclusively for potential production applications. Costs prior to FY 1975 have been excluded. The centrifuge related costs were eliminated as of June 5, 1986. A similar determination was made to include the advanced isotope separation R&D costs beginning in FY 1978. All Atomic Vapor Laser Isotope Separation ("AVLIS") costs prior to FY 1978 were excluded. Costs relating to the Molecular Laser Isotope Separation and Plasma Separation Process were dropped in FY 1982 when the AVLIS process was selected over the other two for enrichment purposes.

4. Interest

Since the beginning of the program, interest has accrued on unrecovered costs and has been reported in the annual financial statements. Through FY 1985, the imputed interest on these costs reported in the financial statements amounted to about $4,600 million.

Imputing interest is proper since the Federal Government incurs significant interest costs in financing its debt. Since this debt is the basis of the Government's investment in the enrichment program, interest should be imputed on the unrecovered portion of that investment. Through FY 1985, interest was imputed at a rate based on the previous year's average rate for outstanding marketable securities of the U.S. Treasury. Beginning in FY 1986, DOE is proposing to use a fixed rate of 6.319 percent (the average of prior Treasury rates used) to impute interest on existing unrecovered costs.

5. Current Unrecovered Government Costs

The following is a tabulation of unrecovered Government costs.

Unrecovered Government Investment as of September 30, 1985

[Dollars in millions]

Inventories:		
Separative Work	$1,663	
Uranium	404	$2,067
Plant and Equipment:		
Gas Centrifuge Enrichment Plant	2,589	
Gaseous Diffusion Plants	1,970	
Atomic Vapor Laser Isotope Separation	33	
Imputed Interest	171	4,772
Other Balance Sheet Items		49
Cumulative Loss from Operations		295
Subtotal		[1] 7,183
LESS: Loss on Capital Investment:		
Gas Centrifuge Enrichment Plant	2,580	
Gaseous Diffusion Plants	1,200	[1] 3,780
Unrecovered Government Investment		$3,394

[1] These amounts do not include imputed interest after the effective date of recognizing a loss on capital investment. If the imputed interest were included from the effective date to September 30, 1985, imputed interest of $303 million would be added, changing these amounts to $7,484 and $4,083 million, respectively. In either event, the $3,394 million represents the unrecovered Government investment.

In the preamble to the proposed criteria, DOE announced a reduction in the amount of plant and equipment costs to be recovered to reflect the fact these assets are not being used to provide enrichment services to customers. The amount of this reduction is equivalent to 60 percent of the value of the Gaseous Diffusion Plants (GDP) that is no longer an earning asset, and the entire value of the Gas Centrifuge Enrichment Plant (GCEP) which never was and never will be an earning asset. DOE believes this reduction is proper. Customers should pay a price which reflects only the actual costs of providing enrichment services. The costs of items which are not, and most likely will not, be used in providing enrichment services to current customers are not appropriate for recovery. DOE has determined that none of the GCEP and only forty percent of the GDP's are used to provide enrichment services. Accordingly, only the costs associated with the utilized 40 percent of the GDP's are appropriate Government costs to be recovered over a reasonable period of time. As a result of this reduction, the amount of unrecovered government costs appropriate for inclusion in establishing customer charges is $3,394 million.

[3] The preamble contained a figure of $3,457 million based on a preliminary draft of the 1985 financial statement for the enrichment program. The figures in this Notice are slightly different than those which appear in the preamble to the proposed criteria because DOE has refined the numbers which will be set forth in the program's annual financial statement for 1985.

6. Treatment of Government Transactions

DOE provides a portion of its production to meet U.S. Government requirements for enrichment services. The cost recovery computations have been structured so that the costs of providing enrichment services are allocated to commercial customers and to government users on the same basis.

In the annual financial statements and cost recovery calculations, all costs are recognized. These total costs are offset by revenues. Since unrecovered Government costs result when costs exceed revenues, equitable allocation requires all customers be treated as paying the same price for enrichment services. For commercial customers, revenues are determined from sales invoices. For Government deliveries, revenues are imputed at prices equal to those charge commercial customers. This practice has been consistently followed and reported in the annual financial statements since the beginning of the program. Therefore, the costs of providing enrichment services are allocated proportionally to all customers.*

The treatment of Government and commercial revenues in the Federal budget process has varied over the years. However, the treatment of revenues and outlays in the budget process has never been the basis for determining the amount of unrecovered government costs. A review of the treatment of revenues and outlays in the budget process demonstrates the problems with using a budget or cash basis method of determining unrecovered Government costs. All the cash costs of providing enrichment services to commercial and Government users have always been included in the uranium enrichment budget. The treatment of revenues, however, has varied. Prior to FY 1980, commercial revenues were not used in annual Appropriations Act as direct offsets to uranium enrichment budget costs. From FY 1980 through FY 1986 commercial revenues were used as direct offsets to enrichment costs to arrive at a net enrichment appropriation amount. Through FY 1982 there were no Government revenues included in the budget process. A change was made in FY 1983 when revenues were included for Government deliveries for the first time. The revenues were calculated using the commercial price less the depreciation and imputed cost components. These cost components were not included because these non-cash costs are not included in the enrichment budget.

Issued in Washington, D.C., on April 21, 1986.

James W. Vaughan, Jr.,

Acting Assistant Secretary for Nuclear Energy.

BILLING CODE 6450-01-M

* A change was made in FY 1986 which should result in a more precise allocation. Beginning in FY 1986, the cost of high assay enrichment production was separated and separate prices were developed for high and low assay production. The FY 1986 Government revenue includes amounts to reflect the separate high and low assay prices. The high assay price is considerably higher than the low assay price because of the less efficient equipment used in producing high assay material, and the additional safeguard, security, and environmental protection costs associated with higher enrichments. Since the Government is the primary user of high assay production, this change has resulted in increased costs being transferred to the Government users. DOE has not made this high and low assay adjustment retroactively because of the lack of cost data to make a defined cost allocation in prior years, and because the estimated impact of this adjustment is small (only $10 to $15 million per year). This FY 1986 change will be reflected in the FY 1986 financial statements.

DEPARTMENT OF THE TREASURY

Customs Service

19 CFR Part 111

Proposed Customs Regulations Amendment Relating to Customs Broker Examinations

AGENCY: Customs Service, Department of the Treasury.

ACTION: Proposed rule.

SUMMARY: Customs currently gives an examination to those wishing to become licensed Customs brokers twice per year. The administration of these exams is proving to be a burden on the limited resources of Customs. In order to maintain the high standards of the exam and pass only those capable of rendering valuable information and services to their clients, Customs is proposing to reduce the number of times the exam is given to once per year.

DATE: Comments must be received on or before June 24, 1986.

ADDRESS: Comments (preferably in triplicate) may be submitted to and inspected at the Regulations Control Branch, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: George Pinto, Duty Assessment Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229 (202-566-2654).

SUPPLEMENTARY INFORMATION:

Background

Part 111, Customs Regulations (19 CFR Part 111), sets forth the general provisions as well as specific procedures relating to Customs brokers, that is, individuals, partnerships, associations, or corporations licensed to transact Customs business on behalf of others. In particular, § 111.13 contains the procedural aspects of the examination of applicants for individual brokers licenses.

Currently, pursuant to § 111.13(b), Customs gives two brokers exams per year, in April and October. The exams are prepared and graded in Customs Headquarters and are designed to test an applicant's knowledge of customs and related laws, regulations, and procedures, and his or her fitness to render valuable service to importers and exporters. Composing exam questions which are unambiguous and which comprehensively test an applicant's knowledge of the subject matter is a difficult and time consuming task. The work entailed in preparing and grading the exam is a serious drain on the limited resources of Customs.

There has been a continual increase in the number of applicants wishing to take the brokers exam each time that it is given. It has reached the point that Customs is concerned that the quality of the exam will suffer if we continue to give it twice yearly. Up to now, a high standard of quality has been maintained on the exam and it is generally recognized as a fair and thorough test of the qualifications of the applicant. It is with the goal of maintaining this high standard that Customs now proposes to amend § 111.13(b), Customs Regulations, to reduce the frequency of exams to once yearly. The proposed schedule provides for an exam every June. If the number of applicants continues to increase while the resources Customs can allocate to preparing and grading the exam fails to keep pace, Customs is concerned this would result in inadequate testing of an applicant's knowledge and consequently the granting of licenses to those who may not qualify to act for others in Customs matters.

Comments

Before adopting this proposal, consideration will be given to any written comments timely submitted to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Room 2426, Headquarters, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, DC 20229.

Regulatory Flexibility Act

Pursuant to the provisions of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, it is certified that, if adopted, the proposed amendment will not have a significant economic impact on a substantial number of small entities. Accordingly, it is not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Executive Order 12291

This document does not meet the criteria for a "major rule" as specified in § 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

Drafting Information

The principal author of this document was John E. Doyle, Regulations Control Branch, Office of Regulations and Rulings, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

BILLING CODE 4820-02-M

19 CFR Part 172

Reduction of Petitioning Time in Liquidated Damages Cases

AGENCY: Customs Service, Treasury.

ACTION: Proposed rule.

SUMMARY: This document proposes to amend the Customs Regulations to expedite the processing of cases in which liquidated damages have been assessed against a bond holder for violations of the Customs laws and regulations. The proposal would reduce the time in which petitions for relief from the payment of the liquidated damages may be filed with Customs in such cases from 60 days to 30 days from the date of mailing of the notice of the liquidated damages incurred. It would thus conform the administrative petitioning time in these cases to that which currently applies to seizure and forfeiture cases.

DATE: Comments must be received on or before June 24, 1986.

ADDRESS: Comments (preferably in triplicate) may be addressed to and inspected at the Regulations Control Branch, Room 2426, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: James Demb, Entry Procedures and Penalties Division, U.S. Customs Service, 1301 Constitution Avenue NW., Washington, DC 20229 (202-566-5746).

SUPPLEMENTARY INFORMATION:

Background

Section 172.2, Customs Regulations (19 CFR 172.2), provides procedures Customs uses when a petition for relief is not filed or payment is not made to Customs or arrangements made to pay by a party who is liable for the payment of liquidated damages assessed against a bond holder for violation of any of the conditions of the bond. Under this section, a 60-day period from the mailing date of the notice of liquidated damages incurred is allowed before any collection action is taken by Customs. Collection action may be temporarily withheld, however, if it appears that the party liable for the payment of liquidated damages is absent from the U.S. at the time the notice is received or for more than 30 days during the 60-day petitioning period.

Current § 172.12, Customs regulations (19 CFR 172.12), refers to the 60-day period for filing a petition for relief in liquidated damages cases and current § 172.33, Customs Regulations (19 CFR 172.33), provides for a similar 60-day period for filing supplemental petitions for relief, under certain specified conditions.

Similar 60-day filing periods formerly applied to petitions for relief filed in accord with the provisions of Parts 162 and 171, Customs regulations (19 CFR Parts 162, 171), which are concerned with cases involving the seizure of merchandise subject to forfeiture of fines and penalties incurred for violations of the Customs laws and regulations. Pursuant to T.D. 85-195, published in the Federal Register on December 10, 1985 (50 FR 50267), however, this 60-day petitioning period was reduced to 30 days. This was done to conform the Customs Regulations to changes made to the Tariff Act of 1930 (19 U.S.C. 1202 et seq.), with respect to the forfeiture and disposition of property seized by Customs. The petitioning period change was one of many changes to Parts 162 and 171, which resulted from certain provisions of the Comprehensive Crime Control Act of 1984 (Pub. L. 98-473) and the Tariff and Trade Act of 1984 (Pub. L. 98-573). It was expected that these changes would reduce Customs costs relating to the storage and upkeep of seized property and expedite the processing of penalty and forfeiture cases resulting from the seizure of the property.

At the time that the changes to Parts 162 and 171 were proposed, it was determined advisable not to include liquidated damages cases among those subject to the new 30-day petitioning period. It was believed that inasmuch as property is not being held by Customs in liquidated damages cases, the same urgency did not attach to these cases as it does to seizure and forfeiture cases. Since that time, however, it has been decided that liquidated damages cases should nevertheless be subject to a 30-day petitioning period in order to expedite the disposition of these cases, thereby saving Customs needed time and resources. It was also reasoned that having the same petitioning period for seizure, forfeiture, and liquidated damages cases would be easier to administer since it would preclude any confusion as to when the 30-day or the 60-day petitioning period would apply.

It is therefore proposed to amend §§ 172.2(a), 172.12(b), and 172.33 (a)(1) and (c)(2)(ii), Customs Regulations, to reduce the petitioning time in liquidated damages cases from 60 to 30 days. It is also proposed to amend § 172.2(b), to reduce from "more than 30 days" to "more than 20 days," the time during the 30-day petitioning period a party liable for the payment of liquidated damages must be absent from the U.S. in order for collection action on the case to be temporarily withheld by Customs.

It is also proposed to amend the heading and text of § 172.2(a), to provide that Customs will refer unsatisfied liquidated damages claims to the

UMI

VOL 51 ISS 80 AP 25 1986

Department of Justice rather than the U.S. Attorney. This direct referral would expedite the processing of these cases and the collection of liquidated damages.

Comments

Before adopting this proposal, consideration will be given to any written comments timely submitted to Customs. Comments submitted will be available for public inspection in accordance with the Freedom of Information Act (5 U.S.C. 552), § 1.4, Treasury Department Regulations (31 CFR 1.4), and § 103.11(b), Customs Regulations (19 CFR 103.11(b)), on regular business days between the hours of 9:00 a.m. and 4:30 p.m. at the Regulations Control Branch, Room 2426, Customs Headquarters, 1301 Constitution Avenue NW., Washington, DC 20229.

Regulatory Flexibility Act

Pursuant to the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 et seq.), it is certified that, if adopted, the proposed amendments will not have a significant economic impact on a substantial number of small entities. Accordingly, they are not subject to the regulatory analysis or other requirements of 5 U.S.C. 603 and 604.

Executive Order 12291

This document does not meet the criteria for a "major rule" as specified in section 1(b) of E.O. 12291. Accordingly, no regulatory impact analysis has been prepared.

Drafting Information

The principal author of this document was Susan Terranova, Regulations Control Branch, U.S. Customs Service. However, personnel from other Customs offices participated in its development.

Administrative practice and procedures, Liquidated damages.

Proposed Amendments

It is proposed to amend Part 172, Customs Regulations (19 CFR Part 172), as set forth below.

PART 172—LIQUIDATED DAMAGES

1. The authority citation for Part 172 would continue to read as follows:

Authority: 19 U.S.C. 66, 1623, 1624.

2. It is proposed to revise § 172.2 to read as follows:

§ 172.2 Failure to petition for relief.

(a) *Referral of claim to Department of Justice.* If any party liable for liquidated damages fails to petition for relief or to pay or make arrangements to pay the liquidated damages within 30 days from the date of mailing of the notice of the liquidated damages incurred, as provided in § 172.1, or within such additional time as may have been granted, the district director of Customs, after required collection action, shall refer the claim promptly to the Department of Justice.

(b) *Absence from the U.S.* If it appears that the parties liable for liquidated damages are absent from the U.S. or during the 30-day period referred to in paragraph (a) of this section were absent for more than 20 days, the district director may withhold such referral for a reasonable time unless other action is expressly authorized by the Commissioner of Customs.

3. It is proposed to revise § 172.12(b) to read as follows:

§ 172.12 Filing of petition for relief.

* * * * *

(b) *When filed.* A petition for relief shall be filed within 30 days from the date of mailing of the notice of the liability for liquidated damages incurred unless an extension of such period has been granted by the district director.

* * * * *

4. It is proposed to amend § 172.33 by revising paragraphs (a)(1) and (c)(2)(ii) to read as follows:

§ 172.33 Supplemental petitions for relief.

(a) *Time and place of filing.* If the interested parties are not satisfied with a decision of the district director or the Commissioner of Customs, a supplemental petition may be filed with the district director of Customs by the interested parties. Such a petition shall be filed either:

(1) Within 30 days from the date of notice to the petitioner of the decision from which further relief is requested if no effective period is prescribed in the decision; or

* * * * *

(c) * * *

* * * * *

(2) A second supplemental petition will not be considered except in one of the following circumstances:

* * * * *

(ii) If it is filed within 30 days following an administrative or judicial decision which reduces the loss of duties upon which the mitigated penalty amount was based; or

* * * * *

William von Raab,
Commissioner of Customs.
Approved: April 8, 1986.
Francis A. Keating, II,
Assistant Secretary of the Treasury.

Social Security Administration

20 CFR Parts 404 and 416

[Reg. Nos. 4 and 16]

Disability Insurance and Supplemental Security Income; Determinations of Disability—Compliance, Performance Standard Revisions, and Other Changes Involving Administrative Requirements and Procedures

AGENCY: Social Security Administration, HHS.

ACTION: Proposed rules.

SUMMARY: These proposed regulations for administering the disability determination function implement section 17 of Pub. L. 98-460 (the "Social Security Disability Benefits Reform Act of 1984") which provides measures to improve State compliance with Federal law by amending section 221 of the Social Security Act (the Act). Section 221 requires the Secretary to take definitive steps within specific time frames to either assure the compliance of State agencies with SSA regulations and other written guidelines or proceed to terminate their participation in the SSA-administered disability programs. The proposed regulations also make other changes to improve the disability determination process by revising State agency performance requirements, modifying our monitoring and technical and management assistance procedures, and by clarifying and updating certain administrative requirements.

DATE: We will consider comments if we receive them no later than June 24, 1986.

ADDRESSES: Send your written comments to the Commissioner of Social Security, Department of Health and Human Services, P.O. Box 1585, Baltimore, Maryland 21203, or deliver them to the Office of Regulations, Social Security Administration, 3-A-3 Operations Building, 6401 Security Boulevard, Baltimore, Maryland 21235 between 8:00 a.m. and 4:30 p.m. on regular business days. Comments received may be inspected during these same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Irving Darrow, Legal Assistant, Office of Regulations, Social Security Administration, 6401 Security Boulevard, Baltimore, Maryland 21235, telephone (301) 597-3409.

SUPPLEMENTARY INFORMATION: Prior to the Social Security Disability Amendments of 1980 (Pub. L. 96-265), the disability programs under title II and title XVI of the Social Security Act (the Act) were administered under a Federal-State contractual mechanism established under the 1954 Amendments to the Act. At that time, Congress specified that determinations of disability should be made by State agencies under agreement with the Secretary.

Under these agreements the State agencies, on behalf of the Secretary of Health and Human Services, made determinations of disability on the basis of standards and guides issued by us. We paid 100 percent of the costs incurred by the States in performing this function. The State agency function included obtaining medical and vocational evidence from the applicant and his or her medical treatment sources, and where necessary, arranging for one or more examinations of the applicant by specialists.

The 1980 Amendments to the Social Security Act—Pub. L. 96-265

In 1980, out of concern for uniform program administration, Congress enacted section 304 of the 1980 Amendments which increased our statutory authority to improve State performance by requiring the promulgation of regulations establishing standards of performance and administrative requirements and procedures for the States to follow to ensure effective and uniform administration of the disability programs. Section 304 also provided that beginning June 1981, disability determinations are to be made by the State in compliance with the newly prescribed standards unless it notifies us, in writing, that it no longer wishes to make the determinations. We are authorized to take over the disability determination function if we find that the State has failed to make determinations consistent with prescribed standards. Certain time frames, notice requirements and State agency employee protections were included in these provisions.

Congress was also concerned about the rapid growth of the disability programs that had occurred in the 1970's and the effectiveness of the continuing disability review process. Section 311 of the 1980 Amendments was aimed at improving administration by assuring that only those who meet the definition of disability in the law continue to receive benefits. The provision requires us to review the status of Social Security beneficiaries with nonpermanent disabilities at least once every 3 years, and those with permanent disabilities at less frequent intervals determined appropriate by the Secretary. A number of States expressed concern because our policy did not provide a medical improvement standard for these reviews, and refused to use prescribed standards for review. These States either implemented their own standards or stopped processing continuing disability review cases altogether.

We promulgated performance standards in regulations, effective June 1, 1981, requiring the State agencies which make disability determinations for use to meet standards in accuracy and processing time and other administrative and procedural areas.

The 1984 Amendments to the Social Security Act—Pub. L. 98-460, Section 17

Pub. L. 98-460 was enacted to promote order and uniformity in the disability programs. It maintains our commitment to treat disabled individuals fairly and humanely while fulfilling our obligation to administer the disability programs effectively. In addition to setting our the standards for the continuing disability review cases and providing statutory direction in several other areas, Pub. L. 98-460 included a temporary provision to ensure that we maintain uniform, national administration of the disability programs in the event of a State failing to make disability determinations in a manner consistent with regulations and other written guidelines.

The new statute sets out specific review standards and also requires us to either assure the compliance of States with the regulations and other written guidelines carrying out these standards or to proceed to terminate their participation (fully or partially) in the disability programs. We must follow prescribed steps and make a final determination as to a State's compliance within 16 weeks after information is received that a State may not be in substantial compliance with the regulations and other written guidelines; and assume all or part of a State agency's disability determination function not later than 180 days after a final determination that a State is not in substantial compliance with the regulations and other written guidelines.

The amendments also provide certain protections for State agency employees if a final determination is made by the Commissioner (or his or her designee) finding that a State is not in substantial compliance. We will give employees of the State agency (with some limited exceptions) who are capable of performing duties in the disability determination program preference over any other persons in filling positions for which they are qualified. We may exceed any applicable personnel ceilings and waive any applicable hiring restrictions in this regard. Also, to the extent feasible within the 180 day period after the final determination and in conjunction with the Secretary of Labor, we will assure the statutory protection of State agency employees whom we do not hire.

The amendments also place responsibility on us to assure that cases decided by a State agency when it was not in substantial compliance are decided in accordance with the regulations and other written guidelines.

Section 17 expires on December 31, 1987. Thereafter, it will no longer serve as the statutory basis for the regulatory provisisons which specifically implement it. Unless the provisions of section 17 are extended by Congress, we will prepare new regulations to take effect on January 1, 1988.

Proposed Regulatory Provisions

Definitions

We proposed to add a definition for "not in substantial compliance" (i.e., a State is not following our regulations and other written guidelines in processing disability claims and in carrying out the other responsibilities of the State described in the regulations) to §§ 404.1602 and 416.1002. Also, we have amended the definition of "other written guidelines" to include issuances (e.g., memoranda, program policy statements) by the Commissioner and/or Associate Commissioner for Disability. This expanded definition is intended to cover special situations where time limitations do not permit the promulgation of guidelines through the regular process. Such special issuances are of major importance to the disability program, for example, in carrying out court orders.

The Procedures for Determining When a State Is Not in Substantial Compliance With Our Regulations and Other Written Guidelines

When we receive information that a State may not be following our

VOL 51 ISS 80 AP 25 1986 UMI

regulations and other written guidelines, we will investigate the matter immediately and, within 21 days, make a preliminary finding as to whether the State is or is not in substantial compliance. If a State is notified of a preliminary finding that it is not in substantial compliance, it will have 21 days, from the date of the finding, to provide written assurance that the situation will be corrected.

If a State provides such assurance, we will monitor its performance for 30 days. Regardless of whether a State provides such assurance, we will make a final determination as to whether it is or is not in substantial compliance with our regulations and other written guidelines within 60 days of our preliminary finding (or within 90 days if we conduct a hearing).

Determining if a State Is Not in Substantial Compliance

Section 17 of Pub. L. 98-460 directs us to follow specific procedures within designated time frames before making a final determination that a State is not in substantial compliance with our regulations and other written guidelines. Generally, instances of a State not being in substantial compliance (whether intentional or not) will be readily apparent and correctible. For example: a State may not be applying the correct evaluation criteria to cases involving a certain body system. The situation is investigated, confirmed, and the State notified of the preliminary findings. If the State agrees to correct the deficiency, it is corrected and verified by monitoring, and the State is notified of the final determination of substantial compliance.

We may also find that a State is not in substantial compliance because it has failed to meet our performance standards. Generally, in these situations, the State agency is trying to follow the rules in making disability determinations but does not meet performance standards. Assistance by SSA to the State agency to bring its performance up to acceptable levels is appropriate. Therefore, before initiating the mandatory procedures (see §§ 404.1670(b) and 416.1070(b)) for determining if a State agency is in substantial compliance, we will provide the State agency with performance support. We will provide such support for up to 12 months if a State agency does not meet two of the three established threshold (minimum) performance standard levels (one of which must be the documentation/decision standard, formerly the accuracy standard) for two or more consecutive calendar quarters. Thereafter, we will give the State a 3-month adjustment period when we will not require the State to meet the performance standards.

After the 3-month adjustment period, if the State agency again falls below two of these threshold levels (one being the documentation/decision standard) in two consecutive calendar quarters during the next 12 months, we will begin a 21 day investigation of whether the State is in substantial compliance. Thereafter, we will follow the procedures resulting in a final determination as to whether the State is in substantial compliance.

Hearings

Under Pub. L. 98-460, a State may request a hearing on the matter of substantial compliance and we, at our discretion, may grant it. The State must make its request to the Commissioner of Social Security within 55 days of a preliminary finding that it is not in substantial compliance. If we grant a hearing, we will appoint a hearing officer. The hearing will begin no later than 70 days after the preliminary finding and the State has 3 working days to present evidence and arguments. The hearing officer will recommend a decision to the Commissioner no later than 90 days from the date of the preliminary finding. The recommendation will not be binding; however, it will be considered in reaching the final determination.

Protection of State Agency Employees

If we assume a State agency's disability determination function and we hire, we will give State agency employees (with certain exceptions) who are capable of performing duties in the disability determination function preference over any other persons in filling positions for which they are qualified. We will establish a system for determining the hiring priority among the affected State agency employees in those instances where we are not hiring all of them. State employees converted to Federal employees under this procedure will be new Federal employees subject to the same probationary requirements imposed on all new Federal employees.

Also, to the extent feasible within the 180-day takeover period, we will (in conjunction with the Secretary of Labor) assure the statutory protection of State agency employees not hired by us. In this regard, we will work with the Secretary of Labor to secure assurance from the State that it has made fair and equitable arrangements to protect the interests of displaced employees. Such arrangements include only those provisions which are provided under all applicable Federal, State, and local statutes. These include but are not limited to: (1) The preservation of rights, privileges, and benefits (including continuation of pension rights and benefits) under existing collective-bargaining agreements; (2) the continuation of collective-bargaining rights; (3) the assignment of affected employees to other jobs or to retraining programs; (4) the protection of individual employees against a worsening of their positions with respect to their employment; (5) the protection of health benefits and other fringe benefits; and (6) the provision of severance pay as may be necessary.

Cases Decided by a State Agency After a Final Determination That the State Is Not in Substantial Compliance

After a final determination and before we assume the disability determination function, we will take such action as may be necessary to assure that cases decided by a State agency are decided in accordance with applicable regulations and other written guidelines. We will determine whether the action is necessary in only certain classes of cases or in all cases processed by the State agency during the period.

Performance Standards

Under Pub. L. 98-265, we were required by Congress to promulgate regulations establishing whatever standards of performance were considered necessary for a State agency to follow to ensure effective and uniform administration of the disability programs. Effective and uniform administration must be measured in relationship to the processing of benefit determinations of those people who apply for disability benefits. Accordingly, accuracy of decision and processing time standards were established as the indicators of State agency performance. The objective of a processing time standard is to assure good public service. The objective of a performance standard for accuracy is to assure that decisions are rendered in accordance with regulations and other written guidelines. As in processing time, the purpose is to assure good public service.

Processing time and performance accuracy standards were first established by regulations implementing Pub. L. 98-265 in 1981, and were set at two levels: target and threshold. Only title II and title XVI disability determinations on initial claims were considered in assessing whether a standard was met. In determining

processing time, we considered title II initial processing time and title XVI initial processing time separately, and established separate performance standards. In determining accuracy, we considered title II and title XVI initial disability determinations together and established a single overall standard for performance.

Target levels were established as challenges designed to reflect what we believe to be an optimal level of performance and service delivery that we expect State agencies eventually to attain. We are not proposing to change these target levels from present levels:

Title II initial processing time	37 days
Title XVI initial processing time	43 days
Combined accuracy rate	97 percent

Under current regulations, threshold levels are established as the minimum aceptable levels for performance. Falling below these threshold levels requires appropriate action on our part to improve State agency performance. A State agency's continued failure to meet two of the three threshold levels (one of which is accuracy), after receiving assistance from us to improve performance, could be cause for us to assume partial or complete responsibility for performing the disability determination function, after certain procedural requirements are met.

Intermediate goals are performance goals set between the threshold and target levels for each individual State agency for the purpose of ensuring continued movement toward the targeted level. These intermediate goals are essential tools for the State agencies to improve their performance. We are amending §§ 404.1641(d) and 416.1041(d) to show that the SSA regional commissioners will also monitor specific national minimum intermediate processing time goals of 54.9 days for initial title II cases and 62.4 days for initial title XVI cases by December 31, 1987. This does not preclude the regions from setting lower intermediate processing time goals; but, it establishes a minimum intermediate goals for the State agencies to reach by December 31, 1987. This will establish reasonable and realistic intermediate processing time goals for State agencies to use to improve performance and focus on the importance of timely service to the public. In the event a State agency fails to meet these intermediate processing time goals, by December 31, 1987, performance will be reviewed jointly by us and the regional office and improvement plans implemented. We will furnish the support needed to improve the State's performance.

Processing Time Standards

The processing of a claim for disability benefits involves actions by both Social Security Administration operating components and the State agencies. The purpose of a processing time standard for the State agencies is to assure that the time required by the State agency to process cases is consistent with our objectives for service delivery and yet allow adequate time for the State agency to secure and evaluate pertinent medical and vocational evidence and make a determination of disability. This process requires the actions of many individuals ranging from routine clerical actions to sophisticated analysis by medical and vocational experts.

In establishing performance standards for processing time, we recognize that our constant effort to improve the program also affects the time required for the State agencies to make determinations. Changes in our evidentiary requirements (for example, in order to keep pace with modern medical and vocational technology) can increase the time required to secure and evaluate evidence. On the other hand, improvements in our procedures and systems enhancements may tend to decrease the time required. However, standards should reflect actual operating experience and changes in current operating realities. Therefore, we are proposing an increase in the processing time thresholds based on recent actual experience and the reasonable predictions of the expected operating environment for the time covered by this regulation.

When we established the current processing time standards, we fully expected that they would require revisions after we acquired some experience in applying them. The original processing time threshold standards were based on data for fiscal year 1979 and were set at 49.5 days for title II initial claims and 57.9 days for title XVI initial claims. Data for the period October 1983 through September 1984 indicate that State agencies' processing times have risen due, in part, to changes in systems, policies, and procedures.

We are now proposing to change the processing time threshold levels for initial title II claims to 59.3 days and the initial title XVI claims to 67.9 days. This increase in time should allow State agencies to better focus on the qualify and consistency of disability determinations, while at the same time, processing disability determinations with reasonable promptness.

In revising the processing time threshold standards, we have decided to continue to apply separate thresholds for title II initial disability determinations and title XVI intital disability determinations because there continues to be a difference in mean processing time between title II and title XVI disability cases. This is explained by the fact that processing times for title II and title XVI case are measured by two different and separate systems. For instances, unlike title II, title XVI State agency processing time can include additional time after the release of the case by the State agency. Specifically, title XVI processing time includes the time between the date of State agency decisional action and the date of updating the Supplemental Security Record. Further improvements in the measurement systems are being made and are expected to enable us to establish a single processing time standard for both types of cases in the future.

We are amending §§ 404.1642 and 416.1042 to establish the new processing time threshold levels.

Documentation/Decision Rate Standard (Formerly Accuracy Rate Standard)

The objective of a performance standard for quality is to assure that decisions are in accordance with regulations and other written guidelines. As in processing time, the purpose is to assure good public service.

As with the processing time threshold standards, when we established the performance accuracy threshold standard in the 1981 regulations, we also anticipated that the accuracy standard would need to be revised in the future after experience in applying it was gained.

Since that time, State agencies have generally improved their accuracy. The original performance accuracy standard was based on combined title II and title XVI initial accuracy data for fiscal year 1979, and the threshold was established at 90.6 percent.

In order to assure continued improved good public service and to emphasize the objective of accurate, well-documented decisions, we are revising the performance accuracy threshold from 90.6 percent on initial cases only to 93.0 percent on all decisions. The increased accuracy threshold and its measurement of all decisions carries out our emphasis on accurate, well-rationalized, and documented cases by providing a realistic challenge for the States that is an incentive for further improved performance. The increased threshold is more representative of

VOL 51 ISS 80 AP 25 1986 UMI

current State agency performance. Since 1979, State agencies have improved their accuracy which is in keeping with our mutual objective of producing quality disability determinations.

We are also proposing to change the term "performance accuracy standard" to "documentation/decision standard". SSA Regional Commissioners and State agency administrators have pointed to the need to clarify that our current accuracy standard cannot be equated solely with the accuracy of the final decision. In this regard we believe that the term "accuracy" may be misleading. What our proposed regulations provide is a much broader standard than decision accuracy in that it also measures the extent to which decisions are fully and consistently documented in accordance with our policy and procedural guidelines. This type of standard offers greater assurance of program uniformity and the correctness of the final decision since it also addresses the soundness and adequacy of the documentation on which the decision is based. The change in name to "documentation/decision standard" reflects this intent.

The national performance accuracy threshold of 93.0 percent was established using fiscal year 1984 State-by-State combined title II and title XVI performance accuracy rates for disability determinations at all levels of adjudication, i.e., initial, reconsideration and continuing disability review cases. However, data were limited on initial continuing disability reviews and reconsiderations of continuing disability reviews because of the April 1984 moratorium on such cases.

On the basis of experience, we have decided to retain a single documentation/decision standard for both title II and title XVI disability cases. There is no data to indicate variances in documentation/decision standards from one type of case to another. We have also decided not to limit the documentation/decision standard to initial cases but rather to revise it to an overall standard that will include reconsideration and continuing disability review cases. This will provide us with a more comprehensive indicator of performance.

If any change in the manner of measurement or revision to the definition of an error is made, we will evaluate the effect of the revision on the documentation/decision threshold.

Technical and Management Assistance

Technical and management assistance (TMA) is a structured SSA program designed to offer or provide support, assistance, guidance or resources to improve State agency performance. This can include but is not limited to: onsite reviews, administrative measures, training or funding. According to the 1981 regulations, a State agency will receive TMA when performance reaches unacceptable levels or when performance has significantly declined. We believe that emphasis should be placed on good performance and preventive maintenance which may be far less costly than corrective action taken when the State agency has developed more serious performance problems. We also believe that the need for additional support or assistance should not be viewed solely as punitive measure brought about by poor performance. We are, therefore, proposing a number of modifications in the monitoring and TMA sections of the regulations. We propose the following changes.

- *TMA*—Change the term "technical and management assistance" to "performance support".
- *Reviews*—Within budgeted resources, conduct fiscal and administrative management reviews (FAMRs) and special onsite reviews as a part of the regular performance monitoring process. A FAMR is a fact finding mission to review particular aspects of State agency operations. During these reviews we also review the quality assurance (QA) functions. The FAMR previously was conducted as a part of technical and management assistance and, as a result, was associated with poor performance.
- *Quality Assurance*—Review the quality assurance (QA) function to ensure that it is consistent with the intent of the QA process and that proper sample selection procedures are being followed.
- *Assistance Request*—Amend §§ 404.1681 and 416.1081 to show that a State may request assistance at any time that the regular monitoring and review process reveals that assistance could enhance performance. The current regulations do not provide that a State may request assistance.
- *Performance Support*—Further amend §§ 404.1681 and 416.1081 to explain that we will consider offering, or providing upon request, assistance when the documentation/decision rate falls below 93.0 percent in any of the three categories of decisions, i.e., initial cases, reconsiderations, and continuing disability reviews. We will consider offering or granting assistance if a State agency falls below one or even two categories of the documentation/decision threshold, e.g., reconsiderations only, even though it is still in "substantial compliance." Performance support directed at a specific problem area may improve a State agency's overall documentation/decision rate. Also, if any of our ongoing reviews and quality assurance activities reveal that performance could be improved by such support, we will consider offering assistance. The current regulations only allow for optional TMA when performance significantly declines or when intermediate goals have not been met. The proposed regulations will allow for performance support, including State requested support, in a much broader range of circumstances. This support will continue to be provided from State and SSA staff and budgets.

We are also proposing some other amendments to these sections to conform with changes in the proposed processing time and documentation/decision standards.

Administrative Requirements and Procedures

General Administrative Requirements

The 1981 regulations provide, under the heading "*Organization*" (§§ 404.1620 and 416.1020), that the State is responsible for providing the organizational structure, sufficient qualified personnel, medical consultants services and a quality assurance function to ensure that disability determinations are made accurately and promptly. Our objective was to regulate only where necessary and to allow the States maximum flexibility to manage the State agencies as long as their performance was acceptable. We, therefore, said that we would impose specific requirements in these areas only in the course of a mandatory technical and management assistance program.

It is still our goal to regulate administrative areas only to the extent necessary to ensure effective stewardship of the disability programs and to continue to give the States maximum flexibility to manage the State agencies. However, experience has shown over the past several years that, in some circumstances, there is a need for specific requirements even though mandatory performance support is not needed. A State may have serious deficiencies in one or more functions currently listed under "*Organization*" or in any of the functions included under "*Administrative Responsibilities and Requirements.*" These deficiencies may not necessarily cause the State agency to fall below the thresholds that require mandatory performance support. For example, a State may take action to discontinue its quality assurance program, or may fail to submit timely and accurate reports of its administrative functions. Another example is: a State may attempt to contract out functions which our instructions require the State to retain. Even where a clear and serious deficiency may eventually lead to a State agency's requiring mandatory performance support, for example, where a State may adopt a medical review procedure for a class of cases that clearly delays processing the cases and imposes evaluation standards which are inconsistent with our regulations or written guidelines, it is unreasonable to expect that we would always wait until the State agency's performance falls through the necessary performance thresholds before initiating corrective measures. We have an obligation to exercise stewardship and to immediately undertake to correct any deficiencies which may cause the State to be found not in substantial compliance with our regulations and other written guidelines.

For the above reasons, we have changed the title of §§ 404.1620 and 416.1020 from "*Organization*" to "*General Administrative Requirements*". We have retained the four administrative functions covered in this section but have deleted the statement that we will impose specific organizational requirements on a State only in the course of a mandatory technical and management assistance program. Instead, we have stated that we will act immediately to remedy any deficiencies in the four administrative functions involved under this section or in the other administrative functions covered individually under "*Administrative Responsibilities and Requirements*", which are sufficiently serious that, if not corrected, may cause the State to be found not in substantial compliance with our regulations and other written guidelines.

Facilities

We are proposing to amend §§ 404.1623(c) and 416.1023(c) to require that access to the premises where the disability determination function is performed includes telephonic access to State agency management. Telephone contacts may be preferable to personal visits in some cases for the purposes of clarifying or verifying State agency activities required by the regulations and other written guidelines. They are quicker and more cost effective.

Fiscal

We propose to revise §§ 404.1626 and 416.1026 to substitute "Office of Management and Budget (OMB) Circular A-87" for "Federal Management Circular 74-4" to reflect a change in the title of this latter circular. We are also making reference to 48 CFR 31.6 of the Federal Acquisition Regulations System and OMB Circular A-87 which define necessary costs for the period after March 31, 1984. We also propose to revise these sections to require that States arrange for their own audits in accordance with the Single Audit Act of 1984, Pub. L. 98-502.

The Single Audit Act of 1984 provides for independent audits of financial operations, including compliance with certain provisions of Federal law and regulations. The requirements are established to ensure that audits are made on an organization-wide basis. Since the States are required by the Single Audit Act of 1984 to arrange for audits of their own agencies using Federal guidelines, we will audit State records only if (1) they do not perform their own audits of the State agency under the Single Audit Act of 1984 or (2) they perform a State agency audit but the audit does not meet our program requirements. In the case of an unsatisfactory State audit, we may conduct a supplementary audit or review activity as prescribed by the Single Audit Act of 1984.

Audits

We propose to revise §§ 404.1627 and 416.1027 to reflect that the Department of Health and Human Services' Office of Inspector General will not be the principal agency conducting audits of State agencies. The State agencies are to be audited by the States under the Single Audit Act of 1984.

In addition, we are proposing that the Commissioner be given 90 days from the date of receipt of a State's appeal of an audit determination to issue a decision on that appeal. Experience has shown that 45 days to respond does not allow sufficient time for careful investigation and review of all the issues.

Disputes on Other Matters

We propose to revise §§ 404.1681 and 416.1081 to clarify that the "fiscal issues" to be resolved by the Grant Appeals Board are "monetary disallowances." In accordance with the regulations governing the Grant Appeals Board (45 CFR 16), monetary disallowances are the only type of fiscal recommendation, decision, or dispute which are appealable to the Grant Appeals Board.

Executive Order 12291: These regulations have been reviewed under Executive Order 12291 and do not meet any of the criteria for a major regulation. Therefore, a regulatory impact analysis is not required. In fact, these regulations only make some modifications to the regulations which implemented section 304 of Pub. L. 96-265 (the "Social Security Disability Amendments of 1980"). When these regulations were published in the Federal Register on May 29, 1981 (46 FR 29180), it was determined that they did not constitute a major rule, as defined in Executive Order 12291.

Regulatory Flexibility Act: We certify that these regulations will not, if promulgated, have a significant economic impact on a substantial number of small entities because they only affect States agencies making disability determinations under title II and title XVI of the Act. Prior to June 1981, these same State agencies made these disability determinations under agreements with the Secretary.

Paperwork Reduction Act: These regulations impose no new reporting/recordkeeping requirements necessitating OMB clearance.

List of Subjects

20 CFR Part 404

Administrative practice and procedure, Death benefits, Disabled, Old-Age, survivors and disability insurance.

20 CFR part 416

Administrative practice and procedure, Alcoholism, Drug abuse, Investigations, Medicaid, Reporting and recordkeeping requirements, Supplemental security income (SSI), Vocational rehabilitation.

(Catalog of Federal Domestic Program Nos. 13802, Social Security Disability Insurance; 13.807 Supplemental Security Income)

Dated: October 4, 1985.

Martha A. McSteen,

Acting Commissioner of Social Security.

Approved: January 9, 1986.

Otis R. Bowen, M.D.,

Secretary of Health and Human Service.

Chapter III, Title 20 of the Code of Federal Regulations is amended as shown.

PART 404—FEDERAL OLD-AGE, SURVIVORS, AND DISABILITY INSURANCE (1950——)

Part 404 of Chapter III of Title 20 of the Code of Federal Regulations is amended as follows:

1. The authority citation for Subpart Q continues to read as follows:

Authority: Secs. 205, 221 and 1102, Social Security Act, as amended; 53 Stat. 1368, as amended, 68 Stat. 1081, as amended; 49 Stat. 647, as amended; 42 U.S.C. 405, 421, and 1302.

VOL 51 ISS 80 AP 25 1986 UMI

2. Section 404.1601 is amended by revising paragraphs (d), (f), and (g) to read as follows:

§ 404.1601 Purpose and scope.

* * * * *

(d) Sections 404.1640 through 404.1650 describe the documentation/decision standard and processing time standards for measuring State agency performance.

* * * * *

(f) Sections 404.1670 and 404.1671 describe the level of performance below which we will find a State agency to be not in substantial compliance with the requirement that it make disability determinations consistent with the regulations and other written guidelines. The action that we will take when this occurs is also set out.

(g) Sections 404.1680 through 404.1683 describe the rules for resolving disputes concerning fiscal issues and providing hearings when we propose to find that a State is not in substantial compliance.

* * * * *

3. In § 404.1602, the definition of "other written guidelines" is revised and definitions for the terms "documentation/decision rates" and "not in substantial compliance" are added to read as follows:

§ 404.1602 Definitions.

* * * * *

"Documentation/decision rates" are the preestablished levels against which State agency disability determination accuracy is measured.

"Not in substantial compliance" means that a State is not following our regulations and other written guidelines in processing disability claims and in carrying out the other responsibilities of the State described in the regulations.

"Other written guidelines" means written issuances (e.g., memoranda, program policy statements) by the Commissioner of Social Security or the Associate Commissioner for Disability; and the policies, procedures, guides, and operating instructions in the Disability Insurance sections of the Program Operations Manual System that are not designated as advisory or discretionary.

4. Section 404.1620 is amended by revising the section heading and paragraph (a) to read as follows:

§ 404.1620 General administrative requirements.

(a) The State will provide the organizational structure, qualified personnel, medical consultant services, and a quality assurance function sufficient to ensure that disability determinations are made accurately and promptly We may impose specific administrative requirements in these areas and in those under "Administrative Responsibilities and Requirements" in order to establish uniform, national administrative practices or to correct the areas of deficiencies which may later cause the State to be "not in substantial compliance" with our regulations and other written guidelines.

* * * * *

5. Section 404.1623 is amended by revising paragraph (c) to read as follows:

§ 404.1623 Facilities.

* * * * *

(c) *Access.* The State will permit us access to the premises where the disability determination function is performed and personal and/or telephonic access to the management of such premises. These contacts shall be for the purpose of verifying and/or inspecting the work and activities required by the regulations and assuring compliance with pertinent Federal statutes and regulations. We will contact the State and give reasonable prior notice of the times and purposes of any visits.

6. Section 404.1626 is amended by revising paragraphs (a) and (e) to read as follows:

§ 404.1626 Fiscal.

(a) We will give the State funds, in advance or by way of reimbursement, for necessary costs in making disability determinations under these regulations. Necessary costs are direct as well as indirect costs as defined in 41 CFR 1–15.7 of the Federal Procurement Regulations System and in Office of Management and Budget (OMB) Circular A–87, as amended or superseded for costs incurred before April 1, 1984; and 48 CFR 31.6 of the Federal Acquisition Regulations System and OMB Circular A–87 as amended or superseded for costs incurred after March 31, 1984.

* * * * *

(e) After the close of a period for which funds have been made available to the State, the State will submit a report of its expenditires. Based on an audit arranged by the State under Pub. L. 98–502, the Single Audit Act of 1984, or by the HHS Inspector General or based on an audit or review by SSA (see § 404.1627), we will determine whether the expenditures were consistent with cost principles described in 41 CFR 1–15.7 for costs incurred before April 1, 1984; and 48 CFR Subpart 31.6 of the Federal Acquisition Regulations for costs incurred after March 31, 1984; and in other written guidelines in effect at the time the expenditures were made or incurred.

* * * * *

7. Section 404.1627 is revised to read as follows:

§ 404.1627 Audits.

(a) *Performed by the State.*—(1) *Generally.* Audits of accounts and records pertaining to the administration of the disability program under the Act, will be performed by States in accordance with the Single Audit Act of 1984 (Pub. L. 98–502) which establishes audit requirements for States receiving Federal assistance. If the State's audit meets SSA's program requirements, SAA will accept the findings and recommendations of the audit. The State will make every effort to act upon and resolve any items questioned in the audit.

(2) *Questioned items.* Items questioned as a result of an audit under the Single Audit Act of 1984 of a cross-cutting nature will be resolved by the Department of Health and Human Services, Office of Procurement, Assistance and Logistics (OPAL). A cross cutting issue is one that involves more than one Federal awarding agency. Questioned items affecting the disability program will be resolved by SSA in accord with paragraph (b)(2) of this section.

(3) *State appeal of audit determinations.* OPAL will notify the State of its determination on questioned items. If the State disagrees with that determination, it may appeal in writing within 30 days of receiving the determination. State appeals of a cross-cutting issue as a result of an audit under the Single Audit Act of 1984 will be made to the Department of Health and Human Services (HHS), Departmental Grant Appeal Board (the Board). The rules for hearings and appeals are provided in 45 CFR Part 16.

(b) *Performed by the Secretary.*—(1) *Generally.* If the State does not perform an audit under the Single Audit Act of 1984 or the audit performed is not satisfactory for disability program purposes, the books of account and records in the State pertaining to the administration of the disability program under the Act will be audited by the HHS Inspector General or audited or reviewed by SSA as appropriate. These audits or reviews will be conducted to determine whether the expenditures were made for the intended purposes and in amounts necessary for the proper and efficient administration of the disability program. Audits or reviews will also be made to inspect the work and activities required by the

regulations to ensure compliance with pertinent Federal statutes and regulations. The State will make every effort to act upon and resolve any items questioned in an audit or review.

(2) *Questioned items.* Expenditures of State agencies will be audited or reviewed, as appropriate, on the basis of cost principles and written guidelines in effect at the time the expenditures were made or incurred. Both the State and the State agency will be informed and given a full explanation of any items questioned. They will be given reasonable time to explain items questioned. Any explanation furnished by the State or State agency will be given full consideration before a final determination is made on the audit or review report.

(3) *State appeal of audit determinations.* The appropriate SSA regional commissioner will notify the State of his or her determination on the audit or review report. If the State disagrees with that determination, the State may request reconsideration in writing within 30 days of the date of the regional commissioner's notice of the determination. The written request may be made, through the Associate Commissioner, Office of Disability, to the Commissioner of Social Security, Room 900, Altmeyer Building, 6401 Security Boulevard, Baltimore, Maryland 21235. The Commissioner will make a determination and notify the State of the decision in writing no later than 90 days from the date SSA receives the State's appeal. The decision by the Commissioner or other than monetary disallowances will be final and binding upon the State. The decision by the Commissioner on monetary disallowances will be final and binding upon the State unless the State appeals the decision in writing to the Department of Health and Human Services, Department Grant Appeals Board within 30 days after receiving the Commissioner's decision. See § 404.1683.

8. Section 404.1640 is revised to read as follows:

§ 404.1640 General.

The following sections provide the procedures and guidelines we use to determine whether the State agency is substantially complying with regulations and other written guidelines, including meeting established national performance standards. We use these performance standards to help assure effective and uniform administration of our disability programs and to measure whether each State agency's performance of the disability determination function is acceptable. Also, the standards are designed to improve overall State agency performance in the disability determination process and ensure that benefits are made available to all eligible persons accurately and efficiently. We measure the State agency performance in two areas—processing time and quality of documentation and decisions on claims. State agency compliance is also judged by adherence to other program requirements, e.g., availability of specialist/medical resources and consultative examination oversight activities.

9. Section 404.1641 is amended by revising paragraphs (b), (c), and (d) to read as follows:

§ 404.1641 Standards of performance.

* * * * *

(b) *The target level.* The target level is the optimum level of performance. There are three targets—one for the combined title II and title XVI overall documentation/decision rate (as defined in § 404.1643(a)), one for title II initial processing time, and one for title XVI initial processing time.

(c) *The threshold level.* The threshold level is the minimum acceptable level of performance. There are three thresholds one for the combined title II and title XVI overall documentation/decision rate, one for title II initial processing time, and one for title XVI initial processing time.

(d) *Intermediate goals.* Intermediate goals are levels of performance between the threshold levels and the target levels established and monitored by SSA's regional commissioners after negotiation with each State agency. The intermediate goals are stepping stones designed to help the State agencies reach the target levels. In the case of processing time intermediate goals, minimum levels of performance have been established that each State agency should meet by December 31, 1987.

10. Section 404.1642 is amended by revising the section heading and paragraphs (a) and (c) and by adding a new paragraph (d) to read as follows:

§ 404.1642 Processing time.

(a) *General.* Title II processing time refers to the average number of days (including Saturday, Sunday and holidays) it takes a State agency to process an initial disability claim from the day it is received in the State agency until the day it is released by the State agency. Title XVI processing time refers to the average number of days (including Saturday, Sunday and holidays) from receipt of the initial disability claim in the State agency until systems input of a presumptive disability decision or a disability determination, or release of the case folder to the disability quality branch, whichever is the earliest action.

* * * * *

(c) *Threshold levels.* The processing time threshold levels are:

(1) 59.3 days for title II initial claims.

(2) 67.9 days for title XVI initial claims.

(d) *Intermediate Goals.* In order to stress the need for continued improvement, minimum intermediate goals are being established for the calendar year ending December 31, 1987, for title II and title XVI initial case processing time. All states should be achieving by December 31, 1987, minimum intermediate processing time goals of:

(1) 54.9 days for title II initial claims.

(2) 62.4 days for title XVI initial claims.

11. Section 404.1643 is revised to read as follows:

§ 404.1643 Documentation/decision rate.

(a) *General.* Documentation/decision rate refers to the overall percentage of initial, reconsideration, and continuing disability review cases that do not have to be returned to State agencies for further development or correction of decisions based on evidence in the files and as such represents the reliability of State agency adjudication. This definition includes the consideration of factors with potential for affecting a decision even if they do not change the result in a particular case. For example, if a particular item of medical evidence should have been in the file but was not included, even though its inclusion does not change the result in the case, that is treated as an error for purposes of applying the standard.

(b) *Target level.* The State agency overall documentation/decision target level for combined title II and title XVI cases is 87 percent.

(c) *Intermediate goals.* Intermediate goals will be established annually by SSA's regional commissioners after negotiation with the States and should be used as stepping stones to progress towards the targeted level.

(d) *Threshold level.* The State agency overall documentation/decision threshold level for combined title II and title XVI cases is 93.0 percent.

12. Section 404.1644 is amended by revising the section heading and paragraph (a) to read as follows:

§ 404.1644 How and when we determine whether the processing times exceed.

(a) *How we determine processing times.* For all initial title II cases, we

VOL 51 ISS 80 AP 25 1986 UMI

calculate the mean number of days (including Saturday, Sunday and holidays) from the time the case folder is received in the State agency until it is released to us by the State agency. For initial title XVI cases, we calcuate the mean number of days (including Saturday, Sunday and holidays) from receipt of the initial disability claim in the State agency until systems input of a presumptive disability decision or of a disability determination, or release of the case folder to the disability quality branch, whichever is the earliest action.

* * * * *

13. Section 404.1645 is revised to read as follows:

§ 404.1645 How and when we determine whether the documentation/decision rate is met.

(a) *How we determine the documentation/decision rate.* We determine a State agency's documentation/decision rate on the basis of decision and documentation errors identified in our review of sample cases under our quality review program.

(b) *Frequency of review.* Title II and title XVI initial, reconsideration, and continuing disability quality review data are monitored together on a quarterly basis. The determination as to whether the documentation/decision threshold has been met is made at the end of each quarter. Quarterly State-by-State combined overall quality review rates are compared to the established documentation/decision standard (threshold level).

14. Section 404.1650 is revised to read as follows:

§ 404.1650 Action we will take if a State agency does not meet the standards.

If a State agency does not meet two of the three established threshold levels (one of which must be the documentation/decision standard) for two or more consecutive calendar quarters, we will notify the State agency in writing that it is not meeting the standards. Following our notification, we will provide the State agency appropriate performance support described in §§ 404.1660, 404.1661 and 404.1662 for a period of up to 12 months.

15. The subheading preceding § 404.1660 is revised from "*Technical and Management Assistance*" to "*Performance Monitoring and Support.*"

16. Section 404.1660 is revised to read as follows:

§ 404.1660 How we will monitor.

We will regularly analyze State agency combined title II and title XVI overall documentation/decision rate, title II initial processing time, and title XVI initial processing time. Within budget resources, we will also routinely conduct fiscal and administrative management reviews (FAMRs) and special onsite reviews. A FAMR is a fact finding mission to review particular aspects of State agency operations. During these reviews we will also review the quality assurance (QA) function. This regular monitoring and review program will allow us to determine the progress each State is making and the type and extent of performance support we will provide to help the State progress toward threshold, intermediate, and/or target levels.

17. Section 404.1661 is revised to read as follows:

§ 404.1661 When we will provide performance support.

(a) *Optional support.* We may offer, or a State may request, performance support at any time that the regular monitoring and review process reveals that support could enhance performance or if the documentation/decision rate falls below 93.0 percent in any of the three categories of decisions (i.e., initial, reconsideration and continuing disability review decisions). The State does not have to be below the overall documentation/decision rate of 93.0 percent to receive performance support. Support will be offered, or granted upon request, based on available resources. If the State fails to meet the minimum intermediate processing time goals (see § 404.1642(d)) by December 31, 1987, we will furnish the support needed to improve the State's performance.

(b) *Mandatory support.* (1) We will provide a State agency with mandatory performance support if regular monitoring and review reveal that two of three threshold levels (one of which must be the documentation/decision standard) are not met for two consecutive calendar quarters.

(2) We may also decide to provide a State agency with mandatory performance support if regular monitoring and review reveal that any one of the three threshold levels is not met for two consecutive calendar quarters. Support will be provided based on available resources.

(3) The threshold levels are:

(i) Combined title II and title XVI overall documentation/decision rate—93.0 percent,

(ii) Title II initial processing time—59.3 days, and

(iii) Title XVI initial processing time—67.9 days.

18. New §§ 404.1662 and 404.1663 are added to read as follows:

§ 404.1662 What support we will provide.

Performance support may include any or all of the following:

(a) An onsite review of cases processed by the State agency emphasizing adherence to written guidelines.

(b) A request that necessary administrative measures be implemented (e.g., filling staffing vacancies, using overtime, assisting with training activities, etc.).

(c) Provisions for Federal personnel to perform onsite reviews, conduct training, or perform other functions needed to improve performance.

(d) Provisions for fiscal aid to allow for overtime, temporary hiring of additional staff, etc., above the authorized budget.

§ 404.1663 Failure to meet the performance standards.

After we provide mandatory performance support, we will give the State agency a 3-month adjustment period. During this 3-month period, we will not require the State agency to meet the threshold levels. Following the adjustment period, if the State agency again falls below two of three threshold levels (one being the documentation/decision threshold) in two consecutive calender quarters during the next 12 months, we will begin the 21-day investigation of whether the State is not in substantial compliance with our regulations and other written guidelines (see § 404.1670(b)(1)).

19. The subheading preceding § 404.1670 is revised from "*Substantial Failure*" to "*When a State is not in Substantial Compliance.*"

20. Section 404.1670 is revised to read as follows:

§ 404.1670 Determining that a State is not in substantial compliance.

(a) *General.* We must assure the substantial compliance of States with our regulations and other written guidelines or assume their disability determination functions within a specified time. Our regulations and other written guidelines take precedence over conflicting State laws and regulations. We may find that a State is not in substantial compliance if it does not meet performance standards (see paragraph (b) of this section) or does not follow other provisions of our regulations and other written guidelines, without good cause (See § 404.1671).

(b) *Procedures.* We take specific steps within definite time frames before determining that a State is not in substantial compliance with our regulations and other written guidelines. These are:

(1) *Information that a State may not be in substantial compliance.* Where we receive information (e.g., from individuals, quality assurance reviews, etc.) that a State may not be following our regulations and other written guidelines, the matter will be investigated, as soon as possible, by SSA's regional office in whose jurisdiction the State is located to determine if the State is not in substantial compliance (see § 404.1671 if good cause is an issue). Examples of "not in substantial compliance" include:

(i) Failure to follow SSA's disability development and evaluation criteria,

(ii) Failure to process a certain class or classes of disability cases,

(iii) Failure to carry out the basic responsibilities of the State as described in § 404.1603(c), and

(iv) Failure to meet performance standards as described in § 404.1663. In cases involving continued failure to meet the performance standards, the mandated investigation will begin as soon as our information shows that the State has again failed to meet performance standards as described in § 404.1663.

(2) *Preliminary finding.* The SSA regional office will complete its investigation and we will make a preliminary finding on the matter within 21 days of receipt of the information. On the date that such finding is made, we will also notify the State in writing of the outcome. If there is a preliminary finding that the State is not in substantial compliance with our regulations and other written guidelines, the notice will include an explanation of the basis for the finding, i.e., which regulation or guideline is not being complied with and how we determined it. We will request assurance from the State's Governor or equivalent (or his or her designee) that the situation will be corrected.

(3) *Assurance by the State.* Any State notified of a preliminary finding that it is not in substantial compliance will have 21 days, from the date the finding was made, to provide assurance to us in writing that the situation will be corrected.

(4) *Monitoring and final determination.* If a State provides such assurance, we will monitor the agency's performance for 30 days beginning with the day after the date on which the assurance has been provided. Within 60 days after the date on which the preliminary finding was made or 90 days after such date if the State is granted a hearing (see § 404.1680), the Commissioner (or his or her designee) will make a written final determination as to whether the State is substantially complying with our regulations and other written guidelines. This determination is not subject to judicial review.

(5) *Final determination that a State is not in substantial compliance and assumption of workload.* If we make a final determination that any State is not in substantial compliance with our regulations and other written guidelines, we will as soon as possible, but not later than 180 days after the date of such determination, assume responsibility for making disability determinations in that State. We will decide whether to assume all or part of the State's workload (e.g., the part in which the State is not in substantial compliance).

21. Section 404.1671 is revised to read as follows:

§ 404.1671 Good cause for not following our regulations and other written guidelines.

If a State has good cause for not following our regulations and other written guidelines, then we will not find that the State is not in substantial compliance. We will determine if good cause exists. Some of the factors relevant to good cause are:

(a) Disasters such as fire, flood, or civil disorder, that—

(1) Require the diversion of significant personnel normally assigned to the disability determination function, or

(2) Destroyed or delayed access to significant records needed to make accurate disability determinations;

(b) Strikes of State agency staff or other government or private personnel necessary to the performance of the disability determination function;

(c) Sudden and unanticipated workload changes which result from changes in Federal law, regulation, or written guidelines, systems modification or systems malfunctions, or rapid, unpredictable caseload growth for a 6-month period or longer.

§ 404.1675 [Removed and Reserved]

22. Section 404.1675 is removed and reserved.

23. Section 404.1680 is revised to read as follows:

§ 404.1680 Discretionary hearings.

(a) *Request for hearing.* Within 55 days of a preliminary finding that a State is not in substantial compliance with regulations or other written guidelines, the State may request a hearing on the issue of substantial compliance. The request must be directed to the Commissioner of Social Security. The request may be oral but it must be confirmed in writing within 5 days. Written requests must be sent to the Commissioner of Social Security, Social Security Administration, P.O. Box 888, Baltimore, MD 21235.

(b) *Action on hearing request.* Within 60 days of the preliminary finding, we will notify the State as to whether or not such a request will be granted. If a hearing is granted, the notice will specify the time and the place of the hearing. Such hearing will be scheduled to begin no later than the 70th day after the date of the preliminary finding. The notice will also specify the regulations or other written guidelines with respect to which the State may not be in substantial compliance.

(c) *Conduct of hearing.* The hearing will be conducted by a hearing officer whom we designate. The State will have a maximum of 3 working days to present evidence and argument. The hearing officer's rulings with respect to evidence, persons who may attend the hearing, and other matters about the conduct of the hearing will not be appealable. The hearing officer will recommend a decision to us no later than 80 days after the date of the preliminary finding.

(d) *Final determination.* Within 90 days of the date of the preliminary finding, the Commissioner will make a written final determination as to whether the State is substantially complying with our regulations and other written guidelines. This determination is not subject to judicial review (see § 404.1670(b)(4)).

24. Section 404.1681 is revised to read as follows:

§ 404.1681 Disputes on other matters.

Disputes concerning monetary disallowances will be resolved in proceedings before the Health and Human Services Departmental Grant Appeals Board if the issue cannot be resolved between us and the State. Disputes other than monetary disallowances will be resolved through an appeal to the Commissioner of Social Security, who will make the final decision. (See § 404.1627)

25. Section 404.1690 is revised to read as follows:

§ 404.1690 Assumption of the disability determination function when we make a finding that a State is not in substantial compliance.

(a) *Notice to State.* When we find that a State is not in substantial compliance, we will notify the State in writing that we will assume responsibility for performing the disability determination function from the State agency, whether

VOL 51 ISS 80 AP 25 1986 UMI

the assumption will be partial or complete, and the date on which the assumption will be effective.

(b) *Effective date of assumption.* The date of any partial or complete assumption of the disability determination function from a State agency may not be later than 180 days after the final determination finding that a State is not in substantial compliance.

(c) *Protection of State employees.* If we hire personnel to perform the disability determination functions assumed from the State, we will give employees of the State agency who are capable of performing duties in the disability determination program preference over any other persons in filling positions for which they are qualified. We may, but are not required to, extend this hiring preference to the State agency's administrator or the deputy or assistant administrator (or his or her equivalent). We may exceed any applicable personnel ceilings and waive any applicable hiring restrictions in this regard. Also, to the extent feasible within the 180 day period after the date of the final determination and in conjunction with the Secretary of Labor, we will assure the statutory protections under applicable Federal, State, and local law of State agency employees whom we do not hire.

26. Section 404.1691 is amended by revising paragraph (b) and adding new paragraphs (c) and (d).

§ 404.1691 Assumption when a State no longer wishes to perform the disability determination function.

* * * * *

(b) *Effective date of assumption.* The State agency will continue to perform whatever activities of the disability determination function it is performing at the time the notice referred to in paragraph (a) of this section is given for not less than 180 days, or, if later, until we have complied with the requirements of paragraphs (c) and (d) of this section. For example, if the State is not making disability determinations (because we previously assumed responsibility for making them) but is performing other activities related to the disability determination function at the time it gives notice, the State will continue to perform these activities until the requirements of this paragraph are met. Thereafter, we will assume complete responsibility for performing the disability determination function.

(c) *Protection of State employees.* We will develop and initiate procedures to implement a plan to partially or completely assume the disability determination function from the State agency under paragraph (a) and (b) of this section. Except for the State agency's administrator, deputy administrator, or assistant administrator (or his or her equivalent), we will give employees of the State agency who are capable of performing duties in the disability determination function preference over any other persons in filling positions with us for which they are qualified. We may also give a preference in hiring the State agency's administrator, deputy administrator, or assistant administrator (or his or her equivalent). We will establish a system for determining the hiring priority among the affected State agency employees in those instances where we are not hiring all of them.

(d) *Determination by Secretary of Labor.* We will not assume responsibility for performing the disability determination function from a State until the Secretary of Labor determines that the State has made fair and equitable arrangements under applicable Federal, State and local law to protect the interests of employees who will be displaced from their employment because of the assumption and who we will not hire.

§ 404.1692 [Removed and Reserved]

27. Section 404.1692 is removed and reserved.

28. New §§ 404.1695 and 404.1696 are added to read as follows:

§ 404.1695 Cases decided by a State agency when the State is not in substantial compliance.

After a final determination that a State is not in substantial compliance and before we assume the disability function, we will take such action as may be necessary to assure that cases decided by the State agency are decided in accordance with applicable regulations and other written guidelines. We will determine whether the action is necessary in only certain classes of cases or in all of the cases processed by the State agency during the period.

§ 404.1696 Expiration date.

Section 17 of Pub. L. 98-460 will expire on December 31, 1987. Thereafter, it will no longer serve as the statutory basis for the regulatory provisions which specifically implement it.

PART 416—SUPPLEMENTAL SECURITY INCOME FOR THE AGED, BLIND, AND DISABLED

Part 416 of Chapter III of Title 20 of the Code of Federal Regulations is amended as follows:

1. The authority citation for Subpart J continues to read as follows:

Authority: Secs. 1102, 1614 and 1631 Social Security Act, as amended; 49 Stat. 647, as amended; 86 Stat. 1471, as amended by 86 Stat. 52; 86 Stat. 1478; U.S.C. 1302, 1382c, and 1383.

2. Section 416.1001 is amended by revising paragraphs (d), (f), and (g) to read as follows:

§ 416.1001 Purpose and scope.

* * * * *

(d) Section 416.1040 through 416.1050 describe the documentation/decision standard and processing time standards for measuring State agency performance.

* * * * *

(f) Sections 416.1070 and 416.1071 describe the level of performance below which we will find a State agency to be not in substantial compliance with the requirement that it make disability determinations consistent with the regulations and other written guidelines. The action that we will take when this occurs is also set out.

(g) Sections 416.1080 through 416.1083 describe the rules for resolving disputes concerning fiscal issues and providing hearings when we proposed to find that a State is not is substantial compliance.

* * * * *

3. In § 416.1002, the definition of "other written guidelines" is revised and definitions for the terms "documentation/decision rates" and "not is substantial compliance" are added to read as follows:

§ 416.1002 Definitions

* * * * *

"Documentation/decision rates" are the preestablished levels against which State agency disability determination accuracy is measured.

"Not in substantial compliance" means that a State is not following our regulations and other written guidelines in processing disability claims and in carrying out the other reponsibilities of the State described in the regulations.

"Other written guidelines" means written issuances (e.g., memoranda, program policy statements) by the Commissioner of Social Security or the Associate Commissioner for Disability; and the policies, procedures, guides, and operating instructions in the Disability Insurance sections of the Program Operations Manual System that are not designated as advisory or discretionary.

4. Section 416.1020 is amended by revising the section heading and paragraph (a) to read as follows:

§ 416.1020 General administrative requirements.

(a) The State will provide the organizational structure, qualified personnel, medical consultant services, and a quality assurance function sufficient to ensure that disability determinations are made accurately and promptly. We may impose specific administrative requirements in these areas and in those under "Administrative Responsibilities and Requirements" in order to establish uniform, national administrative practices or to correct the areas of deficiencies which may later cause the State to be "not in substantial compliance" with our regulations and other written guidelines.

* * * * *

5. Section 416.1023 is amended by revising paragraph (c) to read as follows:

§ 416.1023 Facilities.

* * * * *

(c) *Access.* The State will permit us access to the premises where the disability determination function is performed and personal and/or telephonic access to the management of such premises. These contacts shall be for the purpose of verifying and/or inspecting the work and activities required by the regulations and assuring compliance with pertinent Federal statutes and regulations. We will contact the State and give reasonable prior notice of the times and purposes of any visits.

6. Section 415.1026 is amended by revising paragraphs (a) and (e) to read as follows:

§ 416.1026 Fiscal.

(a) We will give the State funds, in advance or by way of reimbursement, for necessary costs in making disability determinations under these regulations. Necessary costs are direct as well as indirect costs as defined in 41 CFR 1-15.7 of the Federal Procurement Regulations System and in Office of Management and Budget Circular A-87, as amended or superseded for costs incurred before April 1, 1984; and 48 CFR 31.6 of the Federal Acquisition Regulations System and OMB Circular A-87 as amended or superseded for costs incurred after March 31, 1984.

* * * * *

(e) After the close of a period for which funds have been made available to the State, the State will submit a report of its expenditures. Based on an audit arranged by the State under Pub. L. 98-502, the Single Audit Act of 1984, or by the HHS Inspector General or based on an audit or review by SSA (see § 416.1027), we will determine whether the expenditures were consistent with cost principles described in 41 CFR 1-15.7 for costs incurred before April 1, 1984; and 48 CFR Subpart 31.6 of the Federal Acquisition Regulations for costs incurred after March 31, 1984; and in other written guidelines in effect at the time the expenditures were made or incurred.

* * * * *

7. Section 416.1027 is revised to read as follows:

§ 416.1027 Audits.

(a) *Performed by the State.*—(1) *Generally.* Audits of account and records pertaining to the administration of the disability program under the Act, will be performed by States in accordance with the Single Audit Act of 1984 (Pub. L. 98-502) which establishes audit requirements for States receiving Federal assistance. If the State's audit meets SSA's program requirements, SSA will accept the findings and recommendations of the audit. The State will make every effort to act upon and resolve any items questioned in the audit.

(2) *Questioned items.* Items questioned as a result of an audit under the Single Audit Act of 1984 of a cross-cutting nature will be resolved by the Department of Health and Human Services, Office of Procurement, Assistance and Logistics (OPAL). A cross cutting issue is one that involves more than one Federal awarding agency. Questioned items affecting the disability program will be resolved by SSA in accord with paragraph (b)(2) of this section.

(3) *State appeal of audit determinations.* OPAL will notify the State of its determination on questioned items. If the State disagrees with that determination, it may appeal in writing within 30 days of receiving the determination. State appeals of cross-cutting issue as a result an audit under the Single Audit Act of 1984 will be made to the Department of Health and Human Services (HHS), Departmental Grant Appeals Board (the Board). The rules for hearings and appeals are provided in 45 CFR Part 16.

(b) *Performed by the Secretary.*—(1) *Generally.* If the State does not perform an audit under the Single Audit Act of 1984 or the audit performed is not satisfactory for disability program purposes, the books of account and records in the State pertaining to the administration of the disability program under the Act will be audited by the HHS Inspector General or audited or reviewed by SSA as appropriate. These audits or reviews will be conducted to determine whether the expenditures were made for the intended purposes and in amounts necessary for the proper and efficient administration of the disability program. Audit or reviews will also be made to inspect the work and activities required by the regulations to ensure compliance with pertinent Federal statutes and regulations. The State will make every effort to act upon and resolve any items questioned in an audit or review.

(2) *Questioned items.* Expenditures of State agencies will be audited or reviewed, as appropriate, on the basis of cost principles and written guidelines in effect at the time the expenditures were made or incurred. Both the State and the State agency will be informed and given a full explanation of any items questioned. They will be given reasonable time to explain items questioned. Any explanation furnished by the State or State agency will be given full consideration before a final determination is made in the audit or review report.

(3) *State appeal of audit determinations.* The appropriate SSA regional commissioner will notify the State of his or her determination on the audit or review report. If the State disagrees with that determination, the State may request reconsideration in writing within 30 days of the date of the regional commissioner's notice of the determination. The written request may be made, through the Associate Commissioner, Office of Disability, to the Commissioner of Social Security, Room 900, Altmeyer Building, 6401 Security Boulevard, Baltimore, Maryland 21235. The Commissioner will make a determination and notify the State of the decision in writing no later than 90 day from the SSA receives the State's appeal. The decision by the Commissioner on other than monetary disallowances will be final and binding upon the State. The decision by the Commissioner on monetary disallowances will be final and binding upon the State unless the State appeals the decision in writing to the Department of Health and Human Services, Departmental Grant Appeals Board within 30 days after receiving the Commissioner's decision. See § 416.1083.

8. Section 416.1040 is revised to read as follows:

§ 416.1040 General.

The following sections provide the procedures and guidelines we use to determine whether the State agency is substantially complying with regulations and other written guidelines, including

VOL 51 ISS 80 AP 25 1986 UMI

meeting established national performance standards. We use these performance standards to help assure effective and uniform administration of our disability program and to measure whether each State agency's performance of the disability determination function is acceptable. Also, the standards are designed to improve overall State agency performance in the disability determination process and ensure that benefits are made available to all eligible persons accurately and efficiently. We measure the State agency performance in two areas—processing time and quality of documentation and decisions on claims. State agency compliance is also judged by adherence to other program requirements, e.g., availability of specialized medical resources and consultative examination oversight activities.

9. Section 416.1041 is amended by revising paragraphs (b), (c), and (d) to read as follows:

§ 416.1041 Standards of performance.

* * * * *

(b) *The target level.* The target level is the optimum level of performance. There are three targets—one for the combined title II and title XVI overall documentation/decision rate (as defined in § 416.1043(a)), one for title II initial processing time, and one for title XVI initial processing time.

(c) *The threshold level.* The threshold level is the minimum acceptable level of performance. There are three thresholds—one for the combined title II and title XVI overall documentation/decision rate, one for title II initial processing time, and one for title XVI initial processing time.

(d) *Intermediate goals.* Intermediate goals are levels of performance between the threshold levels and the target levels established and monitored by SSA's regional commissioners after negotiation with each State agency. The intermediate goals are stepping stones designed to help the State agencies reach the target levels. In the case of processing time intermediate goals minimum levels of performance have been established that each State agency should meet by December 31, 1987.

10. Section 416.1042 is amended by revsing the section heading and paragraphs (a) and (c) and by adding a new paragraph (d) to read as follows:

§ 416.1042 Processing time.

(a) *General.* Title II processing time refers to the average number of days (including Saturday, Sunday, and holidays) it takes a State agency to process an initial disability claim from the day it is received in the State agency until the day it is released by the State agency. Title XVI processing time refers to the average number of days (including Saturday, Sunday, and holidays) from receipt of the initial disability claim in the State agency until systems input of a presumptive disability decision or of a disability determination, or release of the case folder to the disability quality branch, whichever is the earliest action.

* * * * *

(c) *Threshold levels.* The processing time threshold levels are:

(1) 59.3 days for title II initial claims.

(2) 67.9 days for title XVI initial claims.

(d) *Intermediate goals.* In order to stress the need for continued improvement, minimum intermediate goals are being established for the calender year ending December 31, 1987, for title II and title XVI initial case processing times. All States should be achieving by December 31, 1987, minimum intermediate processing time goals of:

(1) 54.9 days for title II initial claims.

(2) 62.4 days for title XVI initial claims.

11. Section 416.1043 is revised to read as follows:

§ 416.1043 Documentation/decision rate.

(a) *General.* Documentation/decision rate refers to the overall percentage of initial, reconsideration, and continuing disability review cases that do not have to be returned to State agencies for further development or correction of decisions based on evidence in the files and as such represents the reliability of State agency adjudication. This definition includes the consideration of factors with potential for affecting a decision even if they do not change the result in a particular case. For example, if a particular item of medical evidence should have been in the file but was not included, even though its inclusion does not change the result in the case, that is treated as an error for purposes of applying the standard.

(b) *Target level.* The State agency overall documentation/decision target level for combined title II and title XVI cases is 97 percent.

(c) *Intermediate goals.* Intermediate goals will be established annually by SSA's regional commissioners after negotiation with the States and should be used as stepping stones to progress toward the targeted level.

(d) *Threshold level.* The State agency overall documentation/decision threshold level for combined title II and title XVI cases is 93.0 percent.

12. Section 416.1044 is amended by revising the section heading and paragraph (a) to read as follows:

§ 416.1044 How and when we determine whether the processing times are met.

(a) *How we determine processing times.* For all initial title II cases, we calculate the mean number of days (including Saturday, Sunday, and holidays) from the time the case folder is received in the State agency until it is released to us by the State agency. For initial title XVI Cases, we calculate the mean number of days (including Saturday, Sunday, and holidays) from receipt of the initial disability claim in the State agency until systems input of a presumptive disability decision or of a disability determination, or release of the case folder to the disability quality branch, whichever is the earliest action.

* * * * *

13. Section 416.1045 is revised to read as follows:

§ 416.1045 How and when we determine whether the documentation/decision rate is met.

(a) *How we determine the documentation/decision rate.* We determine a State agency's documentation/decision rate on the basis of decision and documentation errors identified in our review of sample cases under our quality review program.

(b) *Frequency of review.* Title II and title XVI initial, reconsideration, and continuing disability quality review data are monitored together on a quarterly basis. The determination as to whether the documentation/decision threshold has been met is made at the end of each quarter. Quarterly State-by-State combined overall quality review rates are compared to the established documentation/decision standard (threshold level).

14. Section 416.1050 is revised to read as follows:

§ 416.1060 Action we will take if a State Agency does not meet the standards.

If a State agency does not meet two of the three established threshold levels (one of which must be the documentation/decision standard) for two or more consecutive calendar quarters, we will notify the State agency in writing that it is not meeting the standards. Following our notification, we will provide the State agency appropriate performance support described in §§ 416.1060, 416.1061 and 416.1062 for a period of up to 12 months.

15. The subheading preceding § 461.1060 is revised from "*Technical and Management Assistance*" to "*Performance Monitoring and Support.*"

16. Section 416.1060 is revised to read as follows:

§ 416.1060 How we will monitor.

We will regularly analyze State agency combined title II and title XVI overall documentation/decision rate, title II initial processing time, and title XVI initial processing time. Within budgeted resources, we will also routinely conduct fiscal and administrative management reviews (FAMRs) and special onsite reviews. A FAMR is a fact finding mission to review particular aspects of State agency operations. During these reviews we will also review the quality assurance (QA) function. This regular monitoring and review program will allows us to determine the progress each state is making and the type and extent of performance support we will provide to help the state progress toward threshold, intermediate, and/or target levels.

17. Section 416.1061 is revised to read as follows:

§ 416.1061 When we will provide performance support.

(a) *Optional support.* We may offer, or a State may request, performance support at any time that the regular monitoring and review process reveals that support could enhance performance or if the documentation/decision rate falls below 93.0 percent in any of the three categories of decisions (i.e, initial, reconsideration, and continuing disability review decisions). The State does not have to be below the overall documentation/decision rate of 93.0 percent to receive performance support. Support will be offered, or granted upon request, based on available resources. If the State fails to meet the minimum intermediate processing time goals (see §§ 416.1042(d)) by December 31, 1987, we will furnish the support needed to improve the State's performance.

(b) *Mandatory support.* (1) We will provide a State agency with performance support if regular monitoring and review reveal that two of three threshold levels (one of which must be the documentation/decision standard) are not met for two consecutive calendar quarters.

(2) We may also decide to provide a State agency with mandatory performance support if regular monitoring and review reveal that any one of the three threshold levels is not met for two consecutive calendar quarters. Support will be provided based on available resources.

(3) The threshold levels are:

(i) Combined title II and title XVI overall documentation/decision rate—93.0 percent.

(ii) Title II initial processing time—59.3 days, and

(iii) Title XVI initial processing time—67.9 days.

18. New §§ 416.1062 and 416.1063 are added to read as follows:

§ 416.1062 What support we will provide.

Performance support may include any or all of the following:

(a) An onsite review of cases processed by the State agency emphasizing adherence to written guidelines.

(b) A request that necessary administrative measures be implemented (e.g., filling staffing vacancies, using overtime, assisting with training activities, etc.).

(c) Provisions for Federal personnel to perform onsite reviews, conduct training, or perform other functions needed to improve performance.

(d) Provisions for fiscal aid to allow for overtime, temporary hiring of additional staff, etc., above the authorized budget.

§ 416.1063 Failure to meet the performance standards.

After we provide mandatory preformance support, we will give the State agency a 3-month adjustment period. During this 3-month period, we will not require the State agency to meet the threshold levels. Following the adjustment period, if the State agency again falls below two of three threshold levels (one being the documentation/decision threshold) in two consecutive calendar quarters during the next 12 months, we will begin the 21-day investigation of whether the State is hot in substantial compliance with our regulations and other written guidelines (see § 416.1070(b)(1)).

19. The subheading preceding § 416.1070 is revised from "*Substantial Failure*" to "*When a State is not in Substantial Compliance.*"

20. Section 416.1070 is revised to read as follows:

§ 416.1070 Determining that a State is not in substantial compliance.

(a) *General.* We must assure the substantial compliance of States with our regulations and other written guidelines or assure their disability determination functions within a specified time. Our regulations and other written guidelines take precedence over conflicting State laws and regulations. We may find that a State is not in substantial compliance if it does not meet performance standards (see paragraph (b) of this section) or does not follow other provisions of our regulations and other written guidelines, without good cause (See § 416.1071).

(b) *Procedures.* We take specific steps within definite time frames before determining that a State is not in substantial compliance with our regulations and other written guidelines. These are:

(1) *Information that a State may not be in substantial compliance.* Where we receive information (e.g., from individuals, quality assurance reviews, etc.) that a State may not be following our regulations and other written guidelines, the matter will be investigated, as soon as possible, by SSA's regional office in whose jurisdiction the State is located to determine if the State is not in substantial compliance (see § 416.1071 if good cause is an issue). Examples of "not is substantial compliance" include:

(i) Failure to follow SSA's disability development and evaluation criteria,

(ii) Failure to process a certain class or classes of disability cases,

(iii) Failure to carry out the basic responsibilities of the State as described in § 416.1003(c), and

(iv) Failure to meet performance standards as described in § 416.1063. In cases involving continued failure to meet the performance standards, the mandated investigation will begin as soon as our information shows that the State has again failed to meet performance standards as described in § 416.1063.

(2) *Preliminary finding.* The SSA regional office will complete its investigation and we will make a preliminary finding on the matter within 21 days of receipt of the information. On the date that such finding is made, we will also notify the State in writing of the outcome. If there is a preliminary finding that the State is not in substanmtial compliance with our regulations and other written guidelines, the notice will include an explanation of the basis for the finding, i.e., which regulation or guideline is not being complied with and how we determined it. We will request assurance from the State's Governor or equivalent (or his or her designee) that the situation will be corrected.

(3) *Assurance by the State.* Any State notified of a preliminary finding that it is not in substantial compliance will have 21 days, from the date the finding was made, to provide assurance to us in writing that the situation will be corrected.

(4) *Monitoring and final determination.* If a State provides such

VOL 51 ISS 80 AP 25 1986 UMI

assurance, we will monitor the agency's performance for 30 days beginning with the day after the date on which the assurance has been provided. Within 60 days after the date on which the preliminary finding was made or 90 days after such date if the State is granted a hearing (see § 416.1060), the Commissioner (or his or her designee) will make a written final determination as to whether the State is substantially complying with our regulations and other written guidelines. This determination is not subject to judicial review.

(5) *Final determination that a State is not in substantial compliance and assumption of workload.* If we make a final determination that any State is not in substantial compliance with our regulations and other written guidelines, we will as soon as possible, but not later than 180 days after the date of such determination, assume responsibility for making disability determinations in that State. We will decide whether to assume all or part of the State's workload (e.g., the part in which the State is not in substantial compliance).

21. Section 416.1071 is revised to read as follows:

§ 416.1071 Good cause for not following our regulations and other written guidelines.

If a State has good cause for not following our regulations and other written guidelines, then we will not find that the State is not in substantial compliance. We will determine if good cause exists. Some of the factors relevant to good cause are:

(a) Disasters such as fire, flood, or civil disorder, that—

(1) Require the diversion of significant personnel normally assigned to the disability determination function, or

(2) Destroyed or delayed access to significant records needed to make accurate disability determinations;

(b) Strikes of State agency staff or other government or private personnel necessary to the performance of the disability determination function;

(c) Sudden and unanticipated workload changes which result from changes in Federal law, regulations, or written guidelines, systems modification or systems malfunctions, or rapid unpredictable caseload growth for a 6-month period or longer.

22. Section 416.1075 is removed and reserved.

§ 416.1075 [Removed and Reserved]

23. Section 416.1080 is revised to read as follows:

§ 416.1080 Discretionary hearings.

(a) *Request for hearing.* Within 55 days of a preliminary finding that a State is not in substantial compliance with regulations or other written guidelines, the State may request a hearing on the issue of substantial compliance. The request must be directed to the Commissioner of Social Security. The request may be oral but it must be confirmed in writing within 5 days. Written requests must be sent to the Commissioner of Social Security, Social Security Administration, P.O. Box 888, Baltimore, MD 21235.

(b) *Action on hearing request.* Within 60 days of the preliminary finding, we will notify the State as to whether or not such a request will be granted. If a hearing is granted, the notice will specify the time and the place of the hearing. Such hearing will be scheduled to begin no later than the 70th day after the date of the preliminary finding. The notice will also specify the regulations or other written guidelines with respect to which the State may not be in substantial compliance.

(c) *Conduct of hearing.* The hearing will be conducted by a hearing officer whom we designate. The State will have a maximum of 3 working days to present evidence and argument. The hearing officer's ruling with respect to evidence, persons who may attend the hearing, and other matters about the conduct of the hearing will not be appealable. The hearing officer will recommend a decision to us no later than 80 days after the date of the preliminary finding.

(d) *Final determination.* Within 90 days of the date of the preliminary finding, the Commissioner will make a written final determination as to whether the State is substantially complying with our regulations and other written guidelines. This determination is not subject to judicial review (see § 416.1070(b)(4)).

24. Section 416.1081 is revised to read as follows:

§ 416.1081 Disputes on other matters.

Disputes concerning monetary disallowances will be resolved in proceedings before the Health and Human Services Departmental Grant Appeals Board if the issue cannot be resolved between us and the State. Disputes other than monetary disallowances will be resolved through an appeal to the Commissioner of Social Security, who will make the final decision. (See § 416.1027)

25. Section 416.1090 is revised to read as follows:

§ 416.1090 Assumption of the disability determination function when we make a finding that a State is not in substantial compliance.

(a) *Notice to State.* When we find that a State is not in substantial compliance, we will notify the State in writing that we will assume responsibility for performing the disability determination function from the State agency, whether the assumption will be partial or complete, and the date on which the assumption will be effective.

(b) *Effective date of assumption.* The date of any partial or complete assumption of the disability determination function from a State agency may not be later than 180 days after the final determination finding that a State is not in substantial compliance.

(c) *Protection of State employees.* If we hire personnel to perform the disability determination functions assumed from the State, we will give employees of the State agency who are capable of performing duties in the disability determination program preference over any other persons in filling positions for which they are qualified. We may, but are not required to, extend this hiring preference to the State agency's administrator or the deputy or assistant administrator (or his or her equivalent). We may exceed any applicable personnel ceilings and waive any applicable hiring restrictions in this regard. Also, to the extent feasible within the 180-day period after the date of the final determination and in conjunction with the Secretary of Labor, we will assure the statutory protections under applicable Federal, State, and local law of State agency employees whom we do not hire.

28. Section 416, 1091 is amended by revising paragraph (b) and adding new paragraphs (c) and (d).

§ 416.1091 Assumption when a State no longer wishes to perform the disability determination function.

* * * * *

(b) *Effective date of assumption.* The State agency will continue to perform whatever activities of the disability determination function it is performing at the time the notice referred to in paragraph (a) of this section is given for not less than 180 days or, if later, until we have complied with the requirements of paragraphs (c) and (d) of this section. For example, if the State is not making disability determinations (because we previously assumed responsibility for making them) but is performing other activities related to the disability determination function at the time it gives notice, the State will continue to perform these activities until the requirements of this paragraph are met. Thereafter, we will assume complete responsibility for performing the disability determination function.

(c) *Protection of State employees.* We will develop and initiate procedures to implement a plan to partially or completely assume the disability determination function from the State agency under paragraphs (a) and (b) of this section. Except for the State agency's administrator, deputy administrator, or assistant administrator (or his or her equivalent), we will give employees of the State agency who are capable of performing duties in the disability determination function preference over any other persons in filling position with us for which they are qualified. We may also give a preference in hiring the State agency's administrator, deputy administrator, or assistant administrator (or his or her equivalent). We will establish a system for determining the hiring priority among the affected State agency employees in those instances where we are not hiring all of them.

(d) *Determination by Secretary of Labor.* We will not assume responsibility for performing the disability determination function from a State until the Secretary of Labor determines that the State has made fair and equitable arrangements under applicable Federal, State and local law to protect the interests of employees who will be displaced from their employment because of the assumption and who we will not hire.

§ 416.1092 [Removed and Reserved]

28. New §§ 416.1095 and 416.1096 are added to read as follows:

§ 416.1095 Cases decided by a State agency when the State is not in substantial compliance.

After a final determination that a State is not in substantial compliance and before we assume the disability determination function, we will take such action as may be necessary to assure that cases decided by the State agency are decided in accordance with applicable regulations and other written guidelines. We will determine whether the action is necessary in only certain classes of cases or in all of the cases processed by the State agency during the period.

§ 416.1096 Expiration date.

Section 17 of Pub. L. 98-460 will expire on December 31, 1987. Thereafter, it will no longer serve as the statutory basis for the regulatory provisions which specifically implement it.

[FR Doc. 86-8230 Filed 4-24-86; 8:45 am]
BILLING CODE 4150-11-M

Food and Drug Administration

21 CFR Ch. I

[Docket Nos. 75P-0250, 76N-0094, 76P-0329, 76P-0330, 76N-0336, 85N-0347, 85P-0348, 85N-0349, 85N-0350, 85N-0351, 85N-0352, 85N-0353, 85N-0354, 86N-0365, 85N-0362, and 85N-0497]

Withdrawal of Certain Proposed Rules and Food Products

AGENCY: Food and Drug Administration, HHS.

ACTION: Withdrawal of proposals.

SUMMARY: The Food and Drug Administration (FDA) is withdrawing several proposed rules that it published in the Federal Register before 1977 that relate to various food products. The agency's decision to withdraw these proposals is based on its limited resources to complete these rulemaking proceedings and on the likelihood that they have become outdated in the time that has elapsed since the publication of these proposed rules.

DATE: Comments by June 24, 1986.

ADDRESS: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, Rm. 4-62, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Louis B. Brock, Center for Food Safety and Applied Nutrition (HFF-302), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202-485-0162.

SUPPLEMENTARY INFORMATION: FDA is announcing the withdrawal of several proposed rules that relate to various food products. The agency's decision to withdraw these proposals is based on its limited resources to complete these rulemaking proceedings and on the likelihood that these proposals have become outdated in the time that has elapsed since their publication.

Because of the agency's limited resources and changing priorities, FDA has been unable to consider, in a timely fashion, the issues raised by the comments on these proposals. It is unlikely that the agency will have an opportunity to consider these issues in the foreseeable future. All of the proposed rules that are being withdrawn were published in the Federal Register before 1977. Because of the time that has passed since the proposals were issued, as well as changes that may have occurred in the conditions that bear on these proposals, the agency believes that it would be inappropriate to proceed further with any action on these proposals without the benefit of updated public comments.

The withdrawal of a proposed rule neither means that FDA has necessarily lost interest in the issues addressed by the proposal nor precludes the agency from reinstituting proceedings to promulgate a rule concerning those issues. Should the agency decide to undertake such a rulemaking, it will repropose the action and provide opportunity for comment. Moreover, many of these proposals were issued in response to citizen petitions. The agency's current action would not preclude interested persons from filing new petitions on any of the issues covered by the proposed rules the FDA is withdrawing.

For the reasons set out above, and under the Federal Food, Drug, and Cosmetic Act (secs. 201, 402, 403, 701, 52 Stat. 1040-1042 as amended, 1048-1048 as amended, 1055-1056 as amended (21 U.S.C. 321, 342, 343, 371)), the agency is withdrawing the following proposed rules, published in the Federal Register on the dates indicated:

Title	Docket No.	FR publication date and cite
Whipped cream; whipped table cream	85N-0347	Oct. 2, 1969 (34 FR 7984).
Change in status of GRAS or prior-sanctioned substances; proposed statement of policy	85N-0362	Sept. 28, 1971 (36 FR 19092).
Uniform method of declaring the percentage of an ingredient in foods	85N-0350	June 14, 1974 (39 FR 20865).
Nutrition labeling; serving and portion sizes and daily consumption amounts	85N-0349	June 14, 1974 (39 FR 20867).
General flours and related products; improvement of nutrient levels of enriched farina	85N-0497	June 14, 1974 (39 FR 20881).
Breakfast beverage products	85N-0351	June 14, 1974 (39 FR 20883).
Fortified hot breakfast cereals	85N-0353	June 14, 1974 (39 FR 20898).
Fortified ready-to-eat breakfast cereals	85N-0352	June 14, 1974 (39 FR 20898).
Formulated meal replacements	85N-0355	June 14, 1974 (39 FR 20905).
Main dish products	85N-0354	June 14, 1974 (39 FR 20909).
Carbonated soft drink beverages; serving and portion sizes	85P-0348	Jan. 29, 1975 (40 FR 4316).
Fruit flavored sweetened spreads	75P-0250	Nov. 11, 1975 (40 FR 52616).
Substitute for margarine (oleomargarine) or butter	76N-0336	Aug. 30, 1976 (41 FR 36509).

VOL 51 ISS 80 AP 25 1986 UMI

Title	Docket No.	FR publication date and cite
Infant and junior foods	76P-0330	Sept. 7, 1976 (41 FR 37593).
Infant foods, percentage declaration of ingredients	76P-0329	Sept. 7, 1976 (41 FR 37595).
Raw breaded shrimp	76N-0094	Oct. 22, 1976 (41 FR 46606).

Interested persons may, on or before June 24, 1986, submit written comments to the Dockets Management Branch (address above). Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document and with the docket number of the invididual proposed rule being withdrawn if the comment relates to a specific proposal. FDA will consider any comments received. Received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: April 16, 1986.

Frank E. Young,

Commissioner of Food and Drugs.

DEPARTMENT OF LABOR

Wage and Hour Division

29 CFR Part 553

Application of Fair Labor Standards Act to Employees of State and Local Governments; General

Correction

In FR Doc. 86-8685 beginning on page 13402 in the issue of Friday, April 18, 1986, make the following corrections:

1. On page 13403, in the second column, in the seventh line from the bottom, add "of" after "employees".

2. On page 13404, in the first column, in paragraph (4), in the fourth line, "hours" should read "hour".

§ 553.11 [Corrected]

3. On page 13405, in the third column, in § 553.11(b), the last sentence should read: "The term typically does not include individuals who are directly supervised by someone other than the elected official even though they may have been selected by the official. For example, the term might include the elected official's personal secretary, but would not include the secretary to an assistant."

§ 553.23 [Corrected]

4. § 553.23, on page 13407, in the second column, in paragraph (c)(2), in the next to the last line, "(a)(1)" should read "(c)(1)".

§ 553.31 [Corrected]

5. In § 553.31, on page 13410, in the first column, in paragraph (c), in the fourth line, "requires" should read "required"; in paragraph (d), in the sixth line, "required" should read "requires".

BILLING CODE 4310-05-M

FEDERAL MARITIME COMMISSION

46 CFR Part 515

[Docket No. 86-15]

Filing of Tariffs by Marine Terminal Operators; Exculpatory Provisions

AGENCY: Federal Maritime Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Maritime Commission proposes to amend its rules governing the filing of terminal tariffs by marine terminal operators to prohibit certain tariff provisions that exculpate or otherwise relieve marine terminal operators from liability for their own negligence, or that impose upon others the obligation to indemnify or hold harmless terminal operators from liability for their own negligence. Comments and suggestions are also requested on the formulation of a limited exception to this general prohibition which would apply where the user of the port facility assumes certain risks to obtain rate concessions or the terminal operator relinquishes certain operational control to the user.

DATE: Comments due on or before June 24, 1986.

ADDRESS: Comments (original and 20 copies) to: John Robert Ewers, Secretary, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523-5725.

FOR FURTHER INFORMATION CONTACT:

Robert G. Drew, Director, Bureau of Tariffs, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523-5795.

Robert D. Bourgoin, General Counsel, Federal Maritime Commission, 1100 L Street, NW., Washington, DC 20573, (202) 523-5740.

SUPPLEMENTARY INFORMATION: Over the past decade the Commission has considered a number of tariff provisions in marine terminal tariffs that relieve the port or terminal operator of certain liabilities which might otherwise be the responsibility of the port or terminal operator. These provisions have consistently been found to be unjust and unreasonable practices, and therefore, unlawful under section 17 of the Shipping Act, 1916 (1916 Act), 46 U.S.C. app. 816. The mandate of the 1916 Act that ports must establish, observe, and enforce just and reasonable regulations and practices relating to or connected with the receiving, handling, storing or delivering of property is also contained in the Shipping Act of 1984 (1984 Act), 46 U.S.C. app. 1701-1720, at section 19(d)(1), 46 U.S.C. app. 1709(d)(1).

The Commission first determined that an exculpatory clause was invalid under section 17 of the 1916 Act in *Truck and Lighter Loading and Unloading Practices at New York Harbor*, 9 F.M.C. 505 (1966). The clause at issue there provided:

> The Terminal Operator assumes no responsibility for delays to motor vehicles and no claims for such delays will be honored.

The Commission held that it was neither just nor reasonable for the New York Terminal Conference to disclaim responsibility for delay caused by the terminals, although terminal operators could disclaim liability for causes of delay beyond their control.

A more comprehensive exculpatory provision was subsequently found unlawful in *I. Charles Lucidi* v. *The Stockton Port District*, 22 F.M.C. 19 (1979). Stockton's tariff provided:

> The Port of Stockton shall not be responsible for any injury to freight on or in its facilities, by fire, leakage, evaporation, natural shrinkage, waterage, decay, animals, rats, mice, other rodents, moths, weevils, other insects, weather conditions, sweat moisture, the elements, or discharge of water from breakdown of plant, machinery, other equipment, collapse of building or structure, insurrection, war, or shortage of labor; for delay, loss or damage arising from riots, strikes, labor or other disturbances of any persons or of any character beyond the control of the Port of Stockton.

The *Stockton* decision generally followed the rule of law established in *Truck and Lighter* with respect to a port tariff provision that would exculpate a port from liability for damages caused by the fault, in whole or in part, of the port. The Commission followed this principle in finding port tariff exculpatory provisions invalid in *United States Lines* v. *Maryland Port Administration*, 20 S.R.R. 646 (1980).

The Commission has also determined to be unlawful provisions that require port facility users to hold-harmless or indemnify the port authority from liability for the port's *own* negligence. An "indemnity" provision was found unlawful on this basis in *West Gulf Maritime Association* v. *The City of Galveston*, 22 F.M.C. 101 (1979). The Commission stated there that:

> Although the port's indemnification requirement in the instant proceeding would not apply if the port were wholly responsible for an occurrence, it would apply in situations in which the port were partially responsible, even if more so than the user. We find that the indemnity requirements and the waiver of claims and subrogation provisions of the port's tariff are unreasonable for precisely the reasons enunciated in *Bisso, Truck and Lighter*, and *Lucidi*.

More recently, in *Central National Corporation* v. *Port of Houston Authority*, 22 S.R.R. 795 (1984), the Commission struck down both a general exculpatory provision and an indemnity provision, the latter reading as follows:

> Users of its facilities agree to indemnify and save harmless the port authority from and against all losses, claims, demands and suits for damages . . . including court costs and attorney's fees, incident to or resulting from their operation on the property of the port authority.

The Commission has taken similar action in the past year in situations where port authorities have attempted to impose exculpatory tariff provisions on port users. *Wilmington Stevedores, Inc.* v. *the Port of Wilmington, Del.*, 23 S.R.R. 409 (1985); *Stevens Shipping and Terminal Co.* v. *South Carolina State Port Authority*, 23 S.R.R. 684 (1985); *Southeastern Marine Company* v. *Georgia Ports Authority*, ____ S.R.R. ____ (1986).

All the above-cited Commission decisions stand for a clear principle of law that the Commission proposes to codify in its terminal tariff regulations, 46 CFR Part 515. Tariff provisions that exculpate or otherwise relieve marine terminal operators from liability for their own negligence, or that would impose upon others the obligation to indemnify or save harmless the terminals from liability for their own negligence, are, as a rule, unjust and unreasonable and, therefore, contrary to the provisions of section 17 of the Shipping Act, 1916 and section 10(d)(1) of the Shipping Act of 1984.

While the rule actually being proposed in this proceeding absolutely prohibits exculpatory or hold-harmless provisions in marine terminal tariffs, the Commission is also soliciting comments on a possible limited exception to that rule. Such an exception might apply where users of terminal facilities, in consideration for rate and operational concessions by the terminal operator, agree to assume the risks inherent in certain terminal operations. That conditions at a port might justify a hold-harmless and indemnification provision in a terminal tariff under such circumstances was suggested by the Initial Decision in *Lucidi*, where it was stated:

> To the extent that the provisions of [Stockton's tariff] would relieve the port from [liability for damage] to property caused in whole or in part by the fault of the port and without a *quid pro quo* of any kind, such provisions are unjust and unreasonable, in violation of section 17 of the Act.

22 F.M.C. at 29.

BEST COPY AVAILABLE

VOL 51 ISS 80 AP 25 1986 UMI

The form of a possible exception to the general prohibition against exculpatory and hold-harmless provisions might be as follows:

Terminal tariffs may contain hold-harmless and indemnification provisions for specific risks and hazards in terminal operations that port facility users have agreed to assume from the terminal operator but only if such provisions plainly indicate that such assumption by the users is in consideration for the terminal operator's specific concomitant concessions in rates or relinquishment of control to the user over the operations for which the user is assuming liability or providing indemnification.

The Commission therefore requests comments on this or a similar exception. Commenters are asked to address whether any exception is proper as a matter of law, advisable as a matter of policy and administratively feasible. Where appropriate, comments to the proposed rule or rule exception should include suggested implementing language.

The Commission has determined that this proposed rule is not a "major rule" as defined in Executive Order 12291, dated February 17, 1981, because it will not result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographical region; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovations, or on the ability of United States-based enterprises to compete in domestic or export markets.

The Chairman of the Federal Maritime Commission certifies pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), that this rule, if adopted, will not have a significant economic impact on a substantial number of small entities, including small businesses, small organizational units or small governmental organizations.

The Paperwork Reduction Act, 44 U.S.C. 3501–3520, does not apply to this Notice of Proposed Rulemaking because the proposed amendments to Part 515 of Title 46, Code of Federal Regulations, do not impose any additional reporting or recordkeeping requirements or collection of information from members of the public which require the approval of the Office of Management and Budget.

PART 515—[AMENDED]

Therefore, for the reasons set forth above, Part 515 of Title 46, Code of Federal Regulations, is proposed to be amended as follows:

1. The authority citation to Part 515 is revised to read as follows:

Authority: 5 U.S.C. 553; 46 U.S.C. app. 816, 820, 841a, 1709, 1714 and 1716.

2. A new § 515.7, entitled "Exculpatory Tariff Provisions," is added to read as follows:

§ 515.7 Exculpatory tariff provisions.

No terminal tariff shall contain provisions that exculpate or otherwise relieve marine terminal operators from liability for their own negligence, or that impose upon others the obligation to indemnify or hold-harmless the terminals from liability for their own negligence.

By the Commission.

Tony P. Kominoth,

Assistant Secretary.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. 86-052]

Availability of Environmental Assessment and Finding of No Significant Impact for the Licensing of a Recombinant Derived Pseudorabies Virus Vaccine

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This document provides notice that an environment assessment and finding of no significant impact has been prepared by the Animal and Plant Health Inspection Service concerning the issuance of a veterinary biological product license issued to TechAmerica Group Inc., for a recombinant derived pseudorabies virus vaccine. The assessment indicates that the licensing of the recombinant derived pseudorabies virus vaccine will not cause any significant impact on the environment. Based upon this finding of no significant impact the Animal and Plant Health Inspection Service has determined that an environmental impact statement need not be prepared.

ADDRESS: Copies of the environmental assessment and finding of no significant impact are available for public inspection at the Veterinary Biologics Staff, Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 829, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782. Copies of the environmental assessment are also available upon request at this same address.

FOR FURTHER INFORMATION CONTACT: David Espeseth, Senior Staff Veterinarian, Veterinary Biologics Staff, Veterinary Services, Animal and Plant Health Inspection Service, U.S. Department of Agriculture, Room 829, Federal Building, 6505 Belcrest Road, Hyattsville, MD 20782, (301) 436–8245.

SUPPLEMENTARY INFORMATION: The Animal and Plant Health Inspection Service (APHIS) has prepared an environmental assessment and finding of no significant impact relative to its licensing of a recombinant derived pseudorabies virus vaccine under the Virus-Serum-Toxin Act (VSTA) 21 U.S.C. 151 et seq.) produced by TechAmerica Group, Inc.

The environmental assessment and finding of no significant impact provides the public with documentation of USDA's review and analysis of environmental concerns.

Under the VSTA, before a veterinary biological product can be licensed it must be shown to be pure, safe, potent, and efficacious. In the course of reviewing safety data for the recombinant derived pseudorabies virus vaccine APHIS assessed the impact of the licensure of the product on the environment, as set forth in the environmental assessment.

The facts supporting APHIS' finding of no significant impact are summarized below and are contained in the environmental assessment.

1. Genetic engineering procedures were employed to delete a gene which is essential for virus replication making the recombinant derived virus used in the vaccine much safer than naturally occurring or conventional modified vaccine virus.

2. The recombinant derived vaccine virus was rendered essentially avirulent using conventional methodology.

4. Use of vaccine virus can help to control the shed and spread of the virulent field strains of the virus from health animals.

5. Data established that the genetically engineered gene deletion was a stable characteristic of the vaccine virus with an extremely low probability of reversion.

6. The recombinant derived vaccine virus has been shown to have a reduced virulence for other animal species.

7. The recombinant derived strain of the virus is not considered oncogenic or pathogenic to man.

Based on the foregoing, APHIS has determined that licensure of the recombinant derived pseudorabies virus vaccine would have no significant environmental impact on the human environment.

The environmental assessment and finding of no significant impact has been prepared in accordance with (1) The National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4331 et seq.); (2) Regulations of the Council on Environmental Quality for Implementing the Procedural Provisions of NEPA (Title 40, Code of Federal Regulations (CFR) Parts 1500–1508); (3) USDA regulations implementing NEPA (7 CFR Part 1b); and (4) APHIS Guidelines Implementing NEPA (44 FR 50381–50384 and 44 FR 51272–51274).

Done at Washington, DC., this 22nd day of April, 1986.

Billy G. Johnson,

Acting Deputy Administrator, Veterinary Services, Animal and Plant Health Inspection Service.

DEPARTMENT OF COMMERCE

International Trade Administration

Foreign Buyer Program; Support for Domestic Trade Shows

AGENCY: International Trade Administration, U.S. Department of Commerce.

ACTION: Notice of Implementation of the 1987 Foreign Buyer Program.

SUMMARY: This notice sets forth objectives, circumstances and application review criteria associated with the Department's program to support domestic U.S. trade shows.

DATE: These administrative procedures were effective April 22, 1986.

ADDRESS: Export Promotion Services/ Foreign Buyer Program, U.S. and Foreign Commercial Service (US&FCS), International Trade Administration, U.S. Department of Commerce, Room 2808, 14th and Constitution Avenue, N.W., Washington, D.C. 20230, (202/377-0872).

FOR FURTHER INFORMATION CONTACT: Mike Frisby, Director, Marketing Development Division, Export Promotion Services, U.S. and Foreign Commercial Service, International Trade Administration, U.S. Department of Commerce, 14th & Constitution Avenue, N.W. Room 2808, Washington, D.C. 20230 (202/377-0872).

SUPPLEMENTARY INFORMATION:

Introduction

The International Trade Administration of the U.S. Department of Commerce is accepting applications for the 1987 Foreign Buyer Program.

The Foreign Buyer Program was established to select and promote leading trade shows in the United States in high export potential industries. This program supplants the Trade Fair Certification Program for domestic (U.S.) shows.

The Foreign Buyer Program was created in order to give hands-on assistance to U.S. companies interested in exporting. This assistance is given through increased counseling, marketing analysis, and overseas promotion to potential buyers, agents, and distributors. Shows selected for the Foreign Buyer Program will provide a venue for U.S. companies interested in expanding their products into international markets.

As part of its mission to foster, promote, and develop U.S. commerce, the Department has for many years assisted U.S. firms participating in domestic trade shows to meet with potential foreign buyers, agents and distributors.

In keeping with this policy, the Department implemented the Foreign Buyer Program in May 1985. Under this program, the Department selects and promotes domestic trade shows in potential high-export industries in order to bring foreign buyers together with U.S. firms. The program provides assistance to show organizers in identifying and recruiting new-to-market/new-to-export firms to exhibit in these trade shows.

The Department will select up to 15 events during calendar year 1987. The Department will select those events which satisfy the general selection criteria and which, in its judgment, most clearly meet the Department's objectives. For this reason, failure to be selected should not be interpreted as a finding that the event will not be successful in promoting U.S. exports.

Department of Commerce Support of Foreign Buyer Program Events. The support provided for selected events may differ depending on the specific needs identified and agreed upon by the Department and the show organizer. Services will include, but may not be limited to, special overseas marketing efforts by the staff of the U.S. and Foreign Commercial Service. Such marketing activities include contacting key foreign government and private sales prospects and providing publicity in appropriate Departmental periodicals. US&FCS Account Executive and trade specialists in District Offices identify new-to-export/new-to-market U.S. companies for participation in trade shows.

Specific Department Actions. For selected shows the Department of Commerce will:

(a) Designate an Account Executive as a central contact to work with the show organizer on all aspects of promotion abroad and foreign buyer assistance at the show. The Account Executive will work with the show organizer contact to develop a promotion marketing plan and overall promotional timetable.

(b) Prepare and distribute an informational letter and form ITA-4014P to CEOs (if available) of exhibiting U.S. companies to determine their international business objectives in meeting with foreign buyers (Form 4014P has been approved by the Office of

VOL 51 ISS 80 AP 25 1986 UMI

Management and Budget under control number 0625-0151).

(c) Contact U.S. companies exhibiting at the event and encourage them to meet with foreign buyers attending the show. The Department will print an *Export Interest Directory*, containing pertinent information on those companies that express such interest. *The Export Interest Directory* will list U.S. company names, products or services they wish to export, types on international marketing objective (agent/distributor/direct sales etc.) and geographic areas of interest to the company. This document will be distributed to all U.S. Embassies and Consulates sixty (60) days prior to the event.

(d) Advise and work closely with all interested U.S. Embassies and Consulates to assure maximum trade show promotion.

(e) Promote industry trade show participation through announcements in key domestic and international publications (e.g., regional, posts and embassy commercial newsletters, *Business America*, *Export Promotion Calendar* and *Commercial News USA*).

(f) Provide show organizer with specifications of a DOC-designed International Business Center (IBC), including furniture requirements, DOC office, conference rooms, storage area, etc.

(g) Provide show organizer with specifications for a multi-language brochure; U.S. Embassy/Consulate address labels, shipping instructions and quantities for overseas shipment.

(h) Review with the show organizer potential support by appropriate trade associations, state development agencies, banks, transportation companies, chambers of commerce, and other organizations.

(i) Provide a final show report to both the show organizer and promote Embassies/Consulates not later than 90 days after the show.

(j) Request US&FCS Domestic Offices to provide export counseling or specific marketing information to those U.S. participants which have indicated a need for such counseling both prior to and during the show.

Services Provided at Trade Show Site

(a) Two (2) Account Executives will provide primary management of the International Business Center (IBC) and assist in on-site registration (if appropriate) of foreign buyers and post-organized groups, facilitate matching foreign buyers with exhibiting at trade show about available US&FCS products and services.

(b) Provide export counseling or specific geographic marketing information to exhibitors in a designated area in the International Business Center by a trade specialist from a US&FCS Domestic Office and offer information on all US&FCS products and services. Assist foreign buyers to meet their purchasing/representation objectives during the show.

(c) Participate, as appropriate, in special export service seminars specifically aimed at new-to market/new-to-export firms exhibiting at trade show.

(d) Encourage local bank and financial institutions to have a representative available to provide export finance counseling.

Specific Responsibilities of the Show Organizer

(a) Designate an official authorized to work with the US&FCS Account Executive on all aspects of the show promotion.

(b) Provide the Account Executive with a contact during the show to assist with foreign visitor information and product referral.

(c) Provide the US&FCS with a current list of exhibitors, with names and address of CEO or appropriate contact. The name of contact should, if possible, be the decision maker of the exhibiting firm on international matters. The exhibitor list should be on gummed mailing labels.

(d) Produce and distribute a multi-language promotional brochure in the quantities specified by the Account Executive. Draft of brochure must be approved by the Account Executive prior to printing. These brochures must be printed not less than six months prior to the show.

(e) Provide all exhibitors at the convention site with information about the IBC and US&FCS services.

(f) If available, provide to the US&FCS names and addresses of foreign attendees at previous shows. Provide a list of pre-registered foreign attendees at the current show, including names, addresses, and business interests. Both lists are to be provided by country and on a mutually agreed date.

(g) Establish a registration system to assure US&FCS Account Executives access to all foreign attendees at time of registration. On a daily basis provide number of registered foreign attendees, if possible.

(h) Establish an International Business Center (IBC) at the show in a prominent location, preferably adjacent to the main registration area. Show organizer agrees to construct the IBC (minimum of 1000 sq. ft.) according to DOC design specifications which should include: (a) A separate registration area for foreign visitors; (b) appropriate furniture and office equipment, telephone, assured access to international calling, telex, etc; (c) interpreters; (d) registration staff and support; and (e) DOC office conference rooms, storage area, refreshments, lounge, etc. The IBC must be given high visibility in show catalog/program and daily newletters, floor plans, and by strategically placed signs at the exhibition entrance, registration area and on the exhibition floor.

(i) On an agreed date following the show, provide the US&FCS with a registration printout of the names and addresses of the foreign attendess, by country.

(j) Upon notification of acceptance into the Foreign Buyer Program, remit the appropriate user fee. For calendar year 1987 the fee is $3,000.

Selection. Selection indicates that the Department has found the event to be a leading international trade show worthy of participation by U.S. exporting firms and promotion in overseas markets by U.S. Embassies and Consulates. Selection does not constitute a guarantee by the U.S. Government of success of the show or of the undertakings or obligations of the show organizer. Selection is not an endorsement of the show organizer except as to its Foreign Buyer activities. Each successful applicant will be given copies of an official U.S. Department of Commerce logo and/or logo of the U.S. and Foreign Commercial Service for use in its advertising promotional materials.

General Selection Criteria. Subject to Departmental budget and resource constraints, selection will be granted to those events which, in the judgment of the Department, most clearly and best meet the following criteria:

(a) *Export Potential:* The products and services to be promoted at the trade show should be from U.S. industies which have high export potential as determined by U.S. Department of Commerce sources.

(b) *International Interest:* Trade shows will be selected which meet the needs of a significant number of overseas markets covered by the U.S. and Foreign Commercial Service, correspond to marketing opportunities as identified by these posts, and which warrant the attention and promotional effort by those overseas posts. Previous foreign audience attendance at the show may be used as an indicator.

(c) *Scope:* The event must offer a broad spectrum of U.S. products and/or services. Trade shows with a majority of American firms exhibiting will be given preference.

(d) *Stature:* The trade show must be clearly recognized by the industry it covers as a leading event for the promotion of that industry's products and services both domestically and internationally and as a showplace for the latest technology or techniques in that industry.

(e) *Exhibitor Interest:* There must be a clearly demonstrated interest on the part of U.S. exhibitors to receive international business visitors during the trade show. A significant number of these exhibitors should be new-to-export or seeking to expand into additional foreign markets.

(f) *Logistics:* The trade show site, facilities, transportation services and availability of accommodations must be in keeping with the stature of an international-class trade show.

(g) *Cooperation:* Successful applicants will be required to enter into a Memorandum of Understanting which sets forth the specific actions to be performed by the show producer/owner and the USDOC. There must be a willingness on the part of the trade show organizer to cooperate with the US&FCS to further ITA export expansion goals.

When, Where and How To Apply for Selection in the 1987 Foreign Buyer Program

Collection of the information required in an application is authorized by law (15 U.S.C. 1512 *et seq.*). The Office of Management and Budget has approved the information collection requirement contained in these regulations under the provisions of the Paperwork Reduction Act of 1980 (Pub. L. 96-511). OMB Control Number 0625-0130. Approved for use through 08/31/88.

A trade show will not be considered for the 1987 Foreign Buyer Program unless a completed application has been received by the Marketing Development Division no later than June 6, 1986. Applications reviewed will be considered for a calendar year 1987 only. Shows not selected and which want Foreign Buyer Program support for a succeeding year must submit a new application.

Except to the extent required by laws, no information of a proprietary nature reported on this form will be disclosed without the prior written consent of the relevant firm.

Please type the information requested on company letterhead and mail three (3) complete sets of your application to: Office of Marketing Program, U.S. and Foreign Commercial Service, International Trade Administration, Room 2808, U.S. Department of Commerce, 14th and Constitution Avenue N.W., Washington, D.C. 20230

(1) Name of show.

(2) Site of show.

(3) Dates of show. Indicate if show is held annually, biennially, or other.

(4) Name, address, and phone number of applicant.

(5) Name, address, and phone number of applicant contact.

(6) Name, address, and phone number of show sponsor (trade association, national or state government, etc.)

(7) Basic history or description of show. Applicant must demonstrate that subject is a leading international trade show for the industry. Include copies of previous show promotion materials.

(8) Resume of applicant's show experience.

(9) Planned number of U.S. exhibitors. A majority of show exhibitors must be of U.S.A. origin.

(10) Specify gross area of show (sq. ft.or sq. mtrs.). Net area for exhibit space (show U.S. and foreign separately).

(11) Admission fees for show visitors and indicate if there is a reduced fee for international visitors.

(12) Description of technical program and cost to attend (if applicable).

(13) Product categories to be displayed.

(14) Audience profile of potential foreign customers (target countries, industries, profession or technical level).

(15) Submit 3 sets of all show promotional literature, including show catalog, for previous show.

Applicant must type the following on the application and submit with the appropriate signature:

"The above information is correct and the applicant will abide by the terms set forth in the Notice of Implementation of the Foreign Buyer Program fior 1987, No —— Federal Register Notice, Date ——."

Applications will be processed by the Marketing Development Division, Export Promotion Services and final selection of events will be made by June 27, 1986.

Fee: The Department will charge a fee of $3,000 for shows selected and promoted during calendar year 1987.

Mike Frisby,

Director, Marketing Development Division, Export Promotion Services, U.S. and Foreign Commercial Service, International Trade Administration, U.S. Department of Commerce.

VOL 51 ISS 80 AP 25 1986 UMI

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List 1986, Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to Procurement List.

SUMMARY: This action adds to Procurement List 1986 a commodity to be produced by and services to be provided by workshops for the blind or other severely handicapped.

EFFECTIVE DATE: April 25, 1986.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3500.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On July 19, November 15, December 13, 1985, and January 24 and February 7, 1986, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (50 FR 29469, 50 FR 47245, 50 FR 50936, 51 FR 3237 and 51 FR 4785) of proposed additions to Procurement List 1986, October 15, 1985 (50 FR 41809).

Additions

After consideration of the relevant matter presented, the Committee has determined that the commodity and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c, 85 Stat. 77 and 41 CFR 51-2.6.

I certify that the following actions will not have a significant impact on a substantial number of small entities. The major factors considered were:

a. The actions will not result in any additional reporting, recordkeeping or other compliance requirements.

b. The actions will not have a serious economic impact on any contractors for the commodity and services listed.

c. The actions will result in authorizing small entities to produce the commodity and services procured by the Government.

Accordingly, the following commodity and services are hereby added to Procurement List 1986:

Commodity

Dining Packet 7360-01-]10-2020.

Services

Commissary Shelf Stocking for the following locations in San Diego, California:

1. Naval Station
2. Naval Air Station-Miramar
3. Naval Air Station, North Island
4. Naval Training Center

Commissary Shelf Stocking, Branch Commissary Store, Little Creek Naval Amphibious Base, Building 3324, Norfolk, Virginia

Branch Commissary Store, Building 350, Norfolk Naval Shipyard, Portsmouth, Virginia, and

Janitorial/Custodial, Federal Building, 500 Quarrier Street, Charleston, West Virginia

C. W. Fletcher,

Executive Director.

BILLING CODE 6820-33-M

Procurement List 1986, Proposed Additions and Deletions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Additions to and Deletions from Procurement List.

SUMMARY: The Committee has received proposals to add to and delete from Procurement List 1986 commodities to be produced by and services to be provided by workshops for the blind or other severely handicapped.

Comments must be received on or before May 28, 1986.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 5, Suite 1107, 1755 Jefferson Davis Highway, Arlington, Virginia 22202-3500.

FOR FURTHER INFORMATION CONTACT: C.W. Fletcher, (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2), 85 Stat. 77 and 41 CFR 51-2.6. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

Additions

If the Committee approves the proposed additions, all entities of the Federal Government will be required to procure the commodity and services listed below from workshops for the blind or other severely handicapped.

It is proposed to add the following commodity and services to Procurement List 1986, October 15, 1985 (50 FR 41809):

Commodity

Pillow, Bed Feather, 7210-00-205-3205, (Portion of Government requirement not on Procurement List)

Services

Commissary Warehousing Service, Columbus Air Force Base, MS

Janitorial/Custodial

Potomac Annex Building 1-7, 23rd Road & E Street NW.

Central, East & South Buildings, 2430 E Street NW. and 1734 F Street NW. Washington, DC

Deletions

It is proposed to delete the following commodities and service from Procurement List 1986, October 15, 1985, (50 FR 41809):

Commodities

Pad, Examining Table, 6530-00-960-6616

Pad, Hospital Stretcher, 6530-00-259-0004

Service

Commissary Shelf Stocking and Custodial, Peterson Air Force Base, CO

BILLING CODE 3710-08-M

DEPARTMENT OF EDUCATION

Office of Special Education and Rehabilitative Services

National Institute of Handicapped Research, Funding Priorities

AGENCY: Department of Education.

ACTION: Notice of final funding priorities for research fellowships for fiscal year 1986.

SUMMARY: The Secretary of Education announces final funding priorities for research fellowships to be supported by the National Institute of Handicapped Research (NIHR) in fiscal year 1986. In the past, NIHR has funded some fellowships without specifying priority areas, as well as a number of fellowships based on announced priorities. The regulations provide that the Secretary may set priorities when there are critical areas to be addressed. The Secretary has determined that research fellows are needed in the following priority areas; utilization of rehabilitation technology; rehabilitation research training and utilization; medical rehabilitation finance policy; rehabilitation information technology; rehabilitation service statistics; and mental retardation research.

EFFECTIVE DATE: These priorities take effect either 45 days after publication in the Federal Register or later if Congress takes certain adjournments. If you want to know the effective date of these priorities, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Rheable Edwards, National Institute of Handicapped Research. Telephone (202) 732-1200 deaf and hearing impaired individuals may call (202) 732-1198 for TTY services.

SUPPLEMENTARY INFORMATION: The purpose of this program is to build research capacity and also to allow the Secretary to obtain the benefits of research conducted by highly qualified individuals. This research has a direct bearing on the development of programs, methods, procedures, and devices to assist in the provision of rehabilitative services to individuals.

NIHR fellowship regulations in 34 CFR Part 356, (46 FR 45312, September 10, 1981, as amended June 18, 1984 at 49 FR 24978), authorize the Secretary to establish priorities for fellowships by reserving funds to support fellowships in particular areas.

These priorities were proposed for public comment through publication in the Federal Register on November 20, 1985 (50 FR 47797). One comment was received, suggesting that NIHR add a fellowship in adaptive environmental design. No changes were made to the proposed fellowship priorities since NIHR is announcing a priority for a Research and Demonstration project in this area.

The publication of these priorities does not bind the United States Department of Education to fund fellowships in any or all of these research areas. Funding of particular fellowships depends on both the availability of funds and on the receipt of satisfactory applications.

Priorities

• Fellow in Utilization of Rehabilitation Technology

There have been significant advances in the development of technology to enhance communication, mobility, independent living, employment, and education for disabled individuals. However, there are indications that many disabled individuals are not obtaining the maximum possible benefits of existing technology due to deficits in the systems for publicizing, distributing, and financing rehabilitative technology, aids, and devices, and in the integration of technology into the total rehabilitation service delivery system.

An absolute priority will be given to applications for a fellow in this area who will:

• Review the various funding resources which finance the purchase and maintenance of technological devices as well as the support services necessary to achieve full use of technology (including various significant Federal, State, voluntary, and private funding sources);

• Analyze various financing options and the long and short-term cost implications of each;

• Analyze the techniques and effects of publicizing technological devices for rehabilitation; and

• Review the frequency and adequacy of distribution and financing of various types of technology and determine whether certain categories of technology or types of devices require special efforts to assure more adequate distribution (e.g., so-called "orphan technologies").

• *Fellow in Rehabilitation Research Training and Utilization.*

VOL 51 ISS 80 AP 25 1986 UMI

There is a substantial mass of new knowledge in the area rehabilitation regularly generated by research efforts, including those funded by NIHR through the Research and Training Centers (RTCs) and the Rehabilitation Engineering Centers (RECs). However, preliminary observations suggest that research accomplishment could have more impact if there were improved efforts at dissemination of information and training of relevant audiences in the utilization of research results.

An absolute priority will be given to applications for a fellow in this area who will:

• Assess the "state-of-the-art" in information dissemination in the rehabilitation research field, including a survey of the practices and products developed for information dissemination in the RTCs and RECs as leaders in the rehabilitation research field;

• Review current training programs designed to prepare service practitioners and other relevant audiences to use new knowledge and techniques developed through research; such a review would discover the types of audiences involved, levels, funding sources, length and intensity of training, and the knowledge bases from which curricula are developed;

• Assess the extent of collaboration among various training providers such as RTCs and RECs, in such areas as the development of training agenda, information sharing, and shared curriculum development; and

• Develop one or more models for improved information dissemination and training procedures in major research centers, including methods of staffing, planning, materials development, audience identification, targeting audiences, and self-assessment.

• *Fellow in Medical Rehabilitation Finance Policy.*

Mechanisms and sources of payment for restorative rehabilitation services in this country are diverse and complex. The multiplicity of Federal payment and reimbursement programs, as well as statutory, policy, and procedural variations in implementing Federally-authorized programs at the State and local level are not clearly understood. In addition, there are State and private sector sources of funding for rehabilitation hospital and restorative services, but it is unclear what services are covered, who pays for which rehabilitation services, and what mechanisms of payments are used. Recent development in payment mechanisms for medical services, such as the emergence of health maintenance organizations (HMOs), the development of Medicare's Prospective Payment System (PPS), and the continuing evolution of Preferred Provider Organizations and other competition-promoting service financing strategies seems to be fostering the proliferation of medical rehabilitation facilities. Some suggest that this apparent trend is due to the temporary exclusion of medical rehabilitation services from Medicare's PPS and its cost-reduction implications. This phenomenon, however, is not well-documented or well-explained, nor are the implications clear for the availability and quality of services. The rehabilitation community should be developing new models for the deployment of funds for rehabilitative services and also defining policy issues in which a better understanding is needed.

An absolute priority will be given to applications for a fellow in this area who will:

• Identify and assess Federal and State sources of payment and reimbursement for medical rehabilitation facilities and services, and describe the major private sector sources of payment and reimbursement for restorative rehabilitation services, including private health insurance, voluntary agencies, and corporate self-insurance; and

• Develop one or more models for planning for the most effective use of funds through current sources for the purchase of medical rehabilitation services.

• *Fellow in Rehabilitation Information Technology.*

In recent years there has been a proliferation of new technologies to support rapid and efficient exchange of information and communication among geographically and administratively diverse agencies. New technologies include computers, electronic mail, teleconferencing, database systems, computer-assisted training programs, and computerized assessment systems. Preliminary observation suggests that there are vast differences in the extent to which State rehabilitation agencies understand and use these technologies to support both management and service activities, including rehabilitation counseling, training, research, information sharing, assessment, job placement, and management systems.

An absolute priority will be given to applications for a fellow in this area who will:

• Review the use of information technologies in State rehabilitation agencies and NIHR grantees;

• Determine the patterns, frequency, and formats of information needed by State agency personnel and NIHR grantees to facilitate the performance of their tasks;

• Develop a model to assess the cost-effectiveness of these technologies in State rehabilitation agencies and NIHR grantees; and

• Propose new method to increase or refine the volume of useful information which can be exchanged among State agencies, and between State agencies and information providers, such as NIHR grantees, and methods by which automated programs can be used by the rehabilitation counselor to improve "hand-on" services.

• *Fellow in Rehabilitation Service Statistics.*

There are not adequate date about the volume and type of rehabilitation services typically required for inpatient restoration and rehabilitation for individuals with disabilities other than spinal cord injury. Such data would be valuable in planning the deployment of resources to study, understand, and improve rehabilitation processes for individuals with these disabilities.

An absolute priority will be given to applications for a fellow in this area who will:

• Evaluate data from rehabilitation hospitals, rehabilitation units in general hospitals, and secondary sources such as prior studies;

• Assess the adequacy of disability categories used, and the adequacy of data on length of stay, costs, and other elements;

• Review prior studies of these issues for adequacy of methodology, availability of data and access to data sources and findings;

• Discuss the literature and trends in duration and cost of treatment and other relationships evident in the data;

• Determine analyses which can be conducted to yield information on service delivery patterns and costs as related to diagnostic categories; and

• Propose models for future collection and coordination of data on rehabilitation service units.

• Fellow In Mental Retardation Research

In the past decade there have been major improvements in the range of opportunities available to mentally retarded individuals. Preliminary observations indicate that these developments have resulted at least in part from advances in knowledge in several areas: techniques of habilitation/rehabilitation to enhance learning and improve behavior in individuals; information to improve service delivery mechanisms and patterns; and information leading to policy adjustments such as deinstitutionalization and mainstreaming. NIHR is interested in facilitating the development of new knowledge to support further expansion of options and achievements in habilitation/rehabilitation for mentally retarded individuals. However, future planning must be based on a thorough understanding of current knowledge in rehabilitation techniques, service delivery models, and policy considerations.

An absolute priority will be given to applications for a fellow in this area who will:

• Review the state-of-the-art in research in areas of mental retardation related to techniques of rehabilitation intervention, effective patterns of service delivery, and policy options;

• Assess the knowledge needs to effect further improvements in opportunities for this disability category;

• Assess the adequacy of the current state of research methodology and other resources to undertake improvements in the knowledge base; and

• Suggest a research agenda for the next five years, including options for various goals and levels of effort.

(29 U.S.C. 760–762)

BILLING CODE 4000-01-M

Rehabilitation Long-Term Training Program

AGENCY: Department of Education.

ACTION: Notice of Proposed Funding Priorities for Fiscal Year 1986.

SUMMARY: The Secretary proposes funding priorities for long-term training grants in the field of Rehabilitation Counseling to ensure effective use of program funds and to direct funds to areas of identified need during fiscal year 1986. The Secretary will reserve funds for applications meeting these priorities.

DATE: Comments must be received on or before May 27, 1986.

ADDRESS: All written comments and suggestions should be sent to Delores L. Watkins, Office of Developmental Programs, Rehabilitation Services Administration, Office of Special Education and Rehabilitative Services, Department of Education, 400 Maryland Avenue, SW., (Switzer Building, Room 3324–M/S 2312), Washington, DC. 20202.

FOR FURTHER INFORMATION CONTACT: Delores L. Watkins, Office of Developmental Programs, Rehabilitation Services Administration. Telephone: (202) 732–1332.

SUPPLEMENTARY INFORMATION: Grants for the Rehabilitation Training Program are authorized by Title III, section 304 of the Rehabilitation Act of 1973, as amended. Program regulations for the Rehabilitation Long-Term Training Program are established at 34 CFR Part 386. The purpose of the Rehabilitation Long-Term Training Program is to support projects designed to train personnel for employment in public and private agencies involved in the rehabilitation of physically and mentally handicapped individuals, especially those who are the most severely handicapped.

Eligible Applicants

Awards are made under this program to State vocational rehabilitation agencies and other public or nonprofit agencies or organizations, including institutions of higher education.

Proposed Priorities

In accordance with the Education Department General Administrative Regulations (EDGAR) at 34 CFR 75.105(c)(3), the Secretary proposes to give an absolute preference to long-term training applications submitted in the field of Rehabilitation Counseling in fiscal year 1986 that respond to one of the priorities described below. An absolute preference is one which permits the Secretary to select only those applications that meet the described priorities.

All applications submitted in the long-term training of rehabilitation counseling must be designed to improve and strengthen the capacity of rehabilitation counselors to place severely disabled individuals into employment, especially competitive employment. All training must include a job development and job placement component in one of the following areas:

Priority 1

The training under this priority must include placement services that will directly involve students with business and industry in providing rehabilitation services to severely physically and mentally disabled individuals. The placement coursework must be designed to enable students to acquire skills and knowledge in the areas of: (1) Job development, analysis, job modification, and job restructuring; (2) workers' compensation; (3) forecasting labor market trends; (4) the applicability of sections 503 and 504 of the Rehabilitation Act and their implications for placement of disabled individuals; and (5) effective consultation with employers and potential employers to identify employment opportunities for disabled individuals, to assist in the removal of barriers to the employment of disabled individuals, and to educate or train employers and potential employers about various disabilities and any vocational implications of those disabilities. Practicum training must include job development and job placement activities that involve students directly with business and industry. A primary element of the training must be the direct participation of students with business and industry in placing disabled individuals into competitive employment and may include actual participation of students in practicum experiences in business and industry settings. The training must be at the master's degree level.

Priority 2

The training under this priority must include a training curriculum that will prepare rehabilitation personnel to provide supported employment services to severely disabled adults. Supported employment, as used here, means paid work in a variety of integrated settings that include both handicapped individuals and non-handicapped individuals, particularly regular work sites, especially designed for severely handicapped individuals, irrespective of age or vocational potential—(1) for whom competitive employment at or above the minimum wage has not traditionally occurred; and (2) who, because of their disability, need intensive on-going post-employment support to perform in a work setting. The proposed training curriculum must include coursework to enable students to acquire skills and knowledge in the areas of: (1) Behavioral analysis; (2) task analysis; (3) job development, job modification, job accommodation, and job placement; (4) specific job-skills training; (5) employer relations; and (6) union relations. In addition to the specific skills previously listed, training is expected to provide students with knowledge about the various social service systems which affect the lives of disabled individuals, including: (1) State vocational rehabilitation agencies; (2) State developmental disabilities agencies; (3) State employment security systems; (4) workers' compensation; (5) private rehabilitation systems within industry; (6) projects with industry; (7) independent living programs; (8) sections 501, 502, 503, and 504 of the

VOL 51 ISS 80 AP 25 1986 UMI

Rehabilitation Act and their implications for placement of disabled individuals; and (9) provisions of the Social Security Act which relate to disabled individuals. Students must be provided practicum experiences at supported employment sites. Because of the required practicum experience element, applications must show evidence of an on-going established relationship with supported employment programs. The training must be at the bachelor's degree level or above.

Priority 3

The training under this priority must prepare rehabilitation personnel to develop jobs for and place severely disabled individuals into competitive employment in business and industry settings. The training must also focus on supported employment placements of disabled individuals in business and industry settings. Training supported under this priority must include a curriculum that combines the specific skills designated under the previous two priorities. The training must be at the doctoral level.

A separate application review competition will be conducted for each of the three priorities described for the rehabilitation long-term training field of Rehabilitation Counseling. Each application must respond to only one of the described priorities.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding the proposed priorities. Written comments and recommendations may be sent to the address given at the beginning of this document. All comments received on or before the 30th day after publication of this document will be considered before the Secretary issues the final priorities. All comments submitted in response to these proposed priorities will be available for public inspection, during and after the comment period, in Room 3324, Mary E. Switzer Building, 330 C Street, SW., Washington, DC between the hours of 8:30 a.m. and 4:00 p.m. (local time), Monday through Friday of each week except Federal holidays.

(29 U.S.C. 774)

(Catalog of Federal Domestic Assistance No. 84.129, Rehabilitation Training Program)

Dated: April 22, 1986.

William J. Bennett,

Secretary of Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Bonneville Power Administration

Awards for the Most Energy-Efficient Refrigerators and Freezers

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice of proposed action and request for comment and information. *BPA File No.* AEP-1. BPA requests that all comments and information submitted in response to this notice contain the file number AEP-1.

SUMMARY: The Bonneville Power Administration began implementing its "Cold facts. Hot ideas." campaign in February 1986. The campaign promotes energy efficiency to consumers who are planning to buy new major electrical appliances (refrigerators, freezers, clothes washers, and dishwashers). The campaign goal is to increase the "market share" of energy-efficient models purchased in the Pacific Northwest region.

BPA believes that the most effective way to achieve this goal is to clearly identify for consumers and appliance retailers which models are the "most energy-efficient."

This notice describes a proposed action by BPA to identify and promote the most energy-efficient new refrigerators and freezers on the market, and requests comments on the proposed action.

This notice also requests manufacturers of refrigerators and freezers to provide BPA with the following information:

1. Refrigerator models with thru-the-door ice service; and

2. Models in the market in 1986 which are not listed in the 1985 or 1986 Directories of Certified Refrigerators and Freezers, published by the association of Home Appliance Manufacturers (AHAM).

This information is requested so that BPA can determine which models will qualify for an "Energy Winner" award sticker in 1986 and are eligible to be listed in a BPA brochure (to be submitted for printing by June 1, 1986).

Responsible Official: Sydney D. Berwager, Director of Residential Conservation Programs, is the official responsible for development and implementation of the proposed action.

DATES: Comments on the proposed action and information requested from refrigerator and freezer manufacturers are due to BPA by May 22, 1986.

ADDRESSES: Written comments and information should be addressed to Ms. Donna L. Geiger, Public Involvement Manager, Bonneville Power Administration, P.O. Box 12999, Portland, Oregon 97212.

FOR FURTHER INFORMATION CONTACT: Mr. Grant W. Vincent, Consumer Products and Services Branch (KRP), Office of Conservation, Bonneville Power Administration, P.O. Box 3621, Portland, Oregon 97208. Telephone (503) 230-5499. Information may also be obtained from:

BPA's Public Involvement office, P.O. Box 12999, Portland, Oregon 97212. Telephone numbers, voice/TTY, for the Public Involvement office are: 503-230-3478 in Portland; toll-free 80-452-8429 for Oregon outside of Portland; 800-547-6048 for Washington, Idaho, Montana, Utah, Nevada, Wyoming, and California.

Mr. George E. Gwinnutt, Lower Columbia Area Manager, Suite 288, 1500 Plaza Building, 1500 N.E. Irving Street, Portland, Oregon 97232, 503-230-4551.

Mr. Ladd Sutton, Eugene District Manager, Room 206, 211 East Seventh Street, Eugene, Oregon 97401, 503-687-6952.

Mr. Wayne R. Lee, Upper Columbia Area Manager, Room 561, West 920 Riverside avenue, Spokane, Washington 99201, 509-456-2518.

Mr. Ronald K. Rodewald, Wenatchee District Manager, P.O. Box 741, Wenatchee, Washington 98801, 509-662-4377, extension 379.

Mr. George E. Eskridge, Montana District Manager, 800 Kensington, Missoula, Montana 59801, 406-329-3060.

Mr. Terence G. Esvelt, Puget Sound Area Manager, Room 250, 415 First Avenue North, Seattle, Washington 98109, 206-442-4130.

Mr. Thomas Wagenhoffer, Snake River Area Manager, West 101 Poplar, Walla Walla, Washington 99362, 509-525-5500, extension 701.

Mr. Robert N. Laffel, Idaho Falls District Manager, 531 Lomax Street, Idaho Falls, Idaho 83401, 208-523-2706.

Mr. Frederic D. Rettenmund, Boise District Manager, 550 W. Fort Street, Rm. 376, Boise, Idaho 83724, 208-334-9137.

IV. Availability of Documents

I. Background

A. Legal Authority

The Pacific Northwest Power Planning and Conservation Act, 16 U.S.C. 839 et seq. (Pacific Northwest Power Act), provides for the development of cost-effective conservation as the first priority in meeting the electrical energy needs of the region. The Pacific Northwest Power Act also provided for the establishment of the Northwest Power Planning Council (Council) to develop a 20-year power plan for the Pacific Northwest. In accordance with the Pacific Northwest Power Act, the Council adopted the "1983 Northwest Conservation and Electric Power Plan," which recommended that BPA:

> "Develop and implement (in cooperation with utilities, trade and professional associations, educational institutions, community organizations, and other interested parties) education and marketing programs regarding energy-efficient appliances for distributors, dealers, and purchasers (homeowners, rental property managers, etc.)."

The Council recently revised the power plan by adopting the "1986 Northwest Power Plan," which recommends that BPA:

> "Assess the effectiveness of various marketing strategies and incentives in promoting the purchase of the most efficient appliances that are available. These strategies should promote purchases of more efficient appliances at the time of normal replacement. Early retirement of existing appliances should not be encouraged."

B. Purpose and Intent

The purpose of the proposed action is to increase the "market share" of energy-efficient refrigerators and freezers purchased in the Pacific Northwest. The proposed action will affect appliance purchasers (consumers), retailers, distributors, and manufacturers. BPA expects that the proposed action will result in consumers purchasing refrigerators and freezers that are more energy-efficient than would have been purchased without the action. The proposed action should result in lower life-cycle costs (purchase price plus operating cost) to consumer appliance purchasers. On a regional level, the total number of units purchased should not be affected by the proposed action. However, individual appliance retailers, distributors, and manufacturers may experience an increase or decrease in the number of units sold, depending on the energy efficiency of their product offerings.

C. Scope of the Action

The proposed action covers new refrigerators and freezers sold in the BPA service territory (Oregon, Washington, Idaho, Western Montana, and portions of Northern California, Nevada, and Utah, and Western Wyoming) in 1986. BPA is not proposing that the action cover other appliances (such as clothes washers and dishwashers) at this time.

D. Activities to Date

BPA has conducted market research, the purpose of which was to determine how BPA should design an appliance efficiency promotion campaign. The major findings of the market research are:

1. Consumers are generally unaware of the wide range of efficiencies in new appliances.

2. Consumers are often willing to pay more for an energy-efficient model, as long as they can get the other features they want.

3. Consumers have difficulty understanding and using EnergyGuide labels.

4. For the campaign to be successful, it is important to clearly identify the most energy-efficient models at the point of purchase (in appliance retail stores).

A draft proposed campaign design was distributed to interested parties for review and comment on November 8, 1985. Comments received were incorporated into a final proposed campaign design, which was approved by BPA management on December 6, 1985.

BPA began implementing the campaing—"Cold facts. Hot ideas."—in February 1986. The campaign is designed to increase consumer awareness of the range of energy efficiencies in new appliances (refrigerators, freezers, clothes washers, and dishwashers).

BPA is now proposing to establish energy efficiency qualification levels (EEQLs) for new refrigerators and freezers. Models which meet or exceed the EEQLs will be awarded special recognition from BPA. This special recognition will be in the form of "Energy Winner" award stickers, which will be provided to appliance retailers to affix to qualifying models on display in their stores. The qualifying models will also be listed in a brochure, which will be provided free-of-charge to appliance retailers and to consumers who call a toll-free telephone number. BPA plans to establish new EEQLs each year using the procedure proposed in section (II.B.) of this notice.

BPA is now soliciting public comment on the proposed activities.

E. Compliance with NEPA

BPA has determined that the proposed action is excluded from the requirements of preparing either an Environmental Assessment or an Environmental Impact Statement, as specified in Council on Environmental Quality Regulations and Department of Energy Guidelines (February 23, 1982, 47 FR 7977).

F. Issues

1. *Procedure for Establishing EEQLs.*—BPA identified a number of objectives before developing the proposed procedure for establishing EEQLs for refrigerators and freezers. The procedure should:

a. Be based on the industry's current product offering.

b. Be fair and objective (non-arbitrary) in establishing qualification levels.

c. Meet consumer needs (recognize that other major features are often more important to consumers than energy efficiency). The procedure should establish EEQLs for each size group of each major product class.

d. Be somewhat restrictive (so that only very energy-efficient models qualify for the BPA "Energy Winner" award sticker), yet give consumers an adequate number of qualifiying models from which to choose.

e. Be practical (make use of existing, accepted data).

BPA believes the proposed procedures outlined in section (II.B.) of this notice meets these objectives. BPA has prepared a document that addresses a number of issues related to the proposed procedure (see section IV.—Availability of Documents). The document describes why BPA is proposing to:

a. Establish new EEQLs each year;

b. Base the qualification levels on energy efficiency, rather than on operating cost (energy consumption);

c. Use "energy factors" as a measure of energy efficiency;

d. Use 4-cubic-foot size groups, instead of the 2-cubic-foot size groups established by the Federal Trade Commission (FTC);

e. Base the EEQLs each year on the models appearing in the January edition of the AHAM Directory of Certified Refrigerators and Freezers (AHAM Directory); and

f. Establish EEQLs such that approximately 15 percent of models

VOL 51 ISS 80 AP 25 1986 UMI

listed in the AHAM Directory will qualify.

2. *Non-Uniformity of the Market*—The data in the January 1986 edition of the AHAM Directory demonstrate that the energy efficiency of models can vary widely from one size group to another in the same product class. BPA is generally proposing to establish EEQLs such that at least 15 percent of the models in each size group will qualify. Because there are often many models with the same energy efficiency in a group, the number of models that qualify often exceeds 15 percent.

However, there are many instances where: (1) All models in a size group have the same (or nearly the same) energy efficiency, or (2) a model appears to be very energy-efficient in its size group but not very efficient when compared to models in the next larger size group. In these instances, BPA believes it is inappropriate to set EEQLs such that 15 percent of the models in every size group will qualify. To compensate for the non-uniformity of the market, BPA proposes to establish EEQLs that are more stringent (resulting in fewer than 15 percent of models that qualify) for certain size groups. These more-stringent EEQLs result from the following principles:

a. If all models in a size group have the same energy efficiency, or the most efficient model is within 10 percent of the least efficient model, none of the models should be identified as "energy winners."

b. No more than 50 percent of the models should be identified as "energy winners" when there is at least one model in the group that is more energy-efficient.

c. No more than 75 percent of the models in a size group should be identified as "energy winners."

d. It is not "fair" to identify a model from a group of smaller sized units as an" "energy winner" when its energy consumption is greater than or equal to the energy consumption of a larger model which did not qualify in its size group.

3. *Identification of Qualifying Models*—As described in section (II.A) of this notice, all models which meet or exceed the EEQLs for the current year are eligible to receive "Energy Winner" award stickers and be listed in the brochure. BPA is primarily relying on the January edition of the AHAM Directory to identify which models qualify. However, there are a number of models in the market which may qualify and are not listed in this directory. These include:

a. Models listed in previous AHAM Directories;

b. Newer models not yet listed in the AHAM Directory;

c. Models from manufacturers who do not participate in AHAM certification program.

BPA is proposing that the brochure also include qualifiying models from the AHAM Directories for the previous year (January and June editions) and any other qualifying models which BPA is made aware of by manufacturers.

4. *Qualifying Models from Previous Years*—To distinguish between models that quality one year but not the next, the "Energy Winner" award sticker will show the current year (1986 for example) and will state that the model met the EEQLs for the current year.

5. *Assuring Proper Use of the "Energy Winner" Award Stickers*—Participating retailers will be instructed to only place the "Energy Winner" award stickers on models which have been certified by BPA as meeting the EEQLs. Certified models are defined as those which are either listed in the BPA brochure or listed in supplements to the brochure (which will be distributed periodically to participating retailers).

BPA proposes to rely primarily on consumers to assure that the stickers are only placed on qualifying models. All retailers who receive the stickers from BPA will be required to provide consumers with a copy of the brochure. In addition to listing the qualifying models, the brochure will specify the EEQLs for the current year and explain how to determine if a particular model qualifies.

The sticker will include a message to consumers to "request a copy of the brochure from the retailer and verify that the model qualifies for the sticker." If the model is not listed in the brochure, consumers can either use the formulas in the brochure to determine if the model qualifies or ask the retailer to show them the updated list of certified models. The sticker will also include a toll-free telephone number for consumers to call if they fell that the sticker has been placed on a model which does not qualify.

BPA will also conduct spot checks to assure that the stickers are being used properly by retailers. Retailers that place the stickers on non-certified models may not be eligible to receive the stickers in future years.

6. *Product Endorsement Disclaimer*—BPA does not intend to endorse or warrant the performance of any product through the proposed action. To avoid the appearance of a product endorsement, both the "Energy Winner" award sticker and brochure will include a disclaimer. The disclaimer will state that BPA in no way endorses or warrants any models as products. The disclaimer will also state that BPA is only providing information about the energy efficiency of models, as determined by standard formulas and laboratory tests, with industry-supplied information.

II. Proposed Action

A. Process

BPA will establish Energy Efficiency Qualification Levels (EEQLs) each year for new refrigerators and freezers according to the procedure outlined in section (II.B.) of this notice. Models which meet or exceed the EEQLs will be listed in a brochure and will be eligible to receive "Energy Winner" award stickers.

All models listed in the January edition of the AHAM Directory of Certified Refrigerators and Freezers (AHAM Directory) for the current year or in the AHAM Directories for the previous year (January or June editions) which meet or exceed the current year's EEQLs will automatically be listed in the BPA brochure. If the same model number is listed in more than one of the AHAM Directories, the data from the most recent AHAM Directory will be used. BPA will assume the information in the AHAM Directory is correct, unless otherwise notified by AHAM or individual manufacturers.

Manufacturers will be responsible for notifying BPA or other qualifying models not listed in the specified AHAM Directories (new models not yet listed, older models still in the market, or models produced by manufacturers who do not participate in the AHAM certification program). Manufacturers must provide BPA with certification that their models have volume and energy cost ratings determined in the same manner as models which are listed in the AHAM Directory. Specifically:

1. The refrigerated volume must have been independently verified in accordance with American National Standard ANSI/AHAM HRF-1 for household refrigerators, combination refrigerator-freezers, and household freezers.

2. The Federal Trade Commission (FTC) Annual Energy Cost must have been determined according to the FTC Rule for Using Energy Costs and Consumption Information Used in Labeling and Advertising for Consumer Appliances Under the Energy Policy and Conservation Act (16 CFR Part 305).

BPA will notify AHAM and refrigerator and freezer manufacturers each year (usually by March) of the EEQLs for that year. Manufacturers will have approximately one month to notify BPA of qualifying models not listed in the AHAM Directories specified above. BPA will then produce a brochure that lists all qualifying models for the current year. The brochure and "Energy Winner" award stickers will be distributed to appliance retailers who are participating in the "Cold facts. Hot ideas." campaign. BPA will also periodically provide appliance retailers with a list of additional qualifying models that did not get listed in the brochure (as BPA is made aware of them).

B. Procedure for Establishing Energy Efficiency Qualification Levels (EEQLs)

1. Using the January issue of the AHAM Directory for the current year, separate the models in the Directory into the following product classes:

a. *Refrigerators.*

(1) Compacts (all configurations and defrost system types with total volumes less than 8.5 cubic feet)

(2) Manual Defrost

(3) Partial-Automatic Defrost

(4) Automatic Defrost with Single Door or Top-Mounted Freezer

(5) Automatic Defrost with Top-Mounted Freezer and Thru-the-Door Ice Service

(6) Automatic Defrost with Side-Mounted Freezer (Side-by-Side)

(7) Automatic Defrost with Side-Mounted Freezer and Thru-the-Door Ice Service

(8) Automatic Defrost with Bottom-Mounted Freezer

b. *Freezers.*

(9) Upright with Manual Defrost

(10) Upright with Automatic Defrost

(11) Chest with Manual Defrost

2. For the *Compact refrigerator* product class (class 1), separate the models into the following size groups:

a. 0.0 to 4.4 cubic feet

b. 4.5 to 8.5 cubic feet

For each of the remaining *refrigerator* product classes (classes 2 through 8), separate the models into the following size groups:

a. 8.5 to 12.4 Cubic Feet

b. 12.5 to 16.4 Cubic Feet

c. 16.5 to 20.4 Cubic Feet

d. 20.5 to 24.4 Cubic Feet

e. 24.5 to 28.4 Cubic Feet

For each of the *freezer* product classes (classes 9 through 11), separate the models into the following size groups:

a. 0.0 to 7.4 cubic feet

b. 7.5 to 11.4 cubic feet

c. 11.5 to 15.4 cubic feet

d. 15.5 to 19.4 cubic feet

e. 19.5 to 23.4 cubic feet

f. 23.5 to 27.4 cubic feet

g. 27.5 to 31.4 cubic feet

(Note that although freezer size group (a) covers a wider range of sizes than the other size groups, only 3 of the 65 freezers in this size range have volumes which are less than 4.1 cubic feet.)

3. In each size group, rank order the models from highest Energy Factor (EF) to lowest EF (rounded to one decimal place). The EF is determined by the following formula, as described in the Federal Register (September 14, 1977, 42 FR 46140):

$$EF = \frac{\text{Adjusted Total Volume (cubic feet)}}{\text{Daily Electrical Consumption (kilowatt hours)}}$$

Where,

a. Total Adjusted Volume for Refrigerators is:
Fresh Food Volume + (1.63 × Freezer Volume)

b. Total Adjusted Volume for Freezer is:
1.73 × Freezer Volume

c. Daily Electrical Consumption is:

$$\frac{\text{AOC (\$/Year)}}{\text{AER (\$/kWh)} \times 365 \text{ (Days/Year)}}$$

Where,

AOC is the Annual Operating Cost (FTC Energy Guide label rating)

AER is the Average Electricity Rate Assumed to Determine AOC

For 1986, the AOC data from Column 1 of the "FTC Energy Cost in Dollars" columns in the AHAM Directory will be used. Therefore, the AER will be equal to $0.0675/kWh.

4. If a size group has no models listed, no EEQL will be established.

5. *No Significant Difference Adjustment*—If all models in a size group have EFs within 10 percent of the model in the group with the lowest EF, the EEQL will be equal to 1.1 times the lowest EF (note that while no models from this size groups in the AHAM Directory would qualify, there is an opportunity for new models coming into the market to qualify).

6. For the remaining groups (except as noted in Step 7), the EEQL will be equal to the EF of the model that is 15 percent of the way down the list (15%EF). This point on the list is determined by:

a. Multiplying the total number of models in the groups by 0.15;

b. Rounding to the nearest whole number (if the number from the previous step is less than 0.5, round to 1).

7. *Deviations from the 15%EF*—The EEQL will not be equal to the 15%EF if any of the following conditions exist:

a. More than 75 percent of the models in the group have EF's greater than or equal to the 15%EF, and the first model listed has an EF which is greater than the 15%EF.

b. More than 75 percent of the models in the group have EFs equal to the 15%EF, *and* the first model on the list also has an EF equal to the 15%EF.

c. A model with an EF greater than or equal to the 15%EF for its size group has an EnergyGuide Label rating (annual operating cost) greater than or equal to a model in a larger size group of the same product class which did not qualify for the "Energy Winner" award sticker.

If any of the above conditions exists, the EEQL will be set as follows:

50% Adjustment—If condition (a) exists, the EEQL will be equal to the 15%EF plus 0.1. The purpose of this adjustment is to avoid having more than 50 percent of the models in a size group qualify (when models with larger EFs exist in the group).

75% Adjustment—If condition (b) exists, the EEQL will be equal to the EF of the first model on the list plus 0.1. The purpose of this adjustment is to avoid having more than 75 percent of the models qualify in any size group.

Fairness Adjustment—If condition (c) exists, the 15%EF will be increased in increments of 0.1 until the condition no longer exists. The EEQL will then be equal to this value. This adjustment is used because of the philosophy that it is not "fair" to identify a model as an "energy winner" when it uses the same or more energy than all larger model that did not qualify as an "energy winner."

C. Proposed EEQLs for 1986

The following tables show the proposed Energy Efficiency Qualification Levels (EEQLs) for each product class size group for 1986 (second to last column), using the procedures proposed in section (II.B) of this notice. The last column of each table shows the number of qualifying models listed in the January 1986 edition of the AHAM Directory.

As can be seen from these tables, 168 (17 percent) of the refrigerator models and 62 (14 percent) of the freezer models in the AHAM Directory qualify for the "Energy Winner" award sticker. The total number of refrigerator and freezer models that qualify is 230 (16 percent).

VOL 51 ISS 80 AP 25 1986 UMI

PROPOSED EEQLS FOR NEW REFRIGERATORS FOR 1986 BASED ON PRODUCTS LISTED IN THE JANUARY 1986 AHAM DIRECTORY

Group No.	Type	Defrost system	Size Range (cubic feet)	No. of models in group	Group energy factors		Group EEQL	No. of qualification models

Total Freezers				430				62
Total Refrigerators and Freezers				1,429				230

Key for Refrigerator Table.

The number of models in these groups may not be accurate. Since the AHAM Directory does not currently identify which models have thru-the-door ice service, BPA attempted to identify these models through an informal survey. BPA will revise the table and EEQLs is better information is provided to BPA before May 22, 1986 (see Section III).

Key for Refrigerator and Freezer Tables.

—*Type (second column):*

Refrigerators—Single Door (SD), Top-Mounted Freezer (T), Side-Mounted Freezer (S), Bottom-Mounted Freezer (B), Thru-the-Door Ice Service (DI).

Freezers—Upright (U), Chest (C).

—EEQL (second to last column)—Energy Efficiency Qualification Level: a—Affected by "No Significant Difference Adjustment"; b—Affected by "50% Adjustment"; c—Affected by "Fairness Adjustment."

III. Request for Product Information from Manufacturers

The following requests for information have been approved by the Office of Management and Budget (OMB approval #1910–1200).

A. Thru-the-Door Ice Service

As described in section (II.B.) of this notice, BPA is proposing to establish separate Energy Efficiency Qualification levels (EEQLs) for refrigerator models with thru-the-door ice service (product classes 5 and 7). However, the AHAM Directory currently does not indicate which models have this feature. In order to establish the proposed EEQLs for these product classes, BPA conducted an informal survey to determine which models have thru-the-door ice service. It is possible that BPA may have incorrectly identified the models with this feature.

BPA is requesting all refrigerator manufacturers that produce models with thru-the-door ice service to send a list of model numbers to BPA by May 22, 1986, so that BPA can revise the proposed EFQLs and correctly identify the qualifying models in the brochure. If this information is not received by BPA by May 22, 1986, BPA will assume the proposed EEQLs are appropriate. BPA will then attempt to verify that the models identified by BPA as having met the EEQLs actually have this feature. Any model which can not be verified by BPA as having this feature will not be certified as having met the EEQL for its size group.

B. Models Not Listed in the 1985 or 1986 AHAM Directories

As discussed in section (II.A.) of this notice, BPA will automatically list in its 1986 brochure all qualifying models which are listed in the January 1985, June 1985, and January 1986 editions of the AHAM Directory. BPA is planning to submit the brochure for printing by June 1, 1986.

Manufacturers with models in the market that are not listed in these editions of the AHAM Directory must notify BPA by May 22, 1986, if they want these models to be considered for inclusion in the 1986 brochure. Information received after this date will be considered for future supplements to the brochure. For a model to be included in the brochure (and its supplements) it must meet the EEQL for its product class and size group. The manufacturer must identify the appropriate product class for each model number submitted (see section (II.B.1) of this notice). The manufacturer must also certify the refrigerated volumes and annual energy cost in accordance with section (II.A.) of this notice and that the model is available for sale in the Pacific Northwest region.

IV. Availability of Documents

The following documents are available from BPA:

AHAM January 1986 Directory of Certified Refrigerators & Freezers.

Report on Market Research and Program Recommendations: BPA Regionwide Promotion of Energy-Efficient Applicances.

Issues Related to the Establishment of Energy Efficiency Qualification Levels for New Refrigerators and Freezers.

To obtain a copy of these documents, call BPA's toll-free document request line: 800–841–5867 for Oregon; 800–624–9495 for other Western States. You will reach a recorded message where you may leave your request. Please request the document by its exact title.

Issued in Portland, Oregon, on April 15, 1986.

BILLING CODE 6450–01–M

Economic Regulatory Administration

Proposed Consent Order With Atlantic Richfield Co.

AGENCY: Economic Regulatory Administration, DOE.

ACTION: Notice of final action on proposed consent order.

SUMMARY: The Administrator of the Economic Regulatory Administration ("ERA") has determined that a proposed Consent Order between the Department of Energy ("DOE") and Atlantic Richfield Company ("ARCO") shall be made final as proposed. This Consent Order resolves ARCO's potential liability for overcharges arising out of prices charged by ARCO in sales of price-controlled crude oil which were related, or linked, to transactions involving other crude oil during the period January 1, 1973 through January 27, 1981.

ARCO will make a restitutionary payment of $313 million, plus interest from January 24, 1986, the date the Consent Order was executed by DOE. ERA will direct that these monies be deposited in a suitable account for appropriate distribution by DOE. In addition, within thirty days of the effective date of the Consent Order ARCO will pay $2 million for deposit into the Miscellaneous Receipts account of the United States Department of the Treasury as a compromise of civil penalties which DOE might have asserted pursuant to section 5 of the Emergency Petroleum Allocation Act of 1973, as amended.

The decision to make the ARCO Consent Order final was made after a full review of written comments from the public. A public hearing regarding the proposed Consent Order scheduled for March 21, 1986 was cancelled after two requests to make presentations were received but subsequently withdrawn.

FOR FURTHER INFORMATION CONTACT:
Robert G. Heiss, Economic Regulatory Administration, 1000 Independence Avenue SW., Washington, D.C. 20585, (202) 252–6727.

SUPPLEMENTARY INFORMATION:

I. Introduction
II. Comment Received
III. Analysis of Comments
IV. Decision

I. Introduction

On February 7, 1986, ERA issued a notice announcing a proposed Consent Order between DOE and ARCO which would resolve matters relating to ARCO's compliance with Federal petroleum price and allocation regulations with respect to its sales of price-controlled crude oil which were related, or linked, to transactions involving other crude oil during the period January 1, 1973 and January 28, 1981. (51 FR 5394, February 13, 1986). These matters had been expressly excluded from the Consent Order with ARCO dated January 23, 1985 ("1985 Consent Order"), which was subsequently made a final order of DOE. (50 FR 28603, June 27, 1985).

The proposed Order calls for ARCO to make $313 million (plus interest from January 24, 1986, the date of execution by DOE) in restitutionary payment and $2 million in compromise of civil penalties to discharge in full all of its obligations under the price and allocation regulations with respect to its linked, or tied-in, transactions between January 1, 1973 and January 28, 1981. The restitutionary sum would be paid to DOE for appropriate distribution. The amount paid in compromise of civil penalties which DOE might have asserted pursuant to section 5 of the Emergency Petroleum Allocation Act of 1973, as amended, would be for deposit into the Miscellaneous Receipts account of the United States Department of the Treasury.

The settlement includes the violations alleged in a Proposed Remedial Order (PRO) pending against ARCO. The PRO, as amended (50 FR 48120, November 21, 1985), charges ARCO with selling domestic price-controlled crude oil at prices in excess of those permitted by DOE regulations at 10 CFR 212.183(b), 205.202, 210.62(c), and 212.10(a) during the period March 1, 1978 through January 27, 1981. During the period of alleged violations, the total excess consideration, or premiums, alleged to have been unlawfully received by ARCO for 48,251,710 barrels of domestic price-controlled crude oil was $239,948,207.00, exclusive of interest. The interest thereon, computed through October 31, 1985, was $259,347,879.00, yielding a total of $499,296,086.00.

The February 7 notice provided in detail the basis for ERA's preliminary view that the settlement was favorable to the government and in the public interest. The notice solicited written comments from the public relating to the adequacy of the terms and conditions of the settlement, and whether the

VOL 51 ISS 80 AP 25 1986 UMI

settlement should be made final. The notice also announced a public hearing for the purpose of receiving oral presentations on the settement. That hearing, which was scheduled for March 21, 1986, was cancelled (51 FR 9702, March 20, 1986) after two requests to make presentations were received but subsequently withdrawn.

II. Comments Received

ERA received four written comments. All four comments were considered in making the decision as to whether or not the proposed Consent Order should be made final.

The comments fall into three general subject categories. First, one of the four comments addressed DOE's legal theory set forth in the PRO and the adequacy of the settlement of that case. Second, all four comments were directed at the distribution of the restitutionary payments proposed in the ARCO settlement. Third, two comments objected to the amount of compromised civil penalty—one as too little and the other as excessive.

The one comment that addressed the adequacy of the proposed settlement amount was submitted on behalf of certain named and all other utility and surface transportation end-users of petroleum products ("end-users").

With regard to the second category, one comment, which was submitted on behalf of the Controller of California and the Attorneys General of Connecticut, Indiana and Michigan, concerned the non-specific nature of the provision of the proposed Order pertaining to distribution procedures. In addition, it proposed distribution to the states of any amounts not awarded to parties shown to have been actually injured.

Two other comments, also urging the ultimate distribution to the states of monies remaining after the payment of identifiable injured parties, were filed on behalf of the following: Arkansas, Delaware, Iowa, Louisiana, North Dakota, Pennsylvania, Rhode Island, Utah and West Virginia.

The fourth comment belonging in this category, submitted on behalf of the end-users, suggested that they should receive a portion of the distribution.

In sum, the comments falling in the second category did not question the basis of the settlement or adequacy of the settlement amount, but recommended revision of the distribution provision of the proposed Consent Order or urged that distribution be made to the states or to particular end-user groups.

The third category of comments, relating to the amount designated as compromise of civil penalties which could have been sought, were filed by the end-users and the Commonwealth of Pennsylvania. The end-users urged a greater amount and Pennsylvania urged that all $315 million be designated for restitution and none for civil penalty compromise unless DOE could "document" that civil penalty compromise was warranted.

III. Analysis of Comments

The February 7 notice solicited written comments and provided the opportunity for a public hearing to enable the ERA to receive information from the public relevant to the decision whether the proposed Consent Order should be finalized as proposed, modified, or rejected. To ensure greater public understanding of the basis for the proposed settlement, the February 7 notice provided specific information regarding ARCO's overcharge liability and the considerations that went into the government's preliminary agreement with the proposed terms. This settlement information enabled the public to knowledgeably address the areas in which questions or concerns may have existed.

The signle written comment by the end-users, which addressed the adequacy of the settlement, maintains that ERA should have used a different legal theory in its PRO, and that the use of that theory would have yielded an additional possible liability of $150 million in overcharges and interest. On that premise, the comment contends that ERA's proposed settlement, based on the allegations made in the litigation, is accordingly insufficient. ERA disagrees with both the assumption and the conclusion contained in this comment.

The end-users allege that ARCO acted in concert with its crude oil reseller trading partners in the linked transactions to cause the miscertification pf price-controlled oil. The comment concludes that the settlement sum should therefore include not only the benefits ARCO itself received but also, as a penalty for alleged "fraud" and "conspiracy," all benefits obtained by ARCO's trading partners as well as all consequential harm to the refiner-participants in the Entitlements Program, wholesalers, retailer, and end-user. The comment maintains that this measure of settlement would more appropriately approximate the treble damages available in a private action under section 210 of the Economic Stabilization Act ("ESA").

The comment is misdirected. The purpose of the proposed settlement is to resolve the regulatory violations ERA has alleged against ARCO. That the proposed settlement does not seek to recover unlawful revenues received by other persons, and that it does not exact penalties for alleged conduct beyond the scope of the matters ERA has alleged against ARCO, are not cognizable objections.[1] Furthermore, the availability of treble damages in private actions under ESA section 210 is not relevant to the assessment of the appropriateness of a settlement sum that resolves a public enforcement action for restitution pursuant to ESA section 209.

ERA believes that its assessment of the case, considering the specific facts and circumstances reflected in the PRO upon which the proposed settlement was based, was proper. Accordingly, it concludes that both the restitutionary payment of $313 million and the amount of $2 million in compromise of civil penalties, which the comment also describes as inadequate, were appropriate in the circumstances of this case.

With respect to the second category, the comment of the Controller of California and the Attorneys General of several states concerning the non-specific nature of the provision of the proposed Order pertaining to distribution procedures objects to the possibility that DOE might decide to adopt a remedial plan without following the procedures of 10 CFR 205.199 or 205.280, *et seq.* (Subpart V), or without following any other procedures which afford interested parties similar rights.

The comment submitted by the end-users contends that DOE should distribute a substantial portion of the restitutionary monies to end-users. The stated premise of the comment is that a substantial portion of the overcharges was passed through to end-users in relationship to their use of oil products. All the comments received from state authorities propose the distribution of unclaimed and unsuccessfully claimed monies to the states for use in energy-related programs and projects which would benefit all the states' citizens allegedly injured by the overcharges. In addition, the comment submitted by eight Attorneys General maintains that the allowable uses for any refunds to the states should not be limited to the five specific programs identified in section 155 of Pub. L. No. 97–377, 96 Stat. 1830, December 31, 1982 (known as "the Warner Amendment"), for accomplishing restitution.

[1] The proposed settlement does not in any event event foreclose DOE from taking appropriate enforcement action against other persons for regulatory violations arising from the allegedly linked transactions.

Paragraph 403 of the proposed Consent Order provides that "[t]he Administrator of ERA, or his designee, shall direct that these monies be deposited in a suitable account pending DOE's determination of appropriate restitutionary distribution." ERA believes this provision should not be revised.

DOE has not yet resolved the matter of the appropriate disposition of the restitutionary payment. It recognizes that the task of tracing to specific customers the monies associated with the alleged crude oil violations in this case would be extremely difficult, if possible at all. As written, Paragraph 403 of the proposed Consent Order provides for ARCO to deposit the restitutionary payment of $313 million into the U.S. Treasury escrow account. This disposition would defer the question of the proper method of distribution until an appropriate determination can be made, but it does not finally affect the identity of the ultimate recipients of the funds. The resolution of this question, however, should not be an impediment to making the proposed Consent Order final and receiving the monies from ARCO. Indeed, the question of the most appropriate disposition of the funds has no bearing on the settlement of ARCO's alleged liability at this time. Accordingly, remedial considerations will not be further addressed in this notice.[2]

Finally, the end-users suggest that the $2 million to be paid by ARCO, in compromise of civil penalties which could have been sought, was too little, whereas the comment submitted on behalf of the Commonwealth of Pennsylvania suggest that the compromise civil penalty amount should be zero and the restitution amount increased by $2 million, unless DOE documents that the facts of the case warrant that level of civil penalty compromise. The circumstances of this case and DOE's authority concerning civil penalties amply support the Department's acceptance of $2 million in compromise of such penalties. DOE is empowered to accept a compromise of civil penalties. 10 CFR 205.203(b)(2). The potential maximum amount of civil penalties for crude oil violations is $20,000 per violation. *Id.* § 205.203(b)(1)(A). In this case, ERA had alleged that ARCO had committed violations in connection with 140 crude oil sales transactions. Accordingly, it is fully appropriate for DOE to accept a compromise of civil penalties from ARCO in the stated amount as part of the settlement of DOE's allegations. Considering the bases upon which the government could have sought civil penalties, ERA also believes that a civil penalty compromise of $2 million—the largest amount obtained in an administrative oil pricing case—is not inadequate.

For the foregoing reasons, DOE has determined that the proposed Consent Order is in the public interest and should be made final without modification.

IV. Decision

By this notice, and pursuant to 10 CFR 205.199J the proposed Consent Order between ARCO and DOE executed on January 25, 1986, is made a final order of the Department of Energy, effective the date of publication of this notice in the **Federal Register.**

Issued in Washington, DC on April 17, 1986.

Special Counsel, Economic Regulatory Administration.

[FR Doc. 86–9337 Filed 4–24–86; 8:45 am]

BILLING CODE 6450–01–M

[2] All the comments in this category also object to the possible payment of the restitutionary amount to the Miscellaneous Receipts account of the U.S. Treasury on grounds that such a transfer does not constitute restitution within the meaning of section 209 of the ESA. For the reasons discussed above, this objection is also premature. However, in this regard, DOE notes that it previously concluded, in Ruling 1986–1 (49 FR 22069, May 25, 1984), that the remedy of refund to the treasury is within its statutory authority. *See Paynes 22, Inc. v. U.S.*, 762 F.2d 91 (Em. App. 1985).

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Acceptance of Petition for Exemption and Availability of Certification by Witchita Falls Energy Investments, Inc.–JV.

SUMMARY: On March 19, 1986, Witchita Falls Energy Investments, Inc.–JV (WFEI) filed a petition with the Economic Regulatory Administration (ERA) of the Department of Energy (DOE) requesting a permanent exemption based on the "lack of alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum" for a proposed gas fired powerplant to be located at CertainTeed Corporation's Fiberglass Reinforcement Plant at Witchita Falls, Texas, from the prohibitions of Title II of the Powerplant and Industrial Fuel Use Act of 1978 (42 U.S.C. 8301 *et seq.*) ("FUA" or "the Act"). Title II of FUA prohibits both the use of petroleum and natural gas as a primary energy source in any new powerplant and the construction of any such facility without the capability to use an alternate fuel as a primary energy source. Final rules setting forth criteria and procedures for petitioning for exemptions from the prohibitions of Title II of FUA are found in 10 CFR Parts 500, 501, and 503. Final rules governing the cogeneration exemption were revised on June 25, 1982 (47 FR 29209, July 6, 1982), and are found at 10 CFR 503.37.

ERA has determined that the petition appears to include sufficient evidence to support an ERA determination on the exemption request and it is therefore accepted pursuant to 10 CFR 501.3. A review of the petition is provided in the **SUPPLEMENTARY INFORMATION** section below.

As provided for in sections 701(c) and (d) of FUA and 10 CFR 501.31 and 501.33, interested persons are invited to submit written comments in regard to this petition and any interested person may submit a written request that ERA convene a public hearing.

The public file containing a copy of this Notice of Acceptance and Availability of Certification as well as other documents and supporting materials on this proceeding is available upon request through DOE, Freedom of Information Reading Room, 1000 Independence Avenue, SW, Room 1E–190, Washington, D.C. 20585, from 9:00 a.m. to 4:00 p.m., Monday through Friday, except Federal holidays.

ERA will issue a final order granting or denying the petition for exemption from the prohibitions of the Act within six months after the end of the period for public comment and hearing, unless ERA extends such period. Notice of any such extension, together with a statement of reasons therefor, would be published in the **Federal Register.**

DATES: Written comments are due on or before June 9, 1986. A request for a public hearing must be made within this same 45-day period.

ADDRESS: Fifteen copies of written comments or a request for a public hearing shall be submitted to: Case Control Unit, Office of Fuels Programs, Room GA–045, Forrestal Building, 1000 Independence Avenue SW., Washington, D.C. 20585.

Docket No. ERA–C&E–86–33 should be printed on the outside of the envelope and the document contained therein.

VOL 51 ISS 80 APR 25 1986 UMI

FOR FURTHER INFORMATION CONTACT:
Steven Mintz, Coal & Electricity Division, Office of Fuels Programs, Economic Regulatory Administration, 1000 Independence Avenue, SW., Room GA-045, Washington, D.C. 20585, Telephone (202) 252-9506
Steven E. Ferguson, Esq., Office of General Counsel Department of Energy, Forrestal Building, Room 6A-113, 1000 Independence Avenue, SW., Washington, D.C. 20585, Telephone (202) 252-6947.

SUPPLEMENTARY INFORMATION: WFEI proposes to construct and operate its 80 MW powerplant at CertainTeed Corporation's Fiberglass Reinforcement Plant at Witchita Falls, Texas. The system will consist of three gas fired turbine generators, three heat recovery steam generators, one steam driven turbine generator, and ancillary equipment. The facility will generate electrical power for sale to Texas Utilities Electric Company and produce steam to be used at the adjoining CertainTeed plant.

Section 212(a)(1)(A)(ii) of the Act provides for a permanent exemption due to lack of an alternate fuel supply at a cost which does not substantially exceed the cost of using imported petroleum. To qualify, the petitioner must certify that:

(1) A good faith effort has been made to obtain an adequate and reliable supply of an alternate fuel for use as a primary energy source of the quality and quantity necessary to conform with the design and operational requirements of the proposed unit;

(2) The cost of using such a supply would substantially exceed the cost of using imported petroleum as a primary energy source during the useful life of the proposed unit as defined in §503.6 (cost calculation) of the regulations;

(3) No alternate power supply exists, as required under §503.8 of the regulations;

(4) Use of mixtures is not feasible, as required under §503.9 of the regulations; and

(5) Alternative sites are not available, as required under §503.11 of the regulations.

In accordance with the evidentiary requirements of § 503.37(c) (and in addition to the certifications discussed above), WFEI has included as part of its petition:

1. Exhibits containing the basis for the certifications described above; and

2. An environmental impact analysis, as required under 10 CFR 503.13.

In processing this exemption request, ERA will comply with the requirements of the National Environmental Policy Act of 1969 (NEPA): the Council on Environmental Quality's implementing regulations, 40 CFR Part 1500 *et seq.*; and DOE guidelines implementing those regulations, published at 45 FR 20694, March 28, 1980. NEPA compliance may involve the preparation of (1) an Environmental Impact Statement (EIS); (2) an Environmental Assessment; or (3) a memorandum to the file finding that the grant of the requested exemption would not be considered a major Federal action significantly affecting the quality of the environment.

If an EIS is determined to be required, ERA will publish a Notice of Intent to prepare an EIS in the **Federal Register** as soon as practicable. No final action will be taken on the exemption petition until EAR's NEPA compliance has been completed.

The acceptance of the petition by ERA does not constitute a determination that WFEI is entitled to the exemption requested. That determination will be based on the entire record on this proceeding, including any comments received during the public comment period provided for in this notice.

Issued in Washington, D.C., on April 15, 1986.

Robert L. Davies,
Director, Office of Fuels Programs, Economic Regulatory Administration.

BILLING CODE 6450-01-M

Federal Energy Regulatory Commission

[Docket No. RM85-1-000 (Parts A-D)]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol (ARCO Oil & Gas Co.); Order Granting Request For Waiver

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

Issued: April 22, 1986.

On February 24, 1986, ARCO Oil and Gas Company (ARCO) filed a request for waiver of the restrictions in the transitional provisions of § 284.105(a) of the regulations adopted in Order No. 436.[1] ARCO seeks the waiver to permit the transportation of gas by Natural Gas Pipeline Company (Natural) on behalf of Mississippi River Transmission Corporation (MRT) until such time as Natural is issued a certificate, pursuant to section 7 of the Natural Gas Act, authorizing the transportation of gas for MRT. On November 1, 1985, Natural filed an application for such a certificate. The application was amended on November 9, 1985 and is currently pending in Docket No. CP86-186-000. We will grant ARCO's request for waiver.

On September 4, 1985, ARCO and MRT entered into a gas purchase agreement whereby MRT agreed to purchase from ARCO gas located in offshore Texas. On July 22, 1985, MRT entered into a transportation agreement with Natural whereby Natural agreed to transport the offshore gas under Part 284 of the Commission's Regulations.

The transportation agreement specified a two-year term, commencing on the date of initial deliveries of gas. On July 22, 1985, ARCO and Natural entered into a tie-in agreement whereby ARCO agreed to construct an undersea pipeline which would connect into Natural's 16-inch pipeline in High Island Block 71 to facilitate the transportation and sale of the offshore gas to MRT.

Construction of the undersea pipeline by ARCO began on September 16, 1985. Prior to October 9, 1985, ARCO expended $2,600,000 on the construction, which was delayed due to repairs and hurricanes. The pipeline was successfully tested on November 27, 1985, but is currently shut-in as Natural has declined to transport the gas until section 7 certificate authority is received.

In *CLARCO Gas Company, Inc.*,[2] we clarified our policy concerning waivers of the restrictions in the transitional provisions of Order No. 436:

> If gas hasn't flowed by October 9, 1985 the Commission will grant a waiver from the restrictions in the transitional provisions to the extent necessary to allow the transportation to commence if the parties executed a written gas transportation to commence if the parties executed a written gas transportation agreement prior to October 9, 1985, and expended significant funds or constructed significant facilities *in reliance on that agreement*, after the agreement was executed and prior to October 9, 1985.

We find that the facts and circumstances presented by ARCO meet the CLARCO standard in that ARCO constructed significant facilities prior to October 9, 1985 in reliance on a written transportation agreement which was executed prior to October 9, 1985. Accordingly, we grant ARCO's request for waiver of the restrictions in section 284.105 to the extent necessary to permit Natural's transportation on behalf of MRT to commence for a term consistent with the provisions of section 284.105 of the Commission's Rules.

BILLING CODE 6717-01-M

[Docket No. RM85-1-000 (Parts A-D)]

Regulation of Natural Gas Pipelines After Partial Wellhead Decontrol Marathon Oil Co.

Before Commissioners: Anthony G. Sousa, Acting Chairman; Charles G. Stalon, Charles A. Trabandt and C.M. Naeve.

Issued: April 22, 1986.

On March 14, 1986, Marathon Oil Company (Marathon) filed a request for waiver of the restrictions in the transitional provisions of § 284.105 of the regulation adopted in Order No. 436.[1] Marathon seeks the waiver to permit the transportation of gas by ANR Pipeline Company (ANR) for Seagull Marketing Service, Inc. (Seagull) on behalf of various local distribution companies for their system supply.[2] We will grant Marathon's request for waiver.

In its request, Marathon states that Marathon, Amerada Hess Corporation (Amerada), and the Diamond Shamrock Exploration Company are the producers of gas located at the Eugene Island Block 159B platform in offshore Louisiana. On May 29, 1985, Marathon and ANR entered into a written agreement whereby Marathon agreed to reimburse ANR for a pro rata share of the cost of installing an undersea pipeline connecting ANR's offshore pipeline system to the Block 159B platform and for a pro rata share of the cost of new emission control facilities.[3] The agreement was contingent upon the producers' entering into a transportation agreement with ANR for the gas produced from the Block 159B platform.

ANR, Seagull, and Amerada entered into such a transportation agreement, dated August 29, 1985 and signed September 26, 1985, whereby ANR agreed to provide transportation service, under section 311 of the Natural Gas Policy Act, through ANR's interconnection facilities at the Eugene Island Block 159B platform in offshore Lousiana to various onshore interconnection points with other interstate pipelines [4] on behalf of the local distribution companies. The transportation agreement stipulates that the gas will be sold by the producers to Seagull, as agent for the local distribution companies.

In that the May 29, 1985 agreement was contingent upon execution of the transportation agreement, Marathon became liable for its pro rata share of the cost of the interconnection facility and the new emission facility on September 26, 1985, the date the transportation agreement was signed.

Marathon states that ANR began construction of the facilities prior to October 9, 1985. Four separate hurricanes and the resulting damage delayed completion of the connection facilities until late December 1985. Marathon states that ANR purchased the gas for its own use from late December, 1985 to mid-February, 1986, but that the gas is currently shut-in as ANR has declined to transport the gas pursuant to the contract absent a waiver of the restrictions in the transitional provision of Order No. 436.

In *CLARCO Gas Company, Inc.*, [5] we clarified our policy concerning waivers of the restrictions in the transitional provisions of Order No. 436:

> If gas hasn't flowed by October 9, 1985 the Commission will grant a waiver from the restrictions in the transitional provisions to the extent necessary to allow the transportation to commence if the parties executed a written gas transportation agreement prior to October 9, 1985, and expended significant funds or constructed significant facilities *in reliance on that agreement*, after the agreement was executed and prior to October 9, 1985.

We find that the facts and circumstances presented by Marathon meet the *CLARCO* standard in that the parties executed a written gas transportation agreement prior to October 9, 1985 and Marathon became liable for its pro rata share of the cost of the interconnection facilities at the time the transportation contract was executed. Construction of the facilities began prior to October 9, 1985. Accordingly, we grant Marathon's request for waiver of the restrictions in § 284.105 to the extent necessary to permit ANR's transportation on behalf of the local distribution companies, as described above and in the transportation agreement, to commence.

By the Commission.
Kenneth F. Plumb,
Secretary.

BILLING CODE 6717-01-M

[1] 33 FERC § 61,007, 50 FR 42408 (October 18, 1985).

[2] The local distribution companies are Elizabethtown Gas Company, Pennsylvania Gas and Water Company, and Commonwealth Gas Pipeline Corporation. Seagull Marketing Services, Inc. serves as their agent.

[3] The May 29, 1985 agreement states that ANR's cost of service on the connection facilities will be approximately $800,000 for the September 15, 1985 to January 1, 1987 period. Marathon agreed to pay pipeline 37.5% of the difference between $800,000 and the actual transportation revenues received by ANR, if less than $800,000 during the 9/15/85 to 1/1/87 transport period, attributable to the connection facilities. The agreement states that the $800,000 figure will be reduced for any volumes purchased by ANR during the transport period at the rate of seven cents per MMBTu. (The $800,000 figure was reduced to approximately $760,000 as a result of gas purchases by ANR during December 1985 to mid-February 1986.) The agreement further states that Marathon will pay the lesser of 37.5% of $800,000 or 37.5% of the actual cost of new emission control facilities at ANR's Patterson Station.

[Docket No. TA86-10-20-002]

Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

April 21, 1986.

Take notice that Algonquin Gas Transmission Company ("Algonquin Gas") on April 17, 1986, tendered for filing Substitute Twelfth Revised Sheet No. 203 to its FERC Gas Tariff, Second Revised Volume No. 1.

Algonquin Gas states that such tariff sheet is being filed to reflect in Algonquin Gas' Rate Schedule F-2, changes in the underlying rates of Consolidated Gas Transmission Corporation ("Consolidated"), as reflected in Consolidated's March 31, 1986 filing, proposed to be effective March 1, 1986.

Algonquin Gas requests that the Commission accept Substitute Twelfth Revised Sheet No. 203 to be effective March 1, 1986 to coincide with the proposed effetive date of Consolidated's rate change.

Algonquin Gas notes that a copy of this filing is being served upon each affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 28, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any persons wishing to become a party must file a motion to intervene. Copies of this filing are on file

BILLING CODE 6717-01-M

[Docket No. TA86-12-30-000 & 001]

Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

April 21, 1986.

Take notice that Algonquin Gas Transmission Company ("Algonquin Gas") on April 17, 1986 tendered for filing the following tariff sheets to its FERC Gas Tariff, Second Revised Volume No. 1.

Third Substitute Original Sheet No. 205 proposed to be effective December 31, 1985
Second Revised First Revised Sheet No. 205 proposed to be effective January 1, 1986
Revised Substitute Second Revised Sheet No. 205 proposed to be effective February 1, 1986
Revised Fourth Revised Sheet No. 205 proposed to be effective April 1, 1986

Algonquin Gas states that such tariff sheets is being filed pursuant to the provisions of Section 7 of its Rate Schedule F-4 to reflect in its rates, effective December 31, 1985 and in its rates filed and made effective subsequent to December 31, 1985, an increase in the Contract Adjustment Demand Rate to be charged by its pipeline supplier, Texas Eastern Transmission Corporation ("Texas Eastern"), as set forth in Texas Eastern's March 26, 1986 filing.

Algonquin Gas request that the Commission accept the above tariff sheets to be effective as proposed.

Algonquin Gas notes that a copy of this filing is being served upon each affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 28, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any persons wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717-01-M

[Project No. 7560-001 etc.]

City of Austin Electric Utility Department et al.; Availability of Environmental Assessment and Finding of No Significant Impact

April 22, 1986.

In accordance with the National Environmental Policy Act of 1969, the Office of Hydropower Licensing, Federal Energy Regulatory Commission (Commission), has reviewed the applications for major and minor licenses (or exemptions) listed below and has assessed the environmental impacts of the proposed developments.

Project No.	Project name	State	Water body	Nearest town	Applicant
Exemptions					
7560-001	Longhorn Dam	TX	Colorado River	Austin	City of Austin Electric Utility Dept.
9437-000	Yellowjacket	CA	Yellowjacket Creek	Calistoga	John Naerthout, Jr.
Licenses					
5376-001	Horseshoe Bend	ID	Payette River	Horseshoe Bend	Boise Cascade Corp.
7888-001	Comtu Falls	VT	Black River	Springfield	Comtu Falls Corp. & Comtu Associates.
9033-000	Erie Canal Lock No. 32	NY	New York State Barge Canal	Pittsford	Fallen Hydro, Inc.

Environmental assessments (EA's) were prepared for the above proposed projects. Based on independent analyses of the above actions as set forth in the EA's, the Commission's staff concludes that these projects would not have significant effects on the quality of the human environment. Therefore, environmental impact statements for these projects will not be prepared. Copies of the EA's are available for review in the Commission's Division of Public Information, Room 1000, 825 North Capitol Street, NE, Washington, DC 20426.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA86-7-51-000, 001]

Great Lakes Gas Transmission Co.; Proposed Changes in Gas Tariff Under Purchased Gas Adjustment Clause Provisions

April 21, 1986.

Take notice that Great Lakes Gas Transmission Company ("Great Lakes"), on April 15, 1986, tendered for filing the following tariff sheets:

First Revised Volume No. 1

Fifty-Sixth-A Revised Sheet No. 57
Substitute Fifty-Seventh Revised Sheet No. 57
Fifty-Seventh-A Revised Sheet No. 57
Substitute Fifty-Eighth Revised Sheet No. 57

Great Lakes states that the filing provides for a new pricing arrangement related to gas purchased from Great Lakes by Michigan Consolidated Gas Company ("Mich Con"). Under the new pricing provisions for Mich Con, the gas component of the rates consists of a monthly demand charge of $12.35 per Mcf of contract demand per month and a commodity charge of $2.15 per MMBtu for deliveries each day up to 75% of the contract quantity and a commodity charge of $2.00 per MMBtu for deliveries each day over 75% of contract quantity. For deliveries each day in excess of the daily contract quantity the gas component of the rate will be $1.95 per MMBtu.

Under the prior pricing arrangements, the gas cost component of Mich Con's rates was $4.40 per MMBtu for deliveries to partial requirement delivery points and $3.73 per MMBtu for deliveries to full requirement delivery points. The new pricing arrangements provide for monthly adjustments by the application of an index which will react to competitive prices in the markets served by Mich Con. Based on deliveries of full contract volumes the price reduction filed herewith will result in a savings to Mich Con of approximately $48,000,000 annually.

Great Lakes is requesting effective dates of January 22, 1986 for Fifty-Sixth-A Revised Sheet No. 57, February 21, 1986 for Fifty-Seventh Revised Sheet No. 57, March 14, 1986 for Fifty-Seventy-A Revised Sheet No. 57, and May 1, 1986 for Substitute Fifty-Eighth Revised Sheet No. 57. In aid thereof, Great Lakes requests waiver of the 30-day notice requirement of the provision of § 154.38(d)(4)(iv)(a) of the Commission's Regulations so as to permit this out-of-period PGA filing to implement the foregoing substantial reduction in purchased gas cost as soon as possible.

Fifty-Sixth-A Revised Sheet No. 57 reflects the new pricing provisions and is proposed to be effective January 22, 1986 subject to obtaining all regulatory approvals without conditions. The delay in filing this Purchased Gas Adjustment is due to finalizing the precise amendments to the terms and conditions of the Gas Purchase Contracts and Three Party Agreement.

Substitute Fifty-Seventh Revised Sheet No. 57 filed herewith is required to provide for a reduction in the rates to Mich Con as filed on Fifty-Seventh Revised Sheet No. 57 filed by Great Lakes on March 5, 1986 in Docket No. TA86-5-51-000 and 001 to be effective February 21, 1986 and approved by the Commission on April 2, 1986.

Fifty-Seventh-A Revised Sheet No. 57 filed herewith reflects the reduction in the gas cost component of Mich Con's purchases in excess of contract quantity under Rate Schedule AOS-1.

Substitute Fifty-Seventh Revised Sheet No. 57 filed herewith is required to provide for a reduction in the rates to Mich Con as filed on Fifty-Seventh Revised Sheet No. 57 on March 31, 1986 in Docket No. TA86-6-51-000.

Any person desiring to be heard or to protest said filing should file a Motion to Intervene or Protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC., 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before April 28, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. TA86-1-27-003]

North Penn Gas Co., Proposed Changes in FERC Gas Tariff

April 21, 1986.

Take notice that North Penn Gas Company (North Penn) on April 17, 1986, tendered for filing third Substitute Eightieth Revised Sheet No. PGA-1 to its FERC Gas Tariff, First Revised Volume No. 1. The filing is proposed to be effective March 1, 1986.

The purpose of this filing is to track a change in rates filed by Consolidated Gas Transmission Corporation (Consolidated) on March 31, 1986 for effectiveness March 1, 1986.

In all other respects this filing contains the same changes as filed in North Penn's PGA Compliance filing of April 2, 1986, in the above docket.

North Penn respectfully requests waiver of any of the Commission's Rules and Regulations as may be required to permit this filing to become effective March 1, 1986, as proposed.

Copies of this letter of transmittal and all enclosures are being mailed to each of North Penn's jurisdictional customers and interested state Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). All such motions or protests should be filed on or before April 28, 1986. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket Nos. ER86-414-000 et al.]

Electric Rate and Corporate Regulation Filings; Pennsylvania Power Co. et al.

April 21, 1986.

Take notice that the following filings have been made with the Commission:

1. Pennsylvania Power Company

[Docket No. ER86-414-000]

Take notice that on April 17, 1986 Pennsylvania Power Company ("Penn Power") pursuant to 18 CFR § 35.13 and § 35.14 tendered for filing proposed changes in its FPC Electric Service Tariffs Nos. 30, 31, 32, 33 and 34 to the Pennsylvania boroughs of New Wilmington, Wampum, Zelienople, Ellwood City and Grove City, respectively. The proposed changes would increase revenues from jurisdiction sales and service by $208,631.65 or approximately 3.75% based on the 12-month period ending February 28, 1987. This increase is composed of an increase in the state tax surcharge from 4.37% to 4.49% effective April 1, 1986 and an increase in the energy cost rate ("ECR") from .4967¢/Kwh to .5716¢/Kwh effective April 1, 1986. The effect of the change in the state tax surcharge results in an increase in test year revenues of $5,491.32 and the ECR change results in an increase of $203,140.33 in test year revenues. A language change in the ECR Tariff is also sought.

The five municipal resale customers served by Penn Power entered into settlement agreements effective as of September 1, 1984. These agreements provide that these customers will be charged applicable retail rates as may be in effect during the terms of the agreements. Changes in rates were agreed to become effective as to these resale customers simultaneously with changes approved by the Pennsylvania Public Utility Commission. These settlement agreements were approved by the Federal Energy Regulatory Commission through a Secretarial letter dated December 14, 1984 in Docket Nos. ER 77-277-007 and ER81-779-000. Waivers of certain filing requirements have been requested to implement the rate changes in accordance with the settlement agreements.

Copies of the filing were served up Penn Power's jurisdictional customers and the Pennsylvania Public Utility Commission.

Comment date: May 6, 1986, in accordance with Standard Paragraph E at the end of this notice.

UMI

VOL 51 ISS 80 AP 25 1986

2. The Connecticut Light and Power Company et. al.

[Docket No. ER86-415-000]

Take notice that on 4/17/86, The Connecticut Light and Power Company (CL&P) tendered for filing a proposed rate schedule pertaining to a Northfield Mountain Purchase Agreement between The Connecticut Light and Power Company, Western Massachusetts Electric Company (WMECO) and together with CL&P, the Licensees) and Holyoke Gas & Electric Department (the Department) dated as of May 1, 1986.

CL&P states that the Purchase Agreement provides for a sale to the Department of a specified percentage of capacity and related pondage from the Licensees' Northfield Mountain Pumped Storage Hydro Electric Project (Project) together with related transmission service during the period May 1, 1986 to October 31, 1990.

CL&P requests that the Commission waive its standard period and permit the rate schedule to become effective on May 1, 1986.

CL&P states that this Agreement supercedes a prior Northfield Mountain Purchase Agreement, CL&P Rate Schedule FERC No. 306, WMECO Rate Schedule FERC No. 244. The prior Northfield Mountain Purchase Agreement terminates by its own terms on April 30, 1986.

CL&P states that the capacity charge rate for the Project is a rate determined on a cost-of-service basis for the entire Project. The monthly transmission charge is equal to one-twelfth of the average annual cost of transmission service on the transmission system of the Licensees and their affiliated Northeast Utilities companies and is determined in accordance with Schedule B to the Purchase Agreement, multiplied by the number of kilowatts of winter capability which the Department is entitled to receive pursuant to the Purchase Agreement during each month. The station service charge is equal to the average cost of oil-fired generation on the system of the Licensees for the prior month, multiplied by the Department's share of the Project's station service energy requirements.

CL&P states that the services to be provided under the Purchase Agreement are the same as services provided by the Licensees relating to a sale of capacity from the Project to North Attleborough Electric Department pursuant to a rate schedule dated as of November 30, 1983. (Rate Schedule FERC Nos. CL&P 308 and WMECO 246).

CL&P further states that the filing is in accordance with Part 35 of the Commission's Regulations.

WMECO has filed a Certificate of Concurrence in this docket.

Comment date: May 6, 1986, in accordance with Standard Paragraph E at the end of this notice.

3. EUA Power Corporation

[Docket No. EL86-33-000]

Take notice that on April 17, 1986 EUA Power Corporation ("EUA Power") filed a petition for a declaratory order seeking approval of a settlement agreement extending the terms of the settlement agreement of December 27, 1985 in Docket No. EL85-46-000 to EUA Power's purchase of an ownership share in the Seabrook nuclear generating project from Fitchburg Gas and Electric Light Company ("Fitchburg").

EUA Power is a corporation established to acquire ownership shares in the Seabrook project from utilities desiring to disengage from the project. On August 29, 1985, in Docket No. EL85-46-000, EUA Power sought a declaratory order making certain determinations in ratemaking and accounting in connection with the sale of power from an 11.27% ownership share in the project the EUA Power purposed to acquire from Bangor Hydro-Electric Company, Central Maine Power Company, Central Vermont Public Service Corporation and Maine Public Service Company. The issues in that proceeding were resolved by an uncontested settlement agreement of December 27, 1985. After its filing in Docket No. EL85-46-000, EUA Power agreed to purchase a 0.86519% share of the Seabrook project from Fitchburg. The signatories to the settlement agreement in Docket No. EL85-46-000 have executed a further settlement agreement in the present docket agreeing to extend the terms of the earlier settlement agreement to Fitchburg's share. EUA Power seeks approval of the further settlement agreement.

Comment date: May 7, 1986, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

[Docket No. RP85-39-004]

Wyoming Interstate Company, Ltd.; Compliance Filing

April 21, 1986.

Take notice that on April 16, 1986, Wyoming Interstate Company, Ltd. (WIC) tendered for filing Fourth Revised Sheet No. 5 to its FERC Gas Tariff, Original Volume No. 1. WIC states the sheet is filed pursuant to the Commission's order of March 17, 1986 in Docket No. RP85-39-003. The tariff sheet revises WIC's Rate Schedule I—Overrun Rate to reflect the computation of the rate based on a 100 percent load factor, rather than the actual monthly systemwide load factor. The overrun rate is applicable to overrun volumes and to Tennessee Gas Pipeline Company's interruptible transportation.

WIC indicates that copies of this filing were mailed to its customers and other entities.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, DC 20426, in accordance with Rules 214 and 211 of the Commission's Rules of Practice and Procedure. All such motions or protests should be filed on or before April 28, 1986. (18 CFR 385.214, 385.211). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Kenneth F. Plumb,

Secretary.

BILLING CODE 6717-01-M

Office of Conservation and Renewable Energy

[Case No. RF-002]

Decision and Order Granting Waiver from Refrigerator and Refrigerator-Freezer Test Procedure to White Consolidated Industries, Inc.

AGENCY: Office of Conservation and Renewable Energy, DOE.

ACTION: Notice of decision and order.

SUMMARY: Notice is given of the Decision and Order [Case No. RF-002] granting White Consolidated Industries, Inc., a waiver for its refrigerator-freezer model, Frigidaire Model FPCI18TDWO, equipped with an electronic defrost control from the existing U.S. Department of Energy refrigerator and refrigerator-freezer test procedure.

FOR FURTHER INFORMATION CONTACT:

Michael J. McCabe, U.S. Department of Energy, Office of Conservation and Renewable Energy, Mail Station CE-132, Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585, (202) 252-9127

Eugene Margolis, Esq., U.S. Department of Energy, Office of General Counsel, Mail Statin GC-12, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 252-9513

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 430.27(g), notice is hereby given of the issuance of the Decision and Order set out below. In the Decision and Order, White Consolidated Industries, Inc., has been granted a waiver for its refrigerator-freezer model equipped with an electronic defrost control, permitting the company to use an alternate test method.

Issued in Washington, DC, April 8, 1986.

Donna R. Fitzpatrick,

Assistant Secretary, Conservation and Renewable Energy.

Dicision and Order

In the Matter of: White Consolidated Industries, Inc., Case No. RF-002

The Energy Conservation Program for Consumer Products was established pursuant to the Energy Policy and Conservation Act, Pub. L. 94-163, 89 Stat. 917, as amended by the National Energy Conservation Policy Act, Pub. L. 95-619, 92 Stat. 3266, which requires the Department of Energy (DOE) to prescribe standardized test procedures to measure the energy consumption of certain consumer products, including refrigerators and refrigerator-freezers. The intent of the test procedures is to provide a comparable measure of energy consumption that will assist consumers in making purchase decisions. These test procedures appear at 10 CFR Part 430, Subpart B.

The Department of Energy amended the prescribed test procedure regulations, by adding § 430.27, to allow the Assistant Secretary for Conservation and Renewable Energy to waive temporarily test procedures for a particular basic model when a petitioner shows that the basic model contains one or more design characteristics which prevent testing of the basic model according to the prescribed test procedure or when the prescribed test procedure may evaluate the basic model in a manner so unrepresentative of its true energy consumption characteristics as to provide materially inaccurate comparative data. 45 FR 64108 (Sept. 26, 1980).
